CS ERIC/RCS produces minibibliographies of recent ERIC documents on more than seventy topics selected for their usefulness to the classroom teacher. Printed on bookmark-sized card stock and ideal for workshop handouts, minibibs are available in multiple copies from ERIC/RCS in Urbana at no charge. The latest set of minibibs covers ERIC resources on the following topics:

- Class Size Research
- Computers and Composition
- Prewriting
- Remedial Reading/Secondary
- Women's Studies in English
- Word Processing and Writing
- Writing Assessment
- Writing Processes
- Writing Projects

The following are new monographs from ERIC/RCS:

- Composing and Comprehending. Julie M. Jensen, editor. 1984. Available from: National Council of Teachers of English (NCTE), 1111 Kenyon Road, Urbana, IL 61801. NCTE Stock No. 080z4, \$13.00 nonmember, \$10.00 member.

Reflects several years of scholarship on the topic of teaching understanding as a part of the writing process.

- Large Scale Assessment of Oral Communication Skills: Kindergarten through Grade 12. 1984. Donald Rubin and Nancy Mead. Available from: Speech Communication Association, 5105 Backlick Road, Suite E, Annandale, VA 22003. \$11.95, 10% member discount.

Provides a descriptive and evaluative review of 45 assessment instruments that includes target age range, cost, and time required to administer tests, as well as a report of test validity, reliability, practicality, and overall adequacy.

- Study Skills Handbook: A Guide for All Teachers. Kenneth G. Graham and H. Alan Robinson. 1984. Available from: International Reading Association, 800 Barksdale Road, Box 8139, Newark, DE 19714. No. 858, \$8.00 nonmembers, \$5.50 members.

Discusses an extensive range of study strategies from those as simple as using an index or table of contents to locate information in a single text, to one as complex as taking a test.

CH

ERIC CLEARINGHOUSE PUBLICATIONS

CS

- Writing About Literature. Elizabeth Kahn and others. 1984. Available from: NCTE. Stock No. 58773, \$6.00 nonmembers, \$5.00 members.

Teaches students to support an interpretation, explicate an implied relationship, analyze an author's generalizations and other skills needed to write about literature.

The following ERIC/RCS Digests are currently being distributed:

- Bibliotherapy
- Class Size and Writing Instruction
- How to Find Good Computer Software in English and Language Arts
- Language Across the Curriculum
- Large Scale Writing Assessment
- Metacomprehension
- Qualities of Effective Writing Programs
- Resources for Involving Parents in Literacy Development
- Responses of English Language Arts Professionals to A Nation at Risk
- Schemata
- Semiotics
- Software Evaluation for the Teacher of the English Language Arts
- Spelling
- Thinking Skills in English—And across the Curriculum
- Vocabulary

SP

The following is a new publication from ERIC/SP:

The second volume in SP's Teacher Education Monograph series is available: A Model for Evaluating Teacher Education Programs, by Elizabeth Nelli and Norma Nutter. 68 pages, \$6.50. All ERIC Clearinghouses and the ERIC Facility were sent copies in early November. If you have not yet received your copy, please let Celia Finstad know.

ACTION NEWS

Major Publication Planning Sheet — New Data Element Aided ("Proposed Number of Copies")

A new data element, "Proposed No. of Copies", should be added to the Major Publication Planning Sheet (1985 form), following the line for "Estimated Printing Cost (Non-Federal Funds)". A total for these two figures is later requested on the Summary Publication Plan (1985 form).

In answer to several inquiries, administrative costs should be included in the "Estimated Developmental Cost" and the second footnote should be modified to note the addition. Attachment 1 is a revised Major Publication Planning Sheet reflecting these changes.

...Mildred Thorne (Central ERIC)

Bibliography of Documents and Articles on the Subject of ERIC

The Facility is updating its bibliography of publications about ERIC. The last edition of this bibliography covered the period from 1966-1980. We now want to cover the last four years 1981-1984. We would appreciate receiving from the clearinghouses any citations for documents/articles in which ERIC is a significant subject/topic. We would appreciate it even more if you would send us copies of the documents/articles themselves. Central ERIC occasionally asks for such items and we try to keep a modest collection at the ERIC Facility in order to respond to their requests. Please send all contributions to my attention.

You may also be interested to know that we started by searching the ERIC database itself for materials. The search strategy we used is shown below:

- 1 S ERIC/ID
- 2 S ERIC/IF
- 3 C 1-2/or
- 4 Limit 3/190737-999999/ED
- 5 Limit 3/229236-999999/EJ
- 6 C 4-5/or

- 7 S ERIC/TI,AB
- 8 S ERIC(W) Processing (1W) Reference (W) Facility
- 9 S ERIC (W) Document (W) Reproduction (W) Service
- 10 S EDRS
- 11 S Educational (W) Resources (W) Information (W) Center
- 12 C 7-11/or
- 13 Limit 12/190737-999999/ED
- 14 Limit 12/229236-999999/EJ
- 15 C 13-14/or

- 16 C 6 or 15
- 17 Print 16/5/1-?

3058

Title Index

Clearinghouses are advised to retain their 1977-1983 Title Index cumulations (all copies), indefinitely. The 1966-1976 Title Index cumulation was 1,351 pages in two volumes. The 1977-1983 Title Index cumulation was 1,551 pages (200 pages longer), and required three volumes. Theoretically, a 1977-1984 cumulation would be around 1,800 pages and might require four volumes. Printing restrictions and costs argue inexorably for bowing to the inevitable, that is, cutting off the cumulation process, and beginning again with 1984 (and forward).

This means that the 1977-1983 cumulation will become a semi-precious item (like the now-out-of-print 1966-1976 product) and should be bound and cared for accordingly.

This creates the potential of three places to look when checking for duplicates by title, (when date is not known), but that can't be totally avoided when dealing with printed media. We regret the lack of advance notice in this case, but it wasn't until the 1984 data were all in that we could estimate accurately the size of a new cumulation.

The 1984 cumulation should be available by early January.

...Pat Brown (ERIC Facility)

NETWORK NEWS

New Facility Publications: IAL, Source Directory (Truncated), and ERIC Acquisitions Arrangements List

The IAL (Alphabetical and Category Display) along with the ERIC Acquisitions Arrangements list and truncated Source Directory were printed at the end of November. Copies were shipped to all Clearinghouses in early December. If your copies have not arrived by the first week of January, please contact the Facility.

New (and Reduced!) GPO Subscription Rates for RIE

After much work by Mildred Thorne, GPO has finally re-considered its subscription rates for Resources in Education (RIE).

The new prices, effective February 1, 1985, are:

Monthly Issues

Subscription (12 issues)	\$56.00	domestic
	70.00	foreign
Single Issue	8.50	domestic
	10.63	foreign

Semiannual Index

Subscription (2 volumes)	20.00	domestic
	25.00	foreign
Single Volume (Jan-June <u>or</u> July-Dec)	15.00	domestic
	18.75	foreign

...Carolyn Weller (ERIC Facility)

SO Attends NCSS Annual Meeting

Members of the SSEC Executive Board and the ERIC/ChESS Regional Associate Network (RAN) assisted at the ERIC/ChESS-SSEC exhibit at this year's National Council for the Social Studies Annual Meeting held in Washington, D.C., November 15-19. Free searches of the ERIC database, both through DIALOG and DIALOG's Knowledge Index, were offered for several hours each day. ERIC/ChESS coordinator of user services, Lynn Parisi, gave a conference workshop on using databases in the social studies. A special meeting was held for RAN members (about 15 in number) on the subjects of: (1) How to improve RAN services; (2) How to conduct an ERIC Workshop; and (3) How to increase visibility of RAN members. The overall conference was attended by approximately 5,000 social studies/ social science educators.

...Lynn Parisi (SO)

PERSONNEL

Frank Bryars Retires — Duties Assumed by Kathy FitzGerald

After 26 years of Federal service, Frank Bryars retired on December 3 from NIE as "ERIC Information Specialist". For as long as anyone remembers, Frank has served as the ERIC coordinator at NIE for the acquisition of Department of Education and National Institute of Education publications. The Clearinghouses will also long remember Frank's role as a reviewer of Clearinghouse input to RIE. In one way or another over the years Frank's work has benefited almost everybody in the ERIC network, not to mention the many users of ERIC. With warm regards (and a touch of envy), we wish Frank and his wife Velma the best of luck in their retirement. They can be reached at the following address:

Frank and Velma Bryars
1102 Lobbs Road
Route 6, Box 76
Alexander City, AL 35010

Frank's duties have been assumed by Kathy FitzGerald of the NIE Educational Reference Center. Kathy has understudied with Frank at various times over the past two years. Prior to joining NIE, Kathy was a Project Officer at the Teacher Corps. She holds an Ed.M. degree from the Harvard Graduate School of Education. In addition to handling Frank's tasks, Kathy assumes the monitorship of RIE and other Central ERIC publications formerly performed by Mildred Thorne (who retires in early January).

...Central ERIC

Mildred Thorne to Retire in Early January

Mildred Thorne will retire in early January 1985, after 26 years of Federal service. She was one of ERIC's most dedicated workers and together with Frank Bryars a substantial source of the "institutional memory" so important to information systems. Known for her editorial skills, patience, and gracious charm, it was Mildred who watched over RIE and who determinedly managed to get the best possible approval arrangement for ERIC products from the Department of Education's PAVAC publication review group.

We will miss Mildred as both a friend and a colleague and wish her the very best in her retirement.

...Central ERIC

Facility Acquisitions Librarian — Joanna Eustace

The new Acquisitions Librarian at the ERIC Facility is Joanna Eustace, formerly the librarian for the Austin (Texas) Independent School District. Joanna comes to us with skills in both OCLC and DIALOG, a background in education, and a home microcomputer (an Apple). She is looking forward to working with the ERIC Clearinghouses. Please feel free to call and introduce yourselves to Joanna. If she doesn't meet you before, she will see you at the next ERIC Technical Meeting.

...Ted Brandhorst (ERIC Facility)

3059

HE Presents Frank Bryars' with Certificate, on Occasion of His Retirement

Marilyn Shorr and Lynn Barnett represented the Clearinghouse on Higher Education at the NIE-sponsored retirement party for Frank Bryars. In keeping with the spirit of the day, HE presented Frank with a magnifying glass (for "monitoring documents of marginal legibility") and a special Press Release, which appears as attachment 2.

...Lynn Barnett (HE)

Staff Change at TM

Gloria J. Woods-Williams has been hired as TM's new secretary, replacing Virginia Mistic. Mrs. Woods-Williams comes to TM with several years secretarial experience and training, including college coursework in the areas of computers and word processing. Please help us welcome Gloria to the ERIC network.

...Emma Gonzalez-Stupp (TM)

CLEARINGHOUSE ON HIGHER EDUCATION
THE GEORGE WASHINGTON UNIVERSITY

HIGHLIGHTS

FOR IMMEDIATE RELEASE

November 27, 1984

FRANK RETIRES AMID UPROAR

The National Institute of Education announcement of Frank Bryars' November retirement caught the ERIC Clearinghouse on Higher Education in a state of shock. "It seems like only yesterday that Frank pulled our first document," said one tearful staffer. "How can we ever make another 'marginal legibility' judgment without him?" cried another. A third gasped, "Or determine what is of 'parochial interest?' between sobs. Pulling themselves together, the Clearinghouse issued a formal statement congratulating Frank on his decades of service --unparalleled, by many accounts--and wished him well as he leaves ERIC for his new position as state chairman of the Democratic Party in Alabama.

ACTION ITEMS

MultiLink - Identifying the Author of Electronic Mail Messages

Users are requested to "sign" the Electronic Mail messages with the actual author of the message when the message has been written by someone other than the person signing onto the system.

At the present time, the Electronic Mail system inserts the name of the individual who has "signed" onto the system in the "FROM:" position in displayed messages. As a result, the authors of certain messages have been incorrectly identified. Thank you for your cooperation.

...Jim Prevel (Central ERIC)

New IBM/PC Software with Possible Application to ERIC

New IBM/PC software, possibly applicable to ERIC, is being introduced on a daily basis.

Typical of the many new programs are:

FONTRIX - produces near typeset quality printed output from any word processing program.

SAMNA III - A word processor with all the bells and whistles including automatic index and table of contents generators, an 85,000 word spelling dictionary, etc.

POWERBASE - a truly easy-to-use relational database system permitting up to 5 simultaneous files.

If there is any interest, these programs can be demonstrated at the May ERIC Technical Meeting. Please let me know.

...Jim Prevel (Central ERIC)

Postal Rates Increase February 17, 1985

Effective February 17, 1985, the U.S. Postal Service (USPS) increased its postal rates virtually across the board. The cost for a single one ounce first class letter went from 20¢ to 22¢ (a 10% increase). A postcard went from 13¢ to 14¢ (a 8% increase). Attachment 1 is a "Summary of Postal Rate Increases" provided by the USPS in January 1985 and covering all classes of mail.

...Al Hill (ERIC Facility)

PROCESSING ADVISORIES

Clearinghouse Processing of Department of Education Publications (Including NIE, NCES, Etc.)

Clearinghouses are reminded that publications issued by the Department of Education (and its divisions, such as NIE and NCES) should be processed for RIE as soon as possible after they are received. While it is not mandatory they be accepted, they should be evaluated as soon as they are received and if they are selected for RIE input, they should be processed as quickly as possible. The more important ones should be assigned PRIORITY status.

Press releases are sometimes issued concerning these documents and a public demand for them is often created. Because the supply is usually limited from the Department of Education, it is important that these documents be made available from ERIC as soon as possible. Since Reproduction Releases are not required for this type of item, there is no reason for any delay once they have been accepted for input. If they are not accepted, the Clearinghouse should notify the Facility immediately.

Timely processing of ED/NIE publications has continued to be a recurring problem, indicating that some Clearinghouses may need to establish internal procedures to identify and flag such publications so that their processing will be expedited.

...Kevin Arundel (Central ERIC)

PRIORITY Documents

PRIORITY documents are those that are to be processed for the very next possible issue of RIE. PRIORITY status is usually assigned by Central ERIC to documents that are expected to have a high demand.

Normally, before a PRIORITY document is sent to a Clearinghouse, the Facility's Acquisition Librarian consults with the RIE Editorial Staff to determine for what RIE issue the document should be targeted. Clearinghouses are then alerted by phone to expect a PRIORITY document assignment. At the time the document is sent, a PRIORITY Document Form (Attachment 2) is attached to the document; a copy of this form is also given to the RIE Editorial Staff.

When the document is returned to the Facility (processed on a separate logsheet), the Form should still be attached. Clearinghouses will be called if an assigned PRIORITY document has not been received by the deadline established for it.

(NOTE: The resume must be transmitted and the document received in order for processing to be completed. In some extreme cases where 24-hour turnaround is needed, a second copy of the Document may be paginated at the Facility while the Clearinghouse abstracts and indexes the document, in order to save time.)

...Kathy FitzGerald (Central ERIC)

Acquisitions Data Report Processing

Because of omissions or errors on the Acquisitions Data Report (ADR), input to the March 1985 RIE has suffered a number of duplicates that were not detected by the submitting Clearinghouses. Clearinghouses are reminded that just as they proof the input for RIE and CIJE before transmitting the data online, the online data for the ADR should also be proofed for typographical errors. In addition, all documents assigned to RIE should be reported on the ADR.

The ADR is the only way ERIC currently has of determining what documents are in process at the 16 Clearinghouses. The ADR can only be effective in detecting duplicates if all Clearinghouses follow the guidelines in the ERIC Processing Manual (EPM) and make use of the full 60 characters for the title entry, when the length of the title requires it. (EPM IV-32). Ellipses or abbreviations should not be used in entering a title unless they are actually an explicit part of the title. The title should be entered as is until the 60 characters are used and then the ADR entry should stop, no matter how much longer the real title may continue. Arbitrarily abbreviating or artificially truncating a title before the end of the 60 characters may prevent a duplicate from being detected.

...Ted Brandhorst (ERIC Facility)

NETWORK NEWS

UMI Article Clearinghouse

In June 1984, University Microfilms International (UMI) announced a new internal organization called the "UMI Article Clearinghouse". The services of the new ACH unit are geared heavily toward electronic ordering and deposit accounts or credit card debits. Electronic ordering is possible via: DIALOG, OCLC, OnTyme, ITT Dialcom, and ALANET. Deposit account customers can, by the size of their deposit, achieve lower unit prices per article down to a minimum of \$4.00 per article. Credit card customers are billed at a rate of \$8.00 per article. Price reductions do not apply to orders transmitted via the postal service or verbally over the telephone; in all such cases the old full price applies, whatever it may be.

The front matter to the ACH June 1984 Catalog, explaining in detail the various ordering, pricing, and shipping options, is appended as Attachment 3.

...Ted Brandhorst (ERIC Facility)

Acronyms, Initialisms, and Abbreviations in Native and Second Language Acquisition (by Charles Thurston)

Mr. Thurston has compiled a large list of acronyms (1036), but of special interest is the way he assembled them: He manually searched the FL and UD sections of RIE and CIJE from their beginnings through the September 1984 issues! (A part of this document is reproduced as Attachment 4.)

The document has been sent to FL for processing and will no doubt appear in a forthcoming issue of RIE.

...Joanna Eustace (ERIC Facility)

OVAE Provides Second Level Dissemination of Their Documents in ERIC

For several years, ERIC/ACVE has routinely collected documents resulting from projects funded under Section 310 of the Adult Education Act. Recently, we provided the Director of the Division of Adult Education, the Office of Vocational and Adult Education (OVAE), USDE, with a copy of an ERIC search containing more than 225 abstracts for Section 310 projects that have been selected by ERIC since 1980.

In order to encourage individuals in adult education to use these project results in their work as well as to contribute materials to ERIC, OVAE personnel duplicated and distributed the search in a special mailing to Directors of Adult Education in all fifty states and the territories. Staff members in the Division of Adult Education are also using the search in their particular areas of expertise. For example, the English-as-a-Second-Language (ESL) specialist has pulled the abstracts related to ESL and packaged them to send to all ESL specialists in the states and territories. We think this is an excellent example of second level dissemination.

...Susan Imel (CE)

HE IAP Authors Command National Recognition

The ERIC Clearinghouse on Higher Education was pleased to see the publicity garnered for the recent report, "Involvement in Learning: Realizing the Potential of American Education," prepared by the Study Group on the Conditions of Excellence in American Higher Education. The seven-member Study Group was appointed by NIE Director Manuel Justiz. Of the seven members, five have previously authored at least one IAP each for ERIC/HE, and two members have two or more IAP's in progress.

...Lynn Barnett (HE)

HE Hosts DIP Director

On October 25, ERIC/HE was pleased to host a half-day informal meeting with Laurabeth Hicks, NIE Associate Director for Dissemination and Improvement of Practice. Jon Fife and Lynn Barnett found her to be very open to "grass roots" viewpoints and very supportive of the ERIC system as a whole.

...Lynn Barnett (HE)

Kudos for HE Reports and for ERIC

HE was pleased to see in the Bulletin of the British Society for Research into Higher Education that Clearinghouse publications are well received outside the U.S. Dr. Christopher Knapper, a teaching resource person at the University of Waterloo in Canada, writes that he uses HE's iAPs in his own research because they are "done so well." (See Attachment 5).

...Lynn Barnett (HE)

ERIC/CRESS Appoints Local Advisory Board

The ERIC Clearinghouse on Rural Education and Small Schools has formed a local advisory board to supplement its national advisory board. Each of the Clearinghouse's six major scope areas is represented on each board, providing dual coverage and expertise for each scope. In addition, the new advisory board members provide the Clearinghouse with virtually immediate accessibility to experts within each scope area and ensure representation for each scope area at the advisory board meetings.

The first meeting of the new local advisory board members was held on November 12, 1984.

...Amelita Hill (RC)

ERIC/CRESS Contacted for Movie Material

CRESS has been contacted by Rex Gogarty, a writer for the John Deere Company, to provide information for a forthcoming film. The subject is one-room schools today and will feature schools that are using technology in innovative ways. The film will run for 5-6 minutes and will be shown at John Deere dealerships before being released to the general public. The project is scheduled for completion next spring.

...Betty Rose Rios (RC)

PERSONNEL

Staff Changes at ERIC/CS

Ann Auten, Coordinator of User Services, resigned her position last October to move to Minneapolis, MN.

Craig Hollingsworth joined the Clearinghouse last June as a Research Assistant. In October 1984, Craig was promoted to User Services Specialist.

Also in October 1984, Bruce Wood was hired as a full-time Research Assistant.

...(CS)

New Administrative Assistant at CRESS

On September 6, 1984, Yolanda Arteaga joined the staff of the ERIC Clearinghouse on Rural Education and Small Schools. Yolanda replaces Terri Johnson in the position of Administrative Assistant. A seven-and-one-half year veteran of New Mexico State University, Yolanda may be reached at the Clearinghouse between 8 and 12, Monday through Friday.

...Amelita Hill (RC)

Staff Title Change for Sydney Meredith (SO)

Sydney J. Meredith, former Assistant Director of the SO Clearinghouse, has been promoted to Associate Director.

...Cindy Cook (SO)

UMI Article Clearinghouse

The Service

UMI Article Clearinghouse enables you to electronically order articles from 8,000 of the most frequently indexed and requested periodicals.

A licensing arrangement with each publisher guarantees copyright clearance. Article availability, with few exceptions, begins with 1978 issues.

(IEEE conference publications from 1978 forward are also listed and available. When ordering, keep in mind that the per-article price applies to each meeting, not to the entire conference.)

Electronic ordering — currently available through OCLC, DIALOG's Dialorder, OnTyme, and ITT Dialcom which offers a gateway to ALANET — is instantaneous. The minute you place your order, it's received by us in Ann Arbor, and on its way to being processed. Within 48 hours, we'll

ship your order via first-class mail. Same-day shipment via Federal Express or Express Mail is also available; in addition to express fees, a \$5 UMI fee will be assessed to cover increased handling costs.

(In the near future, you may also receive articles through ARTIFAX, UMI's digital telefacsimile article delivery service. For more information, check the box on the Deposit Account Registration form.)

Deposit account customers pay as little as \$4 per article for the service, and credit card customers just \$8. Mail orders are accepted for a slightly higher price per article. (Order forms are included at the back of this catalog.) These prices cover the cost of delivery and copyright fees, and apply to articles of any length. * VISA, MasterCard and American Express are the accepted methods of credit card billing.

* Additional copies of the same article ordered at the same time are just \$2.25 apiece

How to Use This Catalog

The purpose of this catalog is to enable you to access the Clearinghouse title collection, arranged here alphabetically. A list of titles by subject begins on page 147.

A typical entry in this catalog consists of:

1. Periodical title — This may be followed by an edition statement or other clarification of the title.
2. Place of publication.
3. ISSN, if available.

4. UMI order number.

5. Dates of reprint permission, as defined by UMI's licensing agreement with the publisher. A plus (+) indicates that permission is continuous from the year shown to the present, while an asterisk (*) indicates that holdings of issues for that year or years are at present incomplete, and that availability cannot be guaranteed. In the case of split-year publications, holdings or permissions may not be complete for the entire calendar year (see examples below). A dagger (†) indicates the publisher has restricted availability through UMI to selected issues or volumes. For further information, contact UMI Article Clearinghouse.

Sample Entries

- A. Mechanical engineering. (New York)
ISSN 0025-4621
Order number: 576
1978 +

UMI Article Clearinghouse has permission to sell articles from 1978 to the present. All issues are available.

- B. International security. (Cambridge)
ISSN 0162-2866
Order number: 12322
1978-1979 †
1979 +

1979 is listed twice due to the split-year nature of this publication. In this instance, holdings of issues for the 1978/1979 volume-year are incomplete, while issues from the 1979/1980 volume to the present are available.

3082

Pre-1978 Article and Issue Availability

In many cases, the titles listed in this catalog are also available prior to 1978. The price per article is as follows:

\$15.00 per article.

\$ 2.25 each additional copy of the same article ordered at the same time.

Outside the U.S. and Canada add \$2.25 for shipping and handling.

\$.20 per page for issue reprints (\$20.00 minimum), shipping and handling additional.

Pre-1978 article orders must be prepaid, charged against a deposit account or major credit card, and need not be ordered electronically. Personal orders for issue reprints must also be prepaid.

UMI DOES NOT GUARANTEE 48-HOUR TURNAROUND ON PRE-1978 ITEMS. For further information on article availability, please check our Serials in Microform Catalog.

Ordering Information

Electronic ordering is available through four UMI Article Clearinghouse vendors. Dialorder users may order by using the acronym UMIACH. On OCLC, our three-letter code is UMI. OnTyme subscribers may access a special UMI Article Clearinghouse order form by entering the command ":EXEC ** UMI.ORDER". ALANET subscribers will see UMI

Article Clearinghouse as one of their menu options. Customers of ITT Dialcom should contact the Chicago Dialcom office at 312/694-2536 to have UMI Article Clearinghouse added to their service.

If you are not affiliated with OCLC, DIALOG, ITT Dialcom or OnTyme, but would like to be, contact us for details. We'll put you in touch with the vendor(s) of your choice.

Online Access

UMI Article Clearinghouse titles may also be searched on line through ITT Dialcom and are union-listed in the OCLC Serials Control Subsystem (our union list search key is ULUMI). These listings will be continually updated to reflect the acquisition of new titles.

Billing Information

There are two methods of billing — by deposit account or by credit card.

To set up a deposit account, simply call us toll-free at 800-732-0616. We'll issue you an account number, and you'll be able to order articles immediately.

If you prefer, you can register by mail. Just fill in the amount of deposit you desire (see next page for pricing), and your name and address on the Deposit Account Registration form at right, then mail it with a check or purchase order to:

UMI Article Clearinghouse
University Microfilms International
300 N. Zeeb Road
Ann Arbor, Michigan 48106

If you issue a purchase order, we will send you an invoice for prepayment of your deposit. Upon receipt of your prepayment, your deposit account will be activated. As a matter of service, we'll mail you monthly statements showing your current balance. And we'll automatically re-invoice you before your account balance runs out.

If you choose to pay by credit card, you can begin to order articles without delay. Call us toll-free at 800-732-0616 for details.

DEPOSIT ACCOUNT TERMS AND CONDITIONS

1. Deposits will be paid in advance.
2. Orders will be placed electronically (Price allowances do not apply to orders received via postal delivery or verbally over the telephone.)
3. Deposits apply only to UMI Article Clearinghouse purchases.

3083

Pricing

The following pricing options are available to customers of UMI Article Clearinghouse. In the case of deposit accounts, the deposit amount determines the price allowance per article.

SHIPPING AND HANDLING

Shipping and handling charges are included in U.S. and Canadian prices. Outside the U.S., the following charges for shipping are added to the price of the article:

Surface mail	2-3 weeks delivery	\$.65
Air mail	7-10 days delivery	1.95
Courier	2-3 days delivery	9.00

BILLING PROCEDURE*

Institutional Deposit Accounts (Single Shipping Address)

Electronic Orders	COST PER ARTICLE

ACRONYMS, INITIALISMS AND ABBREVIATIONS IN NATIVE AND SECOND LANGUAGE ACQUISITION

Charles Thurston

University of Texas at San Antonio Library

It is ironic that the disciplines of foreign language instruction, English as a Second Language and bicultural-bilingual education, which seek to improve communication skills and foster understanding of other peoples and cultures, should employ a bewildering array of acronyms and display an utter disregard for uniformity of stylistic prescription and definition, thus contributing to a babel of obscure and sometimes meaningless expressions. One wonders about the intellectual content, clarity and coherence of disciplines which employ ESD (English as a Second Dialect) and ESOD (English for speakers of other dialects) interchangeably; that are as likely to refer to BEV (black English vernacular) as VBE (Vernacular Black English), and use seventeen definitions for FLES. Lum noted a decade ago that "The almost complete lack of consensus as to the meanings, perspectives, and proper uses of bilingual-bicultural terms does nothing but add confusion to an area of education that holds promise."¹

The following list of 1,036 terms and definitions in native and second language acquisition, linguistics, language testing and bicultural/multicultural education perpetuates the glut of acronyms and expressions which in many instances express the same thing (see ESL and SCAV). However, it is the compiler's hope that by listing each acronym and its meaning, including every jot and tittle differentiating one entry from its almost identical neighbor,

3086

exactly as they are found in the literature with respect to capitalization, punctuation, and definition, with no judgements rendered as to correctness or appropriateness, the list will indicate the problem of lack of standardization and serve as a corpus for debate.

The terms derive from a manual search of the FL (Languages and Linguistics) and UD (Urban Education) sections of Current Index to Journals in Education and Resources in Education from their inceptions through the September 1984 issues. Language Teaching was scanned in its entirety. Several sections of Language and Language Behavior Abstracts ("Non-Native Language Pedagogy," "Non-Native Language Acquisition," and "Bilingualism, Bilingual Education") were checked. Bibliographies and texts in linguistics, English as a Second Language, and varieties of English were consulted. The compiler of any list of acronyms would be foolish to claim comprehensiveness; each issue of an index adds new terms.

Acronyms of journal titles, monographs (e.g. DARE, Dictionary of American Regional English), academic and professional associations and research centers are excluded.

Alphabetization disregards spacing and punctuation.

LETTERS TO THE EDITOR

I should like to endorse the suggestion by Charles Engel in his letter to the editor about state of the art reviews on educational thought and practice -- the sort of thing that is done so well in the short monographs prepared jointly by the American Association for Higher Education and ERIC (but, in the case of the AAHE-ERIC series, concentrating almost exclusively on American literature). I personally would find such surveys far more useful than abstracts. Although I realize that the SRHE abstracts are highly valued by many members, I myself hardly ever use them in my research and writing: for my own work I would generally go to a much broader literature base (such as ERIC) or go directly to primary sources I can find in my library.

WORKSHOPS/CONFERENCES/MEETINGS

CH	DATE	LOCATION	STAFF	COMMENTS
CE	Nov. 6-10, 1984	Louisville, KY	Susan Imel	<p>At the <u>National Adult Education Conference</u>, Susan Imel made the following presentations:</p> <p>"Databases: Tools for Learning in an Information Society"</p> <p>"Communications Technologies: Their Application in Adult Education"</p> <p>In a session entitled "Adult Literacy Education in the U.S.: Where is it now?" Susan co-presented with Arlene Fingeret, author of an ERIC information analysis paper on the subject, a comprehensive review and synthesis of the adult literacy literature.</p>
CE	Nov. 13-15, 1984	Columbus, OH	Susan Imel Kathy Thiel Judy Wagner	<p>At the <u>Dissemination and Utilization Conference</u> held at the <u>National Center for Research in Vocational Education</u>, Susan Imel and Kathy Thiel presented a session, "Trends in Adult Education." At the same conference, Judy Wagner gave a presentation entitled "A Search in Time...Saves!"</p>
HE	Sept. 21, 1984	University Park, PA	Jon Fife Marilyn Shorr Lynn Barnett	<p><u>On-Site Workshop for Graduate Students</u></p> <p>Jon Fife, Marilyn Shorr, and Lynn Barnett met on September 21 with the staff and students at Pennsylvania State University's Center for the Study of Higher Education in two separate workshops that were enthusiastically attended. Dr. Fife briefed doctoral students on the current status of the field of higher education. Lynn and Marilyn reviewed what ERIC has to offer graduate students and focused on search negotiation strategies. Penn State paid all expenses (including our football tickets!).</p>
HE	Oct. 14-17, 1984	Philadelphia, PA	Lynn Barnett Marilyn Shorr	<p><u>NACADA Conference</u></p> <p>At the request of the president of the National Academic Advisors Association (NACADA), Lynn Barnett and Marilyn Shorr presented a 2-hour workshop and staffed an exhibit at the organization's annual conference in Philadelphia. The workshop was an introduction for faculty and administrators to the wide range of computerized literature databases accessible to them. ERIC searches were conducted in the exhibit area and were enthusiastically received by many people who had never used ERIC before. All searching fees were waived for the occasion by NACADA.</p>

WORKSHOPS/CONFERENCES/MEETINGS

CH	DATE	LOCATION	STAFF	COMMENTS
HE	Dec. 6, 1984	Washington, DC	Laura Casal Lynn Barnett	<p><u>Workshop Spinoff — Peer Advising for ERIC Searches</u></p> <p>HE hosted a half-day workshop for a graduate student from Pennsylvania State University's Center for the Study of Higher Education. The purpose was to instruct the student in ERIC computer searching techniques for the purpose of serving as a knowledgeable liaison between other Penn State students in the higher education program and the University library (which conducts their searches). The feeling was that such a liaison person could act as a resource for the peer group and could help them focus their search requests more precisely. Laura Casal and Lynn Barnett gave the student more detailed tips than would be conveyed in a normal workshop session such as the one conducted at Penn State in September. We feel that this procedure is a new slant on peer advising as well as a new way to spread expertise about ERIC searching techniques.</p>
HE	Dec. 18, 1984	Washington, DC	Marilyn Shorr Lynn Barnett	<p><u>Women in Higher Education</u></p> <p>Marilyn Shorr and Lynn Barnett attended the monthly meeting of Women Administrators in Higher Education, a group housed largely within the National Center for Higher Education, where the HE Clearinghouse is located. The meeting consisted of a panel presentation by women representing U.S. Department of Education programs, including those in vocational education, elementary/secondary education, and within the NIE. A large amount of information was conveyed, and names and phone numbers of contact people for the various programs were distributed.</p>

ACTION ITEMS

RIE Subscription Price Reduction

Central ERIC has requested that we attempt to get some "mileage" out of the recent reduction in RIE's subscription price. It is suggested, therefore, that the Clearinghouses attempt to place the information in their regular journal outlets, where appropriate. A News Release, created by the Facility as a model for such dissemination, appears as Attachment 1.

...Ted Brandhorst (ERIC Facility)

Heavily Posted Identifiers (Descriptor Candidates)

The Dec84 Identifier Authority List revealed a substantial number of heavily posted Identifiers that need to be evaluated as candidate Descriptors. A list of these Identifiers, with postings updated through Feb85, has been prepared as Attachment 2. All terms in the list have 40 or more postings. Most should either be Descriptors or UFs, although a few might involve only postings transfers without actually being represented, per se, in the Thesaurus.

Terms from previous lists of heavily posted Identifiers (Mar83 and Oct81 EABs) that have yet to be evaluated for Thesaurus status are flagged with asterisks. Of these, some also carry an additional flag (+) indicating 10 or fewer postings since Mar83. Terms with this additional flag need a closer look to see why their usage has trickled off (e.g., are they obsolete?, are they former "hot" items since cooled down?). Answers are needed from Clearinghouses responsible for the earlier heavy postings. Maybe their "Candidate Descriptor" status is not warranted; if so, they can be dropped from future lists.

Each Clearinghouse needs to take responsibility for its own terms. The Facility lexicographic staff has grouped the terms by Clearinghouse based on postings and/or scope area, so give us a call if you're wondering where to start.

Also, once you've decided to tackle a subgroup of terms, duplication of effort can be avoided by distributing your list to the rest of the Vocabulary Review Group.

...Jim Houston (ERIC Facility)

TECHNOLOGY CORNER

Presenters Named For National Teleconference

Presenters have been named for the national video teleconference on Educational Microcomputer Software: Identification, Evaluation, and Integration, to be broadcast via satellite from Oklahoma State University (OSU) on April 13.

The teleconference, to be coordinated by the OSU College of Education, will examine resources which are available to assist educators in identifying software for their subjects and grade levels and in finding objective evaluations of the quality of that software.

In addition, the teleconference will focus on ways in which educational microcomputer software can be integrated into the curriculum.

The teleconference will be broadcast from 12:30 to 4:30 p.m., Eastern time, and will combine presentations by a panel of experts drawn from across the United States, demonstrations, videotapes of model classroom situations which illustrate the effective use and integration of microcomputer software, and two extended question-and-answer periods, during which questions from receive sites throughout the United States can be phoned in to the studio and asked live on the air.

Panel members include:

—Kenneth Komiski, executive director of the Educational Products Informational Exchange (EPIE) and executive producer and host of the PBS weekly television series, Educational Computing.

—Ann Lathrop, editor of the Digest of Software Reviews: Education.

—Don Holznapel, director of the Computer Technology Program of the Northwest Regional Educational Laboratory and coordinator of the MicroSIFT Project.

—Vicki Smith, president-elect of the International Council for Computers in Education (ICCE) and regional coordinator for Computer-Based In-

struction, Texas Education Agency.

—Suzanne Damarin, associate professor in education, theory, and practice, Ohio State University.

—Manuel J. Justiz, director of the National Institute of Education (NIE), U.S. Department of Education, who will summarize the most recent grants and contracts awarded by NIE for research and development in the area of educational software and forecast the kinds of resources and information to be produced by these grants in the years ahead.

Because the teleconference is focused on evaluation resources and integration techniques, it is appropriate for teachers and administrators at all levels—elementary, secondary, and postsecondary.

A list of institutions scheduled to receive the teleconference and additional details on the program may be obtained by contacting Connie Lawry, Teleconference Coordinator, College of Education, Oklahoma State University, 108 Gundersen, Stillwater, OK 74078. (405) 624-6254.

Technological Horizons in Education

Purchase Program Allows Educators Computer Discounts

Apple Computer, Inc. of Cupertino, Calif., has announced a special purchase program that allows full-time teachers and other professional employees of educational institutions in the United States to purchase one Apple personal computer system at a 25 percent or more discount off suggested retail prices.

During the next three years, Apple officials say they estimate that U.S. schools will purchase 1.2 million personal computers, bringing the installed base of microcomputers in the K through 12 education market to almost two million units.

Dubbed "An Apple for the Teacher," the program gives educators a one-time opportunity to buy one of the following Apple systems at the discounted price:

—one Apple IIe personal computer with 64 Kbytes of internal memory, one Disk II floppy disk drive, one Monitor II display, and an interface card that provides 80-column display capability;

—one Apple IIe personal computer with 64 Kbytes of memory, two Disk II floppy disk drives, one Monitor II display, and an interface card that provides both 80-column display capability and an additional 64 Kbytes of memory;

—one Apple IIc personal computer, one Monitor IIc display and a monitor stand; or

—one Macintosh computer with 128 Kbytes of memory.

In addition, those educators who take advantage of this offer will be able to order Imagewriter printers with their systems at a similar discount, Apple officials added.

The offer will be available only through Sept. 30.

Technological Horizons in Education
v12n6p14 Feb. 1985

ERIC Facility Working Toward Distribution of ERIC Database on Compact Discs (CD-ROMs)

ORI, as the operator of the ERIC Facility, has distributed the ERIC database to the public on magnetic tape for years. The subscribers peaked several years ago at around 100 and have fallen off steadily as the online vendors expanded their services.

With the advent of compact laser discs, or CD-ROMs as they are called, ORI has been working toward the ability to disseminate ERIC data by this new "high tech" format. Recently, ORI signed an agreement with International Standard Information Systems (ISIS) Inc. that it is hoped will lead to a demonstration of ERIC on CD-ROMs in mid-1985 and a distribution service by the end of the calendar year.

A copy of the News Release issued jointly by ISIS and ORI is shown as Attachment 3.

...Ted Brandhorst (ERIC Facility)

ERIC/EC Acquires a New IBM PC/XT

ERIC/EC finally has an IBM PC/XT. We're using dBase III, Framework, and Wordstar. Some of our up and running applications include maintaining the Acquisitions Arrangements List, maintaining our journal records, MultiLink, ADR, SpecialNet, downloading from BR^S and DIALOG, maintaining a database of current federally funded special education projects, letters, and mailing lists. We're working on other possibilities including monitoring conference papers and an address list of frequent contributors. Our equipment consists of the XT with 640K of internal memory, a 10 MG hard disk, an Okidata 93 printer, and a VanTel modem. We're all becoming computer literate through a lot a trial and error and sharing whatever we manage to figure out. It's been fun!

...Dorothy Beling (EC)

Technology Projects Complement ERIC/EC

Two new projects awarded to The Council for Exceptional Children add to its information and dissemination capabilities and, in so doing, complement the work of the Clearinghouse. One project, The Center for Special Education Technology Information Exchange, will collect, analyze and distribute information on all technologies as they are applicable to the education of handicapped children. This three year project will also conduct an annual R and D symposium focusing on technology and special education. The second project, in which CEC is a subcontractor, is called The Special Education Software Center. This project concentrates exclusively on the development, modification, and application of computer software in special education. For more information about either of these projects please feel free to direct inquiries to Don Erickson.

...Donald K. Erickson (EC)

NETWORK NEWS

Canadian Education Association (CEA)

Central ERIC has been in correspondence with the CEA concerning their plan to establish an online bibliographic retrieval system, similar to ERIC, for Canadian education literature. They are interested in basing their indexing vocabulary on the ERIC Thesaurus, but would have to add terms unique to Canadian education. The Canadian thesaurus would also be made completely bilingual, English-French. A copy of their original contact letter appears as Attachment 4.

RIE Field Length Statistics, 1966-1984

For the record, we would like to publish field length statistics for the RIE Master File for the entire period 1966-1984. These can be seen in Attachment 5. Probably of primary interest to the Clearinghouses are the figures for Title, Author, Descriptors, Identifiers, and Abstract. The average Title is 83 characters. The average Personal Author field is 23 characters. The average Descriptor field is 223 characters. The average Identifier field is 36 characters. The average Abstract is 1049 characters.

...Ted Brandhorst (ERIC Facility)

Online Vendor Updates of RIE/CIJE Files — Schedule

At the request of the online vendors -- DIALOG, SDC, and BRS -- monthly ERIC update tapes are not distributed by the Facility until both the RIE and CIJE tapes for the particular month are available for shipment. Normally this means that the RIE monthly tape is delayed until the corresponding CIJE tape is received and processed for distribution. For example, the February RIE tape was completed and ready for distribution by January 24, but was held until the February CIJE tape (which arrived the week of February 11-14) was ready for distribution on February 22.

In the past, the two update tapes were on different schedules. Users can always determine exactly how far the file has been updated at the time of "logon".

EC Has Advice Galore!

The ERIC Clearinghouse on Handicapped and Gifted Children has gone from famine to feast where advisory input is concerned. During the previous contract period, which ended September 1, 1984, we did not have an official advisory board that met in one place at one time. Now, as part of our new contract, we have three! And they have all met within the last three months. Here is a brief summary. (1) Association Liaison Board - because of our unique location near the District of Columbia, home of many educational associations, we invited 30 different regular and special education related groups to spend a day at the Clearinghouse on November 6, 1984. Nineteen groups sent a representative. Our purpose was to give an overview of ERIC in general and to seek their input on their concerns regarding handicapped and gifted children. Laurabeth Hicks, Judi Conrad and Kevin Arundel from NIE participated. It was a productive day. (2) Advisory Board - our regular, ten member Advisory Board came to the Clearinghouse on December 6 and 7, 1984. We had a tightly organized agenda for them to wrestle with and they did so in a very productive manner. This Board has a broad base of interests represented on it including the director of the Appalachian Educational Laboratory. It too, was a productive session. (3) Special Project Advisory Board - the Office of Special Education Programs in the Department of Education attached a special project to our Clearinghouse during the last procurement exercise. One of the purposes of this project is to examine the impact that funded research has had on educational policy and practice. Since this is not a particularly simple question to answer a special advisory board was established to help direct our efforts. They met at the Clearinghouse on January 17 and 18, 1985.

...Donald K. Erickson (EC)

ERIC -- A Business Source??

The January 1985 issue of Online (Shorthill, Rachel R., "Unexpected Online Sources for Business Information," v9n1 p68-78) reviewed ERIC as a source of information on business education. Comparisons were made between ERIC (CIJE), Psychological Abstracts (PSYC INFO), Health Planning & Administration (HPA), and Public Affairs Information Service (PAIS). As we already knew, they concluded that "ERIC is a fine source for information on business education, but it also contains a great deal of information on general business topics, including over 6000 cites in the subject of industry and over 1400 in economics."

...Emma Gonzalez-Stupp (TM)

PROCESSING ADVISORY

Notify Oryx Press When "Source Journal Index" Needs Revision — A Reminder

Whenever a new journal is added to a Clearinghouse's CIJE coverage or an old journal is deleted or an existing journal changes its name, the Clearinghouse with the information should notify Oryx Press so that the Source Journal Index can be brought up-to-date.

Lately there have been some journals found listed in the Source Journal Index that have long since ceased publication or been deleted from coverage. Don't forget to provide Oryx Press with any new information concerning the journals covered by your Clearinghouse, after having checked with your Central ERIC Monitor to clear the selection.

PERSONNEL

Chuck Hoover Retires!

Chuck Hoover will retire as the Head of ERIC on April 3, 1985, after a total of 16 years with the ERIC system. Chuck's tenure with ERIC has been memorable. He was loyal, steadfast, and persistent in doing his job. He could also be vociferous, stubborn, and combative when it came to arguing for the things in which he believed. He fought hard for the good of ERIC and his devotion to the system never waned. He was a force to contend with whether you were friend or foe. His drive to increase awareness of and access to ERIC contributed greatly to ERIC's becoming the premier bibliographic database serving education. The entire network will miss him and wishes him well!

...Central ERIC

Kathy Clay Redivivus

Kathy Clay would like all her ERIC friends to know that she has left SMERC and accepted a 2-3 year position with the Shasta County School System. She now lives in the mountains, within breathtaking view of Mount Lassen. Her new address is 4690 Memory Lane (!), Redding, CA 96001 (916/244-4600 x252). She has bought a house (with a swimming pool) and would welcome any and all visits and contacts from old friends.

EC's Personnel Changes

Carolyn Boyle, Administrative Assistant at the Clearinghouse on Handicapped and Gifted Children for two and one half years, resigned her position in September, 1984 to move into CEC's Production Department. Betty Amos who served as Secretary was elevated to the position. Her replacement was Joan Flamm who had part-time status in the Clearinghouse and became full time with the transfer.

The Clearinghouse added a full-time clerk-typist, Elizabeth Bates, to complement Lynn Smarte and Beverley Gardner in Information Services.

...Donald K. Erickson (EC)

ERIC/EC Staff Service Awards

Three people on the staff of the ERIC Clearinghouse on Handicapped and Gifted Children were recently honored for their years of service to The Council for Exceptional Children: Betty Amos, 5 years; Janet Drill, 10 years; and Lynn Smarte, 10 years.

...Lynn Smarte (EC)

Dr. Ashburn (SP) Named to Advisory Board and Task Forces

At the annual meeting of the Association of Teacher Educators in February, Betsy Ashburn was appointed to the Advisory Board of ATE's SIG on Research and Evaluation.

A week later at the annual meeting of the American Association of Colleges for Teacher Education, she was made staff liaison to AACTE's Task Force on Professional Development and become an ex officio member of the Task Force on Research and Information.

...Francie Gilman (SP)

Ashburn Attended NIE Urban Superintendents Network

Betsy Ashburn was invited to give a presentation on AACTE and Clearinghouse activities for the NIE-sponsored Urban Superintendents Network, which met in Washington in March. Among the issues discussed were the importance of improving preservice teacher education and differences in preservice training needs for elementary and secondary school teachers.

...Francie Gilman (SP)

Staff Change at TM

Patricia E. Tomko has been recently hired as TM's new publications/acquisitions assistant, replacing Pamela Chisholm. Pat comes to TM from ETS with several years of secretarial experience and training. Please help us welcome Pat to the ERIC network.

NEWS RELEASE	ERIC	PROCESSING AND REFERENCE FACILITY 4833 RUGBY AVE., SUITE 301 BETHESDA, MARYLAND 20814 TEL. (301) 656-9723
	Operated For THE NATIONAL INSTITUTE OF EDUCATION EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC) By ORI, Inc., Information Systems Division	
FOR IMMEDIATE RELEASE		DATE <u>March 21, 1985</u>

GPO Subscription Prices Reduced for ERIC Abstract Journal

Resources in Education (RIE)

For the first time since November 1966, the prices charged by the U.S. Government Printing Office (GPO) for a subscription to the monthly abstract journal of the Educational Resources Information Center (ERIC) — Resources in Education (RIE) — have been reduced.

Effective February 1, 1985, the prices charged by GPO for RIE and its indexes have been re-established as shown below:

<u>Monthly Issues</u>	<u>Domestic</u>	<u>Foreign</u>
Subscription (12 Issues)	\$51.00	\$70.00
Single Issue	8.50	10.63
<u>Semiannual Indexes</u>		
Subscription (2 volumes)	20.00	25.00
Single Issue (Jan.-June or July-Dec.)	15.00	18.75

The new price of \$51 for a domestic subscription represents a substantial 46% reduction from the corresponding old price of \$95. It is hoped that this price reduction will help to stimulate renewed interest in RIE subscriptions, which have been affected adversely by previous GPO price increases.

I N T E R N A T I O N A L

Standard Information Systems

.... NEWS RELEASE January 1985

945 Concord Street
Framingham
Mass 01701
(617) 620-4721

International Standard Information Systems (ISIS) is pleased to announce the signing of an agreement with ORI, Inc., Information Systems Division. ORI operates the central computer facility for the Educational Resources Information Center (ERIC) and manages the ERIC bibliographic database of education-related documents and journal articles. ERIC is a national information system sponsored by the National Institute of Education (NIE). Under the terms of the agreement, ORI and ISIS will work together to develop SilverPlatter* CD-ROM laser disks containing the complete ERIC database, together with associated indexes. The disks will be distributed to libraries and information centers on a subscription basis, through the ISIS SilverPlatter* Service.

Parke P Lightbown, one of the founders of ISIS, stated, "The usage-based charges of the online systems take a big bite from library budgets. We think that the fixed price of the SilverPlatter* subscriptions will be very attractive to libraries. The level of information service provided can be increased without a concomitant increase in expenditures. ISIS will lend subscribers a micro-computer Information Workstation, fully equipped with a CD-ROM disk player and search/retrieval software, so that there is no hardware or software investment required of the user. And, since all the interchangeable SilverPlatter* disks have fixed prices, it won't cost libraries a penny more to allow patrons to search the ISIS-provided databases as much as they need or want."

Mr. Lightbown added that, "We are very pleased to offer ERIC as one of our first databases. It is one of the most extensively used databases in the world today, particularly in libraries and information centers. In an academic setting, for example, a comprehensive and top quality database like ERIC can be an extremely useful and valuable tool to students and faculty alike. But no matter what the environment, our fixed subscription price eliminates the escalating usage-dependent costs that very often force libraries to limit their patrons access to ERIC in its electronic form."

Ted Brandhorst, Director of the ERIC Processing and Reference Facility, points out that, "ERIC's basic mandate is to foster educational change and innovation by making its database available to the educational community as broadly as possible and at the lowest possible price. The ISIS SilverPlatter* disk provides an attractive, state-of-the-art distribution medium that is, nevertheless, economically still in keeping with ERIC's long-term effort to keep its prices to the user affordable."

CANADIAN
EDUCATION
ASSOCIATION

ASSOCIATION
CANADIENNE
D'ÉDUCATION

February 1, 1985

Mr. Charles W. Hoover
Head, ERIC
National Institute of Education
Washington, D.C. 20208
U.S.A.

Dear Mr. Hoover:

I'm writing to inform you of a national initiative the Canadian Education Association is undertaking in education information. The CEA has formed two committees - a Database and a Steering Committee - to advise them on the overall feasibility of establishing an on-line bibliographic retrieval system for Canadian education literature. The system would be based on the CEA's two print indexes - the Canadian Education Index and the Directory of Education Studies in Canada.

The Database Committee has just mailed out approximately 2,000 copies of the attached questionnaire to:

- all Index and Directory subscribers
- all Canadian education institutions and associations
- individual Canadian educators

Responses have been requested by February 28th. The questionnaire seeks to define the current interest in, and use of, on-line retrieval of information in Canadian education. The questionnaire's covering letter, also attached, describes the advisory committee process we have established surrounding this project. Although Canada has no federal government agency for education (constitutionally, education is a provincial matter), we hope that the interest in an on-line database will be sufficient to warrant its implementation and support.

I have enclosed two copies of our questionnaire here. I would greatly appreciate it if you could arrange for one to be completed by someone on your staff.

Some time ago, I wrote to you about our potential interest in using the ERIC thesaurus, or more probably, basing a thesaurus on ERIC's and adding terms unique to Canadian education and parallel French terminology. It seems clear that a change to subject descriptors would be highly preferable as a preliminary to going on-line. However, it is a change that could probably only be justified in the context of going on-line (and therein lies the big question mark).

.../2

Suite 8-200, 252 Bloor Street West, Toronto, Ontario M5S 1V5 (416) 924-7721

3117

...2

The next meeting of the Database Committee is tentatively scheduled for mid-April, the purpose of which will be to discuss and analyze the results of the questionnaire. The Committee will have one more meeting following that in late May or early June. At that meeting, they will formulate the specific model which will be recommended to the CEA Board of Directors in September 1985. I wondered if you would be interested in having one of your staff join us for a day at that meeting. It would be an excellent opportunity to learn first-hand what is going to be proposed for Canada. I'm sure that we could profit from the perspective and experience of ERIC as well. Our Committee of six includes representatives of:

- Onteris (Ontario Ministry of Education on-line database)
- ÉDUQ (Ministère de l'Éducation du Québec's database, soon to be on-line)
- a liaison with the Council of Ministers of Education which is about to launch an on-line education software database
- an in-house system at the University of Alberta for Alberta education materials
- the National Library of Canada
- a federal government agency (IDRC) which vends IBE and other international databases here in Canada

We would be most pleased and appreciative if arrangements could be made to have an ERIC representative join us at that meeting.

I also have two rather direct questions I would like to put to you. We realize that ERIC already indexes several Canadian education journals and select reports; however, we have never known whether this was a matter of general policy or individual clearinghouse policy. Does ERIC have a policy on the selection and inclusion of Canadian and/or foreign education literature in the ERIC database? Also, if Canada established its own on-line database, would this be likely to have any effect on the inclusion of Canadian materials in the ERIC database? I don't mean to question your policies or practices, but it would be useful to know the extent the ERIC's interest in Canadian materials.

If you have any questions about our on-line investigations, I would be most pleased to try to answer them. I'll look forward to hearing from you.

Yours truly,

Maureen Davis
Index Editor

CH	ERIC CLEARINGHOUSE PUBLICATIONS
CS	<p>New ERIC/CS Information Analysis Products:</p> <p><u>ERIC First Analysis: Welfare Reforms. 1984-85 National High School Debate Resolutions.</u> By David L. Wagner. 1984. Prepares high school debaters and their coaches for the investigation of the 1984-85 High School Debate Problem Area and Resolutions. Available from the Speech Communication Association, 5105 Backlick Road, Annandale, VA 22003. \$4.00.</p> <p><u>Recommended English Language Arts Curriculum Guides, K-12.</u> Edited by Evelyn Copeland. 1984. Annotates guides reviewed by the NCTE Committee to Evaluate Curriculum Guidelines. Available from the National Council of Teachers of English, 1111 Kenyon Road, Urbana, IL 61801. \$1.00.</p>
EC	<p>The following ERIC Digests are new or revised for 1984:</p> <ul style="list-style-type: none">● #366 - Being at Ease with Handicapped Children (Revised)● #393 - Argument for Early Intervention (Revised)● #395 - Parents Rights and Responsibilities (Revised)● #406 - Fostering Peer Acceptance of Handicapped Students (Revised)● #415 - Serving the Learning Disabled Student in a Vocational Education Classroom (Revised)● #428 - The Imperative for Educational Reform: Implications for Special Education (New)● #429 - Using Your Microcomputer to Acquire Special Education Information (New)● #430 - Professional Training for Teachers of the Gifted and Talented (New)● #431 - What is Downs Syndrome? (New)● #432 - Diagnosis and Treatment of Dyslexia (New)● #433 - Personnel Preparation in Special Education Quality vs Quantity (New) <p>The following are new publications from ERIC/EC:</p> <p>"Integration of Students with Severe Handicaps into Regular Schools" by Susan and William Stainback. The book is written to show how the support and cooperation of both regular and special class teachers can give students with severe handicaps the opportunity to become integral members of regular schools. Price is \$15.75. CEC Member price \$13.39.</p> <p>"Education of Culturally and Linguistically Different Exceptional Children" Philip C. Chinn, Editor. This essential resource for program directors and researchers brings together, under one cover, state-of-the-art information on bilingual and culturally different exceptional children. These research-based papers will provide data against which local programs can be evaluated. An invaluable resource for grant writers and project personnel. Price is \$8.00. CEC Member price is \$6.80.</p> <p>"Progress in the Education of the Handicapped and Analysis of P.L. 98-199, The Education of the Handicapped Act Amendments of 1983". This is the latest offering in the "Special Education in America Series". Edited by Frederick J. Weintraub and Bruce Ramirez, it provides historical reference for the Education of the Handicapped Act Amendments of 1983, analyzing the amendments, highlighting significant differences between PL 94-142 and PL 98-199. The publication includes a complete citation of the 1983 amendments. Price is \$6.00. CEC Member price \$5.10.</p>

CH	ERIC CLEARINGHOUSE PUBLICATIONS
EC	<p>(Cont'd) "Quality Services for Blind and Visually Handicapped Learners. Statements of Position" - Geraldine T. Scholl, Editor. These statements were developed to reflect state-of-the-art thinking among professionals who serve blind and visually handicapped students. These papers can be used to provide background information to a variety of audiences including teachers, parents, college and university personnel, administrators, and other leadership personnel. Price is \$7.00. CEC Member price is \$5.95.</p>
TM	<p>The ERIC Clearinghouse on Tests, Measurement, and Evaluation has the following IAP and two bibliographies available:</p> <ul style="list-style-type: none">● The Effects of Testing on Teaching and Curriculum in a Large Urban School District, by Floraline Stevens (TME Report #86)● "Test Score Decline"● "Courseware Evaluation" <p>Individual copies of our IAP will be sent to all Clearinghouses. Copies of our bibliographies may be requested by contacting ERIC/TM.</p>

CATALOGING ADVISORIES

NEA Publications Availability

Clearinghouses are reminded that NEA publications, which are usually processed at Level 2, should always have the non-ERIC availability cited as:

NEA Professional Library
P.O. Box 509
Westhaven, CT 06516

The stock number and price of the document should be included whenever available.

...Joanna Eustace (ERIC Facility)

Contract Numbers for Labs and Centers

The contract numbers of the various national Labs and Centers for educational research and development, are now often found in documents carrying an additional designator at the end of the number, e.g. "400-83-0001, P-6."

These are large contracts and it is our understanding that the designator identifies a specific program within the larger contract.

NIE has requested that these special designators be considered part of the contract number and that they be retained. Since no spaces are permitted in contract numbers, the number should be recorded in the form:

"400-83-0001-P-6"

...Carolyn Weller (ERIC Facility)

INDEXING ADVISORY

"Excellence in Education" Reports

In the last year or so, there have been a number of major reports on the condition of education in the United States: e.g. A Nation At Risk; A Place Called School; High School: A Report on Secondary Education in America; Action for Excellence, etc.

The ERIC System is now receiving a significant number of reviews, summations, reactions, commentary, and responses to one or more of these major reports. We believe that it would be helpful for searchers and other users if retrieval of these related documents, as a group, could be facilitated. Since most of the major reports being discussed are generally described as dealing with the topic of excellence in American education, we propose that when dealing with reviews of such reports ERIC indexers should apply the following Identifiers (at a minimum):

1. "Excellence in Education" (usually as a major subject index term)
2. The specific name(s) of the report(s) discussed (major or minor, as appropriate)

It is usually preferable to index to the name of the report (rather than to the name of the Committee or Commission preparing it).

Similarly, when writing abstracts for documents reviewing these major reports, it is helpful to the reader/user to list in the abstract the names of the specific reports being discussed.

...Carolyn Weller (ERIC Facility)

TECHNOLOGY CORNER

CD-ROM (Optical Digital Disc) Availability of ERIC Database

ORI and ISIS are working together to make ERIC available to the public on CD-ROM discs. While this is an entrepreneurial venture being pursued without Government funding or support, it is our intent to keep the ERIC components informed of developments as we move along the way to this new service. In this vein, two news items that appeared on this subject in the March 1985 issues of Information Today and Advanced Technology/Libraries (AT/L), respectively, are reproduced as Attachment 1.

...Ted Brandhorst (ERIC Facility)

NETWORK NEWS

"Wish List" Items That Database Users Wish Database Generators Would Provide

At the recent NFAIS annual meeting (March 3-6), one session devoted itself to a "wish list" of ideal characteristics of bibliographic databases. Some of the items that show up in my notes are the following:

- Use a controlled vocabulary for indexing; don't rely completely on the words appearing in free text to provide your subject indexing.
- Make your processing policies and practices clearly known and available to users, especially your indexing and abstracting policies. Announce them up front; provide them economically.
- Provide informative-type abstracts.
- Incorporate into the record all key or significant names/acronyms appearing in the bibliographic entity being processed.
- Provide clear and informative user aids, explaining how to search your database. Price it economically.
- Update your controlled vocabulary regularly, at least once a year, to keep your terminology current and responsive to the literature.
- Use index phrases in their natural sequence; do not invert them.
- When indexing, indicate the major or most important terms and distinguish them from the minor or peripheral terms.
- Use unabbreviated journal names.
- Establish indexing standards and use quality control mechanisms to ensure that your standards are observed.
- Keep your database clean and free of typographical errors. Do not get it keyed abroad by non-English-speaking keyers.

The two databases that were cited as good examples of organizations observing most of these tenets and that had "up front" processing policy statements (e.g. in the Introduction to the ERIC Thesaurus), were ERIC and MC (Management Contents).

...Ted Brandhorst (ERIC Facility)

ERIC Thesaurus and ERIC Database Receive Kudos for Coverage of History of the Social Sciences

In the February 1985 issue of Database magazine (vol. 8, no. 1, p. 28-36), Robert Skinner has published an article entitled "Searching the History of the Social Sciences Online".

The article covers eight (8) major bibliographic databases, including ERIC. The author gives ERIC several compliments:

"ERIC is one of the most valuable sources for history that one can find online"

"The ERIC thesaurus is one of the best and in history it really shines."

The section of the article dealing with ERIC, and a sample search dealing with "History in ERIC" is reproduced as Attachment 2.

...Ted Brandhorst (ERIC Facility)

ERIC Selection Criteria Studied

Two authors who were originally very doubtful about ERIC's selection practices, but who decided to determine the facts, have recently published an article on their investigation. Behavioral and Social Sciences Librarian (v. 3, no. 4, Summer 1984, p. 25-31) contains an article by Mary Sellen and Robert Tauber entitled "Selection Criteria for ERIC: A Survey of Clearinghouse Acquisition Coordinators". The article is reproduced as Attachment 3.

The authors conclude their study with the observation that "it is readily apparent that the selection criteria for documents in RIE are as rigorous as the criteria for the standard journal literature. It is hoped that understanding this process will further enhance librarians' understanding of RIE and promote usage of this valuable educational resource." (p. 31)

...Ted Brandhorst (ERIC Facility)

1984 RIE Index — Annual Cumulation (by Oryx Press)

Oryx Press has announced that the Index portion of their annual RIE cumulation has been delayed until "late June" for technical reasons. The Abstract portion has already been published.

A copy of their announcement appears as Attachment 4.

...Ted Brandhorst (ERIC Facility)

Title Index Subscribers

The size of ERIC's printed Title Index is such that cumulations must periodically be stopped and the cumulation process begun again with a new year. The cumulations thus far are as follows:

<u>Years Covered</u>	<u>Accessions</u>	<u>Number of Pages</u>	<u>Status</u>
1966 - 1976	120,351	1,350	Out-of-print
1977 - 1983	105,689	1,551	Limited Quantity Available
1984 -	14,246	209	Available

Subscribers are advised to retain the early Title Index cumulations as there are no plans to re-print.

The Title Index for 1984 above has been priced at \$15. Subscribers who prepaid for 1984 currently have a credit on our books for \$25 towards this product (anticipating a full cumulation). After we have sent you the 1984 volume, you will be left with a credit for \$10. This amount may be used for your next order (in which case you need to do nothing) or you may request a refund (in which case please send us a note).

This price adjustment is a one-time change to accommodate the new cumulation process. The price of a 1985 subscription, including the 1984-1985 cumulation, remains at the old advertisement price \$45/year.

Should you have any questions regarding this matter please do not hesitate to contact me at the following:

"Target Audience" and the Online Vendors

Current handling of ERIC's newest data element "Target Audience" (TA) by the online vendors varies as follows:

DIALOG -- TA is treated as a separate field and is accessed via the prefix "TA=," e.g.:

S TA=Practitioners

TA searching can be done on either of the two DIALOG versions now available online, but the TA field is displayed only in "DIALOG2." (DIALOG2 will completely replace the old DIALOG system later this year.) TA entries exist in DIALOG for 41,391 records through Mar85, including:

- 13,806 records originally cataloged with TA since Nov83, i.e., RIE from Jan84, CIJE from Sep84, and RIE Nov-Dec83 entries ("Practitioners" and "Students" only) from the Practice File pilot project.
- 27,585 RIE records (May75-Oct83) retrospectively updated ("Practitioners" and "Students" only) during the Practice File pilot project.

BRS -- TA is handled as part of the Identifier field and is displayed with Identifiers in the document records, as follows:

IDENTIFIERS: Great Britain. West Indians. TARGET AUDIENCE: Practitioners. Policymakers. Students.

Searching must be done with this in mind, e.g.:

Practitioners and (Target adj Audience).ID.

TA postings in the BRS ERIC file exist for the 13,806 records originally cataloged with TA from Nov83 through Mar85. Retrospective postings of TA before Nov83 are not included.

SDC -- The SDC/Orbit IV system currently does not carry TA data in its ERIC file. A July83 letter to SDC from the Facility, announcing TA and requesting SDC accessibility to this data element, was not acted upon. Negotiations with SDC on the TA issue have now been reopened. Implementation seems likely sometime later this year; however, retrospective reloading appears unlikely, even for 1984 and earlier 1985 records.

...Jim Houston (ERIC Facility)

3143

National Technical Meeting (1985)

The ERIC National Technical Meeting for 1985 will be held May 13-14 at the following hotel:

Westpark Hotel
1900 North Fort Myer Drive (1 block from Metro stop)
Rosslyn (Arlington), VA

Tel.: 527-4814 Metro Stop: Rosslyn

There will be a wine and cheese get-together on Sunday evening preceding the meeting, from 8-10 p.m. in the room of Amelita Hill (RC). First-time attendees should make a special effort to attend the Sunday function. The hotel has free inside parking.

A draft agenda and map are reproduced as Attachment 5.

...Mary Niebuhr (FL)

PERSONNEL

Ashburn Involved in AERA's New Division K

Betsy Ashburn has been named to AERA's Division K (Teacher Preparation Curriculum) Committee on Program Analysis and Evaluation, which is chaired by Walter Doyle (Univ. of Texas at Austin) and Joe Vaughn (NIE). While at AERA, Ashburn chaired a symposium on "Research in Teacher Education: What are the Questions?" The panel consisted of David Smith (immediate past president of the American Association of Colleges for Teacher Education), David Berliner (University of Arizona at Tucson), Walter Doyle, and Lillian Katz.

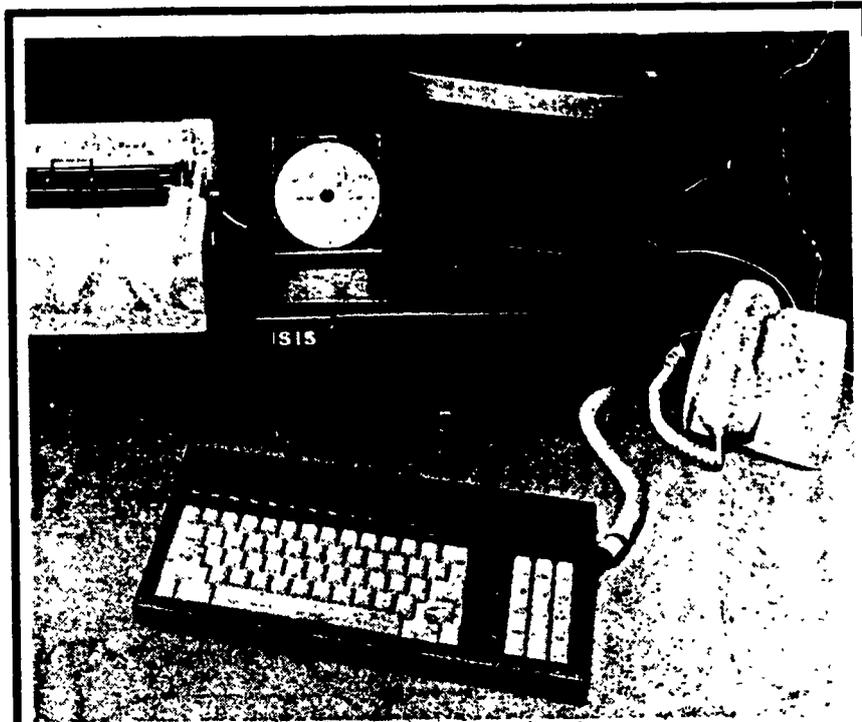

...Francie Gilman (SP)

ISIS will introduce its SilverPlatter CD ROM workstation at ALA in July.

ISIS Dishes Up Silver Platter CD ROM Service

ERIC and PsycLit, a subset of the PsycInfo database produced by the American Psychological Association, will make their debut on 4¾-inch compact optical disks when International Standard Information Systems (ISIS) introduces its SilverPlatter Service at the American Library Association's Annual Meeting in Chicago July 6-11.

ISIS's new CD-ROM service is targeted to be operational at alpha site installations in September, followed by beta sites in January 1986. General installations will begin in the first half of 1986.

For a set annual or monthly rate, SilverPlatter subscribers will receive

complete databases contained on compact optical disks as well as the use of a microcomputer information workstation provided by ISIS which includes a keyboard, monitor, CD-ROM disk player, and search/retrieval software.

Parke P. Lightbown, an ISIS founder, stressed that they will be marketing "a complete service, not a software package for general purpose micros."

"Our production model Information Workstation," he said, "is a dedicated machine, and the user interacts only with the application, not with any traditional operating system."

The ISIS software allows the user to search the laser disk databases using

(continued on page 17)

3146

Silver Platter Service

(continued from page 1)

Boolean operators, field name and content limits, proximity, truncation, and valued parameters.

Subscription prices and frequency of updates for the different databases will be established cooperatively by ISIS and the various information providers. Lightbown said that he expects the minimum subscription rate will probably run about \$1,000 for an annual disk or \$3,000 for a monthly update service.

Multiple subscription discounts to a single product will be available for institutions. There will also be an option for each information provider to participate in a Secondary Use Program which provides "out-of-date" disks to small libraries at significant savings.

Under the terms of the agreement with ORI, Inc., the firm which operates the central computer facility for the Education Resources Information Center (ERIC), ISIS will distribute via CD-ROM the complete ERIC database, together with associated indexes.

The PsycLit CD-ROM subset will contain all the material from the serial literature in the PsycInfo database from 1974 to present. The actual structure of the PsycLit database will probably differ from the online PsycInfo file, and the new structure will be evaluated by ISIS and the APA before regular production begins in the fourth quarter of 1985.

Other databases to be made available on CD ROMs will be announced by ISIS over the next several months. For further information, contact Parke P. Lightbown, International Standard Information Systems, 150 A. St., New England Industrial Center, Needham, MA 02194. (Phone: 617-449-0708)

3147

AT/L March 1986

LASER DISC DATABASE SERVICE TO BE SHOWN AT ALA

International Standard Information Systems (150 A St., New England Industrial Center, Needham, MA 02194, 617/449-0708) has announced plans to demonstrate a laser disc-based database retrieval system at ALA's Annual Conference in July.

The Silver Platter Service will provide users with indexed databases on compact laser discs and microcomputer workstations to read them. Each disc holds over 500 million characters of information, the equivalent of over 200,000 printed pages. Discs are in standard format and are interchangeable.

The I.S.I.S. workstation includes a keyboard, monitor and system unit; a CD-ROM optical disk drive; two RS232C serial ports for connection with a printer and another computer; a modem and communication software allowing the user to search remote databases with the I.S.I.S. search language; and search software which permits the user to search the databases using Boolean operators, field name and content limits, proximity, truncation and valued parameters.

I.S.I.S. has signed an agreement with ORI Inc., Information Systems Division, manager of the ERIC database, to develop laser disks containing the ERIC database as well as associated indexes. An agreement has also been signed with the American Psychological Assn. to develop a subset of its PsycINFO databases; the new product, to be called PsycLIT, will contain all the material from the serial literature from 1974 to the present that is in the PsycINFO database. The company is negotiating agreements with several other database producers and expects to exhibit six databases at ALA.

The workstation is furnished to users at no charge; however, there is a \$70/mo. fee to cover equipment maintenance and service, complete documentation, and a HOTLINE telephone number. Annual subscription prices for the individual databases are expected to vary from \$1000 for an annual disc to \$3000 for a monthly update.

Test installations at public, academic and special libraries, including the Baltimore County Public Library, are scheduled to begin in September. Commercial installations are expected to begin during the first half of 1986.

3148

The ERIC thesaurus is one of the best and in history it really shines.

ERIC

Surely one of the commonest and most used databases in the entire spectrum is ERIC, which is available through practically every commercial online system. It is just as surely one of the most valuable, since it covers virtually every aspect of the field of education and includes, as well, valuable material on psychology, counseling, testing, and statistics. Included in the file are the contents of both *Current Index to Journals in Education* and *Resources in Education* from 1966 to the present. It is updated on a monthly basis.

Surprisingly enough, ERIC is one of the most valuable sources for history that one can find

online. The ERIC thesaurus is one of the best and in history it really shines. Aside from the really obvious term, **EDUCATIONAL HISTORY**, there is a large number of more specific terms to be found under the array term **HISTORY**.

A look at Figure 2 shows that in their zeal to be as complete as possible, the folks at ERIC have made the use of combination strategies in their database a must. Relying on any one "history" term in this database could well result in missed citations. It is important to note, as well, that there are some inconsistencies in the indexing and that **HISTORY/DE** is sometimes used for articles and reports about the study of history.

Selection Criteria for ERIC: A Survey of Clearinghouse Acquisition Coordinators

Mary Sellen
Robert Tauber

ABSTRACT. Acquisition Coordinators from each of the 16 ERIC Clearinghouses are surveyed in an attempt to determine: (1) what is the acceptance rate of manuscripts submitted to the Clearinghouse; (2) what are the academic credentials and experience of the reviewers; (3) what are the criteria used to evaluate unsolicited manuscripts. Fifteen coordinators respond.

For those who use *Resources in Education*, the abstract journal sponsored by ERIC, whose mission it is to gain bibliographic control over documents and journal articles in the field of education, little needs to be said as to the value of the information retrieved from the system.¹ ERIC resources are used more than 2.7 million times annually, providing clients with more than 30 million bibliographic records and/or primary documents. Persons employed by or primarily affiliated with institutions of higher learning account for 45.6% of the annual use of ERIC, while employees in basic education account for 24.8% of the usage. According to Heinmiller,² the three most frequent uses of ERIC information are for research, school improvement and the support of academic study.

What ERIC is, how the system works, and more recently how ERIC has improved have been the focus of previous articles in education journals.³ Every year the *Bowker Annual* and the *ALA Yearbook* contain descriptive articles and reports on trends and developments within ERIC. With the advent of ERIC online, much of the

Mary Sellen is Head Librarian, Penn State Behrend, Erie, PA 16563. Dr. Tauber is Assistant Professor of Education, Penn State-Behrend, Erie, PA 16563.

Behavioral & Social Sciences Librarian, Vol. 3(4), Summer 1984

library literature has been devoted to database descriptors and usage, ease of searchability (both online and manually) as well as feasibility and maintenance of collections and use studies, to name a few

While wide solicitation of documents by ERIC is seen by some as an indicator of poor quality, librarians working in education know the value of this resource for research in education. In order to understand ERIC better, a description of its internal mechanics for selection is presented.

Resources in Education, in contrast to *Current Index to Journals in Education*, abstracts, indexes and announces fugitive material not usually available through library channels, including documents, solicited and unsolicited manuscripts, conference proceedings, etc. Fugitive literature is important to researchers and decision makers because it makes up a majority of the literature produced on education.⁴ The potential impact of documents appearing in *RIE* is significant given that approximately 5,000 organizations or individuals in 60 countries, receive this abstract journal. It is the credibility of information cited in *RIE* that is suspect to some, since they are not aware of *RIE*'s selection standards.

Although "Quality of Content" for *RIE* publications is addressed under the "Selection Criteria Employed by ERIC,"⁵ it is not only buried among topics such as "Legibility and Reproducibility" and "Where to Send Documents," but it is presented without a prerequisite description of the qualifications of those who actually make the selection decisions. For *RIE* citations to receive the legitimization they deserve, the internal mechanics of the selection process need to be made known and subject to scrutiny. Although *RIE* publishes many print (vs. non-print) materials, the remaining comments will be directed towards one specific type of print material—the unsolicited manuscript; typically, conference papers, opinion papers and end products of research efforts.

TRADITIONAL JOURNAL CRITERIA

Since ERIC is relatively new in the world of academia (less than 18 years old), what basis should be used to scrutinize the selection process for *RIE* citations? Perhaps one should use the questions directed at establishing the worth of those unsolicited manuscripts submitted to more traditional journals. One might ask the journal's

Mary S. Allen and Robert Tauber

27

acceptance rate, ask the qualifications of those who act as referees, and ask the criteria used to evaluate the quality of a manuscript. A relatively low acceptance rate, strong and appropriate academic credentials of referees, and recognized indicators of quality of content would be used to validate the credibility of articles appearing in a traditional journal.

What acceptance rate would be an indicator of a "good" journal? Although there is no hard and fast rule, generally the lower the rate the more respected the journal. All other factors being equal, a lower acceptance rate suggests that the editors have been more discriminating concerning selection.

The question of the proper professional credentials for editors, referees, or others who determine which manuscripts are accepted or rejected is more universally agreed upon. Referees ought to have acquired, at a minimum, a terminal degree in the academic discipline, obtain a position as a recognized authority in the field, demonstrated their own research competence, and accumulate experience as a referee. Referees possessing these characteristics to some degree should judge which manuscripts are worthy of publication.

One "should be able" to determine the criteria used by referees to make acceptance decisions by referring to various journals' "Guidelines for Publication." We say "should be" because often such guidelines stress the length and margin parameters, theme focus, interest of readers, and range of submission topics considered, rather than the content selection criteria used by referees. Where specific criteria are cited, they often include such descriptors as: should provoke thought, balance theoretical and practical ideas, be timely, have educational significance, etc.

SELECTION CRITERIA IN RIE PUBLICATIONS

In an effort to determine the internal mechanics of selection for *RIE* publications, the Acquisitions Coordinators from each of the 16 ERIC clearinghouses were contacted. It was explained that what had started as an effort to establish the credibility of ERIC publications for our benefit and satisfaction had evolved into a more comprehensive data collection effort aimed at informing a wider audience.

Each of the 16 ERIC Clearinghouse acquisition coordinators was asked to provide answers to three questions concerning *RIE*'s internal mechanics for evaluating unsolicited manuscripts. The questions were:

3152

1. What is the acceptance rate of unsolicited manuscripts (documents, etc.) submitted to your Clearinghouse for possible publication?
2. What are the academic credentials and experience of those who evaluate unsolicited manuscripts?
3. What criteria are used to evaluate the quality of unsolicited manuscripts?

Responses to the three questions were received from 15 of the 16 Clearinghouses. They are summarized in Table I. Keeping in mind

TABLE I
ACCEPTANCE RATES, REVIEWER QUALIFICATIONS, SELECTION
CRITERIA OF REF
UNSOLICITED MANUSCRIPTS

Clearinghouse	Accept. Rate (1)	Reviewer Qualif.	Selection Criteria for Quality (2)
Adult, Career & Vocational Education	50%	Doctorate	Contribution to Knowledge, Significance, Relevance, New Applications of Knowledge, Authority of Author, Comprehensiveness
Counseling & Personnel Services	40%-60%	Doctorate Masters	Same as Clearinghouse on Teacher Education
Educational Management	47%	Doctorate	None Stated
Elementary & Early Childhood Education	40%-60%	Doctorate	None Stated
Handicapped & Gifted Children	54%	Masters	Reflect emerging trends in field, Concerned with outer edge of knowledge
Higher Education	85%	Doctorate Masters	Significant research, Scholarly contributions of relevant literature, Substantive analyses of issues
Information Resources	31%	Doctorate Masters	Timely, Relevant, Contributing to knowledge, Effective methods and programs
Junior Colleges	50%	Doctorate	Relevance, Significance, Thoroughness of presentation, Authority of author
Languages & Linguistics	72%	Advanced Degrees	None Stated

Max Sellen and Robert Tauber

29

TABLE 1 (continued)

Clearinghouse	Accept Rate (%)	Reviewer Qualif	Selection Criteria for (Qualif: (1))
Reading & Communication Skills	50%	Doctorate	Originality, Significance Appropriate research methodology
Science, Mathematics and Environmental Education	30%	Doctorate	Relevance to education Integration of study with relevant research
Social Studies/Social Science Education	50%	Doctorate	Thoroughness of Reporting, Timeliness. Contribution to knowledge, Significance
Teacher Education	50%	Doctorate	Substantive content, Adds to knowledge base, Presents new material
Tests, Measurements, and Evaluation	60%-70%	Doctorate	High Quality, Substance, Pertinence, Significance, Timely
Urban Education	50%	Doctorate	Relevance, New applications of knowledge Significance, Authority of author

1. Acceptance rates based upon Fall 83, Acquisitions Coordinators' responses to our inquiries. Some Clearinghouses explain higher acceptance rates due to the fact that often the manuscripts received have already undergone a referee process, e.g., conference papers.
2. Detailed "Selection Criteria" for unsolicited manuscripts are available upon request from each Clearinghouse. All criteria basically follow those outlined in Section III of the ERIC PROCESSING MANUAL October 1980, and in the "Criteria for Selection," (April 1983) established by the Clearinghouse National Advisory Board. This list is not exhaustive. It is only meant to reflect the breadth of criteria offered by Acquisition Coordinators.

the traditional journals' criteria listed earlier, we found that these same characteristics were universally included in the internal mechanisms for selecting *RIE* publications.

The reported ACCEPTANCE RATE for nonsolicited manuscripts ranges from 30% to 85%, with the average rate cited being approximately 50%. This supports Chesley's⁶ statement that "... the ERIC system acquires over 30,000 educational docu-

3154

ments a year, of which approximately 16,000 are selected for input and announcement in *RIE*." By comparison, there are traditional journals with acceptance rates lower, higher, and about the same. Only two of the Clearinghouses cited an acceptance rate above 60%. The most lenient acceptance rate, 85% for the Clearinghouse on Higher Education, was explained by the fact that they have standing acquisitions arrangements with certain professional organizations where "most of these (manuscripts) have obviously been through some sort of organizational review and evaluation before they are sent to ERIC."⁷

The ACADEMIC CREDENTIALS of reviewers for ERIC's respective Clearinghouses are impressive, paralleling those of referees for the more traditional journals. In almost every case, reviewers possess PhDs in their respective disciplines, have up to 15 years of experience with ERIC, are faculty of universities (e.g., Ohio State, UCLA, Rutgers, University of Oregon), have teaching and research experience, have gained a national reputation, and often serve as referees on editorial review boards of one or more journals. These reviewers possess the academic background and experience to sit in judgement of nonsolicited manuscripts (and other documents) submitted to *RIE* for possible publication.

In addition to documents being screened by these subject experts, documents are further checked for "presentation," "writing style," and "usefulness to users of ERIC," as they are abstracted and prepared for publication. "Documents can (and have been) "pulled" (rejected) at any point in processing."⁸

The SELECTION CRITERIA used to evaluate nonsolicited manuscripts include: relevance to education, integration of the study with relevant research, innovative practices, significance, new applications of knowledge, appropriateness of content/subject matter, contribution to knowledge, authority of source, comprehensiveness, and more. These criteria were gleaned from written responses to our inquiries. Several of the Clearinghouses sent along copies of their selection criteria, some of which were 8-11 pages long. One, the Clearinghouse for Junior Colleges, took great pains to underline, emphasize, and explain that, "*quality is the single most important selection criteria.*"⁹ There is little recognizable difference between these selection criteria and the criteria used for traditional journals. This is especially true when one realizes that these criteria are evaluated by people with, as shown in the previous paragraph, very strong academic credentials. A response from the director of

Mary Sellen and Robert Tauber

31

the ERIC Clearinghouse for Science, Mathematics, and Environmental Education sums up the selection criteria issue. He states, "Requirements are not substantially different from many journals; a major difference is that we accept some items that have things we would like to see changed. On the other hand, we reject items that later are published in other journals."¹⁰

CONCLUSION

From the responses to our questions from the clearinghouse acquisition coordinators, it is readily apparent that the selection criteria for documents in *RIE* are as rigorous as the criteria for the standard journal literature. It is hoped that understanding this process will further enhance librarians' understanding of *RIE* and promote usage of this valuable educational resource.

Dear Customer:

Thank you for ordering the **1984 RIE Index** (whether by itself or as part of the complete **1984 RIE Annual Cumulation**.) Although the **Abstracts** portion of the **Annual Cumulation** has been published, the **Index** has been delayed by technical problems beyond our control.

It appears now that the **Index** will not be published until late June. We apologize for any inconvenience this may cause. We appreciate your business and hope to serve you better in the future. If charges for the **Index** should appear on your statement, please disregard them. Please notify your billing office. Your copy of the **Index** will be shipped to you promptly upon publication.

Sincerely,

Karen Heuman Parry
Director of Customer Service

Agenda
National Technical Meeting
May 12-14, 1985

Sunday

8:00 pm - 10:00 pm Wine and cheese get-together at hotel
(whose room to be determined later). Packets for
meeting will also be available.

Monday

8:30 - 9:00 Coffee and danish

9:00 - 9:30

General ERIC Reports

- 1) CERIC - state of ERIC
- NIE/Dept. of Education projects related
to ERIC
- 2) EDRS
- 3) Oryx Press
- 4) ERIC Facility

9:30 - 10:15

Clearinghouse Projects

- 1) ERIC/PS: ERIC Digests On-line
- 2) ERIC/TM: Workshop from AERA (they would like feed-
back on the early version of manual).
- 3) Others we should know about?

10:15 - 10:30

BREAK

10:30 - 11:45

Acquisitions (Lynn Barnett)

- 1) What records are kept, where, how long?
- 2) Scope overlap: How to decide if it's reasonably
yours. Guidelines like: source of document;
acquisitions list
- 3) Duplicate checking
- 4) Acquiring documents
- 5) Document preparation (mimeograph and dot-matrix copy;
natural sequence of related documents; missing covers
with useful information)
- 6) Selection procedures, e.g., What makes an analytic
worthwhile versus entering it only as one document?

CONCURRENT

User Services (Lynne Smarte/Judy Wagner)

- 1) Sending materials but not people to conferences: Is
it worth it? Other ways to reach conference-goers
- 2) User services products: finding and compensating
authors and reviewers
- 3) Is anyone downloading search results and supplying
disks instead of paper? If so, what's the procedure?
- 4) TM's new service called "Pathfinders" (search
strategy assistance)

12:00 - 1:30

Group lunch

3158

1:45 - 3:15

Data Processing (Mary Frenza)

- 1) Using micros for indexing/abstracting
- 2) Editing and proofing
- 3) Remembering manual searchers
- 4) Writing CIJE annotations (Penny Demo/Fran Lehr)
They have done this before and it's about time to do it again.

CONCURRENT

User Services (cont'd)

- 1) Doing SOC workshops unfunded
- 2) Dealing with questions beyond ERIC, e.g., other appropriate databases; using micros to search. Share prepared materials (ERIC/HE has developed some).
- 3) Marketing ERIC

3:15 - 3:30

BREAK

3:30 - 4:00

Microcomputers: General Problems

4:00 - 5:00

Microcomputer User Groups

A chance to share how you use your micros for acquisitions, processing, user services, publications, whatever. Come with sample records, etc. Printouts of little utility programs you're using might be what another clearinghouse needs to avoid reinventing the wheel. Also be prepared to share successes and failures.

ERIC Staff Turnover -- Request for Statistics

During the past year, the ERIC Clearinghouses have lost an unusual number of veteran staff. Additional turnover of experienced individuals is projected during the next few months. We are concerned, because the loss of such staff tends to result in a generally higher level of problems in virtually all areas of acquisitions and processing.

In order to get a grip on the magnitude of the problem, each Clearinghouse is requested to send their monitor a list of the staff that have left their Clearinghouse during the past 18 months. For each individual listed, record the area in which the person worked and the number of years of experience in working for ERIC.

...Jim Prevel (Central ERIC)

PROCESSING ADVISORIES

NOTE Field in CIJE

The NOTE Field is occasionally being mis-used in CIJE. It was originally added as a CIJE field in order to house information about the availability of obscure "one-shot" journals and to keep other such non-subject information out of the annotations. Examinations of recent issues of CIJE reveal that it is being used in many instances to record non-essential information, e.g.: (1) information about some earlier document on which the present article is based; (2) information about volume discounts for multiple copies of article reprints.

Because of the large quantity of CIJE accessions, succinctness is a virtue in CIJE processing. Annotations are used in lieu of abstracts. Data elements are fewer in number. Large and flowery notes could adversely affect the present fine balance.

Therefore, please scrutinize your CIJE notes and ensure that they are used only for information that is significant and that would genuinely help the user comprehend (or obtain) the item. (This guidance will be added to the ERIC Processing Manual.)

...Ted Brandhorst (ERIC Facility)

"Quality" Journals and Their Coverage by CIJE

The January 1985 issue of College & Research Libraries (CRL) contains an article by David F. Kohl and Charles H. Davis entitled "Ratings of Journals by ARL Library Directors and Deans of Library and Information Science Schools" (p. 40-47).

The article is of interest to ERIC because certain of the high-rated journals are not currently covered by CIJE.

The journals in question are listed below. IR (Pamela McLaughlin) is taking this opportunity to review the following titles:

- Journal of Library History, Philosophy, and Comparative Librarianship
- Collection Management
- Harvard Library Bulletin
- Reference Services Review
- Library Acquisitions: Practice and Theory
- Micrographics Today
- Law Library Journal
- International Journal of Law Libraries
- Library of Congress Quarterly Journal
- Public Libraries

The identification of "quality" journals occurs periodically in every field. While the above list is relevant primarily to IR, other Clearinghouses should be alert for such reviews occurring in their own fields of specialization and should take the opportunity to make sure that the "best" journals in their field are covered by CIJE.

NETWORK NEWS

Egyptian National Scientific and Technical Information Network (ENSTINET)

The ENSTINET Record Format Manual for Bibliographic Databases has recently been issued in an edition dated April 1985. This manual will be used in the generation of Egyptian bibliographic databases that will feed into international systems such as AGRIS.

It may be of interest to the ERIC network that the data elements described in the ENSTINET manual bear certain resemblances to the ERIC data elements because of Ted Brandhorst's involvement as a consultant for the contractor developing the system for the Egyptians. Another example of ERIC's influence on the development of information systems in the developing nations!

...Pat Brown (ERIC Facility)

ERIC Clearinghouse Use of Online Networks

At the recent ERIC National Technical Meeting, it was suggested that information be assembled on which online networks were being used by the ERIC Clearinghouses. Some Clearinghouses are beginning to send this information to the Facility, via the regular mail and via electronic mail.

It is suggested that any information provided follow the format below:

Example:

	<u>CH</u>	<u>NETWORK</u>	<u>ID</u>	<u>HOST</u>
Judy Wagner	CE	ADVOCNET	AV00003	ITT DIALCOM (System 50)
		The Source	BCD805	
Pam McLaughlin	IR	The Source	BCX248	
		ALANET	ALA0184	ITT DIALCOM (System 41)
Lynn Smarte	EC	Special Net	?	?

When all the returns are in, the Facility will compile the network information into a single summary table for Clearinghouse reference use.

...Pat Brown (ERIC Facility)

Down Under Version of ERIC Thesaurus

The Australian Council for Educational Research has recently published a modified ERIC Thesaurus especially tuned for indexing and retrieval of the educational literature of Australia.

Description: G.B. Lavender and M.S. Findlay. Australian Thesaurus of Education Descriptors. 1st Edition. 1984. 267 pages. 8½ x 11. Hardbound. ISBN 0-85563-385-9.

Prepared under the auspices of the Australian Education Council, and with the assistance of the ERIC Facility's Computer Systems group, the new Australian Thesaurus was adopted for the Australian Education Index beginning in February 1984.

The new Thesaurus offers a number of changes to the ERIC vocabulary. Among these are changes in spelling (e.g., Organisation, Behaviour, Counselling), new terms that give the vocabulary a particularly Australian flavor (e.g., Aborigines, Anglo Australians, Deschooling, Legitimation, Numeracy, TAFE Colleges), and deletions of "Americaneese" and other terms not likely to be used in an Australian context. (Note to VRG insiders: "Working Class" has a SN!)

The Thesaurus' Alphabetical Descriptor Display is formatted exactly like ERIC's (see Attachment 1). The ERIC Group Codes are retained, but there's no accompanying Descriptor Group Display. Rotated and Hierarchical Displays are conspicuously absent, too; we understand that these may appear in future editions.

The front matter of the Thesaurus is much like ERIC's, including schemes for educational/age-level Descriptors. Publication Type Codes are also listed, showing a nearly exact matching of the ERIC codes. All in all, this emulation of ERIC is very flattering and lends support for possible future cooperation among English-speaking countries in educational terminology development.

Availability: Australian Council for Educational Research
Distribution Services Division
P.O. Box 210
Hawthorn Victoria 3122
AUSTRALIA

Those of you who frequently process Australian documents may want to acquire a copy of this new Thesaurus. The price per copy is \$A39 (Australian dollars), plus a postage and handling charge of \$A2 (\$A30 per copy for orders of 5 or more).

...Jim Houston (ERIC Facility)

Kudos for HE Publications

Two publications from the Clearinghouse on Higher Education were cited in "Ten Best on Learning," a bibliography of essential sources for college instructors, written by Maryellen Gleason and appearing in College Teaching (v33 n1 1985). The two are: Improving Instruction: Issues and Alternatives for Higher Education, by Charles C. Cole (AAHE-ERIC Higher Education Research Report 4, 1982); "Teaching Problem-Solving and Creativity in College Courses," by Neal Whitman. The latter, an AAHE-ERIC Higher Education Research Current, appeared in the AAHE Bulletin (Feb. 1983). Two of the other ten items in the bibliography were also by ERIC/HE authors.

HE Briefs New NASEA "Clearinghouse"

Lynn Barnett met with a staff member of the Native American Science Education Association (NASEA) in March to discuss how a clearinghouse is set up. NASEA is collecting original curriculum materials for pre-college science and math. They want to organize the literature using ERIC descriptors and will eventually submit the material for RIE. Information on RC and SE was passed along. At this point there is no specific estimate of when documents will be ready for submission to ERIC.

ERIC Digests Online

The PS Clearinghouse has prepared a brief announcement outlining their plans to make an "ERIC Digests Online" file available via The Source sometime during 1985. The announcement is provided here as Attachment 3.

... Mima Spencer (PS)

SMEAC Information Reference Center Activities for 1984

The SMEAC Information Reference Center includes: (1) the ERIC Clearinghouse for Science, Mathematics, and Environmental Education (ERIC/SMEAC); (2) the Environmental Quality Information Reference Center (EQ/IRC) for water quality education and training; and (3) related activities. Through the work of these components of the SMEAC Information Reference Center, materials (print and non-print) and information were provided directly to over 90,000 individuals and agencies in 1984. Services were provided to persons in every state and territory in the United States and in 41 foreign countries.

The staff produced 23 fact sheets or digests and bulletins that were distributed to more than 70,000 people. They made presentations or provided workshops and exhibits for over 30 professional associations and other groups. They also produced over 20 publications of 70 pages or more in length. More than 200 people from the United States and other countries were involved in writing parts of these publications. Also, ERIC/SMEAC staff members published articles in professional journals distributed to over 300,000 people.

SO Names First Winner in Its Evaluation Card Drawing

In order to encourage ERIC/ChESS patrons to return evaluation cards on reference sheets and digests they had ordered, ERIC/ChESS instituted a drawing to be held semi-annually. The person whose name is drawn from all returned cards in a six-month period is awarded either \$50.00 in ERIC/ChESS publications or a customized computer search. Our first winner, drawn in January 1985, was Marilyn Shepard, Materials Specialist, Flinthills Instructional Materials Center, Emporia, Kansas. Ms. Shepard chose \$50.00 worth of publications, and wrote a letter of thanks which appeared, in part, in our ERIC/ChESS newsletter, KEEPING UP, in March. Our next drawing will be June 1985.

...Lynn Parisi (SO)

ERIC Bibliography on Bilingual Education Prepared for NABE Conference Packet

The Clearinghouse on Urban Education recently prepared a short bibliography of RIE and CIJE citations on bilingual education for the National Association for Bilingual Education. The bibliography was included in a conference packet given to the 2000 participants at the Association's national conference in San Francisco on March 12-16, 1985.

Barbara Wildemuth (TM) Says Farewell to ERIC After Many Years

"With mixed feelings, I am preparing to leave ERIC. I have accepted a teaching assistantship at Drexel's College of Information Studies, and will begin teaching a course on 'Information Management Tools' this summer. I am looking forward to the opportunity to focus on my doctoral program, but at the same time I feel sad at leaving the ERIC family. My personal and professional contacts with all of you have made my life richer, and I will try to continue keeping track of ERIC from outside the system. Farewell."

...Barbara Wildemuth (TM)

Staff Changes at ERIC/CJE

The Clearinghouse on Urban Education is happy to welcome several new staff members. Mercedes Alicea began work in October as a Senior Information Specialist. When she is not busy tracking down documents, Mercedes pursues work on a doctoral degree in international educational development at Teachers College, specializing in music and music education. In November, Carolyn Riehl joined the staff as an Editor/Writer. A doctoral student in educational administration at Teachers College, Carolyn's previous experience includes having been editorial assistant to a literary agent, coordinator of a medical school teaching program in ethics, and high school English teacher. Joan Friedman started in January as a part-time Secretary; she is also a full-time student in the Department of Languages, Literature, and Social Sciences at Teachers College.

All of us at ERIC/CUE were sad to say farewell in December to Georganne Chapin, who had been on the staff since 1978 and was the "jack-of-all-trades" for RIE/CIJE processing. Georganne left to take a position as Assistant to the President of New York Medical College, and reports that although she likes her new job just fine, she misses talking to Carolyn Weller on the phone. We're glad to report that Christine Grove, former abstractor, has assumed the duties of Editor, Rob Nixon has become the new Abstractor (a job he shares with Karen Hornick), and Dharma Chinapen is now the RIE/CIJE Processor.

HOW TO USE THE AUSTRALIAN EDUCATION THESAURUS

1. Read the introduction carefully.
2. "Translate" your topic into subject index terms (descriptors).
3. Look up the descriptors.
4. Read the scope notes.
5. Look at the terms under your descriptors.
6. Make a list of the other terms that could have been used for the same concept.
7. Look up those terms and repeat steps 4-6.

MICROsearch: Extending the ERIC Database to Microcomputers

by Donald P. Ely

ERIC can now be searched through microcomputer diskettes—with some limitations.

Microcomputers first found their way into schools for administrative purposes. Later, instructional applications were introduced under the banner of computer literacy. More recently, school librarians have found that microcomputers can be used for cataloging and circulation purposes. The use of these same devices for information storage and retrieval purposes in the library offers yet another application.

Many educators know that ERIC (Educational Resources Information Center) is a major source of information for the field of education and the associated social sciences. Many people also know that nearly one-half million items in ERIC can be searched online with a computer or microcomputer terminal connected to commercial database search services. What many people do not know is that ERIC can now be searched on microcomputer diskettes.

Of course, one-half million items cannot be squeezed onto a 5¼" diskette, but about 200-300 can—and if these items are current, focused, and easy to use, we have discovered MICROsearch, a microcomputer-based information storage and retrieval service that makes portions of the ERIC database available to microcomputer users. MICROsearch permits direct search of selected parts of the ERIC database without using a telephone connection. The purpose of this article is to describe the functions and use of MICROsearch.

Background

In 1981, the National Institute of Education noted the rapidly expanding use of microcomputers in the schools and

Donald P. Ely is director, ERIC Clearinghouse on Information Resources, School of Education, Syracuse University, Syracuse, NY 13210

wanted to explore the feasibility of using these new instruments to further disseminate ERIC. An additional objective was to increase awareness of ERIC through another medium beyond the normal print publications *Resources in Education* and *Current Index to Journals in Education* and the commercial database search services. Several stipulations were placed on the study: (1) the Apple II+ microcomputer was to be used since it was in extensive use in the schools at that time; (2) one disk drive was deemed desirable since many schools were limited to one-disk operating systems; and (3) the target audience was end users in educational settings—school library media specialists, teachers, and students (not online searchers).

The Current Configuration

MICROsearch requires an Apple II+, IIe, III (with emulator), or Franklin ACE 1000 with a minimum of 48K RAM, Apple DOS 3.3 operating system, and one disk drive. A printer is useful but not essential.

The most appropriate function MICROsearch can serve is as a current awareness tool in particular subject areas.

The software consists of the MICROsearch program disk and a variety of database diskettes that have been downloaded from the ERIC tapes. Each database diskette contains 200-300 bibliographic records. Each record includes accession number, author, title, journal citation, and indexing terms. Abstracts have been omitted due to the limited storage on the diskettes. In addition to the files containing the bibliographic rec-

ords, each diskette contains the basic index (which consists of single words from the title, descriptor, and identifier fields), author index, and descriptor index.

The Search Program

MICROsearch has been designed for use by those without training or experience in online searching. It uses a formatted screen which guides the user through the process of a search. In a search mode, the screen is divided into upper and lower sections. The upper part of the screen displays the last term entered and kept and also the total number of "hits" retrieved (Figure 1). Below this are 2 lines: (1) the search term line (FIND) and (2) the decision line (KEEP?). When a user begins the search routine, the system automatically begins with the search term line and moves in a circular fashion through the decision line back to the search term line. Single words entered after FIND are searched in the basic index, multiple words are searched in the descriptor index. To search for authors, single word descriptors, or major descriptors, the prefixes AU=, DE=, or DE*= are required. Simple truncation is also available.

Figure 2 illustrates the use of the command line (AND/OR/SHOW/BEGIN/END). The commands NOT and RX (for RE-EXECUTE) are also available (RX was included to compensate for the limited range of the 5¼" diskette when additional diskettes are used). The system stores the original search term and the logical operator for up to 10 search terms. Records for citations in TOTAL may be displayed on the screen (using the SHOW command) and may be sent directly to the printer.

The decision line (KEEP?) permits the searcher to decide whether or not to keep the results of the last search statement. A third possibility is offered by the VIEW function. Before the user keeps

or rejects a set for new search terms, it is possible to see an abbreviated version of the citation on the lower portion of the screen. The VIEW function brings title and authors to the screen and permits the set to be modified by keeping or rejecting individual titles. Upon termination of the VIEW function, the effect of the selections upon the temporary total (TEM) is returned to the screen, and the user is given a final opportunity to keep or reject the results.

Copyright © 1984 by The Oryx Press

Figure 1

LAST TERM ENTERED	TOTAL
	XXXXX
FIND --> COMPUTERS	32
KEEP? Y/N/V	TEM 32
.....	

Figure 2

LAST TERM ENTERED	TOTAL
COMPUTERS	32
AND/OR/SHOW BEGIN/END ?	
FIND -->	
KEEP? Y/N/V	
.....	

The bottom half of the screen is also used for a HELP function to display 7 brief instructions without referring to the manual.

The Database Diskettes

It is not possible to describe MICROsearch without considering the limitations of the 5 1/4" diskette. By the time space is reserved on each diskette for the necessary inverted files, there is only limited room (i.e., 200-300 records per disk). Obviously, it would not be possible to download the entire database to diskette. The most appropriate function MICROsearch can serve is as a current awareness tool in particular subject areas. For example, the input of one quarter's new citations in the area of Educational Technology or Library/Information Science will fit on 2 diskettes. The ERIC Clearinghouse on Information Resources now offers a subscription to each of the 2 areas (Educational Technology and Library/Information Science) at \$6.00 per disk. Each quarter, there are 2 disks for each area. Anyone who wants to be current in library/information science could review the 2 disks each quarter and retain them for further use. They could also be printed and serve as a current bibliography. Of

course, they could be reused once they have served their purpose. Other special diskettes on "Computer Literacy" and "Selection and Evaluation of Computer Software and Hardware" are also available at \$6.00 each.

MICROsearch for Teaching Searching

One of the unexpected outcomes of MICROsearch's availability has been its usefulness in teaching searching. The use of a relatively small, focused database with a simple program, which leads a user through the steps of searching, offers an inexpensive and satisfying approach to begin the process. Practice in using the Boolean operators without a set of complex rules provides a first step toward independence in the search process. The on-screen instructions reduce the need for delving into a manual at the point of specific need. There is a manual that points out some of the special features of MICROsearch and helps a person who wants more information than a simple "what to do next." The self-contained package is inexpensive and can be used endlessly without concern for telephone charges and computer connect time. For these reasons, MICROsearch has become a useful training tool for individuals who want to experience simulated online searching.

Summary

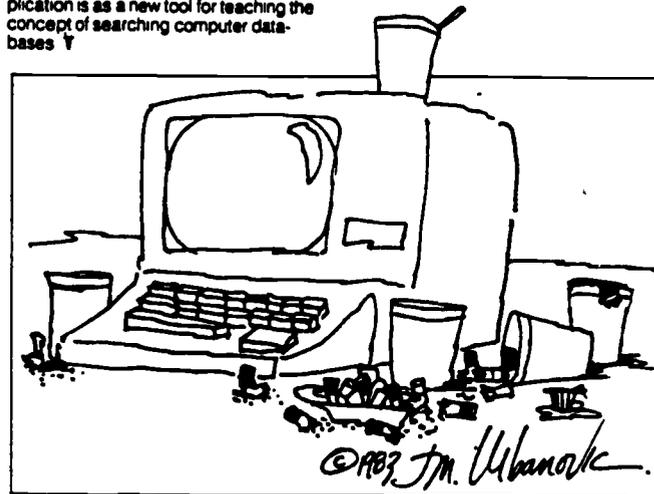

MICROsearch, with its formatted screen and focused, subject-oriented database diskettes, does show promise of fulfilling its goal of extending the ERIC database to microcomputer users as a current awareness service. Another application is as a new tool for teaching the concept of searching computer databases.

... Garfield

are charged \$85 an hour for a 15-minute search, yet they scream and holler about SCI because it is selling at \$150 an hour but requires only 5 minutes to search. They don't look at what they get for the results of their search. The average search on SCI is \$7. The hourly charge is completely deceptive. If you go in and out in one minute and get what you want, it doesn't matter.

Grade/Target Age Group: Grade 10-
adult
Subject: On-line search emulator with
data base
Hardware Required: Apple II + , IIe,
IIc; 1 disk drive, DOS 3.3; printer
recommended
Cost: \$20 demonstration set; \$7.50 per
disk for updates

Reviewed by: Eric S. Anderson,
Librarian, Dakota Community Unit
201, Dakota, IL 61018

The desire to give kids the opportunity to do on-line searching is usually overridden by the tremendously high cost involved. First you pay for a password, and then, everytime you connect, the meter is running. Ma Bell's take must also be added in. For those in metropolitan areas served by TeleNet (and other such money-saving devices), the long distance charge may be less, but the connect time is still substantial. *MICROsearch* is a very sensible alternative.

A single program disk is accompanied by data disks which are updated on a quarterly basis. The program emulates a basic ERIC search with and/or/not operators and provides for ending truncation. You may search the basic index, and author or descriptor indexes. Major descriptors may also be indicated for the strategy.

In performing a *MICROsearch*, you enter a term, have the temporary result number of "hits" displayed and decide whether or not to keep them displayed. You may decide to keep the results, or view them and keep only the ones you want. You may then throw in an "and / or /not" limiter if you care to, and enter another search term. The total hits are then recalculated and you choose whether or not to keep the results. If you run through all of the records on one data disk, you may save the same strategy and search it on other data disks as long as the strategy is no longer than 10 terms.

Search results can be displayed on the screen or printed out with great flexibility. The user may print all records, print an individual record, print a range of records in either descending or ascending order, or print the short form of the record in the same manner. The manual is well done, serves as a good introduction to searching, and clearly illustrates program function and operation.

For a very reasonable \$20 you get the program disk, the manual and one data base disk of your choice. There are five data bases available, and the records come downloaded from the ERIC data base. Quarterly updates are available and back orders are available for \$7.50/disk. Data bases available are Educational Technology, Library/Information Science, Computer Literacy, Micro Hardware/Software Evaluation and Selection, and Basic Skills.

You will find two uses for *MICROsearch*. If you can't afford all the charges involved in searching, you nevertheless can teach students some search skills they can certainly use when they get to college. You won't be able to do it all, but I can see the face on some college librarian's face when the lowly little freshman walks up and asks, "Where are your search terminals?" I also intend to use the update service to keep up on the literature (albeit limited because of the ERIC-only nature of the data disks) from my outpost out here in the cornfields. If you can't afford the high cost of searching, at least there is a limited solution.

Publisher's Reply

I am very pleased that *The Computing Teacher* is running Eric Anderson's review of *MICROsearch*, especially since ERIC/IR indexes your journal for *Current Index to Journals in Education* (CIJE).

One paragraph may be confusing to some. The Educational Technology and Library/Information Science data bases are updated quarterly, with disks available from 1982 to the present. The Computer Literacy, Micro Hardware/Software Evaluation and Selection and Basic Skills disk are special disks created from the entire ERIC data base and do not have updates available at the present time.

MICROsearch
—A Brief Description—

Background

In 1981 the National Institute of Education awarded a contract to the ERIC Clearinghouse on Information Resources at Syracuse University to conduct feasibility studies to see if some advantage could be taken of the proliferation of microcomputers in schools to further disseminate the ERIC database. The equipment specified for the study was the APPLE II Plus microcomputer with Apple DOS 3.3 operating system and one disk drive. Out of this project came MICROsearch, a microcomputer program which is used to search the contents of specially prepared diskettes containing small subject-related segments of the ERIC database.

Equipment Required

MICROsearch requires an APPLE II Plus, IIC, IIE, III with Emulator or Franklin ACE1000 microcomputer with a minimum of 48K RAM, Apple DOS 3.3 operating system, and at least one disk drive. A printer is useful, but not essential.

The Search Program

MICROsearch has been designed for use by those without training or experience in online searching. It uses a formatted screen which guides the user through the process of a search. A simple set of aids is available online and these are supplemented by a 34-page manual. Searching may be done on authors, on words in the title, and on descriptors (keywords taken from the Thesaurus of ERIC Descriptors) or identifiers. It is possible to use three logical operators, AND, OR and NOT, as well as right-hand truncation. A VIEW feature allows the user to screen the titles and authors of items found and discard any that are not of interest. A Re-execute feature permits a search to be automatically rerun on subsequent database diskettes without having to reenter the search terms. It is possible to display items retrieved on the screen and/or to have them printed.

Database Diskettes

Each database diskette contains between 200-300 bibliographic records in a particular subject area selected from Resources in Education (RIE) and Current Index to Journals in Education (CIJE). Each record includes Accession Number, Author, Title, Journal Citation, Descriptors, and Identifiers. (Abstracts have been omitted due to limited storage on the diskettes.) In addition to the files containing the bibliographic records, each diskette contains the Basic Index (which consists of single words from the title, descriptor, and Identifier fields), Author Index, and Descriptor Index.

ERIC MICROsearch ORDER FORM

MICROsearch is available in two basic forms:

1. The DEMONSTRATION SET. It serves to acquaint users with MICROsearch, as well as to teach the concepts of online searching, computerized information retrieval, and search strategy. It contains:

- Program Diskette
(Includes the search program plus programs to print the contents of the database diskettes.)
- Database Diskette (Choices listed below)
- User Manual

2. The SUBSCRIPTION SERVICE. This service is provided for those who want to do end-user searching of the ERIC database in the subject areas of Library/Information Science and/or Educational Technology. As a subscriber, shortly following the previous quarter you will receive disks containing the most recent ERIC input in your chosen subject area. Database disks can be obtained starting in 1982.

All users will need the level 3.5 program disk (released May, 1983) and a manual to search any of the database disks:

.....

DEMONSTRATION SET

• Please send ___ MICROsearch demonstration sets at \$20.00 each. _____

Choose one database per set:

- ___ Educational Technology ___ Library/Information Science
- ___ Computer Literacy (March '83) ___ Basic Skills (June '84)
- ___ Microcomputer Hardware/Software Evaluation and Selection (June '83)
- ___ Resources for Library Instruction (Dec. '84)

INDIVIDUAL ITEMS

• Please send ___ Database disks at \$7.50 each. _____

ANNOUNCEMENT

ERIC DIGESTS ONLINE: NEW FULL TEXT DATABASE FOR EDUCATORS

ERIC Digests Online, a full text database of short topical reports on education, is being developed by the Educational Resources Information Center (ERIC) with funding from the National Institute of Education (NIE). Each Digest, approximately 1000 words in length, provides information on an education-related topic. Among the titles to be included in the new file are "Academic Freedom," "Dismissing Incompetent Tenured Teachers," "The Effects of Corporate Involvement in Education," and "Improving the Mathematical Skills of Minority Students."

ERIC Digests Online is expected to be available later this year through ED-LINE on The Source, an online information service. The file will be searchable by menus and/or key words.

A cooperative effort of Central ERIC and the 16 ERIC clearinghouses, development of the Digest file is being coordinated by the Clearinghouse on Elementary and Early Childhood Education. To receive sample Digests and a partial list of titles, contact project manager Mima Spencer at the above address.

WORKSHOPS/CONFERENCES/MEETINGS

CH	DATE	LOCATION	STAFF	COMMENTS
HE	Jan. 28, 1985	Washington, D.C.	Lynn Barnett Marilyn Shorr	<p><u>Education Policy Forum Sponsored by AERA-IEL Attended By HE</u></p> <p>Marilyn Shorr and Lyn Barnett represented ERIC/HE at an Education Policy Forum sponsored jointly by the American Educational Research Association and the Institute for Educational Leadership (AERA-IEL) on January 28, 1985, at the Library of Congress. The topic was "Conditions of Excellence in Higher Education: Implications for Federal Policymaking," and the speaker was Dr. Kenneth Mortimer of Penn State University, who is chair of the NIE Study Group on the Conditions of Excellence in American Higher Education. Approximately 50 people were in attendance, representing various federal offices, associations and Congressional staffs. In addition to being a lively meeting, the gathering allowed ERIC staff to make themselves visible to legislative and federal professions.</p>
HE	March 15, 1985	Chicago, IL	Lynn Barnett Marilyn Shorr	<p><u>HE Presents Workshop on Online Searching at ASHE Annual Meeting</u></p> <p>Marilyn Shorr and Lynn Barnett, accompanied by a professor and a graduate student from Pennsylvania State University, presented a 2 hour workshop at the annual meeting of the Association for the Study of Higher Education (ASHE) in Chicago on March 15, 1985. The workshop served to introduce faculty, researchers, and graduate students to online searching. Our Penn State colleagues spoke of their own experience using ERIC as a resource, and emphasized the need for planning search strategies when working through a library staff person. Handouts included information on searching with microcomputers, comparative information on different data-bases, etc. One of the participants was impressed enough to want us to conduct the same workshop for her graduate students in the fall.</p>
HE	March 18, 1985	Chicago, IL	John Fife Lynn Barnett Marilyn Shorr Laura Casal	<p><u>AAHE Conference Meeting Stimulates Ideas</u></p> <p>HE sponsored a two-hour meeting at the annual conference of the American Association for Higher Education on March 18, 1985, that once again was extremely beneficial. Guests included college professors, administrators, and researchers who might not otherwise get together. The 10 guests provided outstanding ideas for promoting IAP author visibility as well as the status of ERIC and its acquisitions projects.</p>

WORKSHOPS/CONFERENCES/MEETINGS

CH	DATE	LOCATION	STAFF	COMMENTS
SO	April 14-19, 1985	Irsee Bavaria W. Germany	Irving Morrissett	<p><u>Citizenship Education — International Conference Attended By SO</u></p> <p>Irving Morrissett, Director of SO, participated in a conference on citizenship education of German and American youth, at Irsee, Bavaria, West Germany, from April 14 to 19. The conference was sponsored by the (U.S.) Center for Civic Education and co-sponsored and hosted by the (West German) Bundeszentrale für Politische Bildung. Papers presented and topics discussed included problems and methods of citizenship and law-related education, attitudes of youth about responsibilities toward their nations, and problems of delinquency. The 15 American participants included persons involved in citizenship and law-related education from several federal agencies and Congressional staff members. All of the English-language papers will be entered in ERIC by SO.</p>
SO	March 28-30, 1985	Cedar Rapids, IA and Denver, CO	Staff Members	<p><u>SO Attends Regional Conference</u></p> <p>ERIC/ChESS staff members exhibited materials at two recent regional social studies conferences: the Great Lakes Regional Social Studies Conference, held in Cedar Rapids, Iowa, March 28-30, and the Rocky Mountain Regional Social Studies Conference in Denver, Colorado, April 17-19. Lynn Parisi, SO's Coordinator of User Services, conducted sessions entitled "Keep Your Courses Up-to-Date With Databases" at both conferences. These sessions focused on ERIC as a case study in social studies-related databases accessible by personal computer users. Other SO staff, Cindy Cook and Kay Cook, assisted at the ERIC booth at the Denver conference.</p>
SO	April 8, 1985	Boulder, CO		<p><u>Foreign Visitors to SO</u></p> <p>Three African educators visited the SO Clearinghouse on April 8: Ibrahim Drammeh, Assistant Director of Education, Gambia; Vincent E. Bua, Director of the National Curriculum Development Center, Uganda; and William Chileshe, Head of the Social Studies Department of Curriculum Development Center, Zambia. The visitors were taking part in the "Teaching about American" program, an international educational exchange program sponsored by the United States Information Agency.</p>

CH	ERIC CLEARINGHOUSE PUBLICATIONS
HE	<p>The following HE Digests are now available:</p> <ul style="list-style-type: none"> ● Part-Time Faculty ● Student Stress: Effects and Solutions ● Public Service in Higher Education <p>The following books were recently released by ERIC/HE in the ASHE/ERIC Higher Education Research Report Series. They are available from the Association for the Study of Higher Education, One Dupont Circle, Suite 630, Washington, D.C. 20036 (\$7.50 each, 10% discount for any 15 books, 20% discount to bookstores):</p> <ul style="list-style-type: none"> ● <u>Sex Discrimination Law In Higher Education: The Lessons of The Past Decade.</u> ASHE/ERIC Higher Education Research Report No. 4, 1985 by J. Ralph Lindgren, Patti T. Ota, Perry A. Zirkel, and Nan Van Gieson. 71 pp. <p>This book clarifies the obligations of colleges and universities under existing laws prohibiting sex discrimination. Two parts discuss developments in the law relating to sex discrimination against employees and against students. The final part identifies three practical and cost-efficient strategies for complying with the law.</p> <ul style="list-style-type: none"> ● <u>Faculty Freedoms and Institutional Accountability: Interactions and Conflicts.</u> ASHE-ERIC Higher Education Research Report No. 5, 1985 by Steven G. Olswang and Barbara A. Lee. 74 pp. <p>This publication includes four major sections: (1) academic freedom and tenure, (2) emerging institutional responsibilities and accountabilities (financial reductions, effort reporting, outside consulting, conflict of interest), (3) institutional regulation of faculty freedoms (full-time performance, student interaction, sexual harassment, scientific misconduct patent/copyright ownership), and (4) faculty performance, accountability, and periodic review. Includes recommendations for the institutional environment, faculty morale, etc.</p> <p>Barbara A. Lee is a member of the NIE Study Group on the Conditions of Excellence in American Higher Education.</p> <ul style="list-style-type: none"> ● <u>The High-Technology Connection: Academic/Industrial Cooperation for Economic Growth,</u> by Lynn G. Johnson. ASHE-ERIC Higher Education Research Report No. 6, 1984. 112 pages. <p>This publication examines the "high-tech" connection in which colleges/universities and industrial firms are joined in cooperative efforts to stimulate technological change. Takes into consideration the major spheres of academic/industrial cooperation, the primary mechanisms of interaction, and some of the most significant emerging problems and opportunities.</p>

- Increasing Science Achievement for Disadvantaged Students (No. 25). Describes recent indicators of student achievement in science and science career choices; discusses the effects of race and class, classroom factors, and counseling on achievement; and suggests strategies to increase science involvement among disadvantaged students.

NDN Technology Directory Published by ERIC/CUE

With funding from the U.S. Department of Education, the "The Technology for the National Diffusion Network (NDN) Project" operates under the auspices of the ERIC Clearinghouse on Urban Education. Recently the Project published Technology Programs That Work, a directory of over forty NDN programs that make effective use of technology for educational management, communication, and instructional purposes. Michael Webb, Associate Director of ERIC/CUE, was editor of the directory. Copies are available for \$3.50 (\$3.00 for 10 or more) and can be obtained from NDN through the Clearinghouse on Urban Education.

Two new monographs have been published in the Urban Diversity Series (UDS) from ERIC/UD:

- Safe Schools, Sound Schools: Learning in a Non-Disruptive Environment, by Dora Schriro (UDS #89). This paper examines the extent of school violence and develops an analytic framework in which order and discipline are by-products of a sound educational program.
- Beyond Angel Island: The Education of Asian Americans, by Sau-Lim Tsang and Linda C. Wing (UDS #90). In this well-documented report, the authors present data on the educational attainment of Asian Americans and analyze three major reasons for the high level of success.

ACTION ITEMS

Distributing Products to Other Clearinghouses

We would like to remind Clearinghouses that it is to everyone's advantage that each Clearinghouse, whenever possible, send copies of its products (IAPs, Digests, etc.) to all of the other Clearinghouses. Besides keeping us well informed about the program, it provides material for use in booths, answering questions, etc. Please remember, also, to send one copy of each product to the ERIC Facility for the "ERIC Clearinghouse Products Archival Collection."

...Kevin Arundel (Central ERIC)

Processing ERIC Digests for the ERIC Database

ERIC Digests have proven to be such an effective and handy information item that we want to enter Digests into the database. The following guidelines are to be used when entering Digests into RIE.

1. The printed version of the Digest should be entered into the database.
2. Each Digest is to be a single accession and indexed accordingly.
3. Since Digests are Clearinghouse-originated publications, each one should be assigned Pubtype 071 and the minor Identifier "ERIC Digests" (note the plural form).
4. Each Digest should carry the ERIC disclaimer and ERIC logo.
5. One copy of each Digest should be forwarded to the ERIC Facility for the "ERIC Clearinghouse Products Archival Collection" (in addition to the 10 sent to the CERIC monitor).

...Kevin Arundel (Central ERIC)

PROCESSING ADVISORY

Schedule for the Shipment of Documents

Clearinghouses are reminded that the RIE Master Schedule calls for shipments of documents to be made no later than the Friday of each week. The Friday shipping day was selected so that documents would be in transit over a weekend, thus utilizing to best advantage the time ERIC is not working and ensuring that documents would arrive at the Facility early in the following week. In recent weeks, the Facility has noticed that postmarks are frequently bearing a Monday date instead of a Friday date, indicating that shipments are not leaving the mailroom of the Clearinghouse or its sponsor organization until after the weekend. Clearinghouses are requested to work with their mailroom staff and to ensure that the pickup for either the Post Office or UPS is actually done on Friday as the schedule requires.

...Al Hill (ERIC Facility)

SEARCHING ADVISORIES

"DIALOG Version 2" Enhancements

Three ERIC Facility staff members -- Joanna Eustace, Jim Houston, and Carolyn Weller -- recently attended one of the free seminars currently being offered by DIALOG on "DIALOG Version 2." All agreed that the seminar is worthwhile and that any searchers in the network who have the opportunity to attend one would find it helpful. Among the enhancements (for detailed information, see the Technical Memos that come with Chronolog) are:

1. Using suffixes on S-numbers, E-numbers, and R-numbers to increase the searcher's flexibility in designating sets

Examples ss s3/ti,de -- ss e4/de,id
2. Distributed suffixes or prefixes

Example: ss (therm? or heat?)/de,id
 ss cs=(general(w)electric or ge)
3. New options for restricting sets and search terms (e.g., by language, date of publication, etc.)

Examples ss s9/eng
 ss s3/eng,1982-1984
 ss s12/maj,eng
4. New proximity operators

(n) for Near (i.e., without regard to sequence)
(not w)

Examples ss mail (ln) order
 ss pc (not w) jr
5. Maximum number of sets increased from 98 to 200 -- however there will be no more warnings when you are approaching the limit.
6. Maximum number of characters in a proximity string increased from 50 to 240 characters.
7. Maximum number of items in all sets increased from 1 million to 2 million. Again the limit warning will no longer be present.
8. New options in print command as well as new layout formats.
9. The limit feature /ed or /ej, which was not present for a time, has now been fixed. (See following article, this EAB.)
10. LOGOFF HOLD guarantees 10-minute hold of last search.

As part of DIALOG 2, all databases are gradually being reloaded to the file. As the databases are reloaded, bluesheets will appear in Chronolog and searchers are instructed to get rid of the old bluesheets as they will no longer be valid. ERIC has yet to be reloaded. It is our understanding that when it is, the "wrap-around problem," which causes some false drops, will be eliminated.

A few warnings or cautions --

- a. Searching using the symbols "+," "-." or "*" has been discontinued on DIALOG 2.
- b. If you search in a database that has charges for typing citations online, be careful when you use "type 7/5/all" or "type 7/5/1-150" (or any large quantities) as you will be billed for all of the citations even if you hit the Break key and stop after several have been printed out because you decide you can't use them.
- c. Search results -- Print command. DIALOG 2 puts a hold on Print commands for two hours. After that it is impossible to cancel them. If you order a search and you haven't received it within a reasonable amount of time, contact them immediately. Tapes with Print orders are retained for only two weeks -- after that you would have to rerun the search. All Print requests are being assigned transaction numbers that can be used for cancelling or making inquiries.
- d. Search saves -- Permanent search saves incur a monthly charge of 10¢ per command line, plus 20¢ -- the trainer recommended that you string your commands (selects) together as much as possible in order to reduce the cost. Temporary search saves have no storage cost; they are held for 7 days and then they are automatically erased. To execute search saves on DIALOG 2, you no longer have to enter the period (.execute). The June Chronolog also provided instructions on how to label a search save.

DIALOG 2 has had the normal glitches attendant on system changes and will probably encounter others as it puts the above enhancements into effect. Clearinghouse searchers are urged to forward any problems they encounter to the Facility -- Attention Ted Brandhorst. As the tape supplier, the Facility has a good working relationship with DIALOG and has worked with them in the past to ensure fixes are made as soon as possible. Any glitch that will require some time to fix will be reported in the EAB.

...Carolyn Weller, Jim Houston, and
Joanna Eustace (ERIC Facility)

3214

DIALOG 2 Restores "/ED" and "/EJ" as Limit Qualifiers

In response to several letters, including one from the ERIC Facility, DIALOG has corrected a feature in DIALOG 2 that was considered by reviewers to be regressive rather than progressive. The change involves restoring the capability of using the "/ED" and "/EJ" limit qualifiers that had served so well in DIALOG 1. Attachment 1 is the response from DIALOG that announces the change.

The Clearinghouses are urged to examine DIALOG 2 carefully, as it pertains to ERIC, and to let the Facility know about features that in their opinion should be changed.

...Ted Brandhorst (ERIC Facility)

'USER SERVICES ADVISORY

DIALORDER

ERIC searchers should be aware that DIALORDER is not currently available on "DIALOG Version 2" -- the new enhanced searching system that is gradually being introduced to DIALOG users. Searchers needing to order from EDRS and who wish to order online must conduct their search on DIALOG Version 1 (the old system).

For searchers accessing DIALOG via Uninet, as of July 4, the only version available to search is now DIALOG 2. This means that searchers must either switch to Dialnet, Telenet, or Tymnet if they wish to order via DIALORDER. Their only other alternative is to order directly from EDRS.

Dialog does not have an estimate of how long it will be before DIALORDER is available on Version 2. When it is available, it will be announced in Chronolog. Apparently DIALOG is having problems programming DIALORDER within the framework of DIALOG 2. After DIALORDER is available on DIALOG 2, "old" DIALOG 1 will be phased out entirely.

...Carolyn Weller (ERIC Facility)

3215

NETWORK NEWS

ERIC Fact Sheet (July 1985)

The ERIC Fact Sheet has been slightly revised to bring totals up to date as of mid-1985. A copy appears as Attachment 2. Please duplicate it as needed.

...Jim Prevel (Central ERIC)

Access To ERIC Database Via CD-ROM Compact Disc Demonstrated at ALA Conference (Chicago, July 5-9, 1985)

A CD-ROM disc containing CIJE Resume data for the period January-June 1984, inverted file indexes to the same set of resumes, and a newly-written body of retrieval software, was demonstrated at the recent ALA Annual Conference.

The demonstration went well. The prototype retrieval system performed very well while revealing the occasional "bug" that will gradually be eliminated. Response time was generally good. As later discs get loaded more to capacity, it will be interesting to see what happens to the response time.

The flyer prepared for the demonstration appears as Attachment 3. ORI would welcome Clearinghouse suggestions as to the best and most useful way to group the data on the discs. The maximum capacity of one disc (allowing for indexes and retrieval software) is about 10 years of RIE data. How would you like to see it organized? PIE and CIJE data together or separate? Last two years, three years, or five years on the most recent disc?

...Ted Brandhorst (ERIC Facility)

3216

Directory of ERIC Information Service Providers

The Facility has begun work on a new Directory of ERIC Information Service Providers that will combine the contents of the two existing directories dealing with "Microfiche Collections" and "Search Services". Attachment 4 is the letter we are using to solicit information from the service-providing population. We have asked each of the online vendors to include our request for information in their respective newsletters.

We would be grateful if the Clearinghouses could help to circulate this request to likely ERIC service-providers that may not have been in the previous directories.

...Ted Brandhorst (ERIC Facility)

ERIC on Dialog

We have been informed by DIALOG that they have updated their retrieval software to incorporate the new Publication Type codes (101 and 171) recently added by ERIC and to structure the Journal Citation data (see example) so that it relies entirely on the "JN" field for journal publication date and does not repeat data unnecessarily from the separately searchable Publication Year ("PY").

Example: JN American Education, v14 n10 p37 Dec 1978

~~1978~~ ^{Removed}

...Ted Brandhorst (ERIC Facility)

ERIC Online Usage Rankings

Information Market Indicators (IMI), the product of Martha Williams' Infometrics Company that attempts to determine online usage by database, is no longer subscribed to by NIE and therefore cannot be summarized by the Facility, as we have done in the past. We have, however, obtained a copy of the front matter to the Winter 1985 Issue #6. This issue (covering the third quarter of 1983) makes the following statements pertaining to ERIC:

"The first 4, MDC, NLM, CAS, and ERIC are in exactly the same order as in Q283. These 4 have been in exactly the same position for 4 quarters running; prior to that New York Times had been in 4th and ERIC was 5th, but since NYT's announcement that it would cease operating as a vendor its usage dropped drastically until the actual cessation in July of Q383." (p.6)

"Databases are ranked by time in Table 8. The first four, LEXIS, MEDLARS, CA Search, and ERIC have remained in the top 4 for 6 quarters running, but CA Search and ERIC changed places with CA Search assuming the no. 3 position..." (p.9)

...Ted Brandhorst (ERIC Facility)

3217

ERIC-Related Advertising in Oryx Catalog

The new Oryx Catalog is just out and the ERIC-related products (e.g., CIJE, RIE cumulations, RIE/CIJE microfiche) are described on p. 27-28. These pages can be useful in responding to reference inquiries involving the Oryx products and we reproduce them here for your convenience as Attachment 5.

...Joanna Eustace (ERIC Facility)

European Online Centers

Five major European online retrieval and referral centers have banded together in a request for information that has been directed at various database generators. A copy of the request directed at ERIC is reproduced as Attachment 6.

The ERIC Facility has sent each of the five centers a package of standard ERIC handout material, including sample RIE and CIJE issues. The ERIC Clearinghouses may be interested in sending these centers some of their more specialized Clearinghouse handout materials.

...Joanna Eustace (ERIC Facility)

ERIC Microfiche Collection Available from The Network, Inc.

An ERIC microfiche collection dating from the beginning of 1966 through 1982 is being offered for sale by The Network, Inc. The collection is being offered as currently housed in metal storage cabinets, at a price that is approximately 45% of the cost for a new set for the same period. The price is negotiable and may be paid across an 18-month period. The complete description of the collection and the offer is provided as Attachment 7. The Network has asked if the ERIC Clearinghouses could help to circulate their offering.

...Al Hill (ERIC Facility)

Australia Announces New Education Thesaurus

The Australian Thesaurus of Education Descriptors has been announced by the Australian Council for Educational Research (ACER) in their Apr85 newsletter. ACER has also distributed an order form for this publication. The newsletter article and the order form are both included as Attachment 8.

This new Thesaurus is an adaptation of the ERIC Thesaurus. A description appeared in the May/June85 EAB.

...Jim Houston (ERIC Facility)

ERIC Aquisitions Arrangements List Update

The ERIC Acquisitions Arrangements (EAA) List has been updated and the changes are included here as Attachment 9. A total of 52 additions, changes, and deletions have been made based on Facility information and forms sent to us by Clearinghouses.

The list of changes is arranged in alphabetical order by organization name and follows the same form as the November 1984 List. A change in an arrangement is shown by a percent sign (%) and an arrangement which has been removed is marked with an "X". All other entries are additions to the previous list.

The November 1984 EAA List should be updated by changing, adding, or deleting entries as necessary in alphabetical order. In regard to the distribution of complimentary microfiche, two changes should be made in the "Names and Addresses for Selected Contributor Contact Points and Authorizers" Section of the List. Alberta Education (EFAA #123) has had an address change and the Peace Corps (EFAA #118) wishes to be added to the List. The correct addresses for these organizations are given in Attachment 10.

In order to keep the List as current and informative as possible, changes will continue to be issued in this way via the EAB until the overall volume of changes warrants a completely revised list. The Facility Acquisitions staff appreciates the cooperation of the Clearinghouses in submitting changes to their arrangements as they occur, so that the List will continue to be a useful tool for all components of the ERIC system.

...Joanna Eustace (ERIC Facility)

Databases Used -- Top 40

The July 1985 issue of Online contains an article by Fred Chatterton and Jeff Penberton entitled "The Online Professionals -- Who Does What... The Marquis/Online, Inc. Project." On p. 23 there is a table ranking (by number of users) the top 40 databases reached online. This table is reproduced as Attachment 11. ERIC appears in this table as #4, with 1326 users (out of those who responded to this particular survey). The ranking of fourth corroborates the data received earlier from the Infometrics Inc. survey, wherein ERIC was also ranked fourth among databases searched online.

...Ted Brandhorst (ERIC Facility)

3219

Duplicates and Other Types of Removes from RIE Input — Statistics for 1980-1985

Displayed as Attachment 12 is a table containing the statistics for duplicates and other types of documents removed from RIE input for the years 1980-85.

The average number of duplicates per issue has increased from about 6 per issue in the 1980-82 time frame to about 10 per issue in the 1983-85 period. Of continuing concern is the fact that one-third of the duplicates were "self-duplicates," i.e., duplicates of the Clearinghouse's own input. An analysis of the first 6 months of the 1985 input reveals that while 9 self-duplicates were of items submitted more than a year ago, only 3 regular duplicates (of another Clearinghouse's input) were more than a year old. Since Clearinghouse input for the first 6 months of 1985 was about 100 below the same period in 1984 (with the Practice File excluded), it would appear that the trend in duplicates is stabilizing. However, a decrease would be desirable.

The number of documents removed for other reasons has nearly tripled (from approximately 20 to 60 per issue). This is cause for serious concern. With staff turnover higher, and the amount of time available for adequate training limited, Clearinghouses appear to be finding it more difficult to keep up the quality of their document processing.

The implications of the statistics are self-evident. Your assistance in reducing especially the number of "other removes" would be greatly appreciated.

...Carolyn Weller (ERIC Facility)

ERIC/CAPS Director Garry R. Walz and ERIC/CAPS Consultant Libby Benjamin Win Publications Award

CAPS Director Garry R. Walz and consultant Libby Benjamin, former CAPS Associate Director, received the 1985 Publications Award from the Association for Counselor Education and Supervision, a division of the American Association for Counseling and Development (AACD). The award recognizes ten years of outstanding contributions to publishing in the field of counseling and counselor education. It was presented at the annual AACD Convention April 2-5 in New York City.

...Debbie Herbert (CG)

Acquisitions and User Services Staffs at EC Cooperate

ERIC/EC is using feedback from reviewers of user service products to alert acquisitions staff of documents worth soliciting. Specifically, we use outside experts to review the searches that will become our "computer search reprints." When the reviewers send us additional relevant references that did not appear in the ERIC printout, we pass these on to the acquisitions folks.

...Lynn Smart and Dorothy Beling (EC)

3220

Clearinghouse Hosts NIE Director of Planning

On Thursday, May 2nd, the Clearinghouse was host to Mr. Tom Carroll of NIE, Alan Moorehead, Acting Head of Central ERIC, and Kevin Arundel, Project Monitor. The purpose of the visit was to familiarize Mr. Carroll with the workings of a clearinghouse and its various functions. To aid in this process, Don Erickson gave a general orientation; Dorothy Beling explained the database with its various components; Jean Nazzaro talked about the continuum of services through different kinds of publications; Lynn Smarte described the various services provided to people either by phone or written request. In addition, Susan Elting gave an overview of the various affiliated projects ongoing--how they are interrelated and how they differ. After these sessions, Mr. Carroll was given a tour of the facilities and samples of all the literature on ERIC.

...Don Erickson (EC)

Representation at ERIC Technical Meeting

As part of the User Services session at the ERIC Technical Meeting, I provided information on and handouts from two workshops that I had recently given for 60 Standing Order customers and other ERIC users in Florida and Georgia. Copies of the workshop needs assessment form and the workshop invitation are included in this EAB as Attachments 13 and 14.

At the beginning of the workshop, attendees were asked to fill out a checklist dealing with ERIC Awareness. Responses from the 20 attendees, all of whom were clearly experienced ERIC users, are tallied on Attachment 15. Here are a few other suggestions received from the workshop participants:

- o Put ERIC Digests in the database.
- o Identify in RIE those ERIC Documents which will also be available in government document depository collections.
- o Use the Marquis Directory of Online Professionals to locate people who should be invited to ERIC workshops.
- o Provide a rotated Identifier Authority List (IAL).

...Lynn Smarte (EC)

FL - New Location

The ERIC Clearinghouse on Languages and Linguistics is now settled into its new surroundings and is ready for business. In case you missed it the first time, the new address is 1118 22nd Street, N.W., Washington, D.C. 20037. The new phone number is 202-429-9292.

...Laura Wenzel (FL)

3221

American Association of University Professors (AAUP) Links Up With ERIC

In another joint venture, the Clearinghouse on Higher Education has coordinated several activities with the AAUP--an enticing relationship due to AAUP's large size: 70,000 members. The October issue of RIE will contain 48 collective bargaining agreements that have been carefully gathered by the AAUP office from their individual chapters. These will provide an excellent source of data on many faculty and governance issues.

At the recent AAUP annual meeting in Washington, Lynn Barnett staffed an ERIC exhibit and conducted a workshop for AAUP members interested in searching ERIC. A followup workshop is tentatively scheduled for December. Other ERIC-AAUP activities under discussion include Thesaurus additions and possible joint publications. AAUP already provides us with complimentary advertising space in its monthly journal.

...Lynn Barnett (HE)

CERIC/HE Brief OMB Budget Examiner

Prompted by an article in the Chronicle of Higher Education about the HE acquisitions project with the American Association of University Professors, a staff member of the Office of Management and Budget (OMB) contacted Central ERIC about ERIC selection guidelines for RIE. Alan Moorehead, Pat Coulter, Jon Fife, and Lynn Barnett met for two hours with Bayla White of OMB on July 15 at HE. CERIC and HE were pleased to take advantage of the opportunity not only to explain ERIC's acquisitions policy, but also to brief Ms. White, who is the senior budget examiner overseeing NIE's and therefore ERIC's budget, on problems facing ERIC. She was cordial and receptive to our comments on staff turnover, salaries, general acquisitions and outreach problems, overall Clearinghouse budgets, the desirability of an 800 telephone number, and travel funds for sharing ERIC technical expertise with foreign governments that ask for assistance. She left us with no promises, but it was nice to see someone at that level of the Federal government take an interest in ERIC.

...Lynn Barnett (HE)

Kudos for HE Publications

Overheard at the Annual Meeting of the American Association of University Professors -- Passerby 1: "It would be good to spend some of the AAUP chapter money on the ASHE-ERIC Reports to put on faculty reserve." Passerby 2: "Yes, and if we don't have enough money, I'll get some from the university research office."

...Lynn Barnett (HE)

EDPRESS Workshop Yields Good Ideas

In June, Lynn Barnett attended the annual workshop of the Washington Education Press in Washington, DC, where presenters were full of tips for producing more marketable publications. This continues to be a workshop well worth attending.

...Lynn Barnett (HE)

Fife Serves as Visiting Scholar at University of Nebraska

Dr. Jon Fife of HE spent two days in June at the University of Nebraska as a distinguished visiting scholar for the School of Education, during which time he met with faculty, administrators, and graduate students about current issues in higher education.

...Lynn Barnett (HE)

Financial Aid Packets Available from HE

Laura Casal has prepared a packet of information useful for responding to inquiries from users about sources of student financial aid for college students. Copies have been sent to user services coordinators at all Clearinghouses, but if more are needed, contact Laura via electronic mail (MultiLink).

...Lynn Barnett (HE)

Searching Down Under

HE was pleased to host Elizabeth Oley of the Australian Council for Educational Research in May when she visited Washington, D.C. After asking for details on how our documents are processed, she discussed with us the Australian Education Index, which is now online and accessible from the U.S. We're eagerly awaiting searching instructions so we can try it out as a possible source for acquisitions!

...Lynn Barnett (HE)

ERIC Thesaurus Gets Around

The Clearinghouse on Higher Education recently lent a copy of the ERIC Thesaurus to the Academy for Educational Development (AED), located in Washington, so as to enable AED to identify appropriate Descriptors to use (in combination with its own) in compiling a core collection of "development communication materials."

...Lynn Barnett (HE)

Databases in Education

Paying tribute to ERIC as one of the pioneers in the online field, Bonnie Gratch's article "Information Retrieval Technology in Education," Journal of Educational Technology Systems, 13(4), 271-280, presents a comprehensive list of databases and vendors that deal with the literature of education. Please see Attachment 16 for a copy of the article.

...Pamela W. McLaughlin (IR)

3223

"Library Technology Reports" Studies Online Vendors

The January-February 1985 issue of Library Technology Reports (v. 21 no. 1) is devoted to an article by William Saffady entitled "Availability and Cost of Online Search Services." This article is a lengthy comparative study (112 p.) of the costs of supplying online search services. The ERIC database is used as an example throughout the report. Costs for "typical" searches of ERIC, LISA, PSYCINFO, and COMPENDEX are provided, based on services with annual volumes of 250 searches and 1,000 searches, respectively. See Attachment 17 for a copy of the relevant LTR issue title page.

...Pamela W. McLaughlin (IR)

PERSONNEL

ERIC Facility Staff Changes

Edith Ritter Retires

This summer has been a time of staff changes in the Facility's Editorial Department: At the end of July, Edith Ritter, a part-time editor, who has given such professional dedication to her work that her colleagues thought of her as a "full-timer," retired. Edith, as most RIE processing personnel know, was, in addition to being a first-rate editor, the delightful person at the other end of the phone who coordinated all the duplicates, removes, transfers, and priority documents that accompany each issue. We wish her a happy and well-deserved retirement.

Debbie Burk Becomes a Bridal Shop Owner

Also at about the same time, Debbie Burk, a full-time senior editor, purchased a bridal shop in Silver Spring, Maryland. While relinquishing her full-time status, she will continue working as a part-time editor for a period of time during this period of staff transition. We all wish her well in her new endeavor; she will be greatly missed.

Helen Wilson Returns

Returning on a part-time basis to the Facility at the end of July was Helen Wilson, who has worked for the Facility in the past and who will be familiar to many Clearinghouse staff.

..Ted Brandhorst (ERIC Facility)

3224

Staff Changes at ERIC/CS

Elaine Lutz has recently been hired as a Research Assistant, replacing Bruce Wood.

Debbie Fox joined the Clearinghouse on June 3, and is being trained to take over Craig Hollingsworth's duties as User Services Specialist. Craig resigned his position to move to Chapel Hill, NC, in mid-June.

...CS

Secretary Position Open at ERIC/FL

FL has announced an immediate opening in their Clearinghouse for a secretary. The job is full-time (35 hours/week) and will pay in the range of \$14,000-\$15,500, depending on qualifications. Clearinghouses are invited to refer possible applicants to Dr. John Clark, the FL Director (202-429-9292).

...FL

Staff Changes at HE

We are pleased to announce that, after seemingly endless years of fewer and fewer people, at long last HE has a new staff member. Dianne Alston is the new voice on the telephone as the Clearinghouse secretary. She comes to us from a position on campus in the George Washington University Office of Career Development.

On another note, Lisa Hoogstra, our publications coordinator, is leaving mid-August to pursue a Ph.D. in psychology at the University of Chicago. Her self-taught computer skills will be missed after being crucial for several years. Lisa's successor is Christopher Rigaux, who will leave his job as bookstore manager and join HE on August 1. He is from Indiana and is a graduate of Notre Dame University and the George Washington University graduate-level Publications Program. His bookkeeping and marketing skills and general enthusiasm will serve us well.

...Lynn Barnett (HE)

INFORMATION SERVICES INC
3460 Hillview Avenue
Palo Alto CA 94304
(415) 858 2700 TELEX 334499

August 1, 1985

Ted Brandhorst, Director
ERIC Processing and Reference Facility
4833 Rugby Avenue, Suite 301
Bethesda, MD 20814-3073

Dear Ted:

In response to your June 14th letter, you will be pleased to learn that we have finally implemented /ED and /EJ as limit qualifiers in the ERIC file on DIALOG 2. They are now available for searching.

Both of these qualifiers may be used with the SELECT command as well as the LIMIT and LIMITALL commands. When used with the SELECT command, individual terms, E or R numbers from the EXPAND list, or set numbers may be qualified with /ED or /EJ, e.g.

```
SELECT CHILDREN/ED,MAJ  
SELECT S1-S3/ED      (implied OR between S1,S2,S3)  
LIMIT 6/EJ
```

There is another difference. If you wish to restrict to either ED or EJ sections of the file AND also to a particular accession period, then, the appropriate accession number range should be used, e.g.

```
LIMIT S1/EJ123456-EJ999999
```

I believe the implemented changes will serve the needs of the ERIC searching community. If you have further questions about these changes, Sophie Hudnut, the DIALOG 2 Specialist in Customer Services, can assist you.

Sincerely,

A handwritten signature in cursive script, appearing to read 'C. Bourne'.

ERIC Fact Sheet*

I. USAGE STATISTICS (ESTIMATED)**

A. Institutions in U.S. Providing Access to ERIC Products	3,269
B. Usages of ERIC Resources (Annually)	2.7 million
C. ERIC Bibliographic Records Retrieved in Searches and Provided to Clients (Annually)	30 million
D. Annual Expenditure by Institutions to Support Distribution of ERIC Resources to Users	\$26 million
E. Total Annual Expenditure for the Development, Distribution, and Use of ERIC Resources in U.S. (only 4.1% provided by the Federal government)	\$136 million

II. ABSTRACT JOURNAL SERVICES

A. Resources in Education (RIE)

1. Subscriptions (primarily libraries)	2,000
2. Documents Announced in RIE	
a. Monthly (Average)	1,200
b. Annually (Current Level)	14,000
c. To date (1966 through December 1984)	240,323
3. Documents Evaluated Annually for Possible Announcement in RIE	35,000

B. Current Index to Journals in Education (CIJE)

1. Subscriptions (primarily libraries)	1,800
2. Journals Covered	760
3. Journals Articles Announced in CIJE	
a. Monthly (Average)	1,500
b. Annually (Current Level)	18,000
c. To date (1969 through December 1984)	305,036

* Many of the statistics reported here are constantly changing and therefore have been rounded rather than made exact as of any one day.

III. DOCUMENT REPRODUCTION SERVICES

A. Microfiche Collections

- | | |
|--|-----|
| 1. Organizations Currently Subscribing to Complete ERIC Microfiche Sets (including approximately 90 foreign) | 725 |
| 2. Organizations Offering Significant ERIC Microfiche Collections for Public Access | 779 |

B. Titles Filmed (less than 5% of current document input is copyrighted)

- | | |
|----------------------------|--------|
| 1. Monthly (per RIE issue) | 1,150 |
| 2. Annually | 13,500 |

C. Microfiche Cards Delivered Per Subscriber

- | | |
|----------------------------|--------|
| 1. Monthly (per RIE issue) | 1,600 |
| 2. Annually | 19,500 |

D. Sales (from ERIC Document Reproduction Service (EDRS))

- | | |
|---|------------|
| 1. Microfiche Sold on Subscription (Annually) | 16,000,000 |
| 2. On Demand Document Orders Processed Annually (MF and PC) | 50,000 |
| 3. Total Individual Document Orders Through 1980 (543,886 for microfiche; 503,938 for paper copy) | 1,047,904 |

IV. DATABASE SEARCHING SERVICES

- | | |
|---|----|
| A. Subscriptions to ERIC Magnetic Tapes (via ERIC Facility) (including 10 foreign and all major online vendors) | 30 |
|---|----|

- | | |
|---|-----|
| B. Locations Offering Computer Searches of ERIC Files (estimated) | 700 |
|---|-----|

V. REFERENCE SERVICES (NON-COMPUTERIZED)

A. Inquiries/Questions Answered Annually

- | | |
|------------------------|--------|
| 1. ERIC Facility | 4,000 |
| 2. Clearinghouses (16) | 50,000 |

VI. MISCELLANEOUS STATISTICS

A. Thesaurus Descriptors (as of 10th Edition, 1984)

- | | |
|--|-------|
| 1. Main (Indexable) Terms | 5,086 |
| 2. Synonyms | 3,856 |
| 3. "Dead" terms (valid at one time, but no longer) | 134 |
| 4. Total Terms | 9,076 |

- | | |
|---|--------|
| B. Identifiers (as of Identifier Authority List, December 1984) | 36,500 |
|---|--------|

- | | |

| C. Information Analysis Products (IAPs) Produced by ERIC Clearinghouses (1967-1984) | 4,275 |
|---|-------|

- | | |
|--|--------|
| D. Organizations/Institutions Represented by Documents in the ERIC Database (Source Directory) | 27,600 |
|--|--------|

3229

The Educational Resources Information Center (ERIC) database is the national U.S. bibliographic database covering the literature of education. It is one of the most widely searched databases in the world. It is comprised of two separate files: (1) Resources in Education (RIE), handling the document and report literature, and (2) Current Index to Journals in Education (CIJE), handling the published journal article literature (as contained in over 775 major education-related serials/journals).

ERIC on compact disc

ERIC, available to the public for years on magnetic tape and on-line, will soon be available in an exciting new high-tech format—compact digital disc (commonly known as the CD-ROM disc).

The entire ERIC database will be provided on SilverPlatter™ compact laser discs, together with the hardware required to use the disc, the indexes providing access to the ERIC records, and powerful and flexible search software. For the first time, the ERIC database will be available in a totally self-contained, fixed-cost system for local use without connect or communication costs and under your direct control. In keeping with ERIC's long tradition of promoting low-cost dissemination of its information, this system has been especially designed to provide unlimited and economical searching for the entire educational community—policymakers, administrators, teachers, counselors, researchers, and students.

The ERIC database will be available on one or more archival discs that do not require updating (e.g., 1966–1975 and 1976–1985). Current year data will be contained on a separate disc that will be updated and issued on a quarterly basis. Each disc will be totally independent, containing the records, indexes, and software necessary for full use. The RIE and CIJE files will each be on separate discs.

Searching ERIC on compact disc

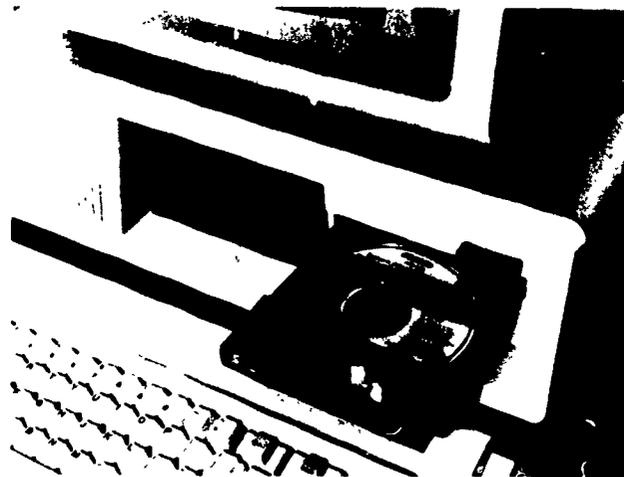

The *Resources in Education* (RIE) printed abstract journal contains indexes by subject, author, institution, and publication type. The *Current Index to Journals in Education* (CIJE) printed index journal contains indexes by subject and author.

Using the powerful and flexible search software incorporated into the ERIC database on SilverPlatter™ compact disc, you will be able to perform all of the search tasks available through the printed reference tools and most of the search tasks now possible on the major on-line systems such as DIALOG, BRS, and SDC. For example:

- **Search** both subject matter fields (descriptors, identifiers, words in title, words in abstract) and non-subject matter fields (author names, institution names, publication type, language, geographic source, target audience, etc.)
- **Browse** the dictionary of available index terms
- **Specify** output requirements using Boolean operators AND, OR, and NOT
- **Interact** with the system to adjust your requirements based on initial outputs at your workstation

More specifically the following features have been built into the SilverPlatter™ search program:

- **Full Boolean capability**—AND, OR, NOT
- **Search** for controlled index terms or words/phrases in full text, or both at once
- **Truncation capability**, allowing you to search all words having a common base prefix

- **Proximity Searching**, permitting you to specify that certain words must be adjacent or near one another in the field searched
- **Select and Display options**, allowing users to select from the output and print the selected items in the desired format
- **Context-sensitive help information**, contained on each disc to permit even first-time users to effectively conduct their own searches

Subscribing to ERIC on SilverPlatter™ compact disc

- Everything you need is provided with a single subscription workstation* (including keyboard, display monitor, compact disc reader, and microcomputer), compact discs (containing database, indexes, and search software), telephone Hotline support
- Your costs are fixed and fully identified up front. The ERIC database on SilverPlatter™ compact disc provides unlimited access within your predefined budget.
- A number of different SilverPlatter™ database subscriptions can be supported on the same single workstation*.

For further information

If you are interested in the ERIC database on SilverPlatter™ compact discs and would like to be kept informed of the availability and subscription costs as the product is introduced (early to mid-1986), please write or call the following address:

ERIC Database on SilverPlatter™ Compact Disc
c/o ORI, Inc., Information Systems Division
4833 Rugby Ave., Suite 301
Bethesda, Maryland 20814
(301) 656-9723

*Workstation is loaned to the subscriber with a nominal monthly charge for equipment maintenance.

SilverPlatter is a trademark and service mark of IMLAC Corporation.

DIRECTORY OF **ERIC** INFORMATION SERVICE PROVIDERS

REQUEST FOR INFORMATION FOR 1985 EDITION

Dear Colleague:

The ERIC Processing and Reference Facility has in the past regularly maintained and periodically published two directories to assist the users of ERIC:

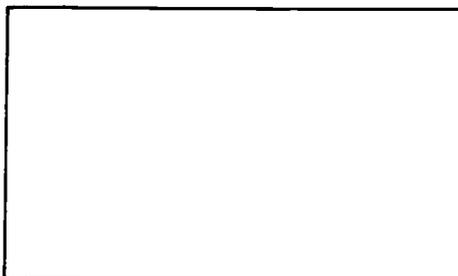

- (1) Directory of ERIC Microfiche Collections
- (2) Directory of ERIC Search Services

These two directories have been, since their inception, very popular reference tools, helping ERIC users to locate and gain access to ERIC microfiche collections and organizations providing ERIC search services in their geographic area that would otherwise have remained unknown to them.

The overlap between these two directories has gradually increased over the years and, therefore, ERIC has decided to attempt to merge them into a new combined Directory of ERIC Information Service Providers. It is envisaged that this new directory would contain entries for all organizations providing to the public significant information services relating to the ERIC database, e.g. maintaining an ERIC Microfiche collection; providing ERIC computer searches (either batch or online); subscribing to the ERIC abstract journals (Resources in Education and Current Index to Journals in Education) and other printed ERIC reference products; providing access to ERIC Clearinghouse Information Analysis Products, etc.

If your organization provides such services and would like to be listed in ERIC's new directory, we would like to hear from you and to receive some basic information about your organization and the ERIC-related services you provide. The basic information we seek falls into the following categories: name, address, telephone number (and other communications links), contact points, population served, equipment available, ERIC collection data, and services provided.

Attached is a blank form which you may use to communicate this information to us. If you would prefer to structure your own entry, a sample of how our entries will look is printed on the back of this letter. We would welcome your providing us with an already formatted description. To facilitate your response, if you had an entry in one of the existing ERIC directories, we are providing below a copy of that entry. You may wish to use it as a basis for providing updated information for the new directory. If you should receive two of our requests for information, please discard one of them. We have tried to eliminate duplicate mailings caused by the same organization being listed in both our existing directories, but may not have been completely successful.

We hope you will take the time to respond if you are an ERIC information service provider. All information (and any questions) should be sent to the address below:

Food and Nutrition Quarterly Index

The most complete and up-to-date source of nutritional information available, this index is produced in a quarterly format to allow users to find this information more quickly and conveniently than ever. It will index and abstract both print and nonprint materials in food, human nutrition, and food service management acquired by the USDA's Food and Nutrition Information Center (FNIC). Each entry indicates subject terms (Descriptors) and each quarterly volume provides a Main Entry Section plus a comprehensive indexing system including subject, title, personal author, corporate author, intellectual level, and media indexes. Coverage by the new **FOOD AND NUTRITION QUARTERLY INDEX** supersedes the annual volumes of the *Food and Nutrition Bibliography* (see p. 34). Volume 1 covers materials acquired by FNIC in 1985.

ISSN 0732-1171 / December 1985 / Quarterly / 208 pages / 8½ x 11 / Paperbound / Subscription rate: \$95.00 per year plus postage and handling

Current Index to Journals in Education (CIJE)

This monthly journal and its companion publications provide an array of reference resources that offer access to the vast world of educational literature. The material contained in these publications is collected and produced by specialists from the 16 clearinghouses of the Educational Resources Information Center (ERIC), a division of the National Institute of Education.

CIJE Monthly

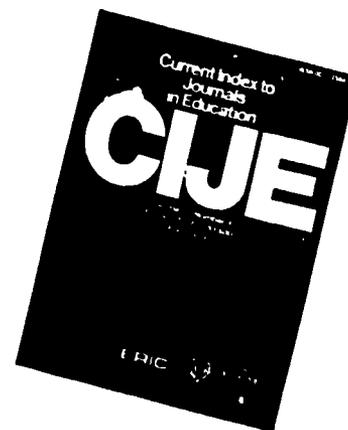

Offering the most timely and complete coverage of the periodical literature of education, each monthly issue of the **CURRENT INDEX TO JOURNALS IN EDUCATION** indexes an average of 1,500 journal articles from approximately 780 publications. Each entry includes complete bibliographic information and a thoughtful annotation written by an ERIC specialist. Access is facilitated by Subject, Author, and Journal Contents Indexes. No other publication offers the comprehensive coverage and incisive annotations contained in each issue of CIJE.

"... recommend'ed for any library serving teachers and educators."
—ARBA 85

ISSN 0011-3565 / 8½ x 11 / Paperbound / 1985 / Monthly
Subscription: \$175.00 plus postage and handling

Back issues available. Please call for further information.

3235

CIJE Semiannual Cumulations

To consolidate the valuable information contained in the CIJE monthly issues in a format more useful for permanent reference, The Oryx Press publishes the **CIJE SEMIANNUAL CUMULATIONS**. Twice a year six monthly issues are integrated into a single cloth-bound volume with cumulated Subject, Author, and Journal Contents Indexes.

1985 / Two Volumes / 8½ x 11 / Clothbound / \$175.00 plus postage and handling

Back volumes available. The back semiannual cumulations from 1979, 1980, and 1981 are now available on microfiche. Please call for details.

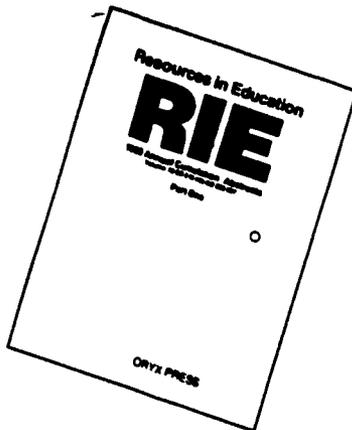

CIJE Author Index, 1969-1984

Now, access to 15 years of CIJE is made easy with this new searching tool. For further information, see the description on p. 6.

Order Toll-Free 1-800-457-ORYX 

**Resources in
Education (RIE)
Annual Cumulation**

This indispensable resource provides access to the world of educational report literature. RIE is a monthly abstract journal published by ERIC covering current educational research findings, technical reports, speeches, unpublished manuscripts, and books. The Oryx Press publishes the RIE ANNUAL CUMULATION to bring this valuable information together annually in three easy-to-use clothbound volumes. The entries in the two-volume Abstracts cite author, source, publication date, availability, and price of the original report as well as providing a clear 200-word abstract of the contents. The third volume (Index) provides titles and identification/accession numbers to the documents and report literature in cumulated indexes by subject, author, institution, and publication type, plus an ERIC clearinghouse number/ED number cross reference index.

ISSN 0197-9973 / June 1985 /
1984 Abstracts and Index /
Three Volumes / 2,160 pages /
8½ x 11 / Clothbound / \$225.00

Print editions of the previous Cumulations are available. All editions become available on microfiche when the clothbound issues are sold out. Editions published in 1979, 1980, and 1982 are available on microfiche. Please call for details.

**RIE/CIJE Microfiche
Cumulations and
Annual Updates**

The ERIC Clearinghouses also collect information for *Resources in Education* (RIE), the monthly ERIC publication that covers report literature (research findings, technical reports, speeches, unpublished manuscripts, and books). Its coverage, combined with the journal coverage offered by CIJE, brings the whole world of educational research together. Both are now accessible through these microfiche cumulations. Covering more than a decade of important educational literature (1966-1980) these CUMULATIONS offer ease of use and tremendous savings of space and storage. A combined subject index provides a completely integrated cumulation of all document and journal article titles, arranged by major descriptors and identifiers, using the latest ERIC vocabulary. You can keep your valuable RIE/CIJE MICROFICHE collection completely up-to-date through ANNUAL UPDATES which contain Main Entry sections for CIJE and RIE, an accumulated Fiche Index from 1966 to the present, along with the useful Combined Subject Index.

EUROPEAN ONLINE CENTERS

June 1985

Dear Sir/Madam,

In Europe there are at the moment five organizations in five different countries which act as an interface between the users in their countries and information providers, database producers or host organizations. These organizations do not act as information brokers, but give information and services to interested organizations and individuals. All organizations have been appointed by their respective governments to promote the use of online services in any possible way. We call ourselves online centres and we would like to introduce ourselves to you.

Going from North to South you find in Sweden the Swedish Diane Center, in Denmark the Danish Diane Center, in Britain the Aslib Online Information Centre, in the Netherlands COBIDOC and in Italy the Italian Diane Referral Center. Although there are slight differences between the various centres, we like to ask your attention for the services we can give to your organization. We are aware that you might already know some of the centres, but we consider it important that you know all the centres and that you are aware that all the centres can give information on your organization to the users in their respective countries.

In the first place we would like to be kept up to date on your activities; all the centres have a newsletter in which they publish new developments, new databases, news from hosts and database producers, seminars etc. In the second place we would like to have brochures and service agreements on your services to meet the demand from our users. We would also like to have information on seminars which you will be giving in the respective countries.

Since from time to time we get requests for demonstration of your services, we would appreciate if you could supply us with a demonstration password and if possible a manual or a short guide (database fact sheets and such) how to access.

Finally, we can help you in various ways in finding a market in our countries. We have listed our respective activities in an appendix, but we can e.g. assist you in the organization of training seminars, marketing days, mailings etc. As a national online centre we naturally have good contacts with users and potential users. For this kind of services please contact the respective centres, taking into consideration the profit or non-profit (promotional) nature of each of them. In the list of centres you will find contact persons; we would appreciate if you could let us know a contact person at your organization to ease communication between our organizations.

We hope you will get in touch with us and look forward to cooperating with you.

On behalf of:

Lilawee Kawafash

Description of Collection:

The collection dates from 1965 to 1982. The microfiche dating from August 2, 1965 to December 8, 1971 is currently being stored in boxes. The microfiche dating from December 9, 1971 to October 27, 1982 is stored in microfiche cabinets.

The collection has been used by our staff and, to a limited degree, by some of our clients. During the period when it received the most use (1979-1982), it was maintained by a librarian.

The Cabinets:

There are six storage cabinets. Five cabinets are identical, each has eight drawers. The outside measurements are 51 1/4" high, 19" deep, 41 1/2" wide. Each cabinet is blue, white, and orange, and has one lock.

One cabinet has five drawers; the outside measurements are 67 1/2" high, 18" deep, and 42" wide. It is white and does not have a lock.

Photographs of the cabinets are available upon request.

Price:

We have established a price of \$12,000 for the microfiche, but are willing to negotiate. (This represents approximately 45% of the cost to buy the collection new.) In addition, we would consider a payment schedule that extends over a period of up to 18 months.

The price for the storage cabinets is \$1,500 if sold with the collection and \$2,000 if sold separately.

Transportation and shipping charges are negotiable.

Terms of Sale:

The collection is available immediately. In the event that multiple parties are interested, we will accept the highest bid. All offers must be on an official organization form or letterhead and signed by an individual who is authorized to commit the institution to that amount of purchase.

The microfiche and cabinets are available for inspection at the address below. For an appointment contact:

Launching of The Australian Thesaurus of Education Descriptors

Dr Norman Curry, Director General of Education in Victoria and Chairperson of the Australian Education Council (AEC) Standing Committee, launched the *Australian Thesaurus of Education Descriptors* at ACER on 28 February.

Representatives from the education and library fields, members of the AEC Working Party on Information Retrieval Systems in Education, those involved in the production of the volume, members of the press, and representatives from library and online organizations and associations were invited.

The ACER was commissioned by the AEC in 1982 to develop an Australian Thesaurus suitable for indexing Australian educational literature. This Thesaurus was developed through a systematic revision of the *Thesaurus of ERIC Descriptors* (Oryx Press) developed in the USA. Geoffrey Lavender was seconded from the Secretariat of the AEC and worked with Margaret Findlay, former librarian at the ACER, preparing the Thesaurus. Subject specialists also participated in evaluating terms in their field of interest.

Until now education information retrieval services in Australia have used several different tools for indexing because there has been no standard controlled vocabulary of Australian educational terminology. The *Thesaurus of ERIC Descriptors* had been adapted for use in a number of Australian systems. These include the *Australian Education Index*, the National TAFE Clearinghouse, and the *Directory of Education Research and Researchers in Australia*. Often the changes made were inconsistent, so that terms used in one system could not be used in another.

As a result there was a need for a core thesaurus of terms suitable for indexing Australian educational literature. It would be based on the actual terminology of education in Australia, and be available widely for use in existing information retrieval systems and in the development of new services. Thesaurus updates will be announced from time to time in the *Australian Education Index*.

The *Australian Thesaurus of Education Descriptors* is up-to-date, accurate, and relevant to the literature of education in Australia today.

The Thesaurus helps all those interested in education to use a variety of education indexes, abstracts and computer-based information systems since it includes all the key words and phrases used about education in Australia. These key terms are used by indexers as subject headings, or 'descriptors', in information retrieval systems. To help find the required information, users can now look in the Thesaurus to identify the best subject headings to use when checking indexes and abstracts.

The *Australian Thesaurus of Education Descriptors* has been used for indexing in the *Australian Education Index* (AEI) (published quarterly with an annual cumulation) and the annual *Bibliography of Education Theses in Australia* (BETA) commencing with the 1984 volumes. Both AEI and BETA are available for online searching through the information system AUSINET.

Elizabeth Oley, ACER Librarian (above right) who completed publication of the *Thesaurus*, replacing Margaret Findlay, former ACER Librarian.

AUSTRALIAN THESAURUS OF EDUCATION DESCRIPTORS

Prepared by G.B. Lavendar and T.A. Findlay

If you are a teacher, librarian, student, researcher or administrator you will be able to get the information you need using the *Australian Thesaurus of Education Descriptors*.

The *Thesaurus* helps all those interested in education to use a variety of education indexes, abstracts and computer-based information systems.

The *Thesaurus* includes all the key words and phrases used when talking or writing about education in Australia. These key terms are used by indexers as subject headings, or 'descriptors', in information retrieval systems. To help find the information they want, users can now look in the *Thesaurus* to identify the best subject headings to use when checking the indexes and abstracts.

The *Thesaurus* contains the definitive vocabulary of education in Australia. Features include:

- actual terminology of education in Australia
- alphabetical display of all subject index terms (headings)
- extensive scope notes to clarify meaning and usage of terms
- full introduction and comprehensive explanatory chapters
- hard cover and sturdy reinforced binding designed to stand up to the continuous heavy use.

Until now education information retrieval services in Australia have used several different tools for indexing because there has been no standard controlled vocabulary of Australian educational terminology. The *Thesaurus of ERIC Descriptors*, a thesaurus devised for an information system operated in the United States, had been adapted for use in a number of Australian systems. These include the Australian Education Index, the National TAFE Clearing-

house, and the Directory of Education Research and Researchers in Australia. However, the changes made were often inconsistent so that terms used in one system could not be used in another.

As a result there has been a need for a core thesaurus of terms suitable for indexing Australian educational literature. It would be based on the actual terminology of education in Australia, and be widely available for use in existing information retrieval systems and in the development of new services.

This revision is now complete and procedures are being developed to ensure that the new *Thesaurus* is responsive to the changing nature and literature of education and to the indexing requirements of *Thesaurus* users. *Thesaurus* updates will be announced from time to time in the *Australian Education Index*.

The *Australian Thesaurus of Education Descriptors* is up-to-date, accurate and relevant to the literature of education in Australia today.

DEPARTMENT OF INFORMATION SERVICES
THE COUNCIL FOR EXCEPTIONAL CHILDREN

THE ERIC CLEARINGHOUSE ON
HANDICAPPED AND GIFTED CHILDREN

January 28, 1985

Dear ERIC Subscriber:

As we remind you from time to time, the ERIC Clearinghouse on Handicapped and Gifted Children (ERIC/EC) is officially designated as your liaison to the ERIC System. One of the responsibilities of a clearinghouse is to provide awareness and update training for new and experienced users of ERIC products and services. The purpose of this letter is to seek your input on 1) whether you would be interested in attending an ERIC workshop in your state this Spring, and 2) what topics you would like covered in the workshop.

In determining the needs at your institution, please share this letter with all appropriate ERIC Users, i.e. computer searchers, handlers of the ERIC microfiche collection, and those who assist patrons with the manual indexes Resources in Education and Current Index to Journals in Education.

If there is sufficient interest, two 5-hour workshops will be held: one in Florida (probably Orlando) and one in Georgia (probably Atlanta). There will be no registration fee, but ERIC cannot cover your expenses.

Please return the enclosed survey form to me by February 15 so that I can use your feedback in planning. If you run into problems mailing by that date, please give me a call at (703)620-3660 with your response.

I look forward to hearing from you.

Sincerely,

Lynn Smarte
Associate Director for User Services

THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

and

ATLANTA UNIVERSITY
SCHOOL OF LIBRARY AND INFORMATION STUDIES

invite you to attend a

WORKSHOP ON ERIC

WHEN: Friday, May 10, 1985
10:00 a.m. - 3:00 p.m.

WHERE: Atlanta University
School of Library and Information Studies
Trevor Arnett Building, Room 121
223 Chestnut Street, S.W. (Corner of Greensferry
and Chestnut streets)
Atlanta, Georgia 30314

HOSTED BY: Lorene B. Brown, Dean
School of Library and Information Studies,
Atlanta University

PRESENTER: Lynn Smarte, Associate Director for User
Services, ERIC Clearinghouse on Handi-
capped and Gifted Children

TOPICS:

- * Availability and effective use of ERIC print products (e.g. RIE, CIJE, Thesaurus of ERIC Descriptors, Identifier Authority List, other special indexes, etc.)
- * Availability and effective use of ERIC microfiche products (ERIC documents on microfiche; title, author, and subject indexes; special microfiche collections)
- * ERIC guidelines for indexing (assigning descriptors, identifiers, publication type codes, target audience indicators, etc.)
- * Online searching of the ERIC database
 - Effective search negotiation

- Effective search strategy design
- * Effective use of the Thesaurus of ERIC Descriptors
- * ERIC training products and tips (to help you teach end users about ERIC)

DO YOU NEED THIS WORKSHOP?

If you are wondering whether this workshop will be worth your time, ask yourself these questions:

1. Did you know that there is an ERIC Identifier Authority List which indicates the current number of postings and the preferred format for over 25,000 identifiers used to index ERIC documents and CIJE articles? Do you have a copy next to your Thesaurus?
2. Did you know that there is a Cumulative Clearinghouse Number to ED Number Cross-Reference List which enables you to convert from accession numbers assigned by clearinghouses to ED numbers?
3. Did you know that there are cumulative title, author, and subject indexes to ERIC available on microfiche?
4. Did you know that the entire ERIC database will soon be available for searching on microcomputers?
5. Are you on the mailing list to receive Interchange, the newsletter for ERIC subscribers?
6. When planning ERIC computer search strategies, do you know:
 - * that it's dangerous to limit education-level or age-level descriptors to majors?
 - * that you often should search "invalid" descriptors?
 - * how to use publication types and the target audience field effectively?
7. Did you know that each of the 16 ERIC clearinghouses has a user services coordinator and that clearinghouses not only collect but also produce special publications?

You may have learned something just by reading these questions. If you'd like to learn more about how to get the most from ERIC, join us for this informative workshop.

WORKSHOP FEATURES

- * Extensive handouts
- * Display copies of special ERIC indexes, directories, and clearinghouse publications for you to examine
- * Small group practice designing ERIC search strategies
- * Terminal available for demonstrations of effective search techniques and strategies and for experimenting with tough search topics that you have faced.

INTERESTED?

Just send in the enclosed Workshop Registration Form. The workshop is FREE, but you will need to bring a little money for lunch. Bring as many colleagues as you wish. Also please bring along questions you would like answered about ERIC and, if possible, one or more copies of the Thesaurus of ERIC Descriptors to use in practicing design of search strategies.

QUESTIONS?

For more information about the contents of the workshop, call Lynn Smarte at 703-620-3660.

For directions to the workshop location, call Lorene Brown at 404-681-0251.

NOTE: Although Ms. Smarte is from the ERIC Clearinghouse on Handicapped and Gifted Children, this is a general system-wide workshop on ERIC. If you do have a special interest in special education literature, she will be happy to highlight ERIC products and services in this area.

(Below are tallied responses from 20 experienced ERIC users)

Checklist of ERIC Awareness

1. Please check all applicable spaces to describe yourself:

	<u>never</u>	<u>several times</u>	<u>often</u>
A. I have used the ERIC print indexes (Resources in Education & Current Index to Journals in Education)	<u>0</u>	<u>1</u>	<u>19</u>
B. I have requested/ordered computer searches of ERIC (to be executed by someone else)	<u>10</u>	<u>7</u>	<u>3</u>
C. I have run ERIC computer searches myself	<u>0</u>	<u>10</u>	<u>10</u>

2. ERIC Print Products

For each of the following products, please note whether you knew it existed and whether you have access to a copy where you work.

	<u>I knew it existed</u>	<u>I have access to a copy</u>
A. Thesaurus of ERIC Descriptors	<u>6</u>	<u>19</u>
B. Identifier Authority List	<u>8</u>	<u>8</u>
C. Printed Title Index	<u>8</u>	<u>6</u>
D. Source Directory	<u>6</u>	<u>7</u>
E. Clearinghouse Number to ED Number Cross Reference List	<u>7</u>	<u>11</u>

3. ERIC Microfiche Products

	<u>I knew it existed</u>	<u>I have access to a copy</u>
A. Author Index (on microfiche)	<u>8</u>	<u>10</u>

--	----------	-----------

True False

5. When searching for references about a particular age group, it is a good idea to limit the age or educational level terms (e.g. secondary education) to major descriptors.	<u>6</u>	<u>14</u>
--	----------	-----------

1.

3264

6. How would you limit a search to research studies?
(No idea) (Some idea) (Aware of Publication Type)
7 4 9

7. How would you remove opinion or position papers from a search?
(No idea) (Some idea) (Aware of Type Codes)
7 4 9

8. How can you limit a search to documents written for parents?
(No idea) (Some idea) (Aware of Target Audience)
12 5 3

9. The current entry for RACISM in the Thesaurus of ERIC Descriptors - 10th Edition, 1984, is listed below. Would you need to include the term RACISM in a search on that topic? 6 Yes 10 No 4 No answer

RACISM (1966 1980) Mar. 1980
CIJE: 517 RIE: 352 GC: 540
SN Invalid descriptor - used for both actions and attitudes - see such descriptors as "racial discrimination" and "racial bias."

10. The current Thesaurus entry for ORTHOPEDICALLY HANDICAPPED is listed below. Would you need to include the term in a search on that topic? 6 Yes 10 No
Orthopedically Handicapped (1968 1980) 4 No answer
USE PHYSICAL DISABILITIES

Notes:

- o Even among these 20 experienced ERIC users, very few were familiar with Target Audience. (For what it's worth, less than 10% of all attendees had heard of the ERIC Practice File.)
- o Most of the experienced users did not understand that invalid descriptors still have to be included in search strategy.

INFORMATION RETRIEVAL TECHNOLOGY IN EDUCATION

BONNIE G. GRATCH
Bowling Green State University

ABSTRACT

Microcomputer technology has had a tremendous effect on the way information and research in education can be retrieved. Since the early 1960's and the availability of online computer search services of the ERIC database, about thirty U.S.-produced databases specifically oriented to educators have become available. Microcomputer technology makes direct access possible to these databases by anyone with a microcomputer, modem, and printer. Such direct access means that educators who have not had the opportunity to use library computer search services may now conduct their own online, interactive searches of the vast body of published literature and other products of educational research and practice. This article identifies and describes many of the educational databases and the information retrieval companies that offer information search services for educators.

Similar to most disciplines, online computer-based information retrieval systems of educational literature and products have sprouted up in great number during the last few years. Online searching implies two-way interactive and nearly immediate communication between a remote computer and a terminal or microcomputer. The field of education was one of the pioneers in online computer-based information retrieval with the development of the ERIC database in the early 1960's. Since then, however, hundreds of databases have been produced and are accessible through such information vendor companies as Lockheed's DIALOG Information Services and information utilities companies, such as The Source and CompuServe. Vendors are organizations that make remote databases available for online use. Information utilities are organizations which provide a variety of online services, such as information retrieval, electronic bulletin boards, shopping, and computing services.

272 / BONNIE G. GRATCH

Up until the last two years databases of particular interest to educational professionals were only available through libraries' or other organizations' computer search services. This type of indirect accessibility usually meant that a librarian or information specialist conducted the actual computer search. With developments in microcomputer technology and communications, however, most of the education-related databases are now available to microcomputer owners. All one needs in addition to the microcomputer is a printer and a modem, which is connected to a telecommunications network to interact in a conversational mode with databases stored in another computer.

There is also a much greater variety of databases available, although the great majority of databases can be classified as bibliographic or source. Bibliographic databases contain references to publications or materials. Source databases contain the information in full. Examples are directory-type databases, databases of stock quotations, and full-text databases with an entire encyclopedia or journal stored in computer-readable format.

Such convenient availability means that the educational professional, who may not have easy access to a library or other organization's computerized search services, may now perform his/her own searches. This is known as end-user searching. While there are still such barriers as cost and time spent in self-training, the exciting opportunities this technology offers are just beginning to be realized. It will probably take some time, however, for the impact of such convenient and direct access to information and research to funnel down to the busy educational practitioner. The trend, however, is for more and more educational professionals to use their home computers or their school's microcomputer to access information. The first step toward more end-user searching must be awareness; therefore, the following descriptions are presented of education databases and online searching organizations available to the personal computer user. For detailed information and accurate costs, readers are encouraged to write or call the online service organization. More information about equipment needed, procedures, searching examples, and a much more thorough coverage of databases and organizations, can be found in Carol Hansen's excellent book, *The Microcomputer User's Guide to Information Online*, published in 1984 by Hayden Book Company, New Jersey.

Many of these databases, such as ERIC, Exceptional Child Education Resources, and PsychInfo, are available through the less expensive information vendors, BRS Afterdark, Knowledge Index, or the information utility, CompuServe—all of which are described in the final section. A few are currently available only through the BRS Colleague Educator, a more expensive service, but designed for end-user searching. Virtually all twenty-nine of the databases in Table 1 can also be searched by a librarian or other information specialist in a public, academic, or special library.

Table 1. Education-Related Online Databases

<i>Database</i>	<i>Online Service</i>	<i>Producer</i>	<i>Description</i>
ABLEDATA	BRS Colleague Educator	National Rehabilitation Information Center	Lists of manufacturers, distributors and costs of over 6,000 rehabilitation aids and devices applicable to the disabled.
Abstrax	BRS Afterdark and Colleague	Abstrax, Inc.	References with brief abstracts to 400 popular and professional periodicals.
273 Academic American Encyclopedia	BRS Afterdark, Colleague and CompuServe	Grolier Electronics Publishers	Multi-disciplinary, full-text encyclopedia.
Bilingual Education Bibliographic Abstracts	BRS Afterdark and Colleague	National Clearinghouse for Bilingual Education	References and abstracts to bilingual/bicultural education and related topics from technical reports, state-of-the-art reviews, conference papers, program descriptions, dissertations, books, journal articles and classroom materials.
College Press Service	CompuServe	College Press Service	Current enrollment figures, campus housing patterns, faculty tenure disputes, etc.

51

Table 1. (Cont'd)

<i>Database</i>	<i>Online Service</i>	<i>Producer</i>	<i>Description</i>
Dissertation Abstracts	BRS Colleague Educator	University Microfilm	The definitive subject, title, and author index to virtually every U.S. dissertation accepted at an accredited institution since 1861.
ED-LINE	The Source	National School Public Relations Association	Current news and legislative information. (Corresponds to <i>Education U.S.A.</i>)
274 Educational Research Forum	CompuServe	Mid-Western Educational Research Association	Full-text of user-submitted articles for educational researchers, practitioners.
EPIE	CompuServe	Educational Products Information Exchange	Reviews of educational hardware and software.
ERIC	BRS Afterdark and Colleague, CompuServe, Knowledge Index	Educational Resource Information Center	References and abstracts to educational research and resources from journals and nonpublished sources.
ETS Test Collection	BRS Colleague	Educational Testing Service	Descriptions of over 5,000 standardized tests and research questionnaires.

Exceptional Child Education Resources	BRS Afterdark and Colleague, Knowledge Index	Council for Exceptional Children	References to English language print and nonprint materials dealing with the education of gifted and handicapped.
Language and Language Behavior Abstracts	BRS Colleague	Sociological Abstracts, Inc.	References and abstracts to the literature on the nature, use, and teaching of language.
Magazine Index	Knowledge Index	Information Access Company	References to the articles in over 400 popular magazines.
Medline	BRS Afterdark and Colleague, Knowledge Index	U.S. National Library of Medicine	One of the major sources of references to biomedical literature. One component of interest to physical education is the physical fitness/sports medicine subfile producer by the President's Council on Physical Fitness.
Mental Measurements Yearbook	BRS Afterdark and Colleague	Buros Institute of Mental Measurements	The on-line equivalent of some of the references to tests and reviews of tests in the series of <i>Mental Measurements Yearbooks</i> .
MENU (The International Software Database)	Knowledge Index	International Software Database Corp.	Lists commercially available software for any type of mini or microcomputer. Purchasing information is listed, and even software delivery is offered.

Table 1. (Cont'd)

<i>Database</i>	<i>Online Service</i>	<i>Producer</i>	<i>Description</i>
Microcomputer Index	Knowledge Index	Microcomputer Information Services	References to articles and software reviews in over 500 microcomputer journals
National Rehabilitation Information Center	BRS Afterdark and Colleague	National Rehabilitation Information Center, Catholic University	References to rehabilitation literature. Citations and abstracts to nonprint educational materials for all levels.
276 Online Micro-Software Directory	BRS Afterdark and Colleague	Online, Inc.	Descriptions and references to reviews of over 2,000 software packages for microcomputers.
Ontario Education Resources Information	BRS Afterdark and Colleague	Ontario Ministry of Education	Ontario's version of ERIC, references to all types of educational information produced in Ontario.
Peterson's College Databank	BRS Afterdark and Colleague, CompuServe	Peterson's Guides	Information and profiles of about 3,000 U.S. and Canadian colleges and universities.
Psychinfo	BRS Afterdark, Colleague, and Knowledge Index	American Psychological Association	References and abstracts to the world's psychological literature.

ONLINE DATABASE VENDORS

Databases included and prices change, so call or write to get the most current information.

BRS AfterDark, a special service of Bibliographic Retrieval Services, Inc., 1200 Route 7, Latham, NY 12110 (800) 833-4707 (518) 783-7251 (New York State).

As of September 1984 AfterDark has forty-one databases in nearly all subject areas, including two full-text databases—the Harvard Business Review and the Academic American Encyclopedia. Other services offered include electronic mail and a data processing newsletter. Shop-at-home programs and instant software delivery are planned. Cost is less than BRS/Search because searching is restricted to the hours of 6 P.M. (your local time) to 4 A.M. Eastern time. Cost: One-time subscription fee of \$75 plus database usage charges of between \$6-\$15 per connect hour. Communication charges are included. Monthly minimum charge of \$14.

BRS Colleague Educator, a special service of Bibliographic Retrieval Services, Inc., 1200 Route 7, Latham, NY 12110 (800) 833-4707 (518) 783-7351 (New York State).

As of September 1984 BRS Colleague Educator provides access to seventy-eight databases in nearly all subject areas. Users of this search service can access or generate electronic newsletters. Also offered are two electronic mail services. The MCI Mail service plans to offer online storage capability for standardized forms, and address lists, as well as a logo and signature service to personalize correspondence. Searching is available nearly all hours, Monday through Sunday. Uses the same menu-driven system as BRS AfterDark. Cost: One time membership fee of \$150.00 plus monthly minimum fee of \$18.00. Hourly searching rate is \$18.00/hour for non-profit educational organizations serving pre K-12 grade levels and \$35.00 for colleges. Additional charges are for telecommunications, database royalty fee, and printing charges. Several of the educational databases do not have royalty fees.

Knowledge Index, a special service of Dialog Information Services, Inc., 3460 Hillview Avenue, Palo Alto, CA 94304 (800) 227-1927 (415) 858-3796 (California).

As of October 1984 Knowledge Index provides access to twenty-three databases in nearly all subject areas. Not as many educational databases are available as on BRS AfterDark or Colleague. Cost is less than the Dialog Search Services, since searching is restricted to late hours—Monday through Thursday 6 P.M. to 5 A.M. (local time); Friday 6 P.M. to midnight (local time); Saturday 8 A.M. to midnight (local time) and Sunday 3 P.M. to

3278

INFORMATION RETRIEVAL TECHNOLOGY / 279

5 A.M. (local time). Cost: One time registration fee of \$35 plus \$24 per connect hour. No monthly minimum. Communications charges are included.

INFORMATION UTILITIES

These well known general services, The Source and CompuServe, are called information utilities because they provide a wide range of services. For example, they offer electronic mail and bulletin board services; general, entertainment information; consumer information services such as movie reviews, restaurant guides, and airline reservations; financial information such as stock market quotes or corporate financial information; and news databases. One of the most recent information utilities is the Delphi system of General Videotex Corp.

CompuServe, produced by CompuServe Information Service, 5000 Arlington Centre Blvd., Columbus, OH 43220 (800) 848-8199 (614) 457-8600 (Ohio).

All the information services are available twenty-four hours a day. Three education databases are available. Of particular note is the Educational Research Forum database. (See description above.) There are numerous options for subscription, and they can be purchased at computer stores. Cost: hourly connect costs vary depending on the speed of the data transmission and the time of day, range from \$6.00 to \$15.00 per hour. No monthly minimum fee.

The Source, produced by The Source Telecomputing Corporation, 1616 Anderson Road, McLean, VA 22102 (800) 336-3366 (703) 734-7500 (Virginia).

A wide variety of services are offered twenty-four hours daily. In addition to the services described above, The Source also has files for 1) education and careers, which contain teaching programs, information on college financial assistance, and an employment opportunity and resume database; 2) government and politics which contains legislation, news commentary and interviews; 3) science/technology which allows mainframe computing capability for performing statistical computations and modeling; 4) creating and computing, which allows for creating and editing of files. One can even market the product created. Cost: there is a one-time registration fee, but there are numerous options for subscriptions. Hourly connect costs vary depending on the speed of the data transmission and time of day. Costs range from \$7.75 to \$44.75 per hour.

Delphi, produced by General Videotex Corp., 3 Blackstone St., Cambridge, MA 02139 (800) 544-4005 (617) 491-3393 (Massachusetts).

3279

280 / BONNIE G. GRATCH

Provides access to over 200 databases twenty-four hours daily, plus sign-on capability to DIALOG Information Services and Dialcom Computer Services. Delphi offers some services similar to The Source and CompuServe, such as communication services (banking, shopping, travel arrangements); entertainment services; computing services; and information services. Unique services provided are the ability to send mail to users of other systems (The Source, CompuServe, etc.), and an unusual information service called ORACLE. This is a group of experts who will reply to your questions through one's Delphi mailbox. Also available for searching is the Kussmaul Encyclopedia. Delphi also offers typesetting by which one can produce camera-ready copy. Costs are less than The Source and CompuServe. Cost: there's a \$49.95 membership charge and hourly connect charges range from \$6.00 to \$16.00. No minimum charges.

CH	ERIC CLEARINGHOUSE PUBLICATIONS
CE	<p>The state of West Virginia's Adult Literacy Campaign will be distributing copies of ERIC/ACVE Digest #40, "Adult Literacy." The digest will be sent to individuals who call their toll-free hotline to inquire about volunteer literacy training.</p>
CS	<p>The following are new ERIC/CS Information Analysis Products:</p> <p><u>ERIC First Analysis: Water Resources, 1985-86 National High School Debate Resolutions.</u> By David L. Wagner and Douglas Fraleigh. 1985. Designed to serve as a framework from which high school debate students, coaches, and judges can evaluate the issues, arguments, and evidence present in the availability and quality of water resources in the United States, this booklet provides guidelines for research on the 1985-86 debate resolutions selected by the National Federation of State High School Associations. Available from the Speech Communication Association, 5105 Backlick Road, Building E, Annandale, VA 22003. \$5.00. (10% discount for 10-49 copies, 20% discount for 50 or more copies).</p> <p><u>Workshops on Family Communication.</u> By Kathleen M. Galvin. 1985. Intended to help speech communication professionals become involved in developing, implementing, and evaluating marital or family enrichment programs, this TRIP booklet discusses the theory and practice of using marital enrichment programs to increase family harmony. Available from the Speech Communication Association, 5105 Backlick Road, Building E, Annandale, VA 22003. \$5.00. (10% discount for SCA members).</p> <p><u>A TV News Approach to Oral Communication.</u> By Pat Kane. 1985. Presenting a studio-workshop approach toward the study of oral communication, this TRIP booklet discusses current theories of communication and broadcast journalism as a model for public communication. The major portion of the booklet offers classroom exercises for sharpening communication skills, a semester syllabus for an oral communication workshop, and seven units to be covered in this workshop/course. Available from the Speech Communication Association, 5105 Backlick Road, Building E, Annandale, VA 22003. \$5.00. (10% discount for SCA members).</p> <p><u>Writing is Reading: 26 Ways to Connect.</u> By Eileen Tway. 1985. Reviews current research on the relationship between reading and writing, and presents activities using the twenty-six letters of the alphabet. Available from the National Council of Teachers of English, 1111 Kenyon Road, Urbana, IL 61801. \$6.00 (\$5.00 NCTE members).</p> <p><u>Measures for Research and Evaluation in the English Language Arts, Volume 2.</u> Edited by William Fagan, Julie Jensen, and Charles Cooper. 1985. Provides information on instruments created by researchers for measuring skill development in various language arts. Available from the National Council of Teachers of English, 1111 Kenyon Road, Urbana, IL 61801. \$16.75 (\$13.00 NCTE members).</p>
EC	<p><u>EC Publishes Major New Text For School Psychologists</u></p> <p>EC has published a new text, <u>The School Psychologist and the Exceptional Child</u>, designed specifically to provide school psychologists in training with practical information in relation to the assessment process about the characteristics and needs of various types of exceptional children. Following an opening chapter on the role and function of the school psychologist in special education, each exceptionality is examined. Addressed are such questions as: How can I best communicate with this student? What strategies and instruments</p>

CH	ERIC CLEARINGHOUSE PUBLICATIONS
EC	<p>Cont'd.</p> <p>have been used most successfully with similar students? What special concerns must I keep in mind? Exceptionalities include: Gifted and Talented, Mental Retardation, Learning Disabilities, Emotionally Disturbed, Physical and Multiple Handicaps, Hearing Impairments, Visual Impairments, and Communications Disorders. This product, which has 256 pages, a publication date of 1985, and an order number of ISBN-0-86586-153-6, is being distributed by the National Association of School Psychologists for \$18.95 per copy.</p>
HE	<p>The following book is now available from HE. Orders should be directed to the Association for the Study of Higher Education, One Dupont Circle, Suite 630, Washington, DC 20036. (\$7.50 each, 10% discount for any 15 or more, 20% discount to book stores).</p> <p><u>Employee Educational Programs: Implications for Industry and Higher Education</u>, by Suzanne W. Morse. ASHE-ERIC Higher Education Research Report No. 7, 1984. 81 pages. Analyzes the following: the development of employee education and training programs; traditional education's role in educating the workforce; overview of such programs as job-related training, trade seminars, tuition aid programs, college credit and degree programs, corporate approaches to employee education and training; implications for academe in cooperative endeavors.</p>

CH	DATE	LOCATION	STAFF	COMMENTS
CG	June 23-25, 1985	Ann Arbor, MI	Garry Walz Jeanne Bleuer	<p><u>ERIC/CAPS Conducts Counselors and Computers Workshop</u></p> <p>"Computer Enhanced Counseling," a workshop aimed at extending counseling effectiveness through the imaginative use of microcomputers, was held in Ann Arbor on June 23-25. Organized and conducted by ERIC/CAPS, the workshop trained 150 participants in a five-step plan to improve the quality and cost-effectiveness of counseling programs through the use of the latest computer technology.</p> <p>The lectures, demonstrations, and hands-on activities focused on such topics as computers with proven track records, promising innovations in technology, strategies in program design, customized applications for different counseling settings, assessment methods, and designing a customized computer-enhanced counseling program.</p> <p>At round-table discussions, counseling professionals shared information on current high-tech projects in computer-assisted counseling. Special clinics and evening sessions were available on creating software for K-12, college and university settings, and private practice. Two pre-sessions were also offered on June 22 on microcomputer basics and advanced microcomputer skills for counselors.</p> <p>ERIC/CAPS Director Garry Walz and acting Associate Director Jeanne Bleuer led the workshop. Major presenters included. William H. Ford, Jr., president of Online Systems, Inc.; Dean Carl Berger of the U of M School of Education; John D. Krumboltz, Professor of Education and Psychology at Stanford University; and James Lee, Professor of Counselor Education at the University of Wisconsin. Various educators in the fields of training and professional development also made presentations.</p> <p>The workshop was co-sponsored by the American Association for Counseling and Development, the American Vocational Association/Guidance Division, the Association for Counselor Education and Supervision, the National Vocational Guidance Association, and the University of Michigan Center for the Study of Higher Education.</p>
CG	July 1-3, 1985 July 8-12, 1985	Burlington, VT Minneapolis, MN	Garry Walz Jeanne Bleuer	<p><u>ERIC/CAPS Workshops Held in Vermont and Minnesota in July 1985</u></p> <p>ERIC/CAPS staff were far flung this July, running workshops in Vermont and Minnesota. At the University of Vermont in Burlington, CAPS Director Garry R. Walz and Acting Associate Director Jeanne Bleuer conducted a three-day program on microcomputer applications to counseling. The July 1-3 workshop covered the four key phases of computers in counseling:</p>

WORKSHOPS/CONFERENCES/MEETINGS

CH	DATE	LOCATION	STAFF	COMMENTS
CG				<p><u>ERIC/CAPS Workshops (Cont'd)</u></p> <p>computer-managed, computer-complemented, computer-assisted, and computer-enhanced.</p> <p>Walz then joined Sunny Hansen on July 8-12 at the University of Minnesota in Minneapolis to lead a workshop on leadership for career development in a new age. Hansen is Professor of Educational Psychology and Director of BORN FREE at the University of Minnesota. The workshop was jointly sponsored by CAPS and University of Minnesota's Counseling and Student Personnel Psychology Program.</p> <p>The workshop was designed to enhance the effectiveness of administrators, teachers, counselors, and human resource specialists in imaging, creating, and implementing innovative career development programs for a variety of settings.</p> <p>Individual sessions covered leadership development and team building; career development -- a new paradigm; new-age framework for career programs; power and roles in organizations; gender, culture, and career; managing change and change agency; managing life transitions; and marketing yourself and your career program.</p> <p>Walz, who earned his doctorate at the University of Minnesota, gave the distinguished graduate lecture at the workshop. Noted as one of the futuristic thinkers in the counseling field, he spoke on "becoming the counselor of tomorrow."</p>
EC	March 13, 1985	Washington, DC	Don Erickson Lynn Smarte	<p><u>HEATH Open House</u></p> <p>Don Erickson and Lynn Smarte attended an Open House for the HEATH Resource Center on March 13 at the National Clearinghouse on Postsecondary Education for Handicapped Individuals. HEATH, which stands for "Higher Education and the Handicapped", is an information project of the American Council on Education and is funded by the Special Education Program office of the Department of Education. It is located at The National Center for Higher Education at One Dupont Circle, Washington, DC.</p>

ACTION ITEMS

RIE Master Schedule

The RIE Master Schedule for 1984-1985 (Tabular Display) extends through the December 1985 issue of RIE and includes shipments through September 1985.

The RIE Master Schedule for 1986 is currently in preparation. In order to provide Clearinghouses with a basic shipment schedule for use up until the new RIE Master Schedule is finally distributed, we are including an interim RIE schedule as Attachment 1.

Please note that documents should continue to be shipped on each Friday. There will be no shipment on 11/29 (Thanksgiving week) and 12/27 (Christmas week). There will also be no transmission of bibliographic data during the weeks of 11/25-29 and 12/23-27. Any shipment/transmission planned for Thanksgiving week or Christmas week should simply be delayed 1 week.

...Carolyn Weller (ERIC Facility)

CIJE Schedule for 1986

The new CIJE Schedule for the 1986 issue year is included as Attachment 2. There will be no bibliographic transmissions/log shipments during the weeks of Thanksgiving and Christmas.

...Oryx Press

Online Transmission of Data

Some Clearinghouses have apparently arranged their online transmission schedule so that documents are now being shipped before the corresponding bibliographic data are transmitted. At times this has resulted in situations where a document is shipped, but the corresponding data are never transmitted, or vice versa. This "asynchronous" scheduling has occurred apparently because Clearinghouses converted to online transmission over a period of time and not all at one time.

In a decentralized system such as ERIC, it is important that all components adhere to the same schedule. In order to get back on track, beginning with the document shipment of February 7 (for the first week of the May issue), the bibliographic data for the documents shipped on Friday, the 7th, should be transmitted during that same week, i.e., prior to the shipment on Friday.

Clearinghouses are also reminded that if they are planning to make any major changes in either the software and/or hardware used to transmit data, they should contact Pat Brown in order to ensure that what they are considering is compatible with the Facility's receiving equipment.

...Pat Brown (ERIC Facility)

NETWORK NEWS

ERIC Technical Steering Committee

A. Definition

The ERIC Technical Steering Committee serves as a conduit between the network's technical processing staff and CERIC for the purpose of promoting system improvements and enhancing system operations. Suggestions for system improvements or modifications in ERIC technical procedures may originate in the ERIC Clearinghouses or other system components, with members of the Steering Committee, or as a result of national/regional technical meetings or other system meetings. In coordination with CERIC, the Steering Committee is responsible for: (1) planning and implementing the agenda for the National Technical Meeting; (2) providing planning assistance for Regional Technical Meetings; (3) considering all recommendations resulting from national/regional technical meetings or recommendations received from Clearinghouses at any time; (4) making recommendations for action to CERIC; and (5) carrying out projects on behalf of the ERIC network, as approved by CERIC.

Membership on the Steering Committee is comprised of five people, including representatives from three ERIC Clearinghouses (one each from the east, midwest, and west coast), one ERIC Facility representative, and a chairperson chosen by CERIC. A balance between process and user services skills is desirable. Terms are staggered in order to permit annual rotation. Members of the Committee recommend new representatives to CERIC; new members are selected by CERIC. Clearinghouse representatives serve for three years. When a new member is appointed to fill out an unexpired term, the following shall apply: (a) If there is one year left in the unexpired term, the replacement serves out that year and serves for his/her own three-year term in addition (a total of four years); (b) If there are two years left in the unexpired term, the replacement serves out those two years and then cycles off the committee. The ERIC Facility determines how long its representative serves. The Steering Committee Chair is appointed for three years. If the Chair's term is not completed, the replacement does not "fill out" the rest of the term, but rather is appointed for a new three-year term.

B. Members

The following are the current members of the ERIC Technical Steering Committee:

	CH	Term Exp.
Amelita Hill	RC	1986
Dorothy Beling	EC	1987
Jane McClellan	CS	1988
Carolyn Weller	Fac	open
Lynn Barnett, chair	HE	1988

Pat Coulter serves as the Central ERIC liaison person, and Betty Rose Rios of RC is the liaison between the committee and the Council of ERIC Directors (COED).

C Meetings

The ERIC Technical Steering Committee will be meeting in Washington on December 5, 1985, to review plans for the Regional Technical Meetings next spring and systemwide recommendations that have come before it in the past 6 months or so. Any ERIC staff member is welcome to submit recommendations. Please direct them to Lynn Barnett at HE.

...Lynn Barnett (HE)

"/ED" and "/EJ" Suffix Commands on DIALOG 2

As indicated in the last EAB, the familiar "/ED" and "/EJ" restrictive suffixes have been restored on DIALOG 2. DIALOG announced this enhancement in its September 1985 Chronolog newsletter. This announcement appears as Attachment 3.

...Ted Brandhorst (ERIC Facility)

ERIC File of Search Strategies

The ERIC Clearinghouse for Junior Colleges (JC) has been funded by NIE to develop a prototype "Search Strategy File" for nonlibrarian and users who conduct their own computer searches of the ERIC database. The file, as we envision it, will be an indexed listing of search strategies on topics of current interest to educational practitioners. An end user searching, for example, for information on the role of merit pay in collective bargaining agreements at high schools or community colleges, would find the following search strategy (made up of ERIC Descriptors):

- (1) Secondary Education OR High Schools OR Two Year Colleges OR Community Colleges
- (2) Mer Pay
- (3) Collective Bargaining
- (4) 1 AND 2 AND 3

This file of strategies could be used together with manuals produced earlier by ERIC on how to conduct online searches.

In the process of developing the Search Strategy File, we will be requesting the assistance of user services personnel systemwide. Specifically, each Clearinghouse will be asked to provide 20 search strategies on major topics of recurrent interest within its individual scope area. Additional information on the types of search strategies to be covered will be forwarded to each Clearinghouse in January 1986. The success of the search strategy file depends on this systemwide input, because staff at the individual Clearinghouses are in the best position to know what topics are of greatest interest to practitioners.

Please do not hesitate to contact us with any questions or suggestions.

...Jim Palmer (JC)/Diane Zwemer (JC)

LOGO Database (Based on ERIC) Mounted on CompuServe

A bibliographic database of citations dealing with the programming language LOGO has been assembled by Information on Information, Inc., and has been mounted on the CompuServe online system. Most of the LOGO citations have been extracted from the ERIC database.

We requested Information on Information, Inc. to provide us with a short write-up on their new product that could be used by the ERIC Clearinghouses. This write-up appears as Attachment 4.

...Ted Brandhorst (ERIC Facility)

EASYsearch

Inspired by the success the IR Clearinghouse has had with MICROsearch and the distribution of selected ERIC information on floppy discs, a local New York firm called Renaissance Learning Systems, Inc., has developed a similar product called EASYsearch.

Attachment 5 is a reproduction of the EASYsearch brochure and provides a complete description of the product (except for prices).

...Barbara Minor (IR)

ERIC Digests Online -- A Progress Report

The most recent Progress Report on the ERIC Digests Project at the PS Clearinghouse, dated September 15, 1985, is reproduced as Attachment 6.

...Ted Brandhorst (ERIC Facility)

New EDRS Order Form

A new EDRS order form, dated October 1985 (Attachment 21), has been prepared, incorporating the revised microfiche and paper copy prices that resulted from the recent competition for EDRS. 500 copies of this form have been sent to each Clearinghouse.

Please note especially the following:

1. The base MF price has been reduced from .97 cents to .75, a reduction of 23%.
2. The base PC price has been reduced from \$2.15 to \$1.80, a reduction of 16%.
3. The prices for all Back Collections and Special Collections have been reduced.
4. The name of the company operating EDRS has been changed from CMIC to "Computer Microfilm Corporation" (CMC).

5. The microfiche distributed to Standing Order Customers will change from vesicular fiche to diazo fiche.
6. The new prices are effective October 1, 1985.

The Facility received the new price information on October 18. We will be working to build it into the first possible issue of RIE, namely the December issue.

With prices like these, ERIC's document delivery operation compares to the Staten Island ferry ride in being one of America's last really good deals!

This is advance information, put together for this EAB (in preparation when the information arrived). Additional details concerning the EDRS operation will be forthcoming in the near future.

...Ted Brandhorst (ERIC Facility)

ERIC Acquisitions Arrangements List Update

The ERIC Acquisitions Arrangements (EAA) List has been updated, and the changes are included here as Attachment 7. A total of 31 additions, changes, and deletions have been made based on Facility information and forms sent to us by Clearinghouses.

The list of changes is arranged in alphabetical order by organization name and follows the same form as the printed EAA List dated November 1984. A change in an arrangement is shown by a percent sign (%), and an arrangement which has been removed is marked with an "X". All other entries are additions to the previous list. The November 1984 list should be updated by changing, adding, or deleting entries as necessary in alphabetical order.

The November 1984 list has been kept current through monthly updates in the EAB. A new, completely revised list, projected now for November 1985, will cumulate all changes made to Facility and Clearinghouse acquisitions arrangements through October 1985.

The Facility Acquisitions staff appreciates the cooperation of the Clearinghouses in submitting changes in their arrangements as they occur.

...Joanna Eustace (ERIC Facility)

Freelance Canadian Indexer/Abstractor Offers Services

Patrick Kavanagh, a freelance Canadian indexer/abstractor is offering his services to any ERIC component who would like coverage of certain Canadian journals (or other sources). Patrick operates out of Ottawa and has access to all the major Canadian national and federal libraries. His address is:

Patrick Kavanagh
150 Queen Elizabeth Driveway, #215
Ottawa, Ontario, K2P 1E7
CANADA

...Ted Brandhorst (ERIC Facility)

South African Medical Research Council, Institute for Medical Literature,
Looking for Presentations on ERIC

Dr. S.F. Rossouw, Director of the Institute for Medical Literature, in Tygerberg, South Africa, has approached ERIC with a request for a knowledgeable speaker who could come to South Africa to give two kinds of ERIC-related presentations: (1) general motivational addresses to librarians and educators; (2) a full "course" on ERIC for online searchers, print product users, etc. He is looking for somebody who could stay about two weeks and make presentations in the major cities. Financial terms for the visit are negotiable.

If there are any interested parties in the ERIC family, they should request the full file on this contact from the ERIC Facility.

...Ted Brandhorst (ERIC Facility)

SO Goes to Japan

Lynn Parisi, Coordinator of User Services for SO, recently spent one month in Japan as coordinator for a Fulbright Teacher Group Project Abroad. While there, Parisi met with Tim Smith, United States Information Service representative, and Warren Obluck, cultural attache, and discussed availability and use of ERIC database materials in Japan.

...Lynn Parisi (SO)

ERIC/CRESS Hosts Computer Workshop by Dr. Alan Hofmeister

ERIC/CRESS will host a one-half day workshop on computer applications for rural schools on November 1, 1985. Dr. Alan Hofmeister, Associate Vice President for Research, Utah State University, will conduct the workshop.

Dr. Hofmeister established an interdisciplinary research and doctoral program in technology and special education at Utah State University in 1970. Since then, he has been actively involved in a wide range of technological applications to education.

Currently, Dr. Hofmeister is actively involved in research in laser videodisc technology and the application of artificial intelligence to education. He is the author of a wide range of books and scholarly articles. His most recent books include Microcomputer Applications in the Classroom, published in 1983 by Holt, Rinehart, & Winston, and Technological Tools for Rural Education published in 1984 by the ERIC Clearinghouse on Rural Education and Small Schools.

...Amelita Hill (RC)

3308

ICET Fellow to Intern at ERIC/CRESS

Brother Manuel P. Uluan, FMS, President of Notre Dame of Dadiangas College, General Santos City, Philippines, will spend a two-week internship at ERIC/CRESS during his ICET (International Council on Education for Teaching) fellowship in rural education in the United States. (ICET is a non-governmental organization member of UNESCO.)

While at the Clearinghouse, Brother Uluan will become acquainted with the ERIC system and will utilize the system in his quest for information concerning the use of computer networks to help resolve administrative problems inherent in small colleges located in rural areas of his country. Visits to small colleges in New Mexico will be conducted.

During his ICET fellowship, Brother Uluan has attended the Rural Education Association National Meeting in Iowa, the National Rural Teacher Education Conference in Washington state, the Rural and Small Schools Conference at Kansas State University and has visited many small and isolated colleges in each of those states.

...Amelita Hill (RC)

PERSONNEL

ERIC/CRESS Staff Changes

In June 1985, there were several changes in the staffing of the Clearinghouse. The 3/4-time position of secretary, which was filled by Phyllis Quintana until April, was expanded to a full-time position, and was filled in June by Jimmie Smith. Jimmie had worked for Dr. Cole in the Department of Special Education prior to joining the CRESS crew. She's caught on fast and is now assisting in the user area, getting out the acquisitions letters for Elaine Benally and Manuela Quezada-Aragon, filling requests for off-the-shelf materials and publications, and typing IAP's on the IBM-PC. Welcome aboard Jimmie!

Yolanda Arteaga, CRESS' half-time administrative assistant, resigned in June. Her position was abolished and her duties were assumed by Amelita Hill. Amelita will now be responsible for user services, financial accounting, and budget development.

...Amelita Hill (RC)

3309

Ellie Cortese Replaces Joy Olson at Facility

Ellie Cortese has been promoted to Secretary for the Facility's Assistant Director for Computer and Management Information Systems. She replaces Joy Olson who has transferred to ORI's Computer Applications and Software Division.

...Deborah Hottel (ERIC Facility)

Staff Changes at FL

Mary Niebuhr has left FL to become Project Coordinator at the Linguistics Society of America. Replacing Mary as Associate Director at FL is Jeannie Rennie. Jeannie was the User Services Coordinator at FL from 1981-84. She has just returned from a year in France where she received her M.A. Also returning to the ERIC fold is Anne Marie Harnett who replaces Nancy Rhodes as Processing Coordinator at FL. Anne Marie was with FL from 1978-82 as an Abstractor/Indexer. From 1982-85, she was at the National Clearinghouse for Bilingual Education. Other FL staff changes that should be noted in your ERIC Directory are the deletion of the Administrative Assistant title and the addition of Nancy Perry as Secretary/Processing Assistant, replacing Cynthia McMillian as Processing Assistant.

...FL

Staff Changes at TM

Barbara Wildemuth resigned as ERIC/TM's Associate Director at the end of May to accept a teaching assistantship at Drexel University's College of Information Studies. Barbara began the doctoral program at Drexel last September. Emma Gonzalez-Stupp, former User Services Coordinator, is TM's newly appointed Associate Director, and Betsy Smith, former Indexer/Abstractor, is TM's new User Services Coordinator. We hope to be able to introduce a new Indexer/Abstractor by the next EAB!

...Betsy Smith (TM)

THE LIGHTER SIDE

Workers Need Youth

A recent abstract submitted to the Facility contains the sentence "Vocational education will serve workers who need a shorter, more focused period of retraining and youth."

The Facility editors could so easily agree that workers need more youth than they were tempted at first to let the sentence go through.

ERIC Enhancements – You Asked for Them!

Among the most requested features for addition to ERIC, File 1, on DIALOG Version 2 have been the suffixes /ED, /EJ. These are now available for searching.

File 1 consists of two major subfiles, the non-journal literature (*Resources in Education* (RIE)) and journal literature (*Current Index to Journals in Education* (CIJE)). Any search term or set may now be restricted to either of these subfiles by using the appropriate suffix – /ED for non-journal literature and /EJ for journal literature. The subfile designation may be applied directly to search terms, e.g.,

```
? S GAME?/DE,ED
S1 2156 GAME?/DE,ED
```

Or it may be applied to a resulting set, e.g.,

```
? SELECT STEPS ROLE(W)PLAY? AND GAME?/DE
S2 74618 ROLE
S3 14371 PLAY?
S4 3478 ROLE(W)PLAY?
S5 4815 GAME?/DE

```

Searches may be restricted to accession years by applying the appropriate accession number range either to the term or to the set number, e.g.,

```
? SELECT S6/ED233123-ED999999
S8 13 S6/ED233123-ED999999
```

When restricting to specific accession year ranges, the ED or EJ suffix designation is retained as part of the accession number, on DIALOG Version 2 as shown above. The complete list of accession year ranges may be found online by entering the command ?LIMIT1.

LOGO Database (Based on ERIC) Mounted on CompuServe

Information on Information, Inc., a Maryland-based company, has recently installed a bibliographic and information database, consisting of citations about the programming language LOGO, on the CompuServe nationwide data communications service. Subscribers to CompuServe will be able to access the service by entering "GO LGO" after accessing the system through a telecommunications modem.

The LOGO database will mark one of the first full bibliographic databases to appear on a videotex type system. The initial database contains over 200 citations relating to LOGO extracted from the ERIC database, as well as other information on LOGO. The retrieval process is menu-driven.

The selection categories currently available to searchers are:

Grade (Early Childhood, Elementary, Secondary, Special Education, Higher Education and Teacher Education);

Subject (English, Math, Music, Computer Science and Science);

Applications (Word Processing, Computer Literacy, Computer Aided Instruction, Disabilities/Handicapped and Instructional Development).

As experience is gained with the system, Information on Information, Inc. will expand the menu selections. Bibliographic citations not covered by ERIC will eventually be added to the system.

Creation of the database involved a combination of the special power and simplicity of videotex and the regular intellectual skills associated with developing conventional bibliographies. The compilers of the LOGO database, Emil H. Levine and Judy Burnam, both information scientists, are personally involved with LOGO and are parents of young children.

Research was conducted at the University of Maryland, in both the College of Library and Information Services and the College of Education, in order to determine a statistical rank order of requirements of educators for computer-related educational materials. A similar rank order was made of material in ERIC, and a statistical comparison was made to determine what was feasible for development of the bibliographies. The result is 16 preselected short form bibliographies, each leading to full citations (with abstract). This allows the searcher to access a specific ERIC citation with as little as 10 keystrokes after signing on!

A list of major LOGO information sources and LOGO meetings is available on the database, as well as procedures for ordering ERIC documents, (including prices for paper copy and microfiche).

Information on Information, Inc.
8815 Churchfield Lane
Laurel, MD 20208

How do I obtain the documents and articles that are identified by EASYsearch?

You can obtain copies of articles and documents from .

- your school library
- a nearby ERIC information center -- there are over 700 worldwide centers that maintain an up-to-date ERIC microfiche collection
- the Educational Document Reproduction Service (EDRS). Order forms are provided with EASYsearch
- the periodical. Each of the EASYsearch database guides contains addresses for all periodicals cited in that database

14 What do I need to use EASYsearch?

Any Apple II computer with 64K memory and 2 disk drives. You don't need to know anything about computers. EASYsearch is so user-friendly that a complete novice can conduct a search right away.

EASYsearch™ Making new ideas and materials accessible for

- inservice teacher education
- teaching practice
- student assessment
- school administration

What is EASYsearch?

EASYsearch is a collection of information about thousands of quality resources that are of practical and immediate use to teachers and administrators. This information has been grouped into 7 different subject area databases: social studies, reading/literature, language arts / ESL, foreign languages, math, science and administration.

EASYsearch is also a search program that makes your computer search through all this extensive information in a matter of seconds to present you with just the specific information you want and need.

Where does this information come from?

This information is from the Educational Resources Information Center (ERIC), which has spent millions of dollars collecting tens of thousands of citations that are useful to teachers.

What type of information will EASYsearch give me?

EASYsearch will give you the titles, abstracts and sources of resources that meet your specific needs. EASYsearch can also give you information that will help you to expand your search if you want to.

What types of resources will EASYsearch tell me about?

A team of educators has gone through the tens of thousands of citations in the ERIC System and has chosen only those citations for resources that are of practical use to educators. These include the following types of resources:

- tests
- lesson plans
- projects
- techniques for motivating and managing student learning
- individualized materials
- educational games
- activities

EXTRA Features

- You can copy the program disk, so each department can have one.
- The 7 database packages cannot be copied, but damaged disks will be replaced for only a handling and postage fee.
- Should you ever have any problems with EASYsearch, you can call our toll-free customer service number.

TAKE ADVANTAGE OF THE NO-RISK, NO-OBLIGATION, TEN-DAY TRIAL PERIOD

Order EASYsearch now! If after ten days you are not completely satisfied, return it to us and receive a full refund.

AN EDUCATOR'S BIGGEST PROBLEM

Developing lesson plans, projects, tests and activities can take up a lot of your valuable time!

Now it is easy to make use of the work and ideas already developed by educators from all over the country.

Announcing

EASYsearch™

A timesaving new technology for more effective teaching

EASYsearch makes it quick and easy to find the ideas and materials you want from among the many educational resources that have been developed in recent years.

- English for the Academically Talented, Grade 7-12

Here is how EASYsearch works

- You wish to find resources to support an instructional unit
- You decide upon a word or words (keywords) that describe what it is you wish to do For example, if you wish to identify student activities that would support your unit, then "activities" would be a keyword. If your unit were remedial in nature the word "remedial" would be a keyword.
- Place the EASYsearch program disk in disk drive #1 and a database disk for the appropriate subject area in disk drive #2 Turn on your Apple II computer.
- The computer asks you to enter your first keyword EASYsearch finds all the entries (citations) on that disk that use your keyword
- You can then enter additional keywords one at a time to broaden or narrow your search.
- You can inspect a summary/abstract of a document or article on the screen while you conduct the search, or as a final check after it has been conducted, to make sure the citations are what you really want.
- You can print out the results of a search on a printer and then automatically repeat the same search on the remaining disks in your subject

area database And you can save your search routine so that you can automatically repeat that search later on each Updates disk for your subject area

- Finally, you can obtain the articles and documents that contain the resources you identified

EASYsearch Updates Subscription Service

Subscribing to EASYsearch Updates enables you to receive update disks for any or all of the subject area databases you have New citations are entered by ERIC every day Much of this material, however, is not immediately useful to teachers or administrators RLS reviews all new citations entered by ERIC and selects the ones that have immediate relevance for you and your school

A subscription provides you with the following services

- You will automatically receive Updates over a two year period
- An Updates disk will be sent to you as soon as there are enough new citations in a subject area to fill a disk
- Your cost of an Updates disk will not be affected by any price increases during the period of your subscription
- You will receive revisions of the program disk free during the period of your subscription (complete set subscriptions only)
- You will receive free information on new databases that become available
- You will receive free information on dynamic and practical educational packages from RLS

ANNOUNCEMENT

ERIC DIGESTS ONLINE: NEW FULL TEXT DATABASE FOR EDUCATORS

ERIC Digests Online, a full text database of short topical reports on education, is being developed by the Educational Resources Information Center (ERIC) with funding from the National Institute of Education (NIE). Each Digest, approximately 1000 words in length, provides information on an education-related topic. Among the titles to be included in the new file are "Academic Freedom," "Dismissing Incompetent Tenured Teachers," "The Effects of Corporate Involvement in Education," and "Improving the Mathematical Skills of Minority Students."

ERIC Digests Online is expected to be available later this year through ED-LINE on The Source, an online information service. The file will be searchable by menus and/or key words.

A cooperative effort of Central ERIC and the 16 ERIC clearinghouses, development of the Digest file is being coordinated by the Clearinghouse on Elementary and Early Childhood Education. To receive sample Digests and a partial list of titles, contact project manager Mima Spencer at the above address.

September 15, 1985

ERIC DIGESTS ONLINE: A Progress Report

Plans are underway to make ERIC Digests Online (EDO) available for public use on ED-LINE on The Source by the end of December (1985).

This new file will offer online the full texts of ERIC Digests, short reports on all aspects and levels of education.

Among the titles of particular interest to ERIC/EECE Bulletin readers are: "Extending the School Year and Day," "Motivating Teachers for Excellence," "The Argument for Early Intervention," "Being at Ease with Handicapped Children," and "Choosing Software for Children."

A pilot test, scheduled for late October, will involve teachers, representatives from professional organizations, colleges of education, and policymakers at state and/or local levels, as well as others interested in education.

The test will provide file developers with feedback on file design, particularly ease of access, ease of use, and menu construction. The unique "user notespace" feature, which will encourage users of the database to comment on a Digest, read comments others have made, or order a search of the ERIC database will also be available for trial. A special effort will be made to involve inexperienced computer users in the pilot test.

EDO is being designed and developed by the ERIC Clearinghouse on Elementary and Early Childhood Education, in cooperation with the 15 other ERIC clearinghouses. Additional information may be obtained by writing to Mima Spencer, Project Director, ERIC/EECE, 805 W. Pennsylvania, Urbana, IL 61801.

GENERAL INFORMATION

1. PRICE LIST

The prices set forth herein may be changed without notice, however, any price change will be subject to the approval of the National Institute of Education Contracting Officer

2. PAYMENT

The prices set forth herein do not include any sales, use, excise, or similar taxes which may apply to the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any shall be borne by the Customer.

Payment shall be made net thirty (30) days from date of invoice. Payment shall be without expense to CMC.

3. REPRODUCTION

Express permission to reproduce a copyrighted document provided hereunder must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

4. CONTINGENCIES

CMC shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure of delay (a) is due to events beyond the control of CMC including, but not limited to, fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortages, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments; (b) is due to failures of performances of subcontractors beyond CMC's control and without negligence on the part of CMC, or (c) is due to erroneous or incomplete information furnished by Customer.

5. LIABILITY

CMC's liability, if any, arising hereunder shall not exceed restitution of charges.

In no event shall CMC be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

6. WARRANTY

CMC MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER, INCLUDING ANY WARRANTY OR MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

7. QUALITY

CMC will replace products returned because of reproduction defects or incompleteness. The quality of the input document is not the responsibility of CMC. Best available copy will be supplied.

8. CHANGES

No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of CMC.

9. DEFAULT AND WAIVER

9 a If Customer fails with respect to this or any other agreement with CMC to pay any invoice when due or to accept any shipment as ordered, CMC may without prejudice to other remedies defer any further shipments until the default is corrected, or cancel this Purchase Order.

9 b No course of conduct nor any delay of CMC in exercising any right hereunder shall waive any rights of CMC or modify this Agreement.

10. GOVERNING LAW

This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.

11. DEPOSIT ACCOUNTS

Customers who have a continuing need for ERIC documents may open a Deposit account by depositing a minimum of \$250.00. Once a deposit account is opened, ERIC documents will be sent upon request, and the account charged for the actual cost and postage. A monthly statement of the account will be furnished.

12. STANDING ORDER ACCOUNTS

Customers who desire to receive microfiche copies of all ERIC reports announced in each issue of Resources in Education may do so by depositing \$1,800.00 or submitting an executed purchase order. The cost of each issue and postage will be charged against the account. A monthly statement of the account will be furnished.

13. PAPER COPY (PC)

A paper copy (PC) is a xerographic reproduction, on paper, of the original document. Each paper copy has a Vellum Bristol cover to identify and protect the document.

14. FOREIGN POSTAGE

Postage for all countries other than the United States is based on the international Postage Rates in effect at the time the order is shipped. To determine postage allow 75 microfiche or 75 (PC) pages per pound. Customers must specify the exact classification of mail desired, and include the postage for that classification with their order. Payment must be in United States funds.

OTHER ERIC COLLECTIONS AVAILABLE FROM EDRS

STANDING ORDERS

Subscription orders for microfiche copies of all ERIC reports announced in each issue of Resources in Education average \$140.00 per month.

SPECIAL ANNOUNCEMENT

ERIC Clearinghouse for Social Studies/Social Science Education
Moves to Indiana University

After 15 years at the Social Science Education Consortium in Boulder, Colorado, the ERIC Clearinghouse for Social Studies/Social Science Education has moved to Indiana University. The results of the competition for the Clearinghouse were announced January 10, 1986. The address and management staff of the new Clearinghouse are as follows:

ERIC Clearinghouse for Social Studies/Social Education (SO)
Indiana University
Social Studies Development Center
2805 East 10th Street
Bloomington, IN 47405

John Patrick, Director
Fred Risinger, Associate Director
(812) 335-3838

The new Clearinghouse will be operational early in February 1986 and will gradually accelerate to "full speed" in all areas, e.g., acquisitions, document processing, information analysis publications, etc. Contributors should send all social science documents to the new address.

PROCESSING ADVISORY

CIJE Advisory

With all of the new people recently in the ERIC network, several questions have arisen about CIJE and what information needs to be reported to Oryx:

1. Who is Responsible for the Entries in the "Source Journal Index?"

Individual entries in the Source Journal Index at the front of CIJE are the responsibility of each Clearinghouse. It is recommended that Clearinghouses periodically review the entries for the journals they index. Changes or corrections, including changes in address, journal title, frequency, coverage, etc., should be reported to Oryx as they are discovered.

2. What Does a Clearinghouse Do if it Wishes to Change a Coverage from Cover-to-Cover to Selective or if it Wishes to Drop or Add a Journal?

Since CIJE resumes are a contract deliverable, changes in coverage or journals indexed should be conveyed to the Clearinghouse's monitor and Jim Prevel (OERI's liaison with Oryx). It is recommended that change notices from the Clearinghouses accompany the first shipment to Oryx in which the changes are involved.

3. Who is Responsible for Reporting on the Availability of a Journal From University Microfilms (UMI)?

Changes in UMI availability should be reported to Oryx just as are other changes. Oryx does not check the entire Source Journal Index list against the latest UMI catalog of journals reprinted.

4. How Should Any Exceptions to Immediate UMI Availability be Handled?

Some Journal publishers apparently have put restrictions on the availability of reprints, e.g., 1985 articles are not available for two years. These exceptions should be reported to Oryx. The suggested entry for the Source Journal Index would then read "Reprint: UMI (2 year delay on availability)".

...Jim Prevel (CERIC)

NETWORK NEWS

Irving Morrissett Writes A Retrospective Goodbye As the SO Clearinghouse Leaves the Social Science Education Consortium (SSEC)

The decision by SSEC not to compete for the SO Clearinghouse in 1986 is a major milestone both in the life of SSEC and the life of ERIC. Irving Morrissett, the Director of SSEC has expressed this well in a moving farewell (recently printed in the Fall 1985 issue of SO's newsletter Keeping Up), that is also a retrospective review of the social studies scene across the last fifteen years. Dr. Morrissett's perspective makes for thoughtful reading for us all and the article is reprinted here as Attachment 1.

...Ted Brandhorst (ERIC Facility)

RIE 1985 Annual Cumulation (by Oryx Press)

The regular annual cumulation of the RIE Resumes and Indexes done by Oryx Press is now being advertised for 1985. The price of the Abstracts and Indexes (3 volumes) is \$225. The Abstracts alone are \$150; the Indexes alone are \$75. The Oryx flyer for this product appears as Attachment 2.

...Al Hill (ERIC Facility)

EDRS Price Change Notices

ERIC Ready Reference #5 has been updated as of October 1985 to reflect the prices effective with the new EDRS Contract. The notice that appeared in the November RIE and ERIC Ready Reference #5 appear as Attachments 3 and 4, respectively.

...Ted Brandhorst (ERIC Facility)

Dialog and System Development Corporation (SDC) Provide ERIC with Revised Online Document Ordering Instructions

Dialog and SDC have provided the ERIC Facility with new and up-to-date write-ups on their commands that permit online searchers to automatically order documents from EDRS. The new write-ups (See Attachments 5 and 6) will be added to the back of RIE.

...Ted Brandhorst (ERIC Facility)

Vertical File Index Seeks ERIC Materials

ERIC/IR has recently responded to a request from the editor of the Vertical File Index (VFI), one of the H. W. Wilson Co. indexes. They were sent a complete set of IR's ERIC Digests and mini-bibs. These materials were announced in the October and November issues of VFI. The response has been tremendous; over 500 requests in 4 weeks. Requesters are from organizations that we have previously had difficulty reaching, e.g., small public libraries, secondary public and private schools, and community colleges. The VFI editor would be happy to receive additional such materials from all the ERIC Clearinghouses. Selection Criteria/Requirements are:

- an actual copy of each item must be submitted to VFI before they will list it;
- no more than 18 months to 2 years since publication; cost under \$10;
- less than 150 pages in size;
- must be paperbound;
- price and mailing instructions must be supplied, e.g., SASE, mailing address, costs, etc.

Send all submissions to:

Editor, Vertical File Index (VFI)
H. W. Wilson Co.
950 University Ave.
Bronx, NY 10452

...Pamela McLaughlin (IR)

Early Childhood Research Quarterly

The National Association for the Education of Young Children, in collaboration with the ERIC Clearinghouse on Elementary and Early Childhood Education, announces a new journal for early childhood educators: The Early Childhood Research Quarterly. To be published by Ablex Publishing Corporation of Morwood, New Jersey, the Quarterly will be devoted to research and scholarship on all topics relating to the care and education of children from birth through 8 years. (See Attachment 7).

The intended audience for the Quarterly includes scholars, researchers, decisionmakers, and administrators, as well as practitioners interested in scholarships in this area. Contents will reflect the interdisciplinary nature of the field and will emphasize work with a clear relevance to application and practice in the care and education of young children. The first issue is scheduled for publication in the Spring of 1986.

Dr. Lilian G. Katz, Director of ERIC/EECE and Professor of Early Childhood Education at the University of Illinois at Urbana, is Editor of the new journal.

Dr. Rhoda McShane Becher, Associate Professor of Early Childhood Education at the University of Illinois at Urbana, will serve as Associate Editor. Karen Steiner, ERIC/EECE Publications Coordinator, will be Managing Editor.

The Quarterly welcomes manuscript submissions. In addition to research reports, of special interest are papers addressing methodological concerns, policy issues, and historical, theoretical, and philosophical matters. For complete information on manuscript submission, write to the Editor, Early Childhood Research Quarterly, University of Illinois, College of Education, 805 W. Pennsylvania Ave., Urbana, IL 61801.

...Karen Steiner (PS)

ERIC/EECE Cooperates with Time-Life Books

A book describing various preschool programs and parenting skills is being prepared by Time-Life publications. Upon request, the ERIC Clearinghouse on Elementary and Early Childhood Education recently supplied information and additional resources on preschool programs and parenting skills to the Time-Life publications staff.

...Norma Howard (PS)

Acquisitions/User Services Joint Effort

During the past six months, ERIC/EECE has increased efforts to encourage early childhood conference organizers to include Clearinghouse brochures "Be an ERIC Author" and "Resources from ERIC/EECE" in conference registration packets. Although past conference organizers were not usually willing to stuff packets with ERIC materials because of limited staff time, this year several organizations have agreed to do so. The Society for Research in Child Development and the Head Start conference are two major organizations for which the Clearinghouse has supplied more than 3500 brochures.

This experience reminds those of us in acquisitions and user services that even though a certain approach may not have been effective in the past, it may be worth trying again; times change, not only for ERIC, but also for our clients.

...Norma Howard (PS)

Australian Thesaurus of Education Descriptors - Reviewed

The Australian Thesaurus of Education Descriptors, which "Australianized" the ERIC Thesaurus, is reviewed in the June 1985 issue of Australian Academic and Research Libraries (See Attachment 8.) The review, by D. H. Borchardt, acknowledges the debt to ERIC and its remarks on the Australian literature of education are of interest.

...Jim Houston (ERIC Facility)

Databases Concerned With "Education"

Just to wet your appetite for more information, the machine-readable databases listed in Attachment 25 have all been indexed under the subject heading "Education" in Martha Williams' well-known database of databases. To save you the trouble of counting, there are 103 education-related databases in her comprehensive compilation.

...Ted Brandhorst (ERIC Facility)

Mid-Continent Regional Educational Laboratory (McREL) -- Address and Telephone Number Changes

McREL has effected various address and telephone number changes. These were communicated recently to OERI and may be of interest to those of you having occasion to contact or work with McREL. The changes are complicated enough that the best way to present them is through their own letter (See Attachment 9).

...Al Hill (ERIC Facility)

Peace Issues Bibliography Service (PIBS)

The Peace Issues Bibliography Service (PIBS) is a service of the Center for International Cooperation at the National College of Education. The bibliography is a computerized, annotated listing of resources on a wide range of peace-related topics, selected primarily for use by educators and parents. The service can provide a selective bibliography geared to the specific grade, format/s, and subject/s requested. Currently, the bibliography contains a total of approximately 700 different resources. When available, information on obtaining the resources is included in the annotation. Attachment 10 is the standard PIBS flyer/order form.

...Joanna Eustace (ERIC Facility)

Unsolicited Testimonial or Need I Say More!!!

At a recent college alumnae potluck, one of the women mentioned that the local Literacy Council was looking for clerical help. Knowing a potential ERIC user when I see one, I later told her that I would send her a packet of goodies on adult literacy. She asked where I worked and before I could finish "The ERIC Clearinghouse on Adult,..." She pointed at me and screamed (in a ladylike fashion, of course), "Digest #40!!! We love it!!! I just made scads of copies!!! You're wonderful!!!"

...Judy Wagner (CE)

TECHNOLOGY CORNER

Technologies Used by ERIC

What technologies have been used or are being used by ERIC? Sometimes we get this question. The answer is often surprising to the asker. For the benefit of those of you who may not have thought of ERIC as a heavy user of "technology", the list in Attachment 11 may prove illuminating.

...Jim Prevel (Central ERIC)

Grolier Publishes its Academic American Encyclopedia on CD-ROM Disc

One of the more innovative publishing efforts underway involving CD-ROM discs is Grolier Inc's project to publish its entire encyclopedia. The encyclopedia, consisting of 9 million words in 21 volumes, will occupy 110 megabytes on a single disc (with a capacity of 600 megabytes). The searcher can look up articles alphabetically, just as one normally uses a printed encyclopedia, or can search on individual words or phrases appearing in the text. A news item from InfoWorld (July 29, 1985) that describes this exciting new product appears as Attachment 12.

...Jim Prevel (Central ERIC)

PERSONNEL

Al Hill Retires From ERIC Facility

Effective February 7, 1986, Al Hill leaves the ERIC Facility to pursue a second career in real estate. Al has supervised the Facility's Document Control Department since its inception and has been with ORI (or its legal predecessors) for over 25 years, since 1960. Innumerable ERIC Clearinghouse staff have interacted with Al over the years by sending him their document shipments or by requesting ERIC forms or labels or standard handout brochures. Some of you may want to wish him well in his new endeavor; don't worry about any lateness, we will forward any messages.

Al will be succeeded by Cindy Addison who has backstopped Al since August 1983.

...Ted Brandhorst (ERIC Facility)

Cheryl Harrison Joins Staff at ERIC/ACVE

Cheryl Harrison has joined CE as Acquisitions Coordinator. She replaces Naomi Jacobs, who is now the full-time librarian at the National Center for Research in Vocational Education.

...Judy Wagner (CE)

Staff Changes at ERIC/SP

We are pleased to announce that our new User Services Coordinator is Dorothy K. Stewart. Dorothy was previously with the Urban Institute, Life-Ring, Inc., and the National Oceanic and Atmospheric Administration. We are also pleased that Barbara Kennedy has joined us as our secretary. Barbara is a graduate of Careerworks, Inc. and was previously a licensed practical nurse at Washington Hospital Center.

Francie Gilman, the previous User Services Coordinator, is taking a well-deserved break before plunging into the job market. We wish her the best of luck.

...Margaret Mann (SP)

Changes in Staff Responsibilities at CG

Several changes in staff responsibilities have been made at ERIC/CAPS in the past month. Please note the following: RIE coordination, Nancy Beekman; cataloging and user services, Kathy Bidelman; acquisitions and user services, Laurie LaChance; and CIJE coordination and editing, Barbara LeRoy.

...Debbie Herbert (CG)Healthy

ERIC PUBLICATIONS

Healthy Moves for Older Adults, by Leslie A. Stenger and Christel M. Smith. 62 p. \$7.95. The "graying of America" is not a myth - it is a reality that professionals in the fields of health, physical education, recreation, and dance should acknowledge and influence.

This book is written to assist professionals working with older adults and can also be used as a text by students in health, physical education, recreation, and dance professional preparation programs who plan to work with older adults. It addresses not only the physical needs and characteristics of older individuals, but also the psychological and sociological aspects of aging. The authors then focus on designing and implementing wellness programs that will meet the many needs of older adults.

...Margaret Mann (SP)

Methods of Assessing Teacher Education Students: Conference Proceedings. Elizabeth A. Ashburn and Robert L. Fisher, Editors. 80 p. \$7.50. This volume provides a record of stimulating discussions on present practices in student assessment in teacher assessment programs and significant problems associated with assessment procedures. The conference, sponsored by Illinois State University and the American Association of Colleges for Teacher Education, was held in July 1985 and was attended by deans and faculty from 47 teacher education institutions. At a time when the value of teacher education programs was severely questioned, it provided a forum for what one observer called "a real commitment to program evaluation and student assessment for program improvement purposes."

...Margaret Mann (SP)

A Model for Evaluating Teacher Education Programs-, by Elizabeth Nelli and Norma Nutter. 68 p. \$6.50. Intense interest in and criticism of teacher education from the public and the profession requires current, accurate information about the quality of teacher preparation. Elizabeth Nelli (Kentucky Department of Education) and Norma Nutter (University of Northern Colorado) show their model can be used to evaluate programs by examining interrelationships among:

- Planned goals and objectives
- Qualitative and quantitative data collection
- Pre-existing conditions (student and faculty characteristics, budget, governance, etc.)
- Interactions among the students, faculty, and curriculum in the teaching/learning process, and
- Intended and unintended program outcomes.

...Margaret Mann (SP)

Motivation Theory and Practice for Preservice Teachers. Kay Alderman and Margaret W. Cohen, Editors. 80 p. \$7.50. Change involves wanting to learn. Wanting to learn is motivation. In this volume, originally developed as papers for the 1984 annual meeting of the American Educational Research Association, the authors propose expanding the topic of motivation in the preservice teacher education program by including contemporary research. These papers clearly establish that there is a body of research available to help educators understand and promote student motivation, although much of this new information has not been compiled or disseminated for beginning teachers. Motivation Theory and Practice for Preservice Teachers is the first step in that direction.

ERIC KEEPING UP

NEWS BULLETIN OF THE CLEARINGHOUSE FOR SOCIAL STUDIES/SOCIAL SCIENCE EDUCATION

Fall 1985

A Retrospective Update on The Social Science Education Consortium and the ERIC Clearinghouse for Social Studies/Social Science Education

by Irving Morrissett, Executive Director of SSEC and Director of ERIC/ChESS

A major change is in store for the ERIC Clearinghouse on Social Studies/Social Science Education, and for its sponsor, the Social Science Education Consortium. After 15 years of operating this clearinghouse, from the time that it became a part of ERIC in 1970, SSEC will cease its sponsorship on December 31 of this year, having decided not to compete for renewal of the ERIC contract when it expires on that date.

It was difficult to make this decision, since the activities of the clearinghouse have been so compatible with, and supportive of, the objectives of SSEC and of its other activities. The circumstances behind this decision, not surprisingly, are financial. SSEC has since its birth in 1963, lived dangerously—on "soft money," that is, periodic grants and contracts, mainly from agencies of the federal government. With the progressive decline in support for activities other than the clearinghouse, as well as decreasing funds for the clearinghouse itself, it has become increasingly difficult, and finally impossible, to keep a critical mass of competent professional support staff.

At this juncture in the life of SSEC, I have become contemplative about the history, purposes, and functions of the Consortium, and of its place in the long history of efforts to improve education. As I look back on SSEC as a case study in federal funding of educational change, the picture is one of much excitement and a little frustration in exploring new (or rediscovered) ideas about the content and methods of education, together with very little excitement and much frustration with respect to the financial and organizational aspects.

The "new social studies" was a secondary outcome of the caustic criticisms of education during the 1950s, typified by Bestor's description of our "educational wasteland," and more specifically of the USSR's launching of Sputnik in 1958. The more immediate results of these events were the launchings of "the new science" and "the new math"; then followed support for social studies. Early in the 1960s, the National Science Foundation established a Course Content Improvement Section, paralleled by the Curriculum Improvement Program in the U.S. Office of Education. These efforts were a part of the burgeoning efforts of President Johnson's Great Society to improve the health, welfare, wisdom, and military preparedness of America.

The initial meeting of scholars and educators, which resulted in the formation of the Social Science Education Consortium, was financed by the National Science Foundation (NSF), sponsored by a committee of the Big Ten and the University of Chicago, and held at Purdue University, where Lawrence Senesh and I organized the gathering. The conference was attended by 24 educators and scholars, all from midwestern organizations (mostly universities) and by representatives of the President's Office of Science and Technology, NSF, and USOE (the U.S. Office of Education).

The conference focused on the problems of social studies education, what was being done about these problems, and what might be done about them by a group such as this. The diagnosis of problems makes interesting reading even today.

I have speculated on the extent to which this analysis was pertinent, in the light of subsequent knowledge, how pertinent it is today, and how much if any progress has been made toward resolving the problems. I will withhold those speculations but share some of the conclusions that came out of that meeting with respect to deficiencies in social studies.

1. Presentation and memorization of facts are emphasized, with little attention given to causal relationship, analytical methods, and critical thinking.

2. Despite the emphasis on facts, factual deficiencies are common...the facts are greatly over-simplified...community pressures may prevent objective treatment of many social facts.

3. Facts and value judgments are not distinguished.

4. The curriculum lacks balance and integration. Western countries and cultures are given a disproportionately large share of attention. History and geography dominate the curriculum...social sciences are not presented as part of a meaningful total framework. A bridge is lacking between the areas of science and the social sciences. Due to the impact of science and technology on society, such an omission can be catastrophic to our cherished democratic values.

5. The social studies curriculum lags far behind the latest knowledge in subject matter and methodology.

6. Recent advances in learning theory and child development have hardly begun to affect teaching methods in the social sciences.

7. Insufficient attention has been given to the differing needs of children.

8. A general emphasis on "citizenship training" has obscured the fact that the social sciences include systematic bodies of knowledge which are useful in their own right. An advanced concept of citizenship today must include an understanding of the concepts, methods, and applications of the social sciences to personal and social problems.

A possible outcome of this meeting could have been the establishment of a curriculum development project of the kind that was being funded with increasing generosity by USOE and, especially, NSF. Instead, the direction was set toward the fostering of communication among social science scholars and educational practitioners, with a view to organizing and disseminating information that could be of use in the improvement of the social studies. This has been the general direction the SSEC has taken in these intervening 22 years.

Strong encouragement was given to SSEC by representatives of USOE and NSF, at the initial conference and through the succeeding months, to submit a joint proposal to the two agencies to develop the activities of SSEC. Most of us in the effort at this time were neophytes in grantsmanship, and so were unusually frustrated by the events of the next 15 months. Through numerous versions of

(continued on page 3)

a proposal and numerous consultations with officials of USOE and NSF, it became apparent that we were not going to receive joint funding; and, to my knowledge, no such grant has ever been made. We were eventually funded by the Office of Education for \$115,000 for one year. That grant was made to Purdue University as the funding agent. After incorporation of the Consortium in November 1965, subsequent grants and contracts were made directly to SSEC.

In 1965, the ERIC system was also getting underway. It opened for business in 1966, but with several great gaps in this very promising educational information system: one of these gaps was the absence of a clearinghouse for social studies. I participated in some of the lobbying to correct this deficiency, and several new clearinghouses were established in 1970, among them one for social studies. In view of SSEC's major objective of disseminating information about new developments in social studies, ERIC was a natural complement to SSEC activities. We competed for the initial contract to operate the clearinghouse and have successfully competed for renewals on the contract, up to the last competition, in 1982, for a three-year contract.

Many, although not all, SSEC members (and others) have not been much concerned with the debate over the distinction between social studies and social science which surfaces periodically. Personally, I am quite willing to equate social studies with social science education, while realizing that there are important differences (some of them unwarranted) between the teaching of social sciences in universities and the teaching of social studies in elementary and secondary schools. In any event, the debate was sidestepped in 1970 by dubbing the new activity as the ERIC Clearinghouse for Social Studies/Social Science Education, out of which the acronym ERIC/ChESS was concocted. (No one has, to my knowledge, defined exactly what a "!" in the middle of two words or phrases means.)

In addition to the base of activities given by the ERIC clearinghouse for 15 years, SSEC has had one other source of long-term, continuing support. This was the funding by NSF from 1967 to 1977. Although this funding always took the form of particular projects—federal agencies always want something "new," even if the "old" warrants continuation—it amounted to institutional support. It was terminated, at least in part, because of the MACOS (Man: A Course of Study) controversy of the mid-seventies.

Other funding has always been much more ad hoc for particular, short-term projects. In 1968-70, SSEC staff members were the core of an exciting Experienced Teacher Fellowship Program. For a two-year period in the early 1970s we had funding to send out missionaries to 40 small teacher-education institutions to talk about new developments in social studies, most of it then under the rubric of the "new social studies." We published a teacher-generated series of promising practices in social studies. We have had various projects for the development or modification of curriculum materials, including materials on quantitative understanding in social studies, on ethnic studies, and on science-related social issues; also materials for the visually impaired and child adoption; and in recent years, some substantial work in evaluation and dissemination of law-related education activities. A major project, supported from 1979 to 1982 by NSF and especially suited to the purpose of SSEC, was SPAN, which assessed the status, needs, and possible future directions of social studies. Among the products of this project was Hazel Hertzberg's outstanding and perceptive *History of Social Studies Reform, 1880-1980* (a work that readers may think I am trying to match in this report). Along the way, SSEC staff have conducted various and numerous training activities, in Boulder and around the country.

While none of SSEC's activities have been antithetical to SSEC's main purpose of fostering communication for the improvement of social studies, it can scarcely be argued that all of the activities fit into an integrated whole. This is because "we do what we are funded to do." SSEC has never

had an income or a fund that it could spend as it wished. We have always had to be on the lookout for potential funding that would fit our general mandate. This has been a continuous concern of staff (not unlike other soft-money institutions), with occasional able assistance from members.

The lack of funds to pursue goals defined by board, members, and staff has been a source of frustration. It has been suggested that SSEC should be on the "cutting edge" of educational developments in our field, that it should be a kind of "think tank," providing a focused leadership for the improvement of social science education. These ideals have run against the basic fact of life that "we do what we are funded to do."

Nevertheless, the Consortium has provided a forum for considering exciting and sometimes urgent problems in education. With membership deliberately kept small to enhance personal interaction, annual meetings over the last 20 years have provided a forum for members to explore new ideas and exchange views. Some publications of significance to the field have come out of these conferences.

In addition to participation in annual conferences, members have often served on SSEC projects—as consultants, as authors, on advisory boards, and sometimes as temporary or part-time staff. There has always been a greater readiness on the part of members to be active participants than there have been funds to support such activities. Members have occasionally brought project funding to SSEC, although they understandably give preference on funding opportunities to the institutions that pay their salaries.

A major shortcoming I see in social studies today, and one that I had hoped we might have made progress on in SPAN and other activities, is the lack of integration of the various subject areas that crowd into the social studies in increasing numbers. The various interest groups—in women's studies, law-related education, ethnic studies, and many others—talk of "infusing" their subjects into mainline courses. This approach has some limited applicability, but also is a bit of a cop-out from the major issue of how to integrate or plan or select the content for social studies.

My greatest regret about the state of social studies, and education in general, is that we (not just SSEC) have failed to use the extensive resources at our command to make education more engaging and exciting for the great majority of students. Most children go to kindergarten and first grade eager for a new adventure. I believe that this interest and excitement could be maintained at a much higher level than is generally the case. My oversimplified diagnosis of the problem is lack of involvement and activity. As I scan the economic literature that flows through our ERIC clearinghouse, I note fairly frequently an enthusiastic account by a teacher about a class activity that was judged to be highly successful in enlisting the interest and enthusiasm of students. Almost invariably, these activities involve very active participation by the students—gathering data, interacting with classmates, working in or studying the community, and similar activities requiring that students get out of their seats and take on a task that requires them to think and act. Most often, such accounts come from elementary teachers. As students progress through the grades, such active involvement becomes less and less frequent, ending with the nadir of education which is undergraduate work in the large university.

While I feel that SSEC has provided a uniquely suitable home for ERIC/ChESS, I know that there are other competent organizations that can and will do justice to this important part of ERIC. We at ERIC/ChESS stand ready to help make a smooth transition to a new home. We give our best wishes to that new organization, to our friends and colleagues in the ERIC system, to the increasing millions of educators whose work is enhanced by ERIC, and to the coming generations of students whose lives may be enhanced by the continuing creative efforts of millions of dedicated educators.

Order Now! RIE 1985 Annual Cumulation

Dear Customer:

This is your last chance to save up to 10% off the regular price of the RIE 1985 Annual Cumulation—available *only* from The Oryx Press.

This cumulation covers one year of *Resources in Education*, the monthly abstract journal covering current research findings, projects and technical reports, speeches, unpublished manuscripts, and books. You know how important this reference is to your education collection.

As before, the RIE 1985 Annual Cumulation is available as a three-volume set (Abstracts Part One, Abstracts Part Two, and Index) or you may buy either the Abstracts (Parts One and Two) or the Index separately.

Early Payment Discount: With this special offer, you can save 5% off the regular subscription rate by submitting your order *with* payment before February 1, 1986.

Standing Order Discount: You can double your savings to a 10% discount off the regular subscription rate by placing yourself on standing order *and* submitting payment before February 1, 1986. Each year, your standing order status will automatically save you 5% off the regular rate as well as qualify you for special early payment offers. Before the new Annual Cumulations are released, you will receive a confirmation notice to verify your wish to remain on standing order.

Regular and discount rates are as follows:

	Regular Rates	5% Off	10% Off
Abstracts and Index Plus Postage & Handling U.S., Canada & Mexico: \$12.00; Elsewhere: \$22 50	\$225.00	\$213.75	\$202.50
Abstracts (two volumes) Plus Postage & Handling U.S., Canada & Mexico: \$6.00; Elsewhere: \$12 25	\$150.00	\$142.50	\$135 00
Index (one volume) Plus Postage & Handling U.S., Canada & Mexico: \$6.00; Elsewhere: \$9 75	\$ 75.00	\$ 71 25	\$ 67 50

Note: Discounts apply only to the regular list price and do not include postage and handling charges

Make sure you have access to educational literature. Use the enclosed order form to order your copies of the RIE 1985 Annual Cumulation today.

I look forward to hearing from you.

Sincerely,

Dick DeBacher

SPECIAL ANNOUNCEMENT

**ERIC Document Reproduction Service (EDRS)
Announces Price Reduction**

(Effective October 1, 1985)

The ERIC Document Reproduction Service (EDRS) has announced that effective October 1, 1985 the price for microfiche copies of ERIC documents has been reduced by 23%.

The new base price for an ERIC title in microfiche is \$0.75 (down from \$0.97). This includes any title that will fit on up to five (5) microfiche (i.e., about 98% of all titles). Each additional microfiche beyond the basic five costs \$0.15 (down from \$0.20).

The new base price for an ERIC title in paper copy is \$1.80 (down from \$2.15) for a document of up to 25 pages. Each additional 25 page increment costs \$1.80 (up from \$1.75).

The prices for back collections, collections by clearinghouses, and other special collections have also been reduced. The EDRS Order Form and the ERIC Price Code Conversion Tables have been revised to reflect the new prices. For further information, call EDRS at 1-800-227-3742.

Dialog Information Services, Inc.

DIALORDERSM SERVICE

SCOPE OF SERVICE

EDRS supplies only the ED-numbered items in the ERIC database. ERIC ED-numbered documents have three levels of availability: 1) Document available in both microfiche (MF) and paper copy (PC) form, 2) Document available only in MF form, or 3) Document not available from EDRS. The prices and level are shown with each ED record in the ERIC database.

.ORDER ERIC must include document form desired (MF or PC) as special instructions.

The "ship to" and "bill to" address will be supplied by DIALOG. Requests for an address other than those with your DIALOG account must be supplied as special instructions. EDRS service is worldwide.

OPTIONS AVAILABLE

Order is shipped 48 hours after receipt of order. Type of delivery should be requested, e.g., airmail, United Parcel Service, Federal Express, etc. All shipments are F.O.B. Alexandria, Virginia.

CHARGES AND TERMS

Cost of document either in MF or PC is contained in ED record abstract data. Add \$.50 per document ordered plus postage. Payment upon receipt of invoice in U.S. funds only.

Deposit accounts desired.

All postage charges are F.O.B. Alexandria, Virginia, and will be billed on invoice.

MISCELLANEOUS

Supplier will retrieve orders daily from the DIALOG DIALORDER Service. No payments necessary to CCC.

CONTACT

Once an order has been retrieved by EDRS and a date and time appear in the .LIST TRANSMITTED column, all questions concerning the order should be directed to:

EDRS
3900 Wheeler Avenue
Alexandria, VA 22304

Telephone: 1-800-227-3742
703-823-0500 (in Virginia)

— see ordering procedures on verso —

3373

Only ERIC report documents (i.e., ED numbered items only) are supplied by the ERIC Document Reproduction Service. To be sure that you are requesting only publications that are available from EDRS, the following procedures are recommended:

Enter accession numbers for which full document copies are requested; or perform search according to normal DIALOG procedures, KEEPing records in set 99 (DIALOG 1) or set 0 (DIALOG 2) for order. Be sure to check first whether the document is available from EDRS. (This information is given in each ERIC ED-numbered record.)
- 3 . TYPE set 99 in a short format to view for accuracy. Delete unwanted items using KEEP-EDnnnnnn if necessary. (When using DIALOG Version 2, the KEEP set is 0. TYPE 0/611-4.)
- 4 . Enter .ORDER ERIC (MF or PC) (number of copies) (special shipping instructions, if any). All ERIC orders must include an indication of MF or PC. The period (.) preceding the ORDER command is optional on DIALOG Version 2.)

System Development Corporation (SDC)

ORDER ERIC

Reports from the *Resources in Education (RIE)* portion of the ERIC database, available from the ERIC Document Reproduction Service (EDRS), are available through the ORBDOC™ Online Ordering Service. The ONLINE ERIC Command can be used to order these documents. (Documents indexed in *Current Index to Journals in Education (CIJE)* can be ordered through University Microfilms. See ORDER UMI.)

Here are important details for using ORDER ERIC:

- **Deposit Account.** A deposit account is not required but users may establish one through EDRS at the address given below.
- **Ordering and Shipping Information.** Include the following:
 - Deposit Account Number (if established) or
 - Billing information (if deposit account is not used): name, organization and complete address.
 - Ship to: same as billing information, or name, organization, and complete address. ERIC EDRS ships microfiche documents via airmail. Paper copies are shipped via United Parcel Service. If special shipping is required, indicate on one line, e.g. SHIP VIA: UPS BLUE LABEL.
 - Purchase Order Number (optional). Enter MY P.O. NUMBER IS: and the number.
- **Document Information.** Include the following on one line:
 - Accession Number (ED Number) (See Order UMI for articles [EJ Number] from CIJE).
 - Document form, i.e. MF for microfiche, HC for hard copy.
 - Number of copies.
- **Rates.** Prices of documents are indicated in the Availability (AV) field of ERIC citations or unit records.

Ablex Publishing Corporation

Announcing an important new journal in the field of early childhood education sponsored by NAEYC in cooperation with ERIC/EECE.

EARLY CHILDHOOD RESEARCH QUARTERLY

Editor: *Lilian G. Katz*, Director, ERIC Clearinghouse on Elementary and Early Childhood Education and Professor of Early Childhood Education, *University of Illinois-Urbana*

Associate Editor: *Rhoda McShane Becher*, Associate Professor of Early Childhood Education and Coordinator of the Early Childhood Teacher Education Program, *University of Illinois-Urbana*

Managing Editor: *Karen Steiner*, ERIC Clearinghouse on Elementary and Early Childhood Education, *University of Illinois-Urbana*

Editorial Board:

<i>Barbara Bowman</i>	<i>Greta Fein</i>	<i>Shirley Moore</i>
<i>David E. Day</i>	<i>Sally Kilmer</i>	<i>Ruby Takanishi</i>

Sponsored by the National Association for the Education of Young Children in cooperation with the ERIC Clearinghouse on Elementary and Early Childhood Education, the **EARLY CHILDHOOD RESEARCH QUARTERLY** includes articles presenting significant research and scholarship on all topics related to the care and education of children from birth through 8 years. Articles reflect the interdisciplinary nature of the field and of NAEYC. Included in the journal are research reports or syntheses, state-of-the-art reports, program evaluations, position papers, and essays. Of special interest are articles addressing methodological concerns; policy issues; and historical, theoretical, and philosophical matters. Above all, emphasis is placed on work with clear relevance to application and practice in the care and education of young children. A sample of articles appearing in the first several issues include:

The Past, Present, and Future for the Early Childhood Education Researcher, *Millie Almy*

Attitudes of Caregivers and the Day Care Experiences of Families, *Susan Kontos and Wilma Wells*

Age and Parenting Behavior among Black Women below the Poverty Level, *Joseph H. Stevens, Jr. and Barbara N. Duffield*

Consequences of Three Preschool Curricula for Youth through Age 15, *Larry J. Schweinhart, N.B. Larner, and David P. Weikart*

Effects of Parenting Style and Children's Preschool Experience on Children's Verbal Attainment: Results of a British Longitudinal Study, *M.E.J. Wadsworth*

Social Comparisons by Young Children: A Structural Analysis, *Judith A. Chafel*

Increasing Preschool Effectiveness: Enhancing the Language Abilities of Three and Four Year Old Children through Planned Sociodramatic Play Opportunities, *Ann K. Levy, Lyn Schaefer, and Pamela Phelps*

Beginning First Graders' "Invented Spelling" Ability and their Performance in Functional Classroom Writing, *Donald I. Richgels*

For more information about **EARLY CHILDHOOD RESEARCH QUARTERLY**, including special NAEYC member subscription rates, please return the coupon below to Ablex Publishing Corporation. Information for Authors can be obtained by writing directly to Karen Steiner, Managing Editor, Early Childhood Research Quarterly, University of Illinois, College of Education, 805 W. Pennsylvania Ave., Urbana, IL 61801.

AUSTRALIAN thesaurus of education descriptors; a word-stock for indexing and retrieving Australian educational literature, prepared by G. B. Lavender and Margaret A. Findlay. Hawthorn, Vic., The Australian Council for Educational Research Ltd., 1984. 247pp. ISBN 0 85563 3859. A\$30.00.

The appearance in print of the *Australian thesaurus of education descriptors* marks a significant stage in the development of educational thought and writing in Australia. A child of the most prestigious Australian educational institution whose maturity (at 55) has not affected its seemingly perennial fertility, this work will be welcomed by all who are concerned with the literature of and on Australian education.

That literature goes back one and a half centuries and shows no signs of abating. The first book published in Australia on the subject appeared in 1831 with the long-winded title *Account of steps taken, in England, with a view to the establishment of an academical institution or college, in New South Wales*. Its author, the Rev. T. D. Faug, could scarcely foresee that the church vs. state debate, innocently opened by him, would last practically forever, though the torrent of words poured out over it in the 19th century has abated somewhat in the 20th.

The literature related to Australian education is voluminous and its bibliographic control presents wide ranging problems among which the use and effect of a loose terminology is not the least. The creation of this *Thesaurus* will assist everyone involved in that literature, be it as a creator, a transmitter or a user, because it will help to define the words used.

The introduction to the *Thesaurus* explains the several specific Australian bibliographical services involved in the bibliographic control of the literature on Australian education, ranging from the well established *Australian education index*, created by ACER in 1957, to the recently initiated *Australian library and information science abstracts*. The authors emphasize the usefulness of specific indexes but say nothing about the larger ones, e.g. *IPHS*. This is a pity because the extraordinarily wide parameters of the subject make reference to the larger retrieval systems surely of considerable importance for the researcher.

There follows a helpful set of "guidelines for indexing" adopted by ACER, the study of which will be useful also to those who merely use indexes. Like, above all, the first rule, taken from ERIC: "index only what is in the document". The rider is, obviously, that an index can only be as good as the work or journal(s) to which it refers.

The authors acknowledge their indebtedness to the ERIC thesaurus and refer to the many years during which that US model has served Australian indexers. Indeed, no claim is made that the Australian *Thesaurus* represents a novel approach to indexing and bibliographic control. What is claimed, and rightly so, is that the ACER *Thesaurus* defines for the Australian scholarly community the terminology appropriate for educational writing and its indexing in this country. The point is also well made that the guidelines for indexing do not relate only to major bibliographic enterprises but can be adapted (and some hints are given to this end) for the in-house control of small data bases or for research projects.

The introductory section finishes with a detailed description of the structure and format of the thesaurus, with numerous examples. This apparatus is not novel, but its mastery is essential for the proper exploitation of bibliographic data bases, be they manual or computer based.

The scope notes (SN) (and the explanation of the descriptor groups) are of particular importance in this context because they define the Australian connotations of words. Librarians have struggled for decades with the problem of Australian subject headings as distinct from Library of Congress headings — and there is more to it than longshoremen vs. watersiders, or footpath vs. sidewalk — and the *Thesaurus* will be an important basis for the correct (i.e. accepted) employment of technical terms in the field of Australian education.

A quick glance at some of the terms used revealed little that could be considered unexpected — though an eyebrow or two may rise at the example Prisoners — U! Inmates; Jail (!) inmates. Nor can it be seriously accepted that Biography is identical with Hagiography even though there are cases of extraordinary congruence. It is never difficult to criticize so large an undertaking, consisting of hundreds of terms and thousands of directly or indirectly related forms.

The *Australian thesaurus of education descriptors* should be in the hands of every contributor to the literature on education and of every student of education and its related fields. All of these users, above all librarians with their experience and overview should take the trouble and write to ACER about any strange instances of word usage they might become aware of. Though the *Australian thesaurus* is yet another great leap forward, it is not and cannot be perfect, just as it can never be complete. Language and the use of words change. There are procedures, we are told "to ensure that the thesaurus is responsive to the changing nature and literature of education and to the indexing needs of thesaurus users". In the absence of a defined programme of revision and reprinting, that promise does not mean as much as I would like. An undertaking like this might have been better in loose leaf format, with stronger paper, for continuous revision. Yet the work before us is well and attractively produced and modestly priced. In spite of these few critical comments, ACER deserves applause.

D. H. Borchardt

Mid continent Regional
Educational Laboratory

2600 South Parker Road • Building 5 • Suite 353 • Aurora, Colorado 80014 • (303) 337 0990

November 4, 1985

National Institute of Education
Ms. Judy Conrad
1200 19th Street, N.W.
Washington, D.C. 20208

Dear Colleague:

Please note the status of mailing addresses and telephone numbers of McREL, The Mid-continent Regional Educational Laboratory.

1. Effective November 30, 1985 we will close the St. Louis office; we request that you take that address and phone number off your mailing list. Claire Heidma, the only staff person from that office who will remain with McREL is moving to our Kansas City Office.

2. The Aurora office has recently relocated. It's new address is:

McREL
Suite 201
12500 East Iliff
Aurora, CO 80014

Please use this address instead of the old one at Suite 333, Parker Road. The telephone number remains the same --303-337-0990. Larry Hutchins and Shirley McCune are both located in this office.

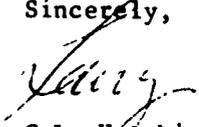

3. The Kansas City address remains the same:

McREL
4709 Belleview Avenue
Kansas City, Kansas 64112

The telephone number is 816 756 2401. The corporate office and business office are located there. Norma Watson and Susan Everson can both be reached there.

Thank you for making these changes.

Sincerely,

C.L. Hutchins
Executive Director

The Peace Issues Bibliography Service (PIBS) is a service of the Center for International Cooperation at National College of Education. The bibliography is a computerized, annotated listing of resources in a wide range of peace-related topics, selected primarily for use by educators and parents. The service can provide a selective bibliography geared to the specific grade, format/s, and subject/s requested. Currently, the bibliography contains a total of approximately 700 different resources from which each PIBS listing is selected. When available, information on obtaining the resource is included in the annotation.

The Center for International Cooperation

. . . seeks to prepare today's youth for effective citizenship in the "global society" of which the United States is a part.

. . . sponsors a half-tuition Global Education Internship for graduate students at National College of Education.

. . . builds a global awareness among undergraduates in National College's pre-service teacher education program, by offering courses with a global perspective, and conducting on-campus events to stimulate the discussion of current global issues.

. . . offers workshops to educators in conflict resolution skills and nuclear age education.

. . . works with community groups to support the public discussion of important global issues.

Center for International Cooperation

Peace Issues Bibliography Service

A COMPUTERIZED, ANNOTATED
BIBLIOGRAPHY OF PEACE RESOURCES
FOR EDUCATORS AND PARENTS

NATIONAL COLLEGE OF EDUCATION

Sample
Order Form

To fill out the Order Form, please complete the Subject, Format, and Level sections below. A brief explanation in the Comments section of how you plan to use these materials will help us evaluate and revise this service. For instance, we would like to know what grades(s) you teach, or how old your children are, what aspects of peace education interest you, etc.

SUBJECT

You can select a maximum of three subjects. If you choose more than one, the computer will print the items which satisfy any of the categories you selected. For example, if you choose Threat and Effect of Nuclear War and Hiroshima/Nagasaki, your list will contain those items included in both topics. Please indicate under "Comments" whether you wish a single alphabetized listing of categories or separate listings of each. There is a fee of \$4.00 per order.

- General (comprehensive, introductory, broad survey of world peace issues)
- History (current history, related to war/peace)
- Hiroshima/Nagasaki (the experience, impact, aftermath, implications)
- The Holocaust (Jewish Holocaust of World War II)
- U.S./U.S.S.R. Relations (current analysis, recent history)
- Threat and Effects of Nuclear War (general, foreign policy, technology, strategy)
- Defense Technology (conventional and nuclear capacity of superpowers)
- Economics (costs of the arms race, impact on the economy, alternative uses of economic resources)
- Peacemaking (noted peacemakers, grass-roots organizing political action, nuclear freeze movement)
- Nonviolent Conflict Resolution (sensitivity and skills in peaceful conflict resolution)
- Prejudice (the problem of prejudice, dealing with prejudice as a factor in conflict and war)
- Psychology (psychological impact of the nuclear threat)
- Peace Education (strategies, curricular materials, school/community relations)

FORMAT (maximum of three formats per order)

LEVEL (one per order)

Technologies Used By ERIC

1. Computer Technology (Mainframe)
 - Database Building/Database Management
 - Computerized Index Production
 - Photocomposition/Computerized Full Page Makeup
(See also Electronic Typesetting)
 - Distribution of ERIC Database on Magnetic Tape (ERICTAPES)
 - Online Access to ERIC Database (DIALOG, BRS, SDC)
2. Computer Technology (Microcomputers)
 - Online Transmission of Bibliographic Data from Remote Clearinghouses to Facility
 - Electronic Mail Linking ERIC Components
 - Distribution of ERIC File Segments on Floppy Disc (MicroSearch)
 - Online Editing (Under Development)
3. Computer-Output-Microform (COM)
 - All ERIC publications were once produced using COM technology. The EDRS cumulative indexes for ERIC (e.g., Title Index) are still produced via COM.
4. Electronic Typesetting
 - Photocomposition of Resources in Education, using first LINOTRON and then VIDEOCOMP electronic typesetting devices.
5. Micrographics Technology
 - Microfiche Production (Silver, Diazo, Vesicular)
High Speed, Step-and-Repeat Automatic Cameras
 - Paper Copy Blowback
High Speed, Step-and-Repeat, Automatic Copiers
6. Optical Character Recognition (OCR)
 - Single-keyed Data, using OCR-A Font, transmitted from ERIC Clearinghouses to ERIC Facility in Scanner-Readable Form
7. Optical Disc Data Storage
 - Compact Disc (CD-ROM Storage of Entire ERIC Database, For Retrieval via Microcomputer/Data Disc Player)
8. Word Processing
 - All Clearinghouses now equipped with either word processors or word-processing microcomputers.
9. Satellite Transmission
 - In Alaska and Appalachia, schools in remote valleys have been supplied with ERIC information via satellite transmission.
10. Videotex
 - ERIC Digests file on CompuServ online Videotex service.

Grolier Puts Works on CD-ROM

COMPANY THINKS COMPACT DISK ENCYCLOPEDIA WILL REVIVE HOME COMPUTER MARKET WITH USEFUL APPLICATION

Grolier Inc. plans to be the first publisher of a new type of software product with a CD-ROM (compact disk read-only memory) containing an electronic encyclopedia.

"The comment made repeatedly to us by dealers and distributors is, 'Thank God, we've finally got a real, legitimate application that justifies a computer in the home,'" says Frank J. Farrell, group vice president for Grolier's U.S. Reference Group in Danbury, Connecticut. Farrell believes that new personal computers, such as the Atari 520 ST and the forthcoming Commodore Amiga, in combination with CD-ROM drives, offer low-cost but powerful delivery vehicles that will make interactive reference products such as Grolier's Academic American Encyclopedia viable.

The 4.72-inch disk will retail for a price of \$199 when it begins shipping in October for the IBM PC and the Atari, assuming that disk drives are available. "Obviously, we are dependent on Atari's shipping its promised \$500 disk drive this fall and on Hitachi, Sony, Phillips, and others," says Farrell. "We are in the unusual position of being out in front of the parade on this and having to wait for the hardware to catch up with us." Farrell believes that Commodore and Apple will have CD-ROM disk drives in the near future that will also support the 4.72-inch format.

The Academic American Encyclopedia consists of 21 volumes or 9 million words that occupy 110 megabytes on the CD-ROM disk. An icon-based menu system allows the user to locate specific article entries, much as one would with printed encyclopedia volumes, and to conduct searches based on words or phrases in the text.

In a demonstration on an IBM PC and a Phillips CD-ROM disk drive conducted July 15 at the National Computer Conference (NCC), searches for encyclopedia articles with occurrences of two words took less than five seconds. The search function reports the number of articles with occurrences of a chosen word or words and produces a list of titles in which they occur, from which the user can select the article he wishes to read.

Along with providing the equivalent of a \$450 to \$650 printed encyclopedia for \$199, Farrell believes a major attraction

the product will be the interactive discovery process a computerized encyclopedia provides. "In searching through a traditional encyclopedia, you are limited by the frame of reference and the vocabulary that you bring to the subject," he says. "With this, the discovery process can be like a bomb — over and over you find things you didn't know or expect."

An example Farrell pointed out at the NCC demo was a search of the words *German* and *submarine*, which, along with more predictable article titles, yielded the Ernest Hemingway entry as containing both words. Finding the highlighted words in the text of the Hemingway biography led to a passage which discussed the unexpected fact that Hemingway had equipped his personal yacht with anti-submarine gear during World War II to hunt German subs.

Farrell says that Grolier will build on its first CD-ROM version of the encyclopedia over the next 18 months with new products. Additional reference tools such as a dictionary, atlas, or thesaurus will be added to the encyclopedia to interact with it, and general productivity tools for database, word processing, or spreadsheet operations might be included as well on the disk, which can hold an additional 400 megabytes. While the first

version of the encyclopedia lacks graphics, future versions will include them. Farrell also expects that updated versions of the encyclopedia will be made available to users on a regular basis, although the company has not yet set a price for the upgrades.

A product like the Academic American Encyclopedia could raise some unusual software protection issues, and Farrell says that Grolier has considered a number of aspects related to its product introduction. Direct reproduction of CD-ROM-based software is not much of a concern owing to many technical obstacles, including the fact that a user would need a high-capacity disk to write to in order to copy it. It would be hard to stop a user from downloading files he wanted to copy, but it is doubtful that an encyclopedia company, which for years has had its articles copied word for word by students, will be overly concerned. "The real danger for us is if somebody recompiles data from the encyclopedia and then adds something to it to get a database they can sell," Farrell says, because it would be difficult for Grolier to prove it had been done.

Grolier also plans to sell the encyclopedia on a 12-inch laser disk for video laser disk players. The Academic American Encyclopedia is identical to the electronic version of the product, which has been available on several on-line database services such as CompuServe and Dow Jones. The retrieval and interface software for the Grolier encyclopedia was developed by Actventure Corp. of Monterey, California

— Edward Foster

HARD DISKS

Tandy Will Sell Bernoulli Box

RADIO SHACK TO SELL REMOVABLE HARD DISK SYSTEM UNDER PRIVATE LABEL WITH MODELS 1000, 1200, AND 1600

Iomega Corp. has clinched a contract with Tandy Corp. to supply its Bernoulli Box 10-megabyte disk-cartridge storage system to Tandy to sell as a "private label subsystem" in its nationwide outlets. The agreement allows Tandy to sell the system as a component for its Model 1000 and 1200 IBM PC-compatible computers or its Model 1600 multiuser Xenix machine.

According to Iomega senior product manager David Cornaby, the Bernoulli Box will look very similar to a Tandy product. It will display the Tandy name and "the Tandy color, fawn-gray."

Cornaby says that it will be called the Tandy Disk Cartridge System or the Tandy DCS, and will use one half-height Bernoulli drive, expandable to two drives that will stack one on top of the other.

Cornaby compares the deal to that in which refrigerator manufacturer Mavtag makes refrigerator units for department store Sears, Roebuck & Co., to sell under the Sears label, Kenmore.

This is different from an original equipment manufacturer (OEM) agreement in which a manufacturer provides a product that is built into a system as a component.

Grolier Inc. Offers Disk-Based Unit That Includes Full-Text Encyclopedia

DANBURY, Conn. — Grolier Inc. is marketing a compact-disk read-only-memory device (CD-ROM) that can store approximately 100 million words and includes the company's 21-volume Academic American Encyclopedia (AAE).

The disk is designed to be used with any computer manufacturer's CD-ROM-disk drive, as well as with most personal computers that have at least 256K bytes of RAM, the company said.

Product Compatibility

The compact disk is said to be compatible with IBM Corp.'s Personal Computer and with the new Atari Corp. 520 ST.

The disk's storage capacity is equal to about 220,000 pages of text, or about 1,500 times more data than a typical 5.25-inch floppy disk can handle, Grolier said. The CD-ROM disk is the same

size as a digital audio-system compact disk.

The company said that a search for any particular word or group of words in the encyclopedia can be completed within three to five seconds.

The manufacturer will attempt to market its compact disk to educators, librarians, business people, researchers and home users, according to Robert B. Clarke, chairman and chief executive officer of Grolier.

The new product, which will carry a suggested retail price of \$199, is expected to be available through computer-specialty outlets in major U.S. cities beginning in October.

In order to scan and display the encyclopedic data, the company explained, a user needs a monitor and a personal computer equipped with a CD-ROM-disk drive. Grolier said it expects such disk drives to become avail-

able for most personal computers in the near future.

To date, Hitachi Ltd., Sony Corp. and several other manufacturers have developed CD-ROM-disk drives for personal computers, Clarke said.

Marketing Plans

He added that Atari is planning to market a CD-ROM drive for its new ST computer in the fall, and that Digital Equipment Corp. is expected to equip its MicroVax computer with a CD-ROM drive as well.

The electronic AAE, which is comprised of about 9 million words, was developed by Grolier Electronic Publishing Inc., a division of the company's U.S. Reference Group.

The AAE CD-ROM display and retrieval software were designed and produced by Activenture Corp. of Monterey, Calif., in cooperation with Grolier.

The ERIC Administrative Bulletin (EAB) is prepared by the ERIC Processing and Reference Facility on the basis of material submitted by all components of the ERIC system. EAB articles are reviewed and approved by Central ERIC before publication. The EAB is intended to be the "journal" of the ERIC system and a major means for the decentralized components of ERIC to communicate and interact with one another. The EAB is also a permanent record reflecting most of the major events in the life of the ERIC system (such as personnel changes, Standing Order Customer changes, etc.) and providing in printed form essential documents (such as ERIC policy and priority statements, Clearinghouse scope statement modifications, ERIC Processing Manual revisions, etc.) Submissions to the EAB are to be sent (using the standard form) to your respective monitor. The deadline for input to each monthly issue is the 10th of the month.

NETWORK NEWS

OERI Organization Charts and Roster

In response to requests made at the recent COED meeting, we are including in this EAB copies of the most recent OERI Organization Charts and Senior Staff Roster (see Attachment 1).

...Ted Brandhorst (ERIC Facility)

ERIC Yearbook of Education

The preparation of an ERIC "Yearbook of Education" is now underway. It will consist of sixteen chapters each devoted to critical issues within the scope of a particular Clearinghouse. It will also have an overview chapter that integrates the separate discussions and makes some general observations. The individual chapters will, in all likelihood, be written by the Clearinghouse directors and their staffs; the author of the overview chapter will be an "outside" educator.

There has been discussion about the possibility of such a work for a number of years. Although the Clearinghouses have collaborated on SOC Workshops, the Vocabulary Improvement Program, and the building of special files, among other technical projects, the "Yearbook" will be the first systematic information analysis product produced by the Clearinghouses acting in concert. (We have, of course, been "collaborating" on RIE and CIJE for years!)

Erwin Flaxman (UD) is editor-in-chief of the Yearbook. The following Directors are members of the Yearbook's Editorial Advisory Board: Garry Walz (CG), Charles Suhor (CS), Philip Piele (EA), Donald Ely (IR), Robert Howe (SE), Elizabeth Ashburn (SP).

The first draft of the Yearbook is expected in the Spring of 1986.

..Erwin Flaxman (UD)

Electronic Networks for Educators

The following paragraph describes a project of the Resource and Referral Service at the National Center for Research in Vocational Education. The project report, "Resource and Referral Service: A Report on Electronic Networks for Educators, has been submitted to ERIC (CE-042 700). A list of national and state electronic networks relevant to educators has been extracted from the report and is reproduced here as Attachment 2.

Project staff identified and compiled information about existing national and state networks that have been developed to link various specialized educational groups. This information is presented in the report in the form of network "profiles" that include: name of network, target audience, cost, method of access, features, a brief description of content, and start date. Project staff used several networks to disseminate information on upcoming professional meetings, resource lists available at no charge, and research findings. These dissemination activities included submitting information to several networks and actively participating in one network by actually developing data files and monitoring their use. Project staff also responded to requests that resulted from the various network announcements. Based on the project's experiences, the following steps are suggested for persons having similar dissemination needs: (1) identify existing networks of interest and request detailed information on costs, features, and number of users; (2) determine dissemination requirements; (3) decide which electronic networks meet all or some of these requirements; (4) considering costs and benefits, decide which networks (if any) to join; (5) submit information for announcement on other networks; and (6) keep up to date on new networks that are formed. In addition to the network profiles, the report includes references to the literature on the topic and examples of the information disseminated.

...Judy Wagner (CE)

"DIALOG in the Classroom"

DIALOG has prepared an exciting new brochure enumerating the files offered by DIALOG that are of particular interest to the educational community. Some of the files mentioned are: ERIC, ECER, Dissertation Abstracts, Directory of Education (electronic), and Peterson's College Database. This assemblage is clearly DIALOG's competitive response to BRS's SPIN/SPIF family of files.

The DIALOG brochure is reproduced in its entirety for your convenience as Attachment 3.

...T Brandhorst (ERIC Facility)

CIJE Author Index, 1969-1984

Oryx Press has produced a new printed cumulative index providing Personal Author access to the CIJE database for the sixteen (16) year period 1969-1984. It is priced at \$120.00 plus postage. This is a large volume containing some 2000 pages. The Oryx flyer/order form for this new product is reproduced as Attachment 4.

...Joanna Eustace (ERIC Facility)

EC Hosts Jim Bencivenga and Alan Moorehead

Jim Bencivenga and Alan Moorehead visited the Reston (VA) home of ERIC/EC on Tuesday, January 28, 1986. Management staff of the Clearinghouse provided a brief overview of procedures, objectives, and products in each of the four major "Performance Category" areas of Clearinghouse operations. Discussion included a constructive interchange regarding ERIC system-wide problems and potential. EC staff enjoyed the opportunity to interact with OERI's new Director of Information Services.

...Don Erickson (EC)

AERA Time is Coming Up Again -- Attention Acquisitions Coordinators

As it does every year, in order to avoid duplicate acquisitions efforts, the ERIC/TM Clearinghouse will solicit all papers presented at the annual meeting of the American Educational Research Association (70th, San Francisco, CA, April 16-20, 1986). TM will transfer AERA papers to the appropriate ERIC Clearinghouses as quickly as possible, but as there are large numbers (over 3,000 presenters), this process will take several months. Please feel free to contact us with any questions about papers of special interest to your particular Clearinghouse.

...Betsy Smith (TM)

ALA Yearbook (for 1984) -- "Databases, Computer-Readable"

The article on "Databases, Computer-Readable" in the 1984 ALA Yearbook states that out of the 300 major databases currently available online only five (5) were used more than 50,000 connect hours in the year. These five were: LEXIS, MEDLARS, CA Search, ERIC, and NEXIS. The article is by David Grossman and the source of the data reported is not given, but the data do confirm the earlier Infometrics, Inc. reports in which ERIC is ranked fourth among databases in terms of total connect hours.

...Ted Brandhorst (ERIC Facility)

National Clearinghouse for Bilingual Education (NCBE) - RFP
Statements Pertaining to Practitioners

The recent RFP for NCBE contains some new language emphasizing the importance of serving practitioners. The relevant passages are quoted below. They are indicative of the priority being given this area. Similar language will no doubt be used in other future ED procurements.

"It will perform a highly active role in outreach to pre-college practitioners..." (p.3)

"The principal users of the Clearinghouse are to be practitioners and those individuals or institutions that interact with or aid the practitioners..." (p.3)

"...the practitioner, as well as those entities and others who serve the practitioners, is the main focus of Clearinghouse efforts." (p.4)

"It is imperative that the practitioner be made aware not only of available classroom materials, but also of the level of satisfaction that users of program materials have experienced. Too often teachers and administrators must rely on personal experience to gather information on the appropriateness and quality of curriculum materials. Too often school districts and teachers resort to materials development because it appears that none are available that fill their students' needs. A readily accessible central file of curricular information, will save bilingual education practitioners time and energy. They could also begin to exchange ideas on a national level.

"What is required is a procedure for collecting information from practitioners regarding what bilingual materials are being used, where they are being used, how and when they were developed (i.e., commercially developed or, teacher/school/district made), the level of satisfaction that practitioners experience with the materials, etc. This information should be placed on a readily accessible file and updated routinely. A teacher or another practitioner will then be able to search the file for appropriate materials, gather some background information, determine what schools or districts are using the materials, establish where the materials are available, and get some notion of the level of satisfaction that users have experienced with the materials. All information and opinions would come from practitioner peers...

"The contractor shall develop a method for collecting the necessary information from practitioners and a file on which the information will be stored and searched. Procedures shall be developed to routinely update this file and make it readily accessible to practitioners in the field. A system that merely lists available curricular materials by subject matter will not be acceptable. Such lists and systems already exist and are of limited use to

practitioners since they lack input from practitioners re: actual classroom experiences. Moreover, they generally contain only commercially available materials. What is required is a system that solicits input from practitioners on their use and satisfaction with bilingual curricular materials both commercially and practitioner developed." (p.7)

...Ted Brandhorst (ERIC Facility)

Who-Has-Done-the-Most-ERIC-Abstracts Contest

The individuals listed below rank the highest in terms of ERIC abstracts written (not edited) through 1985. The study methodology is available upon request.

<u>Individual</u>	<u>Institution</u>	<u>Number of ERIC Abstracts Prepared</u>
Susan Willcher	CE (RIE)	539
	FL (RIE)	955

Request for Charitable Contributions of Documents for Philippine Mining Communities Association

During the holidays, many ERIC components received a letter from the "Southern Philippines Small Mining Communities Association" (SOPSMICA), requesting books, periodicals, magazines, and other educational materials. For those who did not receive the letter and would like to contribute something, the original request is reproduced as Attachment 5.

Eastern Regional Technical Meeting (May 15-16, 1986)

The site of the Eastern Regional Technical Meeting has been established as: Chevy Chase Presbyterian Church, at the corner of Connecticut Avenue and Western Avenue, Washington, DC. The meeting room is identified as: Geneva Hall. More information will follow across the next few months.

...Pamela McLaughlin (IR)

Stored Searches -- An Example from NASA's RECON System

ERIC (via JC) is currently investigating the feasibility of generating and storing for on-demand use a set of optimum search strategies any one of which could be called up and used without going through the sometimes lengthy process of researching and developing an original search strategy.

The January 1986 issue of STI-RECON Bulletin and Tech Information News has a short article describing how NASA provides this particular service to its users. Unfortunately the example used, "Halley's Comet", does not cite the actual search strategy, but only how to recall it; however, the joy of having stashed away the "perfect search strategy" for others to use comes across nicely in the write-up (see Attachment 6).

ERIC PERSONNEL

Lynn Smarte's New Arrival

Christopher Lee Smarte joined the ERIC family on February 10, 1986, weighing 6 lbs. 10 oz. Mother and baby are doing fine. Lynn will be on maternity leave from EC until May 1.

...Pauline Moran (EC)

ERIC Staff Members Honored by NCRVE for Length of Service

Several members of the CE staff were recently honored for their continued service to the National Center for Research in Vocational Education (NCRVE). Recognized for five or more years of service were: Juliet Miller, Susan Imel, Judy Wagner, Sandra Kerka, Cathy Thompson, and Brenda Hemming.

...Judy Wagner (CE)

Staff Changes at TM

We are happy to announce that the position of Indexer/Abstractor at ERIC/TM was filled on November 1, 1985, by Lucie Olson. Lucie has an M.L.S. and has worked as a children's librarian. Her prior work experience at ETS is proving very helpful in dealing with the kinds of materials processed by TM.

...Betsy Smith (TM)

ERIC PUBLICATIONS

EC

"Teaching Learning Disabled Students at the Secondary Level" by Zigmond, Sansone, Miller, Donahoe and Kohnke is an addition to "What Research and Experience Say to the Teacher of Exceptional Children" series. It provides practical suggestions for structuring and implementing programs that work. Part one looks at program options at the secondary level, including the Resource Room, Self-contained Class, Consultation, and Work Study. Part two provides guidelines for planning for instruction. Factors such as assessment of individual instructional needs, motivation, behavior management, and organizing the environment are explored. Part three describes how to organize instruction for maximum student learning. 50pp., #305. \$6.00, CEC member price \$5.10.

"Exceptional Asian Children and Youth" by Kitano and Chinn, Eds. integrates the research to date and provides insight into special education problems of Asian students. Includes chapters on demographics, cultural perspectives, assessment, family influences, gifted and talented, and curriculum modifications. 68pp., No. B620. Price \$7.00, CEC member price \$5.95.

"Educational Services to Handicapped Students with Limited English Proficiency: A California State-Wide Study" by Cegelka, Lewis and Rodriguez and Pacheco is a comprehensive resource for developing programs. Includes a literature review and analysis for over 100 promising practices. 96pp., No. B621. Price \$8.00, CEC member price \$6.80.

All available from The Council for Exceptional Children, 1920 Association Drive, Reston, VA 22091.

CE

During 1985, the ERIC Clearinghouse on Adult, Career, and Vocational Education developed seven major publications. These papers are available through the ERIC system or may be ordered from the National Center Publications Office using the order information below.

Agricultural Education: Review and Synthesis of the Research, Fourth Edition, by Jasper S. Lee. (ERIC Document Reproduction Service No. ED 260 300; Order No. IN298; Price \$4.75). This publication, the fourth edition of a review and synthesis of agricultural education research, concentrates on the period from 1978 to 1984 covering these aspects of agricultural education: (1) vocational-technical agriculture programs; (2) personnel preparation; (3) instructional materials and technology; (4) professionalism; (5) relationships with publics; (6) international agricultural education; and (7) extension education. A summary section highlights areas for future research and the need for a National research agenda.

Videodiscs in Voc Ed, by William P. Olivier. (ERIC Document Reproduction Service NO.ED 260 301; Order No. IN299; Price \$4.75). This paper provides teachers and trainers with the concepts and procedures involved in using interactive videodisc technology for instruction and is intended to help teachers and trainers produce their own videodisc materials. The first section of the paper reviews some of the methods of delivering individualized instruction: programmed and computer-aided instruction. Next, four kinds of configurations for learner interaction with video are illustrated, and a brief description of some of the existing interactive video training materials is provided. The major portion of the paper is devoted to a discussion of the design and production of interactive videodiscs including a case study that describes the development and implementation of a videodisc on machine lathe operations.

Part-Time Occupational Faculty: A Contribution to Excellence, by Michael H. Parsons. (ERIC Document Reproduction Service No. ED 260 302; Order No. IN300; Price \$5.50). Part-time faculty continue to play a vital role in postsecondary occupational education despite reductions in budgets in some institutions and increasing diversity of students. This paper explores the recruitment and use of part-time faculty in postsecondary institutions. The author discusses legal issues, the need for support systems, evaluation, and development of part-time faculty members. Their role in marketing the institution is also emphasized. A systems view of the part-time faculty member prevails throughout the paper.

Part-time faculty members comprise an essential element of any postsecondary occupational education program. From the demographics of their use to their role in needs assessment and institutional marketing, the publication stresses that they are an integral part of the mission of postsecondary institutions.

Adult Literacy Volunteers: Issues and Ideas, by Paul Ilsley. (ERIC Document Reproduction Service No. ED 260 303; Order No. IN301; Price \$5.50). The purpose of this review and synthesis paper is to promote awareness of literacy voluntarism, its literature, history, and programs. In order to provide information to researchers and practitioners, the subject of adult literacy voluntarism is examined for its developments, trends, and issues. The paper includes the following sections: an analysis of the literature base of literacy voluntarism; an overview of current delivery systems including questions regarding current efforts; an examination of the types of literacy volunteer programs; administrative concerns and policy considerations that should be addressed in developing programs; and six common assumptions about literacy voluntarism and recommendations for further research to improve policy and practice.

Immigrant Workers and the American Workplace: The Role of Voc Ed, by Joan E. Friedenberg, Nancy Lee Lucas, Nick Kremer, and Tipawan Reed; edited by Jeanne Lopez-Valadez. (ERIC Document Reproduction Service No. ED 260 304; Order No. IN302; Price \$5.50). The papers in this compilation highlight the issues and strategies used by programs to prepare limited English-proficient (LEP) immigrants and native-born adults for employment. The readings are intended for use by administrators and practitioners and are designed as informational tools for program development. The following sections are included: learning English, including the immediacy and diversity of language needs of LEP immigrants ranging from life coping to employment related; cultural influences and cross-cultural teaching; methods for providing employment and training opportunities for LEP adults; and accessing employment for LEP immigrants (or job development).

Underemployment from a Human Services Perspective, by David P. Meyer. (ERIC Document Reproduction Service No. ED 260 305; Order No. IN303; Price \$6.25). This paper examines underemployment--a developing socioeconomic problem--from a human service perspective. First, a definition of underemployment that considers three essential elements of hours worked, skill utilization, and compensation is developed. Next, three types of underemployment are examined: part-time, below skill, and low compensation. Groups most likely to experience underemployment are described including farm workers, women, youth, minorities, and college graduates, and factors that contribute to underemployment are enumerated.

Because of the variety of underemployment, each calls for its own special kind of career assistance. The paper includes one career assistance model that has been used with underemployed workers in the automobile industry. The paper concludes with a discussion of future trends that will affect the underemployment situation.

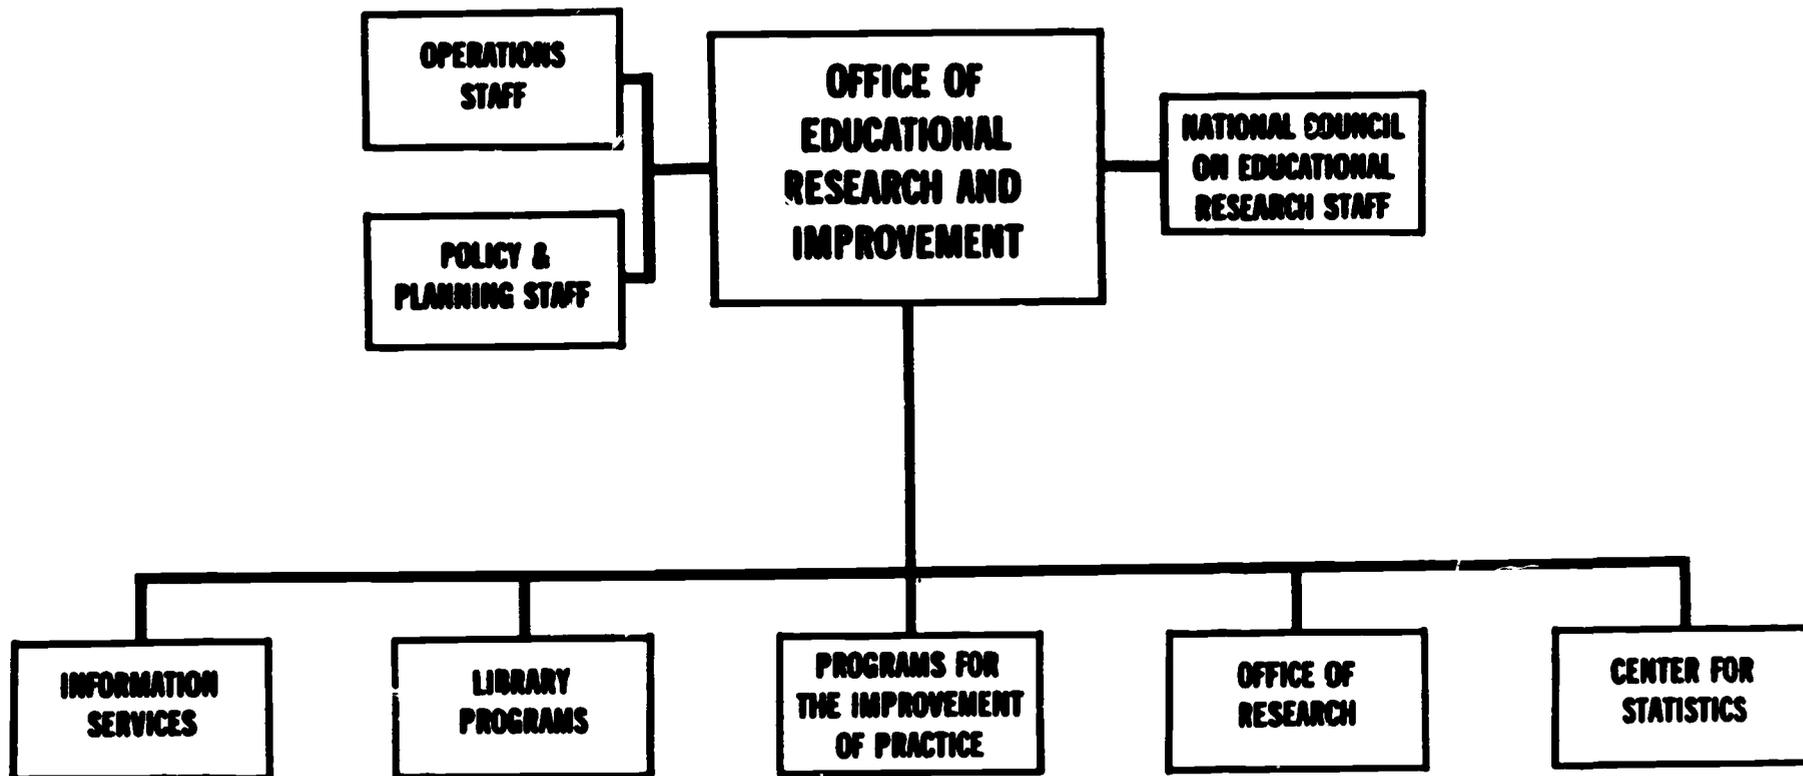

Education and Work: The Essential Tension, by Louise F. Fitzgerald. (ERIC Document Reproduction Service No. ED 260 306; Order No. IN304; Price \$5.50). This paper analyzes and synthesizes the knowledge base in the area of education and employment with particular emphasis on the work done by the National Institute of Education (NIE) Regional Laboratories and Research Center and other relevant grants. The approach taken is to identify the critical questions, both theoretical and practical, that appear to have guided this body of inquiry and to reflect the state of knowledge that bears on these questions. To establish a framework for the inquiry, the paper begins by examining the broad philosophical question of the role of education in society. Next, the empirical relationship between education and occupational attainment is examined in terms of general themes, the subpopulations of blacks and women, the outcomes of vocational education, and the question "Are Americans overeducated?" The third section of the paper examines the question "Which parts of education are salient for employability?" and looks at basic skills, general employability skills, and occupational adaptability and transferable skills. In the fourth section, the effectiveness of various environments and programs for teaching and learning are examined. The paper concludes with observations about the body of research that describe the nature of the relationship between education and work.

These papers may be ordered by IN number from National Center Publications, 1960 Kenny Road, Columbus, OH 43210-1090. Orders under \$10.00 must be prepaid.

DIALOG in the Classroom: Find out about it.

We've studied hard to make DIALOG indispensable for education!

DIALOG offers:

databases to match the professional needs of educators, including:

*ERIC
EXCEPTIONAL CHILD EDUCATION RESOURCES
DISSERTATION ABSTRACTS ONLINE
ELECTRONIC DIRECTORY OF EDUCATION
PETERSON'S COLLEGE DATABASE*

databases to aid in the selection of educational materials such as:

*LC MARC
REMARC
BOOKS IN PRINT
WILEY CATALOG/ONLINE
U' RICH'S INTERNATIONAL PERIODICALS DIRECTORY
BOOK REVIEW INDEX
A-V ONLINE*

databases to assist your use of the microcomputer or micro-computer software in the classroom:

*MICROCOMPUTER INDEX
COMPUTER DATABASE
.MENU™ - THE INTERNATIONAL SOFTWARE
DATABASE™ (ISD)
BUSINESS SOFTWARE DATABASE™*

and several options to allow DIALOG to become a part of your classroom instruction, including:

*DIALOG Classroom Instruction Program
KNOWLEDGE INDEX - Direct Invoicing Option
KNOWLEDGE INDEX - Demonstration Package*

The world's most comprehensive collection of databases, covering virtually all areas of interest, are available on DIALOG. The ERIC database, produced by the Educational Resource Information Center of the National Institute of Education, has been available on DIALOG since 1972. DIALOG has added over 250 databases in all areas of interest since that time, including:

*Business
Chemical Information
Medicine & the Biosciences
Law, Government & Intellectual
Property
Science & Technology
Current Events
Energy, Environment, &
Agriculture
Education
Humanities & Social Sciences
Biographical Information*

We've added options for using DIALOG in the classroom

DIALOG offers several options to encourage student awareness and independent use of online information services.

DIALOG Classroom Instruction Program

For over a decade, educational institutions that offer formal, supervised instruction in online information retrieval have enjoyed use of most of DIALOG's databases at a reduced rate under the Classroom Instruction Program. The Program offers:

over 200 databases during all hours of regular DIALOG service

use of full DIALOG files at the rate of only \$15 per hour, including the cost of telecommunications

two complimentary DIALOG System Seminars for faculty members

a student Lab Workbook for classroom use at \$11 per copy

multiple copies of documentation (Bluesheets) for the DIALOG ONLINE Training and Practice (ONTAP) files at no cost

Check the DIALOG Price List for databases available under this program.

3445

KNOWLEDGE INDEX - Direct Invoicing Option

DIALOG's popular evening and weekend service offers a simplified package of nearly 40 databases. KNOWLEDGE INDEX can be made part of your instructional program through the direct invoicing option, which allows schools to offer direct access to KNOWLEDGE INDEX to their students. The low flat rate of \$24 per hour applies to the use of KNOWLEDGE INDEX under this option.

To begin KNOWLEDGE INDEX service under this option, call or write DIALOG Marketing and ask for the KNOWLEDGE INDEX Packet and the Service Agreement Rider.

KNOWLEDGE INDEX - Demonstration Packet

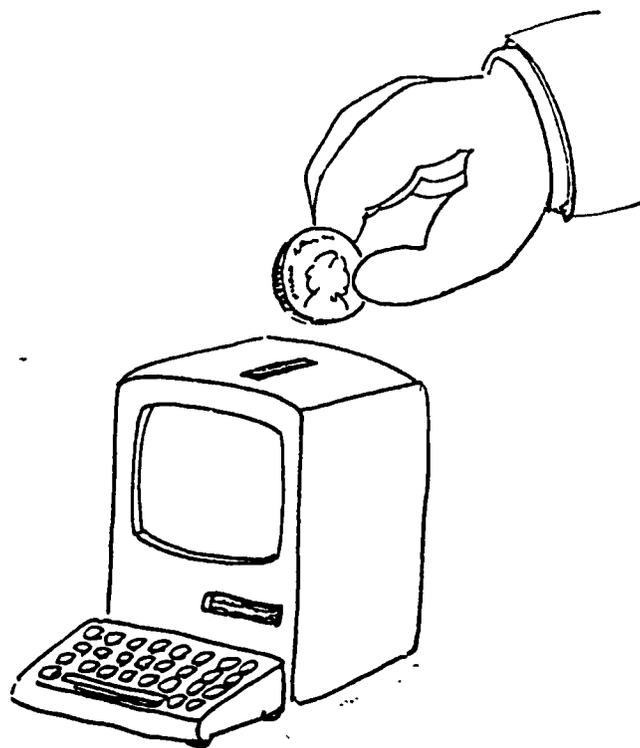

To help acquaint students with the experience of searching KNOWLEDGE INDEX without online charges, a demonstration diskette provides:

- an introduction to the KNOWLEDGE INDEX service
- Interactive demonstration of the use of basic KNOWLEDGE INDEX commands
- a small, searchable database of citations on computers and related topics

The diskette is available now in an IBM PC-compatible version, and in an Apple II version in early 1986. The diskette is in color, but can be used on non-color monitors.

The package is free to qualified organizations. There is a \$5 handling fee. Each organization can make up to 5 copies of each diskette, or can order more copies for a handling charge of \$2 for each additional diskette.

For more information concerning the Classroom Instructional Program and the other instructional programs offered by DIALOG, mail the attached card, or call DIALOG Marketing at 800-3-DIALOG.

Professional Resources for the Educator

ERIC - search the *Resources in Education (RIE)* index and the *Current Index to Journals in Education (CIJE)* index, dating back to 1966, simultaneously on the ERIC database on DIALOG.

EXCEPTIONAL CHILD EDUCATION RESOURCES - a comprehensive database of published and unpublished literature on the education of handicapped and gifted children.

DISSERTATION ABSTRACTS ONLINE - the definitive guide to American dissertations accepted by an accredited institution since 1861, searchable online by author, title, or any term or combination of terms that you wish to use. The **COMPLETE ABSTRACTS** can be **SEARCHED** and **DISPLAYED** on DIALOG for most dissertations granted after 1979.

ELECTRONIC DIRECTORY OF EDUCATION - locate directory information as well as critical demographic data such as enrollment, expenditures, and special facilities on over 100,000 U.S. schools, 15,000 school districts, and 15,000 public libraries.

PETERSON'S COLLEGE DATABASE - a complete, online directory of degree-granting, post-secondary colleges and universities in the U.S. and Canada containing the text of the college profiles found in Peterson's annually updated *Guide to Four-Year Colleges* and *Guide to Two-Year Colleges*.

Evaluate and select educational materials in print...

The LIBRARY OF CONGRESS Catalog is online with DIALOG! The LC MARC and the REMARC databases collectively offer bibliographic records for all books, many serial publications and musical scores, catalogued by the U.S. Library of Congress from 1897 to the present.

The BOOKS IN PRINT database is the continuing record of trade information on forthcoming books, books in print, and books going out of print, published or distributed in the U.S. The BOOKS IN PRINT database allows you to simultaneously search the most current editions of *Books in Print*, *Subject Guide to Books in Print*, *Books in Print Supplement*, *Paper-bound Books in Print*, *Forthcoming Books*, and the *Subject Guide to Forthcoming Books*, and more.

WILEY CATALOG/ONLINE - for a complete inventory of books, journals, software, databases, and other publications sold by John Wiley & Sons and its subsidiaries.

ULRICH'S INTERNATIONAL PERIODICALS DIRECTORY - to identify more than 100,000 regularly and irregularly issued serials from 65,000 publishers in 181 countries to either build your professional collection or that of your library.

BOOK REVIEW INDEX - to locate reviews of books and periodicals that appear in over 380 journals.

In audiovisual format...

A-V ONLINE - locate information on all types of educational, non-print media used in the entire spectrum of education from pre-school to the graduate level.

or in machine-readable format.

Use DIALOG to locate articles on microcomputer hardware, software, or applications in the classroom, lab, or at home.

MICROCOMPUTER INDEX - locate general articles, book and software reviews, applications, and new product descriptions and announcements, from 50 microcomputer journals.

COMPUTER DATABASE - this database offers product evaluations, comparisons, and recommendations on the best buys in computer products.

.MENU™ - THE INTERNATIONAL SOFTWARE DATABASE™ (ISD) - Locate, evaluate, and select software for any application from this online directory of over 55,000 software packages.

BUSINESS SOFTWARE DATABASE™ - Over 3,500 software packages which have business applications for use with micro and minicomputers are described in detail.

CIJE Author Index, 1969-1984

Researchers in education know the *Current Index to Journals in Education* offers the most timely, complete, and authoritative coverage of the vast periodical literature of education. Now access to this extensive literature is easier than ever with a new searching tool: CIJE Author Index, 1969-1984. This extensive work offers convenient access to all the literature indexed in CIJE from 1969 through 1984.

One-Stop Access by Author

This index will list alphabetically each author of every article cited in CIJE during this 15-year period, providing the information needed to find the full citation.

Save Time and Money

This volume, more than 2,000 pages long, bound in cloth, will save countless hours of manual searching

and/or many dollars worth of online searching in educational databases.

ACT NOW AND SAVE! SPECIAL PRE-PUBLICATION PRICE

If you act quickly, you can save \$25.00 off the list price of \$120.00 for the CIJE Author Index, 1969-1984. Fill out the order form below and send it in before September 1, 1985, and you'll pay only \$95.00 plus shipping and handling. Include payment with your order and we'll pay the shipping costs.

CIJE Author Index, 1969-1984. July 1985 / 2,000 pages / 8½ × 11 / Clothbound / ISBN 0-89774-235-4 / Regular price: \$120.00 plus postage and handling. Special offer: \$95.00 until September 1, 1985.

AMELIORATION and SOCIO-CIVIC ACTIONS GROUP

Attachment 5

a division of

Southern Philippines Small Mining Communities Association (SOPSMICA)
Cagayan de Oro City, Philippines

December 5, 1985

Eric Processing & Reference Facility
Suite 301, 4833 Rugby Ave., Bethesda
MD 20814

ATTN: Mr. W. T. Brandhorst, Director

Dear Mr. Brandhorst:

The Amelioration and Socio-Civic Group of which the undersigned is the Chairman, has been tasked by its parent organization, the SOPSMICA, to put up, among other projects, a pioneer community library. This library has been conceived as a means to alleviate the growing illiteracy and idleness of people, especially among the mining communities in the depressed areas of southern Philippines.

Our group has been assigned to produce a few hundred volumes of books, periodicals and magazines to equip that pioneer library. It is therefore our intention to look for sources of educational and recreational reading materials which our group can "buy" very cheaply or receive as DONATIONS. Redundant, obsolete or second-hand items are very much acceptable to start off with this civic-minded undertaking.

We are therefore soliciting your help through the facilities of your organization/office in obtaining some names and address of entities, private and/or public, you may feel may be capable and willing to help in this endeavor.

In the spirit of the coming Christmas season, we thank you so much. More power to your organization!

Very truly yours,

SOPSMICA

by: 
D. M. NOCHE
Exec. Director

P.S. Your office and your branches just might be able to participate by donating or "selling" some volumes you can spare. Many thanks again.

DMN/4decno-1

In reply, please use this address:

Coordinating Center Office: ATTN: MR. DOMINGO M. NOCHE
32 R. Gonzales St., BF Homes, Parañaque, Metro Manila,

Search Hints

RECON—Stored Search

—submitted by Dian Marincola

One of the great pleasures in RECON searching is devising the perfect search strategy. Oh, what joy we experience over combining logical statements which execute in harmonious sequence to yield the optimal retrieval output. Another great pleasure comes from sharing these bits of logistical wisdom with a colleague. This can be easily accomplished by using RECON's stored search feature for networking. All you need is the search name and the terminal identifier on which it is stored. This capability is also especially useful when you are working on a terminal other than your own.

To demonstrate this technique, we have stored the search on Halley's Comet which appears in the lead article of this newsletter. To execute it, signon to File Collection A or D and simply enter:

```
QUERY EXECUTE HALLEY(ID43)
```

or

```
Q EXE HALLEY(ID43)
```

QUERY EXECUTE is the RECON command for enacting a stored search on RECON. Halley is the name of the search and it is stored on terminal number 43. Notice that there is no space between the word Halley and the left parenthesis.

Once executed you may manipulate the sets or refine the strategy according to your own particular needs. Use the SET STATUS command to display the intermittent search results. You will not be able to alter the original HALLEY strategy that is stored on ID 43. To receive a printout of the results, follow the standard RECON PRINT procedures.

Any stored search can be shared with any NASA/RECON user, if desired. You may want to use this capability within your own organization or with colleagues in other facilities as a form of information dissemination. Just exchange the name of the search strategy and the terminal ID on which it is stored.

All file restrictions attached to your password remain intact when executing another user's stored search. In other words, if you are restricted to unclassified citations, you will not be permitted to display or print confidential and secret citations. You will, however, be able to execute any search, whether it retrieves classified citations or not. You just won't be able to see them.

I must caution you that once someone knows a terminal identifier, he or she may execute any other search stored in the corresponding library. Although that person will not be able to alter or purge those stored queries, we suggest that you coordinate within your facility to select one terminal which may have shared access. Store strategies pertaining to sensitive issues on another terminal. Do not publicize the terminal ID on which these are stored.

The ERIC Administrative Bulletin (EAB) is prepared by the ERIC Processing and Reference Facility on the basis of material submitted by all components of the ERIC system. EAB articles are reviewed and approved by Central ERIC before publication. The EAB is intended to be the "journal" of the ERIC system and a major means for the decentralized components of ERIC to communicate and interact with one another. The EAB is also a permanent record reflecting most of the major events in the life of the ERIC system (such as personnel changes, Standing Order Customer changes, etc.) and providing in printed form essential documents (such as ERIC policy and priority statements, Clearinghouse scope statement modifications, ERIC Processing Manual revisions, etc.) Submissions to the EAB are to be sent (using the standard form) to your respective monitor. The deadline for input to each monthly issue is the 10th of the month.

ACTION ITEMS

Cataloging Advisory -- Capitalization of Non-English Titles

The significant words in the titles of works in English are commonly capitalized. Prepositions and conjunctions are commonly lower-cased. This is standard English usage.

The question has arisen as to how to handle capitalization when the title of the document is in a non-English language. The simplest rule is the one to follow: emulate the practice of the document itself. You can not be faulted for following the document in this regard. The titles most commonly at variance with English usage are French titles. French practice is to lower-case the words in titles, except for proper names.

If the non-English title appears in the document only in upper case, follow the guidelines for capitalization found in the GPO Manual, Chicago Style Manual, or Anglo-American Cataloging Rules, when converting to upper/lower case. Titles should generally not be recorded in all upper case, unless they consist solely of acronyms.

...Carolyn Weller (ERIC Facility)

ERIC Acquisitions Arrangements List Update

The ERIC Acquisitions Arrangements (EAA) List has been updated and the changes are included here as Attachment 1. A total of 36 additions, changes, and deletions have been made based on Facility information and forms sent to us by Clearinghouses.

The list of changes is arranged in alphabetical order by organization name. It follows the same form as the January 1986 List. A change in an arrangement is shown by a percent sign (%), and an arrangement which has been removed is marked with an "X". All other entries are additions to the previous list.

The January 1986 EAA List should be updated by changing, adding, or deleting entries as necessary in alphabetical order. In regard to the distribution of complimentary microfiche, one change should be made in the "Names and Addresses for Selected Contributor Contact Points and Authorizers" Section of the List. The Oregon State Department of Education (EFAA #304) wishes to be added to the List. The correct address for this organization is:

Oregon State Department of Education (EFAA #304)
700 Pringle Parkway SE
Salem, Oregon 97310
Contact: Juanita Maloney, Administrative Assistant

In order to keep the List as current and informative as possible, changes will continue to be issued in this way via the EAB until the overall volume of changes warrants a completely revised list. The Facility Acquisitions staff appreciates the cooperation of the Clearinghouses in submitting changes to their arrangements as they occur, so that the List will continue to be a useful tool for all components of the ERIC system.

...Joanna Eustace (ERIC Facility)

Clearinghouse Acquisitions Data Report (ADR) -- Exception
Report Online

The Facility Computer Systems staff has developed a system that performs a duplicate check of the ADR input when it is transmitted directly by Clearinghouses to IBM-PC/XT. The system operates on the IBM-PC/XT and uses the Multilink Electronic Mail system. A few of the Clearinghouses currently are transmitting their monthly ADR input directly to the IBM-PC/XT by connecting to Multilink and issuing the "upload" command ".UP". When the ".UP" command is entered, the system responds with the prompt: "Enter filename:". At this point, the Clearinghouse operator names the ADR input data in the following format: the two character Clearinghouse prefix, e.g., "CE"; followed by two characters "AD"; followed by the numerals for day and month, i.e., "0903" (9 March). A properly structured filename would be entered, for example as, "CEAD0903", indicating CE's ADR input transmitted on 9 March.

The Clearinghouse operator then initiates the transmission of the monthly ADR input to the system. At the end of the transmission, the system automatically saves the data that has been received and assigns the indicated filename to the data set.

The ADR duplicate checking system has been designed to automatically initiate execution at 9:00p.m. each evening, identifying any Clearinghouse ADR input that was transmitted to the system during the day. This ADR input is then "title checked" against the previous six months cumulative ADR file identifying potential duplicate entries in the process. A data set containing the potential duplicate ADR entries for each Clearinghouse is created by the system. The system assigns a Clearinghouse-specific name to the data set. For example, CE's ADR exception report would be named "CEAR". The individual files of potential duplicates are then available for viewing on Multilink by the submitting Clearinghouses the following day, thus eliminating the normal two week delay before the monthly printed ADR report is available.

To view a Clearinghouse's ADR exception file, the Clearinghouse operator simply enters the system-assigned data set name, e.g., "CEAR", preceded by a period, following the command prompt " " issued by Multilink. For example, to view CE's ADR exception report file, the operator need only enter ".CEAR" and the contents of the exception report would be displayed.

It is strongly suggested that all of the Clearinghouses take advantage of this new feature and begin to move in the direction of transmitting their monthly ADR input directly to the IBM-PC/XT through Multilink. This new feature will not replace the need for a monthly printed ADR report, but it will give you your exception report overnight.

If you should need assistance or have any questions getting started with this new capability, please contact Pat Brown at the Facility.

...Pat Brown (ERIC Facility)

NETWORK NEWS

EDRS Changes Microfiche Film Base from Vesicular to Diazo

Beginning with RIE MAR86 (ED-262 152), EDRS will manufacture diazo microfiche rather than the former vesicular microfiche. The diazo fiche will be distributed without envelopes, thereby reducing the cost of ERIC subscription fiche to 7.7 cents per fiche and reducing shipping costs by about 30%.

A letter describing the advantages of diazo fiche went to all Standing Order Customers (SOC's) in March 1986 and is reproduced here as Attachment 2.

...Jim Prevel (CERIC)

DIALOG Increases Prices for ERIC Online Retrieval

Beginning March 1, DIALOG announced the first increase in thirteen years in its rates for accessing the ERIC database. The CHRONOLOG announcement to this effect appears below.

Unfortunately, DIALOG neglected to discuss the increase with ERIC in advance. Central ERIC has objected to the lack of advance notification and to the new charge of \$0.10 per record TYPed or DISPLAYed.

If DIALOG agrees to any changes or rollbacks, they will be announced in the EAB as soon as we learn of them.

Catching up with Inflation

Remember when a hamburger was 19 cents at McDonald's? Or when you could still get a paperback book for 75 cents? Back in 1973, when ERIC was introduced on DIALOG, an ERIC search cost only \$25 per hour. We're proud of the fact that we've held ERIC at that 1973 level for the past thirteen years, despite ongoing increases in the cost of providing the database.

Beginning March 1, inflation catches up with ERIC as the price for **File 1** goes from \$25 to \$30 per hour, \$0.10 per full record TYPed or DISPLAYed online, and \$0.14 per full record PRINTed offline. ERIC on DIALOG is still your best buy, with not only the lowest price of any online service, but also the highest quality of service and support. □

...Ted Brandhorst (ERIC Facility)

ERIC MICROsearch for the IBM-PC

The ERIC Clearinghouse on Information Resources (IR) has produced an IBM version of their product ERIC MICROsearch. The revised version provides the same searching capabilities as the Apple version, but is menu-driven and provides context-sensitive help. Additional enhancements for the IBM version include the ability to accumulate citations on a hard disk, the ability to reformat indexes, a color screen, faster retrieval, and an EXPAND command that allows the user to view portions of any of the indexes. The demonstration set sells for \$49.00 and includes the program disk, one database disk, and the manual. Subscription service will be available in the two subject areas of LIBRARY/INFORMATION SCIENCE and EDUCATIONAL TECHNOLOGY. Each disk will contain data for an entire quarter (approximately 350-400 citations) and is priced at \$10.00 per disk. Database disks will be available going back to 1984.

...Jane A. Klausmeier (IR)

BRS Issues ERIC "Aidpage"

BRS has recently issued an "Aidpage" for the ERIC database. Such pages represent a very useful concept. Unfortunately, the ERIC page was not cleared in advance with anyone in ERIC and contains some obsolete information, e.g., EDRS address. The Facility has notified BRS of the needed corrections. (See Attachment 3).

...Jim Houston (ERIC Facility)

TECHNOLOGY CORNER

Library of Congress (LC) Announces Public Opening of Access to Optical Disk Technology

On January 23, LC opened its optical disk project to public access. In the interests of keeping the ERIC Clearinghouses abreast of developments in optical disk technology, reproduced here as Attachment 4 is LC's announcement in the February 17, 1986 LC Information Bulletin.

ERIC PUBLICATIONS

CS

NEW ERIC/CS INFORMATION ANALYSIS PRODUCTS:

Activities for Teaching Speaking and Listening: Grades 7-12. By Pamela J. Cooper. 1985. The activities included in this book were developed to increase students' repertoire and use of effective oral communication behaviors. Designed to appeal to students of all ability levels, these activities provide for student interaction and involvement and for integrating oral communication across the curriculum. The activities are divided by grade levels (7-9 and 10-12) and by skills (communication codes, oral message evaluation, basic communication skills and human relations). Each activity includes (1) an objective, (2) procedures for implementing the activity, (3) follow-up suggestions and/or questions, and (4) evaluation/assessment procedures. Available from the Speech Communication Association, \$11.95. (ED 258 310)

Recommended English Language Arts Curriculum Guides, K-12 1985. (Annual publication.) Edited by Adele Stern. Annotates recommended guides reviewed by the NCTE Committee to Evaluate Curriculum Guides and Competency Requirements. Available from the National Council of Teachers of English, \$1.00 (ED 249 504)

Research on Written Composition: New Directions for Teaching. By George Hillocks, Jr. 1985. Information gained from a meta-analysis of research on writing instruction from 1963 through 1982 is synthesized. Implications and recommendations for practice are presented, and a bibliography of approximately 3,000 items is included. Available from the National Council of Teachers of English, \$24.75 nonmembers, \$19.00 members. (CS 209 .29)

The Teacher-Researcher: How to Study Writing in the Classroom. By Miles Myers. 1985. Ways that teachers can analyze writing samples and the writing process to meet the need of a school or program assessment are presented. Teacher research among K-12 teachers is promoted by providing examples of different ways teachers can study writing in their classrooms. Available from the National Council of Teachers of English, \$13.00 nonmembers, \$10.00 members. (ED 261 394)

DOCUMENT REPRODUCTION SERVICE

3900 WHEELER AVE ALEXANDRIA, VA 22304-5110 1-800-227-3742

OPERATED BY

COMPUTER MICROFILM CORP
703-823-0500

NOTICE

To all ERIC Subscribers to the Monthly RIE

Beginning with the March 1986 RIE there will be three (3) significant changes that will be of benefit to you.

FIRST: The film base will change from vesicular to diazo film.

SECOND: The microfiche will be furnished without envelopes and your cost per microfiche will be reduced to \$0.077.

Third: Your shipping charges will be reduced by about 20-40% due to the fact that there will be no envelopes.

You will enjoy a number of advantages because of the change from vesicular to diazo film. Specifically:

- * Clearer, sharper, eye readable titles, especially in reflected light. Titles will have a white transparent stripe for ease of reading and the title will be reproducible if the microfiche are duplicated.

- * Better microfiche copies from film to film. Paper copies from reader printers will be as good as from vesicular film.

- * The wear characteristics of diazo film are better than vesicular film and far better than silver film. Diazo film has virtually a higher resistance to scratching than all other film bases.

- * When properly stored, the diazo film fully meets the American National Standards Institute (ANSI) Specification PH 1.60-1985 for long term storage of up to 100 years.

- * Diazo film is preferred for an active user file as opposed to an archival storage file, because of its superior handling characteristics.

- * Due to the superior handling and wear characteristics of diazo film, paper envelopes are not needed for protection.

The space and weight savings realized by the elimination of envelopes should be of considerable benefit to you. You should consider removing all your vesicular microfiche from the envelopes, thereby reducing your storage requirements by at least 50%.

Please contact us if we can be of any assistance or if you have any questions.

AB Typical contacts with information-processing technology (IPT) do not significantly reshape thought. Although some suggest that IPT will have a narrowing, dehumanizing influence, the diversification of ITP now underway will allow for more styles of involvement. Because of this diversification, thinking may change as it did in response to literacy and print. (KH).

AB As part of a review of California's strategy for helping recipients of Aid to Families with Dependent Children (AFDC) find jobs through the Work Incentive Program (WIN), eight demonstration programs were analyzed. There were four major findings. First, the Department of Social Services (DSS), which targets AFDC recipients with recent job experience for WIN employment and training services, should instead target AFDC recipients who lack recent work experience. To that end, legislation is needed to redesign State employment and training programs. Furthermore, increases in participant earnings, not placement rates, should be made the primary measure of the success of employment programs. Second, the most cost-effective services are job search and skill training services. Third, State and local coordination of WIN and Job Training Partnership Act services is essential if their impact on increasing participant earnings and reducing AFDC is to be maximized. Local WIN managers should be given responsibility for determining the types of services provided locally, and legislation should be created that requires DSS to develop guidelines and procedures for supplying local managers with the information needed to determine the types of services appropriate to different economic conditions. And fourth, the two primary goals of the WIN program are to reduce welfare dependency by increasing the earning power of AFDC recipients and to reduce AFDC grant expenditures. To address both goals, a two-tiered strategy is required. (KH).

Library Announces Public Opening Of Access to Optical Disk Technology

The Library of Congress officially opened the print project of its Optical Disk Pilot Program to the public during a special ribbon-cutting ceremony on January 23. The event, which inaugurated public access to the new optical disk technology in the Library, was held in the Newspaper and Current Periodical Reading Room of the Serials Division.

Deputy Librarian William J. Welsh cut the ribbon surrounding the optical disk console and printer and made a brief presentation on the background of the project and the Library's goals for the new technology. "We at the Library of Congress are concerned about the speed with which our collections are deteriorating," Mr. Welsh said. "As one part of a far-reaching preservation program, we are investigating the possible preservation benefits of optical disk technology. In addition, we hope to learn whether the technology will be practical in helping us to provide better, faster service to the public. Now that the public can use our new system, we will be scrutinizing the performance of our equipment and our patrons' response to this new world of service. We will keep everyone posted."

Following the briefing there was a demonstration of the optical disk equipment by Katherine Gould, coordinator of reference service in the Serials Division. Ms. Gould reiterated that a primary purpose of the technology is service and that other advantages of the optical disk program are its storage capacity, preservation qualities, and elimination of the not-on-shelf or "N.O.S." problem. Ms. Gould demonstrated retrieval of materials such as journal articles, which are accessed via "BIBL" (the Library's online bibliographic citation file, which covers many periodicals in the field of public affairs). Future files to be put on optical disk include the *Congressional Record*, full texts of entire issues of journals, and a selection of manuscripts, maps, music scores, law reports, and technical reports.

The Optical Disk Pilot Program was begun in 1982 for improving access to Library materials, solving certain preservation problems, and saving space for col-

lections which are growing at a rate of almost 6,000 items per working day. A number of companies presented proposals to the Library on developing a pilot program and a contract was awarded to Integrated Automation, Inc., Berkeley, Calif., to provide the optical disk equipment for the project. The optical disk print project (digital) uses state-of-the-art equipment to store, scan, and retrieve text materials. The Library of Congress received copyright permission to copy more than 70 journals on optical disk. That permission covers the items published between 1983 and 1986. An advisory commission consisting of publishers and librarians was established to address copyright issues raised by the use of optical disk technology. Efforts are continuing to broaden the scope of materials utilized in the optical disk program.

The system will be available for public use from 9 a.m. to 4 p.m., Monday through Friday. It is still in its developmental stages, and the Library invites the

public to assist in both testing and evaluating the technology. Public reader stations are located in the Newspaper and Current Periodical Reading Room, the Main Reading Room, the Science Reading Room, and the Law Reading Room. Some terminals have printers attached providing immediate printouts; all terminals permit patrons to order printouts from a central printer.

The Library is using analog video disk technology for non-print materials with reader stations now open in the Prints and Photographs Reading Room and the Motion Picture, Broadcasting and Recorded Sound Division Reading Room. An announcement about upgrades for the video disk system will be made later this month.

Katherine Gould (seated) demonstrates a user terminal to Peter Sparks (left), Suzy Platt, Robert Zich, and Steven Herman. Joseph Price is in the background.

The ERIC Administrative Bulletin (EAB) is prepared by the ERIC Processing and Reference Facility on the basis of material submitted by all components of the ERIC system. EAB articles are reviewed and approved by Central ERIC before publication. The EAB is intended to be the "journal" of the ERIC system and a major means for the decentralized components of ERIC to communicate and interact with one another. The EAB is also a permanent record reflecting most of the major events in the life of the ERIC system (such as personnel changes, Standing Order Customer changes, etc.) and providing in printed form essential documents (such as ERIC policy and priority statements, Clearinghouse scope statement modifications, ERIC Processing Manual revisions, etc.) Submissions to the EAB are to be sent (using the standard form) to your respective monitor. The deadline for input to each monthly issue is the 10th of the month.

ACTION ITEM

EDRS Order Form Revised (April 1986)

The EDRS Order Form (See Attachment 1) has been revised to reflect all the new prices. The new form is dated April 1986. Copies are being sent to the Clearinghouses directly by EDRS. Additional copies should be obtained by contacting EDRS.

Please ensure that all stock of the old EDRS Order Form is discarded.

Whenever EDRS prices appear in Clearinghouse brochures or other literature, they should be changed to reflect the new prices shown in this new order form.

...Vic Fortin (EDRS)

PROCESSING ADVISORIES

Journal Articles and Issues of Serials in RIE

The push to obtain "practitioner-oriented" materials for RIE (and the general shortage of good documents) is leading the Clearinghouses to input more and more items made up of issues of serial publications, articles from serial publications, compendiums of articles, and runs of several issues of serial publications.

In doing this, the Clearinghouses must observe the ERIC Processing Manual restrictions that are designed to maintain a logical distinction between RIE and CIJE and to avoid a proliferation of undifferentiable entries in RIE.

Issues of Serials

Entire individual issues of serial publications should generally only be put in RIE when they are "theme issues" in which every article in the issue deals with the same theme and the issue can be treated as a monograph on that theme. If a serial issue is not a theme issue, then each article in the issue should be treated individually in CIJE. It is generally bad practice to permit individual issues of serials to go into RIE because the entries for them are virtually identical and this would lead to a proliferation of clone-like accessions clogging the database.

Articles from Serials

Single articles from serials should generally go into RIJE. CIJE was specifically designed for that kind of input. Exceptions can be made in the case of old articles (i.e., no longer "current") of classic or high quality and significance that for one reason or another never went into CIJE in the first place and for which reproduction permission has now been obtained. Alternatively, such articles could be handled in CIJE as one-shots, but if they can be microfiched it is just as well to process them for RIE.

Single articles from current journals should go into CIJE, otherwise the distinction between RIE (documents) and CIJE (journals) becomes blurred and would eventually disappear.

Compendiums of Journal Articles/Columns/Features

Regularly appearing journal columns or features often have a unity of subject-matter (e.g., Valentines Day projects) that argues for their being grouped together as one item. This kind of accession came into its own during the Practice File Pilot Project and continues to be a viable option. It amounts to assembling a body of material from several serial issues (perhaps even a year's worth) and treating it as if it were a monograph on a single topic. It is essential in such cases that reproduction permission be obtained, otherwise the material has not really been brought together and there is little value in pushing it into RIE instead of its normal home CIJE.

Runs of Several Issues of a Serial Publication

If a serial publication is relatively rare or obscure or very specialized and it is unlikely that it would be subscribed to by very many university/college libraries, then RIE processing (with its microfiche process) may be a better way to make the serial available to users than CIJE processing.

In such cases, it is essential that reproduction permission be obtained (otherwise RIE provides no advantage over CIJE) and it is essential that at least a year's worth of the serial comprise the accession (in order to avoid the proliferation of clone-like entries).

Across the past year, many adjustments have had to be made to RIE input in order to make it conform to the above guidelines. It would be appreciated if Clearinghouses could observe these guidelines carefully in the future in order to save time, effort, and money in document processing.

...CERIC

Missing Pages, Pages Out of Order, Unfilmable Pages

Documents with missing pages (or sections), pages out of order, or pages that are unfilmable for one reason or another, are on the increase. These situations can cause problems far out of proportion to the original error. When a document must be re-filmed because of one of these defects, it requires a major effort on EDRS's part, including the manufacturing and distribution of some 750 replacement fiche.

Documents should routinely be subjected to a completeness test by the Clearinghouses, i.e.:

- Are all the pages there?
- Are the pages in proper sequence?
- Is every section referred to in the Table of Contents present?
- Are all listed appendixes present?
- Are there any cropped pages?
- Are any pages too faint to film?
- Is a better copy of this document needed?

Our impression is that some Clearinghouses are not checking document completeness adequately and that pages presenting filming problems are often simply being ignored. Please try to catch this class of problem before it gets any worse.

Document completeness and page order is a major aspect of quality control and we are hearing from OERI in no uncertain terms that "Quality is job one".

...CERIC

NETWORK NEWS

EDRS Special Products Brochure (New)

EDRS has prepared a new brochure (See Attachment 2) covering the various special microfiche products EDRS offers other than the RIE documents themselves. Copies of the brochure are being sent directly from EDRS to the Clearinghouses. Additional copies are available from EDRS upon request.

...Vic Fortin (EDRS)

Statement of Chester E. Finn, Jr., Assistant Secretary for Research and Improvement and Counselor to the Secretary...before the Subcommittee on Select Education, February 19, 1986

Attachment 3 consists of an 8-page statement by Chester Finn before the House Subcommittee on Select Education. The statement is extremely useful as a summary of what the OERI reorganization is all about and what the new priorities are.

...Joanna Eustace (ERIC Facility)

Frequent User of Clearinghouse IAPs Requests Rapid and Timely Announcement in RIE

A letter was recently received from the Georgia Department of Education complaining about some Clearinghouse publications that were announced in RIE over a year after their publication. In the examples cited, the explanation lay in the fact that the items in question were of the "Digest" or "Short Report" variety and had not been selected for RIE for that reason. Later, when the policy was clearly stated that Digests should go in RIE, the items in question were belatedly announced.

The main interest of the letter is, however, in the fact that this key active user of ERIC really looks forward to ERIC Clearinghouse publications and regularly reviews the RIE Highlights page for items of interest to their clients. The letter is a strong argument for ensuring that ERIC Clearinghouse publications are accessioned for RIE virtually as they roll off the presses. I think we are now accomplishing this for most Clearinghouse publications. Hopefully, some day we will get Department of Education documents in with the same comprehensiveness and alacrity.

...Joanna Eustace (ERIC Facility)

Good News at TM

Daniel Stupp was born April 6, weighing in at 7 lbs 10 ozs. Emma and son are doing fine. Emma is on maternity leave until mid-June. Betsy Smith is filling in as Associate Director, and Lucie Olson is covering User Services.

...Pat Tomko (TM)

Steering Committee Recommendations - CERIC Actions

The following actions have been taken by Central ERIC recently on the basis of steering committee recommendations:

1. "Microcomputer Use in ERIC Clearinghouses". The Facility is conducting this survey and it should be completed by May 30.
2. EDRS has been asked (and has produced) a brochure with information about products and prices.
3. CERIC has forwarded a written request to DIALOG to make the NOTE field searchable (as it is in BRS and SDC).
4. All Clearinghouses will be listed in the new "Directory of ERIC Information Service Providers" being produced by the Facility.
5. All Clearinghouse special projects will be announced in the EAB at the time of their funding, with details of how they may affect other Clearinghouses. Periodic updates on the projects will also be provided via the EAB.
6. EDRS has sent written notification to the microfiche standing order customers about the new diazo fiche and the elimination of the paper envelopes.
7. After the "ERIC Redesign Study", CERIC will consider improving the procedures for making and announcing Clearinghouse scope of interest changes.
8. After the EDRS marketing effort, which is now underway, a decision will be made about continuing the special ERIC IAP fiche collections and announcing them in RIE.
9. Central ERIC has contacted the director of a project at San Francisco State University to see about ERIC input to her microcomputer tutorial on how to use ERIC. This is being produced with private money.
10. A procedure is being developed internally at OERI to get all OERI-funded documents into ERIC, including those from the Labs and Centers, once they have been approved by the responsible OERI project officer.

A few other recommendations having to do with RIE/CIJE and tech/director meeting schedules are on hold until the "ERIC Redesign Study" is completed.

...Lynn Barnett (HE)

Regional Tech Meetings

Just a reminder--dates, locations, and organizers of the ERIC Regional Tech Meetings are as follows:

West - May 8-9, 1986 (Mary Lou Finne/EA)

Midwest - May 12-13, 1986 (Nancy Beekman/CG)

East - May 15-16, 1986 (B.J. Vaughn/IR)

Please let your planner know of any items you would like to see placed on the agenda and discussed at these meetings.

...Lynn Barnett (HE)

LIST OF ATTACHMENTS

- Attachment 1: EDRS Order Form (April 1986)
- Attachment 2: EDRS Special Products Brochure (April 1986)
- Attachment 3: Statement of Chester E. Finn, Jr. ...before the
Subcommittee on Select Education, February 19, 1986
- Attachment 4: EDRS Customer Service Report - March 1986

GENERAL INFORMATION

1. PRICE LIST

The prices set forth herein may be changed without notice, however, any price change will be subject to the approval of the Contracting Officer/USED/Office of Educational Research & Improvement/Contracts and Grants Management Division.

2. PAYMENT

The prices set forth herein do not include any sales, use, excise, or similar taxes which may apply to the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any shall be borne by the Customer.

Payment shall be made net thirty (30) days from date of invoice. Payment shall be without expense to CMC.

3. REPRODUCTION

Express permission to reproduce a copyrighted document provided hereunder must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

4. CONTINGENCIES

CMC shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure of delay (a) is due to events beyond the control of CMC including, but not limited to, fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortage, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments; (b) is due to failures of performances of subcontractors beyond CMC's control and without negligence on the part of CMC, or (c) is due to erroneous or incomplete information furnished by Customer.

5. LIABILITY

CMC's liability, if any, arising hereunder shall not exceed restitution of charges.

In no event shall CMC be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

6. WARRANTY

CMC MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

7. QUALITY

CMC will replace products returned because of reproduction defects or incompleteness. The quality of the input document is not the responsibility of CMC. Best available copy will be supplied.

8. CHANGES

No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of CMC.

9. DEFAULT AND WAIVER

a. If Customer fails with respect to this or any other agreement with CMC to pay any invoice when due or to accept any shipment as ordered, CMC may without prejudice to other remedies defer any further shipments until the default is corrected, or cancel this Purchase Order.

b. No course of conduct nor any delay of CMC in exercising any right hereunder shall waive any rights of CMC or modify this Agreement.

10. GOVERNING LAW

This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.

11. DEPOSIT ACCOUNTS

Customers who have a continuing need for ERIC documents may open a Deposit account by depositing a minimum of \$250.00. Once a deposit account is opened, ERIC documents will be sent upon request, and the account charged for the actual cost and postage. A monthly statement of the account will be furnished.

12. STANDING ORDER ACCOUNTS

Customers who desire to receive microfiche copies of all ERIC reports announced in each issue of *Resources in Education* may do so by depositing \$1,600.00 or submitting an executed purchase order. The cost of each issue and postage will be charged against the account. A monthly statement of the account will be furnished.

13. PAPER COPY (PC)

A paper copy (PC) is a xerographic reproduction, on paper, of the original document. Each paper copy has a Vellum Bristol cover to identify and protect the document.

14. FOREIGN POSTAGE

Postage for all countries other than the United States is based on the international Postage Rates in effect at the time the order is shipped. To determine postage allow 160 microfiche or 75 (PC) pages per pound. Customers must specify the exact classification of mail desired, and include the postage for that classification with their order. Payment must be in United States funds.

OTHER ERIC COLLECTIONS AVAILABLE FROM EDRS

STANDING ORDERS

Subscription orders for microfiche copies of all ERIC reports announced in each issue of *Resources in Education* average \$130.00 per month.

Annual RIE

EDRS has produced annual cumulative RIE's from 1966 and offers separately and collectively each year through 1985. Formatted exactly like the monthly RIE in paper, it includes document resumes, subject, author, and institution indices: prices are

YEAR	PRICE	YEAR	PRICE
1966	\$1.00	1976	\$7.00
1967	1.50	1977	6.25
1968	4.00	1978	6.75
1969	4.25	1979	7.25
1970	4.25	1980	6.75
1971	5.00	1981	6.50
1972	5.00	1982	8.00
1973	5.75	1983	8.00
1974	6.00	1984	8.00
1975	6.25	1985	9.00

Monthly RIE

The current issue of Resources In Education on microfiche is now included in the monthly shipment to standing order customers. These provide immediate access to the new fiche without waiting for the paper copy of RIE to arrive.

Additional sets of the monthly RIE on microfiche may be purchased for placement in different locations to aid users in using the ERIC data. Available at \$2.00 per monthly set.

Current Special Products

RIE Cumulative Title Index 1966-1985.

Resources in Education Cumulative Title Index is a single alphabetical listing of all ERIC document titles from the beginning of the ERIC system in 1966 through 1985. Each citation includes level of availability, publication date, ED number, number of pages and/or number of microfiche.

RIE Cumulative Author Index 1966-1985.

Resources in Education Cumulative Author Index provides access by author, including secondary authors when noted. If there are three or more authors, only the first is listed by name. For each author, title, the level of availability, the ED number, number of pages and/or microfiche are cited.

The cumulative author and title indices, when used in conjunction with one another, are invaluable ERIC search aids.

Resources in Education Cumulative Subject Index 1966-1985.

This index lists the titles of documents under the major subject terms that have been assigned to characterize their contents. The subjects which conform to those in the Thesaurus of ERIC Descriptors, are in alphabetical order and cumulative from 1966 to 1985. This product is an invaluable tool in the manual searching of the ERIC data base. A concise, complete index which

identifies pertinent documents, this file contains microfiche alphabetically indexed for ready reference.

Resources in Education Cumulative Institution Index 1966-1985.

This index lists the title of the ERIC documents under the institution responsible for their development. An alphabetical listing by the name of the university, institution, agency, association, etc., is also provided.

RIE Cumulative Descriptor Usage Report 1966-1985.

Descriptor Usage Report is a concise cumulative index of the descriptors (index terms from the Thesaurus) used in Resources in Education from 1966 to 1985.

RIE Cumulative Identifier Usage Report 1966-1985.

RIE Identifier Usage Report is a concise cumulative index of the identifiers (additional identifying terms) used in Resources in Education from 1966 to 1985.

These Usage Reports contain all the terms used and list the ED numbers for the documents to which they were assigned. Major descriptors or identifiers are indicated by an asterisk. The fiche also provide the only printed access to minor identifiers.

STATEMENT
of
CHESTER E. FINN, Jr.
ASSISTANT SECRETARY FOR RESEARCH AND
IMPROVEMENT AND COUNSELOR TO THE SECRETARY
U.S. DEPARTMENT OF EDUCATION
before
THE SUBCOMMITTEE ON SELECT EDUCATION
U.S. HOUSE OF REPRESENTATIVES
WASHINGTON, D.C.
February 19, 1986

Mr. Chairman, it is a pleasure to appear before this Subcommittee for the first time. I am also pleased to represent Secretary Bennett.

I would like to begin by recounting some pertinent history. In December of 1867, the Congress enacted a statute establishing a Department of Education for the following purposes:

...collecting such statistics and facts as shall show the condition and progress of education in the several States and Territories, and of diffusing such information respecting the organization and management of schools and school systems and methods of teaching as shall aid the people of the United States in the establishment and maintenance of efficient school systems, and otherwise promote the cause of education throughout the country.

This mandate to gather statistics and engage in research pertaining to education is as appropriate today as it was six score years ago. Indeed, it is the core and clearest responsibility of the Federal government in the field of education. The Federal government is uniquely equipped to support and encourage education research, data collection, and dissemination of knowledge about effective educational practices. The Federal government can economically and efficiently establish uniform procedures and definitions for statistical purposes. Likewise, the Federal government has a unique ability and interest in disseminating knowledge about successful educational practices.

The information that the Department's Office of Educational Research and Improvement produces is so familiar that it requires some effort to visualize its absence. Federal statistics tell us how many students are in our nation's classrooms, how many teachers are at work in those classrooms, and how many professors are training teachers. In the future, we hope to learn more about the characteristics of teachers, where they come from, where and why they leave, and how many more teachers must be found for the classrooms of the next decade. Through Federal activities in the field, we learn how much money is being spent on education and, equally important, what people are studying and how well they are learning. We are so accustomed to knowing

these facts that we can easily forget that reports such as A Nation at Risk are only potent when established on a base of solid facts.

Besides collecting data, the Federal government has demonstrated that it can and should sponsor education research of high quality. We know more about what works and what doesn't in the classroom as the result of federally sponsored research. In fact, Secretary Bennett will soon release an important compilation of research findings entitled, "What Works." This slender volume sets forth in easily understandable language more than three dozen findings and conclusions that we believe will be of interest and value to parents, teachers, and education policy-makers across the land as they work together for better education. I think that OERI can also point with pride to its role in the production of "Becoming A Nation of Readers," last year's superb report by the Commission on Reading. That report has been well-received--and properly so--as an excellent distillation of what we know about the learning and teaching of reading. During the past year, we also released the "Reading Report Card" of the National Assessment of Educational Progress (NAEP) which showed that students were reading better in 1984 than in 1971 when NAEP first assessed reading but that, distressingly, minority children's achievement falls far below an acceptable level. These reports and other earlier efforts are tangible evidence that research can produce findings that are both understandable and useful.

In 1867, Congress recognized the obligation to get research findings into the hands of those who could benefit from them. Our major inadequacy thus far has been an unsatisfactory record of disseminating understandable and useful research findings and data to a variety of audiences in the "several States and Territories." We are making a concerted effort to remedy that problem by concentrating the efforts of two divisions of the new OERI on serving the distinctive information needs of professionals, policy-makers, and the lay public.

Because the Administration acknowledges and supports the vital role that the Federal government can play in the generation of education statistics and research, we strongly support reauthorization of the research and data collection functions found in sections 405 and 406 of the General Education Provisions Act (GEPA). Last year, we took steps to revitalize those functions by reorganizing and consolidating the National Institute of Education (NIE) and the National Center for Education Statistics, as well as several other components of the Office of Educational Research and Improvement (OERI). This reorganization effort was an expression of this Administration's commitment to greater efficiency and responsiveness in the conduct, support, analysis, and dissemination of education research and statistics.

The Administration also has submitted for the consideration of the Congress a measure, which I shall outline shortly, that proposes to reauthorize the research and statistics functions of

sections 405 and 406 of GEPA, some of which will otherwise expire at the close of this fiscal year.

Let me next turn to a brief summary of the reorganization, some recent OERI accomplishments and present goals, and our reauthorization proposal.

II. Reorganization

Secretary Bennett decided to restructure the Federal education research and statistics operations because he shared the view held by many scholars and policymakers that the structure and operations of the old Office of Educational Research and Improvement and National Institute of Education were inefficient, duplicative, and insufficiently productive. In devising a new framework, the Secretary sought advice from Department officials, members of Congress, expert consultants, the scholarly community, leading education practitioners, those with experience under the previous structure (including former NIE Directors), education associations, the National Council on Educational Research, and the general public. The result was a new organizational structure that reflected a consensus among those who advised the Secretary.

Secretary Bennett officially initiated the reorganization of OERI on July 2, 1985. At that time, he notified Congress of his intent to restructure in 90 days the various research and data collection functions found in sections 405 and 406 of GEPA, as well as certain other activities of the Office of Educational Research and Improvement. During that 90-day period and beyond, the Secretary responded to questions and comments from members of Congress, the public, and the press. On October 27, 1985, at the end of the 90-day period and after some additional time for intra-departmental management actions, the reorganization took effect, and the new OERI came into being.

As you know, the restructuring of the Department's educational research enterprise involved the consolidation of the Office of Educational Research and Improvement, the National Institute of Education, the National Council on Educational Research, the National Center for Education Statistics and the Center for Libraries and Education Improvement. OERI now includes five program units: the Office of Research; the Center for Statistics; Programs for the Improvement of Practice; Information Services; and Library Programs.

The Office of Research retains most of the familiar functions of the National Institute of Education dealing with the conduct of research. The overriding goal of this Office over the next several years will be to develop reliable knowledge that people can use to solve pressing problems in education.

The Center for Statistics retains most of the functions of the National Center for Education Statistics and assumes responsibility for monitoring the National Assessment of Educational Progress. Through it, we will continue to gather, analyze, and synthesize data on the characteristics and

performance of American education, and we are striving to do this faster and better.

Programs for the Improvement of Practice (PIP) are aimed at narrowing the gap between what is known and what is done about American education. In other words, the primary mission of this unit is to ensure that research findings and information about exemplary practices are easily accessible to education practitioners. The function of the Programs for the Improvement of Practice is to examine, organize, and communicate these research findings and exemplary practices to those we depend upon to bring about reform and renewal in American education.

Information Services addresses the more specialized information needs of parents, policymakers, journalists, and scholars. To gain the full value of educational research, the Secretary believes that we needed to make such knowledge more accessible and understandable to those who could benefit from it. Information Services also administers the Education Resources Information Center (ERIC), the world's largest computerized bibliographic education information system.

Our fifth component, Library Programs, continues to make Federal grants to support operations of public libraries and to aid research libraries.

III. Accomplishments and Goals

Many of our efforts these past few months have been concerned with management, personnel, and resource allocation. Reshaping an organization of this size and complexity is difficult. We are convinced, however, that we have an OERI that can achieve the important scientific and educational goals that Congress and the President have established for it. Moreover, we have not been sitting still; much good work has gone on during the transition period.

One of the major accomplishments of the last several years has been the reconstruction, with encouragement by Congress, of the regional laboratory and research centers network. For the first time, we now have a nationwide system of laboratories prepared to serve all regions of the country. Likewise, the ten new centers and four already in existence are better prepared to serve the nation's research needs. Almost every center has entered into a consortium arrangement with scholars and universities in other states. Thanks in large part to the work of my predecessors and the staff, the process for making these awards was open, fair, professional and efficient. The competition was based on almost two years of public consultation that included hearings, expert study group deliberations, and advice from the Congress, individual experts and practitioners around the country. The competition resulted in grants for centers and contracts for laboratories that can total up to \$150 million over the next five years.

As you know, the regional laboratories and the university-based research centers were created to increase the

nation's institutional capacity for responding to significant educational problems on a national and regional basis. Specific missions, functions, and governance structures have been carefully defined for the regional laboratories and for each of the centers. The centers' missions are in the areas of teacher education; student testing, evaluation, and standards; writing; learning; effective secondary schools; effective elementary schools; education and employment; postsecondary management and governance; postsecondary teaching and learning; and State and local policy development in education. Four other centers (on teaching; reading; bilingual and foreign languages; and technology) resulted from earlier competitions. We also are committed to devoting substantial resources to studying teacher quality.

The laboratory and center competition is a milestone in several respects:

- 1.) It represented the first full recompetition of the laboratories and centers since their creation in the nineteen sixties.
- 2.) It served as a model for future competitions in that it embodied a rigorous, open and participatory planning process and the use of peer review to appraise quality.
- 3.) It represented a renewed Federal commitment to the concept of laboratories and centers as legitimate means of responding to significant educational problems on a national and regional basis.

Besides our work with the laboratories and centers, we are readying for publication the 1986 Condition of Education Report. We have already announced initial plans for a major redesign of our elementary and secondary school data collection system. To rekindle the process of encouraging promising and fresh ideas from different sources, we have recently announced that the Office of Research is accepting proposals under an "unsolicited grants" program. Peer review panels will advise us regarding competitions, and the Secretary anticipates making awards periodically during the year.

To guide our continuing and future work, we have established four top priorities (joined, of course, by many others):

-- Repairing the nation's education data base. It is our foremost responsibility but today our data base is not what it should be.

-- Enlarging our understanding of educational outcomes and quality by strengthening such activities as the National Assessment of Educational Progress.

-- Improving efforts to disseminate useful, reliable,

and timely information to educators, policymakers, the public and the media.

-- Replenishing the intellectual capital of education through well-chosen programs of research into important issues.

In the months ahead, the Center for Statistics will concentrate on the first of these priorities--repairing the data base. The Center will generate detailed statistics on instructional staff at all educational levels; we will provide new and more comprehensive outcome measures through longitudinal studies, assessment, and international comparisons; we will provide the first comprehensive national data on student financial aid; and we will develop better education indicators for the annual, Congressionally mandated, Condition of Education report. We will also expand the coverage of our postsecondary education statistics by doubling the number of postsecondary institutions we will survey--from 8,000 to 16,000. We call this program the Integrated Postsecondary Education Data System. It will play a key role in strengthening the data base.

As I noted earlier, the Office of Research will be largely responsible for defining and implementing our research efforts. The Office will devote a large amount of its energies to developing a solid and productive partnership with the centers, as well as with other scholars and practitioners, to assure the optimal use of limited research funds. Moreover, the research staff is developing a planning and monitoring system that will identify high priority policy questions for all our research activities.

The Programs for the Improvement of Practice staff will be involved in over a dozen major programs designed to support, facilitate, and enhance the exchange of information on improving educational practice nationwide. For instance, the division will develop, assemble, and present summaries of information on the status of educational practice, reforms, and improvement efforts occurring across the United States.

To help increase public awareness of and access to educational data and research, Information Services is about to launch a "quick response" toll-free telephone service for people who need information about education in a hurry. In addition, Information Services is making our Department library more accessible to educators and the public. Information Services is also examining the structure and performance of the ERIC system. We will also be considering the feasibility of increasing the databases for ERIC and developing low-cost subject area database subsets for use on microcomputers. This is an effort to increase the utility of the ERIC system for educational scholars and students and--perhaps even more importantly--for practitioners, policymakers, and the general public.

3500

IV. Reauthorization

We have submitted for the consideration of the Congress a proposed reauthorization measure. It is a straightforward attempt to update sections 405 and 406 of GEPA, retaining the major features and purposes contained in those sections. The bill was developed with due regard for what this Committee has heard in past hearings, and after much informal consultation, over a long period, with many in and out of government who are deeply interested in the progress of educational research. This proposal retains for the complete entity the current name of "The Office of Educational Research and Improvement."

We have attempted in our legislative proposal to modify sections 405 and 406 of GEPA to make them compatible with the reorganization plan now in effect, to heed a number of sound recommendations, and to improve the quality and performance of the agency.

- 1.) Our proposal vests authority in the Secretary for the conduct and support of the section 405 and 406 activities.
- 2.) The research and development policies and priorities contained in section 405 have been updated.
- 3.) The National Council on Educational Research has been reauthorized as the National Advisory Council on Educational Research and Improvement. It will be a Presidentially appointed advisory body and its advisory function will conform with the Charter developed for it under the reorganization plan of last July.
- 4.) The proposal requires the Secretary to achieve a balanced portfolio in the procurement of educational research from regional laboratories and research and development centers, and through solicited and unsolicited proposals from individual researchers, and other institutions (including institutions of higher education).
- 5.) To ensure quality in all awards made by OERI, we have added a new paragraph to section 405 that provides that in making awards the Secretary shall, to the extent possible --
 - a.) solicit recommendations and advice regarding research priorities, opportunities and strategies from qualified experts, such as education professionals and policy-makers, personnel of the regional educational laboratories and of the research and development centers, the Council, as well as parents and other members of the general public;

- b.) employ suitable selection procedures embodying the principles of peer review; and,
 - c.) determine that the activities will be of high quality, will be efficiently conducted, and will be consistent with of the purposes and priorities of the Office;
- 6.) The measure combines in one authorization the various authorizations of appropriations for NIE, NAEP, and NCES.
- 7.) The proposal contains numerous technical changes to reflect the reconfiguration of the Office of Educational Research and Improvement and eliminates outdated or unnecessary provisions.
- 8.) The bill would terminate FEDAC, whose functions have been made redundant by the Paperwork Reduction Act.

The Secretary and I welcome questions and suggestions from members of Congress about this proposal and about the improvements under way within OERI. I look forward to working with the Congress during the reauthorization process. Let me note in closing, as I said at the outset, that this set of functions and activities has been a Federal responsibility since 1867; it is reasonably described as a singularly important element of the Federal role in education. I share Secretary Bennett's oft-stated conviction that the American people, equipped with reliable information, accurate data, and solid research findings, can be counted upon to fix their own schools and postsecondary institutions. OERI is the largest single source, within the Department of Education, of such information, data and research findings. For this reason, and for others, it warrants reauthorization.

Thank you for the opportunity to appear before the Subcommittee today. I will be happy to answer your questions.

The ERIC Administrative Bulletin (EAB) is prepared by the ERIC Processing and Reference Facility on the basis of material submitted by all components of the ERIC system. EAB articles are reviewed and approved by Central ERIC before publication. The EAB is intended to be the "journal" of the ERIC system and a major means for the decentralized components of ERIC to communicate and interact with one another. The EAB is also a permanent record reflecting most of the major events in the life of the ERIC system (such as personnel changes, Standing Order Customer changes, etc.) and providing in printed form essential documents (such as ERIC policy and priority statements, Clearinghouse scope statement modifications, ERIC Processing Manual revisions, etc.) Submissions to the EAB are to be sent (using the standard form) to your respective monitor. The deadline for input to each monthly issue is the 10th of the month.

ACQUISITIONS ADVISORIES

OERI Bulletin

The OERI Bulletin is a new monthly publication of the Office of Educational Research and Improvement, U.S. Department of Education. Its purpose is to disseminate information concerning educational research funded by OERI.

CERIC and the ERIC Facility's Acquisitions Department have added all ERIC Clearinghouses to the mailing list for automatic distribution of the OERI Bulletin. Although it is published monthly, each issue deals with a separate and distinct topic and is, therefore, appropriate for RIE as a "theme" issue. In order to avoid duplication in processing, Clearinghouses should not process an issue of the OERI Bulletin unless it was sent to them as a "for the system" document by the Facility.

...Kevin Arundel/CERIC and
Joanna Eustace/ERIC Facility

National Governors' Association (NGA) "The 1991 Report"

The National Governors' Association (NGA) has recently announced a five-year project, "The 1991 Report", to study problems facing American education. This project will result in a variety of reports and documents which are of interest to ERIC.

Due to the large number of requests for these documents, it has been arranged that they will be sent to CERIC and forwarded to the ERIC Clearinghouses, as appropriate, via the Facility. Clearinghouse Acquisitions Coordinators therefore, should, not contact the National Governors' Association for documents concerning this project.

...Joanna Eustace (ERIC Facility)

NETWORK NEWS

ERIC Regional Technical Meetings - Agendas

The agendas for at least two of the ERIC Regional Meetings were prepared and distributed to prospective attendees. Even though by the time they appear in the EAB, the meetings will have been held, there is some utility in reproducing them here as Attachments 1 and 2. Each year, the old agendas are sought around the time when the new agendas are being contemplated. Having them in the EAB will facilitate this "looking back for inspiration" process.

...Debbie Hottel (ERIC Facility)

ERIC Redesign Study

A U.S. Department of Education News Release, on April 28, 1986, announced the formation of a 13-member panel to study the redesign and operation of ERIC. The news release, the mandate of the panel, and the membership of the study group are included here as Attachment 3. The final report of the panel is due in five months, at the end of September 1986.

...Jim Prevel (CERIC)

Letter from Jim Bencivenga to the Newspaper Community

Jim Bencivenga recently directed a letter to the newspaper community that transmitted the "key issues and trends" summary submitted by one Clearinghouse. The idea was to demonstrate to the editors and reporters how they might make use of such ERIC information in their work. He promised to provide additional such trends and issues papers "on a regular basis". A copy of the letter is provided as Attachment 4.

...Jim Prevel (CERIC)

Most Frequently Consulted Databases - ERIC at Top of Top 20!

The Online Database Search Directory, edited by John Schmittroth, Jr. and Doris Maxfield, and published in 1983 by Gale Research Company, was recently reviewed in the May 1986 issue of JASIS. The review reprints two tables from the Directory. (See Attachment 5). One of the tables shows ERIC as the most accessed database of those covered by the Directory. 595 organizations, or 52% of the total, reported that they "frequently searched" ERIC.

...Ted Brandhorst (ERIC Facility)

Target Audience (ERIC Ready Reference #8)

The ERIC Facility has developed a new item in the "ERIC Ready Reference" series. The new item covers the Target Audience field. It describes the eleven distinct audiences that have been defined and it illustrates how each of the major online vendors (DIALOG, BRS, and SDC) provide access to the data in this field for searching purposes. A copy of ERIC Ready Reference #8 appears as Attachment 6. Stock will be provided to each ERIC Clearinghouse.

...Ted Brandhorst (ERIC Facility)

Pocket Guide to ERIC -- Revision

The Pocket Guide to ERIC has been revised and delivered to OERI for printing. Since we are not certain how long that process will take, we have reproduced the new Pocket Guide panels on a series of four pages (3 panels per page) and included it as Attachment 7 to this EAB. This is intended as a contingency resource, should the GPO printing take excessively long.

Thesaurus "Introduction" to be Updated for 1986 Edition

Oryx Press is planning to publish the next edition of the ERIC Thesaurus in the fall. This will include an update of the "Introduction". Any comments are welcome about what should be added or deleted to the "Introduction" I will have to have the revised text done by July 1, so now is the time for suggestions.

...Lynn Barnett (HE)

OERI Outreach Office Assists HE in Conference Activities

ERIC/HE was pleased to have Gene Huddle of OERI's Outreach Office provide complimentary OERI publications for the HE booth at the national meeting of the American Association for Higher Education (AAHE) in March. The "freebies" on the table (including Involvement in Learning and other higher education-related reports) went like hotcakes. Gene was able to spend several hours with us at the booth meeting AAHE participants and helping answer questions about OERI programs. He was also able to provide complimentary publications for the HE booth at the annual meeting in Washington of the National Association of Student Personnel Administrators (NASPA).

Authoritative Reference Book in Higher Education Cites HE Publications More Than Those of Any Other Organization

Oryx Press has recently published a second edition of Research in Higher Education: A Guide to Source Bibliographies, by Richard Quay. As stated in the press release, Oryx published this book in order "to provide researchers with the most complete bibliographies of higher education related topics..." The book cites ERIC/HE monographs (IAPs) 128 times. This number equals 14% of all publications cited, making the HE Clearinghouse the most often cited source of publications with extensive bibliographies in the field of higher education.

...Lynn Barnett (HE)

HE IAP to be Included as Book Chapter

A recent HE monograph, "Futures Research and the Strategic Planning Process: Implications for Higher Education", will be cited in a new Jossey-Bass book by Warren Groff, Institutional Research and Assessing the External Environment. Groff says the IAP is "super" and writes in the Jossey-Bass book that it is an "excellent resource for the applications of futures research to organizational development." He goes on to say, "The series "ASHE-ERIC Higher Education Reports" is invaluable, particularly the documents by Johnson The High-Tech Connection: Academic/Industrial Cooperation for Economic Growth, by Cross Adult Learning: State Policies and Institutional Practices, and by Moran Academic Libraries: The Changing Knowledge Centers of Colleges and Universities."

TECHNOLOGY CORNER

ERIC on SilverPlatter CD-ROM Disc

The "ERIC on CD-ROM" product planned by ORI, Inc. and SilverPlatter Inc. jointly, is progressing satisfactorily and subscription forms were distributed in April. A special status report mailing is being sent by ORI to all organizations that responded to an earlier questionnaire. This mailing is an independent ORI commercial effort and is not being done with ERIC resources. It is reproduced here as Attachment 8 simply to keep the ERIC Clearinghouses up-to-date with respect to "ERIC on CD-ROM" developments.

...Pat Brown (ERIC Facility)

ERIC Digests Online on ED-Line

ERIC Digests Online (EDO) is up and running on ED-Line on The Source: as of April 1, 108 digests, representing all 16 ERIC Clearinghouses, can be accessed by menu, key word search, or fast command. Each Digest has its own "Notespace" for user comments. A general user notespace contains comments on the EDO file.

PS plans to add ten new Digests each month. It is imperative that Clearinghouses send us all new Digests (with index terms and annotations) as soon as they have been completed.

If you already subscribe to The Source and ED-Line, please try out the file and let the PS project staff have your reactions. For information on subscribing to The Source and ED-Line, call Laura Bono of ED-Line at (703) 528-5840. Attachment 9 is a notice that has been prepared in order to respond to user inquiries.

MICROSearch for the IBM-PC

IR has developed an IBM version of their "ERIC MICROSearch" product. The new brochure for this version is provided as Attachment 10.

...B.J. Vaughn (IR)

PERSONNEL

Judi Conrad Leaves CERIC

After several years with Central ERIC, Judi Conrad left in late May to join the Clearinghouse on Handicapped and Gifted Children as an Associate Director, Management. We are all sorry to see her leave. She was an untiring worker, whose enthusiasm and willingness to further ERIC "awareness and access" will be much missed at CERIC, but we are pleased she will still be with the ERIC family.

...CERIC

New Staff at HE

HE is overjoyed to have a new secretary on staff after going without since October! Suzanne Trapasso joined us at the end of February. She is in the Master's Program in Higher Education Administration at George Washington University and was most recently employed in the Office of Resident Life at Catholic University. She replaces Dianne Alston.

...Lynn Barnett (HE)

Personnel at SP

We are pleased to announce that Penny Purdue has joined the SP staff as a part time Writer/Editor. She worked for SP previously assembling the new Directory of Teacher Education-Related Organizations. Penny has a Masters Degree in Education and is currently a graduate student at George Washington University in the field of Public Administration.

Among existing staff, Diane Flanagan, our Processing Coordinator, is going on maternity leave in mid-April to have her second child. Celia Finstad, our Administrative Assistant is also pregnant and will be leaving on April 30, but unfortunately will not be returning. She and her husband have purchased a hardware store and are embarking on a career in business. Dorothy K. Stewart, SP's User Services Coordinator, is going to undergo surgery in mid-April and will return to full-time duty sometime in May.

...Margaret Mann (SP)

The Lighter Side

Kudos For ERIC

Overheard from a librarian at the Association of College and Research Libraries (ACRL) convention in Baltimore. "Oh, there's ERIC--that's the best program in the Federal government."

...Lynn Barnett (HE)

VISITORS

Brazilian VIPs Visit HE

Twelve Brazilian university rectors (vice-presidents) visited the HE Clearinghouse on April 14 as part of the Seminar on University Administration for Pro-Rectors for Administration. The seminar was co-sponsored by Partners of the Americas, George Washington University, Pennsylvania State University, the Fulbright Commission of Brazil, the Council of Rectors of Brazilian Universities, and the U.S. Agency for International Development (AID). The Brazilians were briefed on ERIC by Lynn Barnett, who then, with Laura Casal, conducted demonstrations of computer searching of the ERIC database. The visitors were each allowed to take with them two HE IAPs of their choice, paid for by George Washington University.

ERIC PUBLICATIONS

EA

NEW ERIC/CS INFORMATION ANALYSIS PRODUCTS:

"Decision Support Systems and the Microcomputer Revolution," by John Lindelow. Article in Educational Technology, November 1985 (circulation: 50,000).

Explores the nature and origins of the new computerized decision-making tools and describes their entry into the work lives of managers in every type of organization, including schools.

It is Time for Principals to Share the Responsibility for Instructional Leadership with Others, by Keith A. Acheson with Stuart C. Smith (February 1986).

Prepared by the ERIC Clearinghouse on Educational Management for publication by the Oregon School Study Council. Defines the role of the instructional leader, argue that the principal alone cannot carry out this role, and points to several other personnel who can assist with instructional leadership. Teachers, in particular, could be trained to observe one another and provide feedback as part of the staff development program.

Collegial Support for Professional Improvement: The Stanford Collegial Evaluation Program, by Susan Staver Roper and David E. Hoffman (March 1986).

Prepared by the ERIC Clearinghouse on Educational Management for publication by the Oregon School Study Council. Describes a tested program in which pairs of teachers observe and confer with each other. The resulting data are used only for professional development purposes, not for personnel decisions. Barriers to collegiality are also discussed.

HR

Academic Libraries: The Changing Knowledge Centers of Colleges and Universities. ASHR-ERIC Higher Education Research Report No. 8, 1984. By Barbara B. Moran. 94 pp.

Focuses on collegiate administrative issues related to academic libraries, including new technologies, organization and management, budgeting, personnel issues and faculty status, collection development/cooperation.

Futures Research and the Strategic Planning Process: Implications for Higher Education. ASHR-ERIC Higher Education Research Report No. 9, 1984. By James L. Morrison, William Renfro, and Wayne I. Boucher. 125 pp.

Examines the rationale for futures research, the strategic planning process, stages of strategic planning, developing a strategic planning capability within an academic institution, and the relevance of environmental scanning and forecasting to higher education.

ERIC PUBLICATIONS

HE

NEW ERIC/CS INFORMATION ANALYSIS PRODUCTS:

Faculty Workload: Research, Theory, and Interpretation. ASHE-ERIC Higher Education Research Report No. 10, 1984, by Harold E. Yuker. 110 pp. (Index issue for 1984 series).

Examines concepts and uses of faculty workload data, data from institutional reports and faculty reports, variations in instructional activities, research/scholarship/creative activities, other faculty activities, and total workload.

Flexibility in Academic Staffing: Effective Policies and Practices. ASHE-ERIC Higher Education Report No. 1, 1985, by Kenneth P. Mortimer, Marque Bagshaw, and Andrew T. Masland. 108 pp. Subject index.

Discusses staffing in the institutional context and institutional coping strategies, types of flexibility (part-time, non-tenure track, etc.), faculty flow models, reallocation and reduction strategies, and specific recommendations. Supported by grant from TIAA-CREF.

Associating in Action: The Washington, D.C. Higher Education Community. ASHE-ERIC Higher Education Report No. 2, 1985, by Harland G. Boland. 113 pp. Subject index.

Reviews the higher education associations and society, the environment of the DC-based association community, historical review of the 1960s, 1970s, and 1980s and their political climates, and current issues.

And on the Seventh Day: Faculty Consulting and Supplemental Income. ASHE-ERIC Higher Education Report No. 3, 1985, by Carol M. Boyer and Darrell R. Lewis. 76 pp. Subject index.

Studies questions related to who consults, whether faculty consulting is increasing, whether faculty who consult are shirking their campus responsibilities and exploiting their consulting opportunities, whether faculty are motivated to consult primarily for economic reasons, and the adequacy of institutional policies and procedures.

Faculty Research Performance: Lessons from the Sciences and the Social Sciences. ASHE-ERIC Higher Education Report No. 4, 1985, by John W. Creswell. 73 pp. Subject index.

Examines measures of faculty research performance (publication counts, citation counts, performance ratings), conceptual explanations of research performance, correlates of research performance, and implications for practice and research.

Academic Program Reviews: Institutional Approaches, Expectations, and Controversies. ASHE-ERIC Higher Education Report No. 5, 1985, by Clifton F. Conrad and Richard F. Wilson. 93 pp. Subject index.

Considers program review in historical perspective and its growth, diverse approaches (including program selection, reviews, models for evaluation, evaluative criteria), major issues in program review, and proposals for improving it.

WORKSHOPS/CONFERENCES/MEETINGS

<u>CH</u>	<u>DATE</u>	<u>LOCATION</u>	<u>STAFF</u>	<u>COMMENTS</u>
HR	Feb. 20-23, 1986	San Antonio, TX	Lynn Barnett Jon Fife Marilyn Shorr	Marilyn Shorr, Lynn Barnett, and Jon Fife attended the annual meeting of the Association for the Study of Higher Education (ASHE).
	Mar. 13-14, 1986	Washington, DC	Lynn Barnett Jon Fife Marilyn Shorr Suzanne Trapasso	Marilyn Shorr, Lynn Barnett, and Jon Fife, and Suzanne Trapasso represented HR at the National Conference of the American Association for Higher Education (ASHE).
	Apr. 2-4, 1986	Washington, DC	Lynn Barnett	Marilyn Shorr, Lynn Barnett, and Suzanne Trapasso staffed the HR exhibit at the National Association of Student Personnel Administrators (NASPA) conference. CG publication lists and workshop information were also displayed.
	Apr. 9-11, 1986	Baltimore, MD	Lynn Barnett Marilyn Shorr Suzanne Trapasso	Marilyn Shorr, Lynn Barnett, and Suzanne Trapasso helped Chris Rigaux and Karen Wittenauer staff an ASHE exhibit at the convention of the Association of College and Research Libraries (ACRL). The exhibit was designed to promote the ASHE-ERIC Higher Education Reports series and to market subscriptions to the IAP monograph series.
SP	Feb. 24-26, 1986	Atlanta, GA	Margaret Mann Dorothy K. Stewart	Margaret Mann and Dorothy K. Stewart attended the annual meetings of Association of Teachers Educators.
	Feb.26-Mar.1 1986	Chicago, IL	Margaret Mann Dorothy K. Stewart	Margaret Mann and Dorothy K. Stewart attended the American Association of Colleges of Teacher Education. The conference participants were given a free pen for visiting the booth and that pen created more interest in the display than any monograph ever did. The pens were a big hit. Maybe we could put the abstracts on pens...

DEPARTMENT OF EDUCATION

NEWS

FOR RELEASE
Monday, April 28, 1986

Eileen Nicosia--(202) 254-7930
Jane Glickman --(202) 245-8564

PANEL TO SEEK WAYS TO IMPROVE ERIC -- WORLD'S LARGEST EDUCATION DATABASE

A 13-member panel to study the redesign and operation of the Educational Resources Information Center (ERIC) has been named by Chester E. Finn, Jr., the Department of Education's Assistant Secretary for Educational Research and Improvement.

The redesign study panel will advise Finn on the future direction of ERIC, which is the information database devoted to education. ERIC is funded by the Department of Education and is the world's largest computerized collector of education information. Its resources are used more than 2.7 million times a year.

"Secretary Bennett and I firmly believe that the American people, equipped with good information, are ready, willing and able to improve schools and colleges," Finn said.

"The purpose of ERIC is to put such information into the hands of classroom teachers, students, parents, scholars and others with an interest in education.

"ERIC is 20 years old this year and is generally respected by members of the research and scholarly community. But it is capable of reaching a much wider audience," Finn said, "and this panel can offer sound advice and guidance toward that end."

The final report of the panelists is due in September.

-MORE-

3519

-2-

The panelists are primarily drawn from the information science and education communities, but also include a reporter from the Dallas Times Herald, a member of the Missouri governor's staff, and several Education Department staffers. Finn has asked the panel to examine ERIC to determine whether:

- It adequately meets current requests for information and is technologically prepared to meet future needs;
- Its dissemination efforts effectively meet the needs of current and potential users, and whether awareness and access to ERIC can be improved;
- Its quality control procedures are adequate to assure that the materials put into the system are accurate, reliable and of high quality.

The ERIC system presently includes 16 specialized clearinghouses across the country. Their particular areas of expertise range from early childhood to postsecondary education to subject areas such as reading and math.

The information stored in ERIC is made available to the public on microfiche at more than 3,000 locations worldwide, mostly in public and school libraries, colleges, universities and educational organizations.

The ERIC database includes research studies, program descriptions and evaluations, conference proceedings, bibliographies, curriculum guides, state-of-the-art papers, journal articles and other education materials.

3520

-3-

In keeping with OERI policy to seek advice and counsel from peer reviewers, Finn has asked six individuals, including a principal and a college president, also to look at ERIC and to review the recommendations of the ERIC Redesign Study Panel. Five have accepted and one remains to be named.

"We attach a great deal of value to external review of our projects by capable scholars, practitioners and policymakers," Finn said. "Another group of individuals will undoubtedly provide a slightly different perspective."

The Department is also inviting the public to provide ideas for improving ERIC. Suggestions and comments about its redesign should be sent to Pat Coulter or Elizabeth Payer, Information Services, Department of Education, OERI, Washington, D.C. 20208. The comments will be reviewed by the panel and should be submitted before July 1. The panel will meet twice.

3523

ERIC Redesign Study

Purpose

The purpose of the study is to examine and evaluate the effectiveness and efficiency of the ERIC system in terms of its capacity to respond to existing and projected information needs of educators, policymakers, scholars, students, the press and the general public.

Objectives:

1. Examine the system's current coverage of the field of education assessing (a) its adequacy for meeting the educational information needs of the next two decades and (b) the appropriateness of the present clearinghouse configuration to meet these needs.
2. Assess the effectiveness of ERIC's dissemination mechanisms for providing awareness and access to educational information both to current and potential users. Identify the multiple audiences which ERIC should serve and appraise their specific needs.
3. Evaluate the system's quality control procedures to assure the selection of materials of high quality, substance and significance.
4. Evaluate the adequacy and efficacy of the system's technology and provide cost data for implementing any proposed technological improvements.
5. Assess the relationship of ERIC to other educational information service providers. Identify areas of overlap and duplication and opportunities for integration or linkage with other information systems and resources including related Departmental programs.
6. Clarify priorities within the system given current and projected resources and recommend the most cost-effective allocation of resources for operating the ERIC system.
7. Identify system activities which warrant growth, improvement, deletion or modification.

3524

ERIC Redesign Study Plan

Purpose of the Study

The purpose of the ERIC Redesign Study is to examine and evaluate the effectiveness and efficiency of the ERIC system in terms of its capacity to respond to existing and projected information needs of educators, policymakers, scholars, students, the press and the general public.

The study will be conducted by the ERIC Redesign Study Panel which will consist of 12 members representing the Council of ERIC Directors, OERI staff, the education and library/information communities, the press and State government. In addition to the Study Panel, six people will react and provide independent written critiques of the Study Panel's findings. Staff support will be provided by Information Services. A three member Study Staff will coordinate the study activities and provide ongoing support for the redesign project which will be conducted over a seven-month period.

Purpose of the Panel

The purpose of the Study Panel is to advise the Assistant Secretary for Educational Research and Improvement on issues relating to the design, operation and allocation of resources of the Educational Resources Information Center (ERIC) program. The Assistant Secretary will use the information and recommendations generated by the Study Panel to plan and direct the ERIC system. The study's recommendations on the role and structure of the clearinghouses will be considered in planning for the 1987 ERIC competitions.

Concerns of the Assistant Secretary

The Assistant Secretary has identified three priority concerns related to the ERIC system--technology, quality control and dissemination. Specifically, he is concerned about:

- o What is the adequacy and efficacy of the ERIC's present technology and its ability to respond to future demands?
- o How effective are ERIC's dissemination efforts in meeting the needs of current and potential users? How can awareness and access to the system be improved?
- o Are ERIC's quality control procedures adequate to assure the selection of materials of high quality, substance and significance?

Issue papers on these three concerns are being developed by two external experts and The Council of ERIC Directors. These papers will serve as the take-off point for the study.

-2-

Procedures

Upon receipt of these papers, ERIC program staff will review and add their reactions and comments. For two of the topics (technology and quality control), comparative information on at least two other large information systems will be gathered.

On April 30, the Study Staff will send the issue papers (along with staff comments on and syntheses of these papers) to all members of the ERIC Redesign Study Panel. Additional selected material and data on the ERIC system will be included in this package.

Two meetings of the ERIC Redesign Study Panel will follow. The first will be held on May 22-23 and the second on August 7-8.

May Meeting Anticipated Outcomes

Study panel members will:

1. Acquire a thorough understanding of the present operation of the ERIC system.
2. Identify the major problems and issues that should be addressed (based on the issue papers) and obtain the data needed to respond to these issues. Problem identification must be tied to the objectives of the study.
3. Identify specific study tasks and make subgroup assignments in the areas of technology, quality control, and dissemination. Agree upon issue paper requirements.
4. Think about and develop alternative models for structuring the ERIC clearinghouse network. Send recommendations for alternative models to the Study Staff by June 27.
5. Agree upon the next steps to be undertaken.

Following this meeting, members of the three subgroups will develop issue papers with recommendations in their respective areas. Subgroup chairpersons will submit these papers to the Study Staff by June 27. In addition, subgroup members will also submit their ideas regarding the structuring of the ERIC network by June 27. The Study Staff will then develop a synthesis of all comments related to the ERIC structure and mail this synthesis as well as subgroup papers to all Study Panel members on July 11. Each member will be asked to comment on the two papers he/she was not involved in writing.

3526

-3-

August Meeting Anticipated Outcomes

Study Panel members will:

1. Identify system activities which warrant growth, improvement, deletion or modification on the basis of the issue papers developed by the subgroups.
2. Present three options with accompanying recommendations for structuring the ERIC clearinghouse network.
3. Discuss a final plan for strengthening the ERIC system.

Based on the discussions of the August meeting as well as the subgroup issue papers, Central ERIC and the Study Staff will produce a plan which will serve as the basis for ERIC's strategic planning for the next two decades.

Work will begin on the procurement process for the 1987 ERIC competitions.

3527

ERIC Redesign Study
Schedule

Begin Planning Process for Study	2/5/86
Preliminary Recommendation of Panel Members	2/7
ERIC Program Staff Planning Meeting	2/12
Final Panel Member selection by Asst. Sect.	3/3
Initial phone contact followed by letter of invitation	3/10
Study Plan completed & mailed with letter of invitation	3/10
Receive initial issue papers from ERIC Directors on 3 priority areas defined by Asst. Sect.	3/14
Prepare contracts for panel members	3/17
Develop budget & secure funding	3/31
Background reading materials distributed	4/11
Mail Expanded issue papers to group	4/30
#1 Panel Meeting in D.C. (initial briefing and site visit to Reston clearinghouse)	5/22-23
Panel Members submit recommendations on clearinghouse structure and Chair persons submit written reports	6/27
Distribute reports to all panel members and reactor group	7/11
#2 Panel Meeting in D.C. (discuss reports and make recommendations)	8/7-8
Final Recommendations submitted to Asst. Sect.	9/10
Final Decision by Asst. Sect. on clearinghouse structure	10/27

MAY 2 1986

Dear Colleagues:

Your editor wants an article on competency tests for teachers. Or a story analyzing the benefits and drawbacks of full-day kindergarten. Where do you turn for background information?

Since 1966, the U. S. Department of Education has sponsored what is now the world's largest information system providing material about education. Called ERIC--Educational Resources Information Center--the center collects information at 16 "clearinghouses" throughout the country. The information is then made available to the public at about 3,000 locations worldwide. There is no charge to use most ERIC services and products, which include:

- o An index of articles that have appeared since 1968 in more than 700 journals from the Phi Delta Kappan to Nurse Educator. (ERIC does not distribute copies of the articles because of copyright laws. But copies of these articles are available at most large libraries or can be ordered.)
- o A second index to ERIC's own educational document collection of about 250,000 items dates back to 1956. Some have previously been published.

This collection includes research studies, program descriptions and evaluations, conference proceedings, bibliographies, curriculum guides, state-of-the-art papers, and other education materials. Almost all of these documents are available on microfiche, and paper copies of most can be ordered.

Most of the 3,000 locations where it is possible to use ERIC are in colleges and universities or in educational organizations. At many of these locations, librarians and information specialists can, for a fee, conduct computer searches to help find articles and publications quickly.

Each of the 16 clearinghouses analyzes and selects materials in a specific subject--"testing, measurement, and evaluation," for example, or "handicapped and gifted children."

And each recently submitted a summary of key issues and trends in its area of expertise to the U. S. Department of Education's Office of Educational Research and Improvement, which today oversees ERIC.

I thought the enclosed information, which highlights issues from one of the clearinghouses, might trigger story ideas. My office will provide such trends and issues papers from the ERIC clearinghouse directors on a regular basis. Please keep in mind, however, that the clearinghouse director's points of view do not necessarily represent the official views or opinions of the U. S. Department of Education. After you have received a few of these trends and issues papers, please let me know if you have found them useful in your work.

Sincerely,

Jim Bencivenga
Jim Bencivenga
Director, Information Services

Online Database Search Directory. First edition. Parts one and two. John Schmittroth, Jr., and Doris Morris Maxfield, Editors. Detroit: Gale Research Company; 1983. Price of the set \$110.00 (ISBN 0-8103-1698-6, ISSN 0741-0077).

The organizations in this directory are those that will provide searching of online databases to the general public, or at least to some individuals outside their own organizations, through the use of publicly available online searching systems.

Many agencies will be providing their own searching services and may wonder why they might need referral information to other organizations in competition with them. The answer lies in the proliferation of vendors of database searching systems in the United States and Canada, the geographical scope of this directory. In fact, pages 191 and 192 of part one list 86 different searching systems which have been reported as being searched by listed agencies. Part two, issued 11 months later, lists 107. It is unlikely that most libraries have accounts with this many search services.

The basic record contains sixteen items of descriptive information on the services including names, addresses, telephone numbers, age, staff size, fee and availability policies, and system accessed.

The problem, it seems to this reviewer, will be in keeping the material up to date in a rapidly changing field. People and expertise at the services listed are certainly subject to change.

Nonetheless, the indices to organizations by database searched and systems accessed should be quite valuable. The geographical index, by state and subarranged by city, (the Canadian section by city alone) may well be useful for the "where can I get a search done while I'm in . . ." sort of question. The search personnel index provides something of a directory to active searchers, and the organization index is useful if one desires to find the main description of a service without knowledge of its official name. As an example, entry under "BLISS", the acronym used by the Middleton Library at Louisiana State University, will lead you to the complete record.

I suspect that the index by subject area searched will have the least value. There are 23 broad topics that the services were asked to check if they considered them a specialization. There are ten and three quarter pages of entries for services specializing in Education, twelve pages specializing in Medicine and the Biosciences, nine and a quarter in Social Sciences, and eight in "any topic", and eight in Science and Technology (which might not include Chemistry, Engineering, Medical, or Materials Science, which have separate entries). Patents, the smallest specialization, has entries covering two pages. Since it seems unlikely that "any topic" can really be a specialty or that one can specialize in Science and Technology but not in Chemistry, Bioscience or Engineering at the same time, one must believe there was some confusion in the use of these categories. The only question this reviewer can conceive of answering with this index is "What search services believe that they specialize in one of these topics?" The person with a subject search will, I suspect, first use the geographical index, and then check the physically close entries to see if they handle the desired topic.

However, the availability of this index in no way detracts from the usefulness of the tool as a whole. Since the indices in the second part accumulate those in the first, those in the first are now of minimal value, and part one is retained only because of its register of the first 634 search service entries. The 510 in part two are in a separate alphabet, but since the index entries reference an entry number, this provides no serious problem.

The following chart, provided by Gale, with its publicity release and derived from the directory, may be of interest to JASIS readers.

TARGET AUDIENCE

Educational documents and journal articles are sometimes written for particular audiences. ERIC currently identifies these audiences in a special "Target Audience" field (data element). The field is used when an author clearly specifies an intended audience; otherwise, it is left blank. For consistency, eleven (11) distinct audiences have been defined by ERIC, as follows:

- **Policymakers**
- **Researchers**
- **Practitioners***
 - **Administrators**
 - **Teachers**
 - **Counselors**
 - **Media Staff**
 - **Support Staff**
- **Students**
- **Parents**
- **Community**

**Note: The ERIC computer system automatically adds the generic audience "Practitioners" to records cataloged by any of the five "practitioner" sub-categories.*

Each of the major online retrieval vendors provides access to ERIC's "Target Audience" data, and computer searchers can employ this data to limit output and improve relevance. Each vendor provides access in a different way and has a different segment of records containing "Target Audience" data on its file. These differences are summarized below:

DIALOG

Access: Via the prefix "TA=" e.g. S TA=PRACTITIONERS
 File Segment: RIE from Jan84; CIJE from Sep84.
 Retrospective RIE postings (May75-Dec83,
 "Practitioners" and "Students" only).

BRS

Access: "Target Audience" data merged with Identifier data, e.g:
 IDENTIFIERS: Great Britain. West Indians.
 Caribbean. TARGET AUDIENCE: Policymakers.
 Searching must be done with this in mind, e.g:
 POLICYMAKERS.ID. AND (TARGET ADJ AUDIENCE).ID.
 File Segment: RIE from Jan84; CIJE from Sep84.
 Retrospective RIE postings (Nov83-Dec83,
 "Practitioners" and "Students" only).

SDC

Access: Via the suffix "/TG," e.g. PRACTITIONERS/TG
 File Segment: RIE from Aug85; CIJE from Aug85.

How to Submit Documents to ERIC

Where to Send Documents

Documents usually enter the ERIC system through one of two ways:

They may be sent to the clearinghouse most closely related to their subject matter. (A list of the clearinghouses and their addresses appears in this brochure.) Material is expedited if it is directed to the attention of "Acquisitions."

If it is uncertain which clearinghouse is appropriate, materials may be sent to the following address:

ERIC Processing and Reference Facility
Acquisitions Department
4833 Rugby Avenue, Suite 361
Bethesda, Maryland 20814

The ERIC Facility will forward all submissions to the appropriate ERIC clearinghouse.

What Kinds of Documents to Send

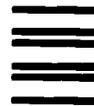

ERIC would like to be given the opportunity to examine virtually any document dealing with education or its aspects. The ERIC audience is so broad (encompassing teachers, administrators, school board members, librarians, researchers, media specialists, students and their parents, counselors, and every other type of educator or educational practitioner) that it must collect a wide variety of documentation in order to satisfy its users. Examples of types of materials collected are the following:

- Research Reports/Technical Reports
- Program/Project Descriptions
- Opinion Papers, Essays, Position Papers
- Monographs, Treatises
- Speeches and Presentations
- Evaluation Studies
- Feasibility Studies
- State-of-the-Art Studies
- Instructional Materials
- Classroom Materials
- Syllabi
- Teaching Guides
- Resource Guides
- Manuals
- Handbooks
- Curriculum Materials
- Conference Papers
- Proceedings
- Bibliographies, Annotated Bibliographies
- Legislation and Regulations
- Tests, Questionnaires, Measurement Devices
- Vocabularies, Dictionaries, Glossaries, Thesauri
- Statistical Compilations
- Taxonomies and Classifications
- Dissertations

ERIC—A General Description

ERIC stands for the Educational Resources Information Center, an information system in existence since 1966 and currently sponsored by the Office of Educational Research and Improvement, within the U.S. Department of Education.

ERIC is designed to provide users with ready access to primarily the English-language literature dealing with education. It does this through a variety of products and services, many of which are described in this brochure e.g., databases, abstract journals, microfiche, computer searches, online access, document reproductions, analyses and syntheses, etc.

Organizationally ERIC consists of a central Government office (establishing policy, funding, and monitoring the entire system); sixteen subject-specialized "clearinghouses" (collecting and analyzing the literature and producing information products); a central editorial and computer facility (maintaining the database and preparing the abstract journal *Resources in Education* and other products); a central "ERIC Document Reproduction Service" (preparing microfiche and document reproductions); a commercial publisher (publishing *Current Index to Journals in Education*, the ERIC Thesaurus, and other ERIC publications). Full names and addresses for all the components of ERIC appear elsewhere in this brochure.

This brochure provides users with an introduction to what ERIC is and what it offers, and also serves as a quick reference source answering a wide variety of everyday questions about ERIC that users commonly have. A wealth of information is packed into a relatively small space and we hope that it is information that will prove useful to you.

Major ERIC Products

The information available from ERIC is disseminated in a variety of products. This panel lists the various products and indicates where each can be obtained. Detailed addresses of the sources can be found in this brochure under the heading "The Organizations That Make Up ERIC".

PRODUCT	SOURCE
Abstract Journals • <i>Resources in Education</i> (RIE) (Announcing Documents)	U.S. Government Printing Office (GPO) Washington, D.C. 20402 (\$56./year)
• <i>Current Index to Journals in Education</i> (CIJE) (Announcing Journal Articles)	Oryx Press (\$175./year)
Microfiche 4" x 6" microfiche of documents announced in RIE. Available on subscription or on demand. Back collections available.	ERIC Document Reproduction Service (EDRS) Annual Subscriptions: Approx. \$1500 (approx. 14,000 fiche) Titles: \$0.75 (1-5 fiche)
Magnetic Tapes (ERIC TAPES) Computer-compatible tapes containing the contents of RIE and CIJE and the related authority files and inverted files. Available on subscription or on demand.	ERIC Facility (Write for price list)
Information Analysis Products State-of-the-art reports; interpretive summaries; syntheses; etc.	Specific ERIC Clearinghouses
Computer Searches • Complex searches by computer of the ERIC files, negotiated with the supplier and provided to the user in the form of printouts. • Online access, searching, retrieval from ERIC files via computer terminal.	Please consult <i>Directory of ERIC Information Service Providers</i> (approximately 900 locations, geographically arranged; available from ERIC Facility). Online vendors: BRS, DIALOG, SDC. See online retrieval panel for addresses.
ERIC TOOLS Various printed indexes and other tools produced for the benefit of those working closely with the ERIC files, e.g., <i>Title Index</i> , <i>Identifier Authority List</i> , <i>Report Number Index</i> , <i>Contract/Grant Number Index</i> , etc.	ERIC Facility (Write for price list)
Thesaurus of ERIC Descriptors The master list of approved Descriptors (index terms) used by the ERIC system, with a complete cross-reference structure and rotated and hierarchical displays.	Oryx Press (\$45.00)
Computer-Output-Microform (COM) • Cumulative title and author indexes for RIE • <i>Descriptor and Identifier usage reports for RIE</i> • RIE resume cumulations from 1966 to present.	EDRS (Write for price list)
Document Reproductions • Paper copy reproductions of documents announced in RIE • Paper copy reproductions of journal articles announced in CIJE.	ERIC Document Reproduction Service (EDRS) (\$1.50 for each 1-25 page increment) University Microfilms International, Article Clearinghouse, 300 N. Zeeb Road, Ann Arbor, MI 48106 Institute for Scientific Information, Original Article Tear Sheet Service, 3501 Market Street, Philadelphia, PA 19104 (Several journal article copy services exist of which the above are major examples)

3540

3541

Document Delivery

ERIC is notable among information systems in providing for the availability of reproductions of the documents and journal articles announced in its abstract journals RIE and CIJE.

ERIC obtains permission from authors and producers to reproduce approximately 98% of the documents currently being announced in RIE. This means that in a monthly issue announcing 1,500 documents, some 1,470 documents are microfilmed and made available to users in either microfiche or paper copy reproductions. Alternative availability instructions are always cited for the small number of items ERIC cannot make available.

The document delivery arm of ERIC is the ERIC Document Reproduction Service (EDRS). EDRS sells subscriptions to the total set of ERIC microfiche at a rate of 7.7¢ per fiche card. EDRS also sells microfiche copies and paper copies of documents on an on-demand basis. On-demand microfiche cost \$0.75 per title (up to 5 fiche cards) and \$0.15 for each additional fiche card required. On-demand paper copies cost \$1.80 for 1-25 pages and \$1.80 for each additional 25 pages required. For current prices, always consult the most recent edition of RIE.

For order forms and ordering instructions contact:

ERIC Document Reproduction Service (EDRS)
3900 Wheeler Avenue
Alexandria, Virginia 22304
Telephone: (703) 823-0500
(800) 227-3742

It is more difficult to provide copies of the journal articles announced in CIJE because of copyright restrictions on the original journals. However, several organizations provide reprint services and have made arrangements to reimburse the original publishers appropriately. Among these are: (1) University Microfilms International (Article Clearinghouse), 300 North Zeeb Road, Ann Arbor, Michigan 48106 Tel.: (800) 732-0616; (2) Institute for Scientific Information, Original Article Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, Tel.: (800) 523-1850.

For those journals that do not permit reprints, it may be necessary to consult an original issue of the journal in your local university or public library. Some service organizations, such as the San Mateo Educational Resources Center (SMERC), maintain relatively complete collections of the journals indexed by CIJE.

Microfiche Collections

Microfiche (MF) of the documents announced in *Resources in Education* may be obtained on a monthly subscription basis from the ERIC Document Reproduction Service (EDRS). When purchased in this way, the price is a very economical 7.7¢ per microfiche card. The table immediately below displays for each calendar year the accession number range, total titles, total microfiche cards, and current price.

Year	Accession Range	Documents Filmed	Total MF Cards	Price
1966-1967	ED-010 000 - ED-012 348	2,347	4,426	\$ 331.96
1968	ED-012 349 - ED-021 151	6,946	13,679	1,075.95
1969	ED-021 152 - ED-031 604	8,331	15,899	1,192.45
1970	ED-031 605 - ED-042 060	8,448	16,188	1,214.13

TOTAL		224,364	348,428	\$25,982.67

Complete collections of ERIC microfiche are currently being subscribed to by approximately 750 organizations. In addition, there are several organizations that, while not currently subscribing, have substantial ERIC microfiche collections in their possession. All such organizations are listed in the *Directory of ERIC Information Service Providers*. This reference tool is arranged geographically in order to facilitate referral of users to the closest possible microfiche service point. Each entry in the *Directory* provides the address, telephone number, contact person, collection status, and services provided. (See the "Search Services" panel for a sample entry).

The *Directory of ERIC Information Service Providers* is prepared by the ERIC Processing and Reference Facility and can be obtained free of charge from the Facility.

Online Retrieval

The ERIC database (both RIE and CIJE components) can be searched online by computer via all three of the major vendors of online retrieval services: DIALOG Information Services, System Development Corporation (SDC), and Bibliographic Retrieval Services (BRS).

ERIC was one of the very first bibliographic data bases to take advantage of this advanced technology and remains File #1, for example, among the many files offered by DIALOG.

Individuals and organizations wishing to search ERIC online need only the following:

- a computer terminal (that can link by phone with the online vendor's computer),
- an open purchase order with one or more vendors (you pay only for what you use).

Online computer searching is a superior way to perform retrieval for the following reasons:

- You get responses back in real time, while you wait
- You can search both subject matter and non-subject matter fields, e.g., authors, institutions.
- You can make complex logical demands that your output must meet; requirements more complex than you can apply manually.
- You get to interact with the computer and can adjust your requirements as you see what the computer selects.
- You can search both controlled input fields (e.g., index terms selected from a thesaurus) and free text fields (e.g., words in the abstract). Free text fields are not normally searchable manually.

In order to establish your own online searching capability contact one or more of the online vendors listed alphabetically below. Each vendor offers different retrieval software, command structure, and training and user support facilities. You should choose the one best fitted for your particular needs.

Search Services

The ERIC database (consisting of both RIE and CIJE data) is one of the most widely searched and heavily used bibliographic databases in the world today. Approximately 50 organizations all over the world (including all the major online vendors) purchase the ERIC tapes and provide computerized access to them. Via these primary sources, several hundred service centers that provide computer searches of ERIC to various classes of users can be identified. The *Directory of ERIC Information Service Providers* attempts to identify these sources and to provide complete entries describing the address, telephone number, contact person, clientele served, ERIC collection status, equipment available, and services provided (including search system used). The 1986 *Directory* lists approximately 900 service points. It is estimated that over 250,000 computer searches are made of the ERIC file each year by these service centers.

Displayed below is a typical entry from the *Directory of ERIC Information Service Providers*.

San Mateo Educational Resources Center (SMERC)
San Mateo County Office of Education
333 Main Street
Redwood City, CA 94063

Communications: (415) 363-5449
Contact: Neelus Raza, Director
Clientele: (1) San Mateo County public school employees;
(2) Subscribers
Collection: RIE (1986); CIJE (1989); Thesaurus (10th, 1984);
ERIC TOOLS; Microfiche (1986);
Clearinghouse publications
Equipment: MF Reader; MF Reader/Printer;
MF Duplicator; Office copier; Microcomputer;
Computer terminal
Services: PC reproduction; MF duplication;
Search services (online: DIALOG)

If you would like to be listed in the next edition of the *Directory*, please request a questionnaire from the ERIC Facility. If you would like a free copy of the *Directory*, write or call the ERIC Facility. Multiple copies are available for use with conferences, seminars, classes, etc.

3544

Question-Answering Services

Within the ERIC system, subject expertise resides primarily within the various specialized ERIC clearinghouses. Questions that involve answers to substantive matters are therefore best directed to the particular clearinghouse whose scope includes the area covered by the question. From this brochure, clearinghouse scopes can be determined only from their names; however, there is a single page flyer available from the ERIC Processing and Reference Facility that contains detailed scope notes for each clearinghouse.

In the course of a year, all the ERIC components combined answer more than 100,000 written and telephoned inquiries from users. Many of these inquiries are requests involving identification of specific documents and can be answered fairly rapidly and simply. (This type of request is best directed to the ERIC Facility.) Many other requests, however, involve some level of subject expertise in the development of a customized response. ERIC clearinghouses will accept such questions in their subject areas. For inquiries involving computer searches, cost recovery is normally sought. Referrals to other organizations where computer searches or other information services may be purchased are also made, as appropriate. In summary:

- **Specific Documents**
Requests to identify (and determine availability and price for) specific documents (including OERI publications) that are needed should normally be directed to the ERIC Processing and Reference Facility.
- **Subject-Oriented Questions**
Requests to answer subject-oriented questions should be directed to the particular ERIC clearinghouse most closely associated with the subject matter involved.
- **Computer Searches**
Requests known in advance to require a computer search should be directed to the most appropriate service point, as determined from the *Directory of ERIC Information Service Providers* (listing approximately 900 service points nationwide).
- **ERIC Clearinghouse Publications**
Requests for specific publications of the ERIC clearinghouses should be directed to the clearinghouse that prepared the document. (Clearinghouses often have stocks of printed copies that are either available free or that cost less than reproduced copies from the ERIC Document Reproduction Service.)

Information Analysis

What are Information Analysis Products?

In addition to collecting the literature of education for announcement in RIE and CIJE, the ERIC clearinghouses analyze and synthesize the literature into research reviews, knowledge syntheses, state-of-the-art studies, interpretive studies on topics of high current interest, and many similar documents designed to compress the vast amount of information available and to meet the needs of ERIC users. These products constitute new contributions to the literature by ERIC.

How are ERIC Information Analysis Products Available?

ERIC information analysis products are published by the individual ERIC clearinghouses responsible for producing them. As long as stocks last, original copies are usually available directly from the responsible clearinghouse. In addition, information analysis products are announced in RIE, if appropriate. When announced in RIE, they are contained in all ERIC microfiche collections and may be ordered in microfiche or paper copy from: ERIC Document Reproduction Service (EDRS), 3900 Wheeler Avenue, Alexandria, Virginia 22304. Full ordering details and current prices are to be found in RIE.

Bibliographies and Indexes of ERIC Information Analysis Products

Periodically, ERIC prepares bibliographies of its information analysis products and other major publications. All items in the series to date are listed below.

Accession Number of Bibliography	Size	Period Covered	Number of Items
ED-029 161	24 p	1968	149
ED-034 089	34 p	1969	240
ED-041 598	47 p	1970	366
ED-054 827	54 p	1971	416
ED-077 512	55 p	1972	415
ED-087 411	74 p	1973	396

Telephone (301) 656-9723

April 1986

Dear Colleague:

The purpose of this letter is to provide a status report to all interested parties on the joint SilverPlatter/ORI project to distribute the ERIC database on CD-ROM compact disc.

The response from the field concerning this proposed product has been extremely gratifying, and the number of organizations that have completed our survey form or otherwise expressed an interest in the product has been so large as to make individual responses impractical thus far.

Alpha Test

The Alpha Test phase for ERIC will start on May 27, 1986 at four East Coast sites that have been selected for a combination of their level of searching activity, level of interest and willingness to provide feedback, level of multidatabase activity, type of institution, and geographic proximity to SilverPlatter/ORI staff.

Subscription Service

Beginning in April 1986, we are accepting subscription orders, with the first production discs scheduled for distribution by the end of July. Order forms are enclosed with this mailing.

Disc Content and Frequency

The first ERIC disc is the "current" disc, upon which we will build over the next few years. It will contain both parts of the ERIC database (RIE and CIJE) beginning with January 1983 and it will be updated on a quarterly basis. All quarterly updates will be cumulative, i.e., each new disc will contain all data from the older disc, plus 3 month's worth of new data.

The first disc will be delivered in July and will contain data through the March 1986 issues of the abstract journals. The second disc will be distributed in October and will contain data through the September 1986 journal issues. The third disc will be distributed in January 1987 and will contain data through December 1986, and so on.

Each first year subscriber will receive five discs in order to give them the basic starter disc plus a year's worth of updates. Continuing subscribers will thereafter receive four discs annually.

Headquarters Office • 1375 Piccard Drive • Rockville, Maryland 20850

3546

Return of
Old Discs

Subscribers will be enjoined in the terms and conditions of sale from re-selling their old discs. To further preclude such an illegal "gray" market, subscribers will be requested to return old discs before new update discs will be sent, but the arrangement will be such to ensure that subscribers are never without the last disc. For example, after subscribers have received their first two discs, they will be asked to return disc #1 before disc #3 will be shipped, to return disc #2 before disc #4 will be shipped, and so on.

Archival
Discs

After the "current" disc subscription process is up and running during the first year, SilverPlatter/ORI will proceed to prepare archival discs for the ERIC backfile. This will require two discs for RIE (1966-1975, 1976-1982) and one disc for CIJE (1969-1982). These will be offered for sale as one-time purchases and will not require updating. Subscribers to the current disc will be offered a discount on the archival discs.

Subscription
Price

The ERIC subscription price is \$2,995 per year for the current discs. There is currently a 25% discount for subscriptions to multiple SilverPlatter databases beyond the first one ordered.

Equipment

An IBM-PC microcomputer (or compatible equipment) with a minimum of 256K of memory is needed in order to run the SilverPlatter retrieval software. Additional memory, e.g., 512K, substantially improves response time and is highly recommended. A printer is useful for output purposes. Subscribers are expected to make their own local arrangements for obtaining the necessary microcomputer and (optional) printer.

SilverPlatter will sell or lease to subscribers (on lease-purchase basis) a CD-ROM data disc drive. The initial price is \$1,295 to purchase or \$700/year for a two-year lease-purchase arrangement. Equipment price reductions from manufacturers will be announced to customers as they occur. A separate maintenance agreement for the disc is available. Purchase or lease of a drive includes the microcomputer interface board and the connecting cable.

Indexes

Each disc contains a defined set of ERIC records and the inverted file indexes to those same records. The inverted file indexes are based on the controlled vocabulary fields (e.g., Descriptors and Identifiers), the natural text fields (e.g., Title, Abstract), and certain other numeric, alphanumeric, and coded fields. Virtually every ERIC data field is indexed and accessible via the SilverPlatter retrieval system.

3547

Retrieval
System

The retrieval system is a proprietary system developed by SilverPlatter during the last two years. It is designed especially for the CD-ROM environment. The system provides searchers with as complete a set of capabilities as can be provided on microcomputers. It offers both straight Boolean operators (AND, OR, NOT) and natural text operators (adjacency, in same sentence, in same field). Searchers are able to specify the fields in which the terms searched must appear. As improvements are made in the retrieval software, subscribers will automatically be sent the improved versions.

HELP

Context-sensitive HELP is available to all searchers. This aspect of the system will be constantly evolving as feedback is received from users. New releases of the retrieval software will incorporate such tutorial improvements.

Support

SilverPlatter will provide troubleshooting and support through a toll-free 800 number.

Documentation

Subscribers will receive documentation on the SilverPlatter retrieval software and on the ERIC database. Even though the system is designed to be used with very little advance training and will contain considerable built-in HELP information, the documentation will permit the searchers inclined to study it to increase their searching skills considerably.

Demonstration

The SilverPlatter/ORI system will be demonstrated for prospective subscribers at the offices of either organization (see addresses on attached flyer) and at exhibits at various professional association conferences during 1986, e.g., ACRL, SLA, ALA, National Online, etc. (See list of conferences attached).

* * * * *

1986 has been called the "year of the compact disc". We anticipate that during the year ahead you will see many CD-ROM products offered to you. SilverPlatter and ORI are working diligently to ensure that our ERIC CD-ROM product will measure up to the needs of the users. We think you will be pleased with the results and we look forward to serving you.

Information on a SilverPlatter CD-ROM

A multitude of databases on SilverPlatter compact discs (CD-ROM) in your library at a fixed cost.

Now, subscribe to:

PsycLIT

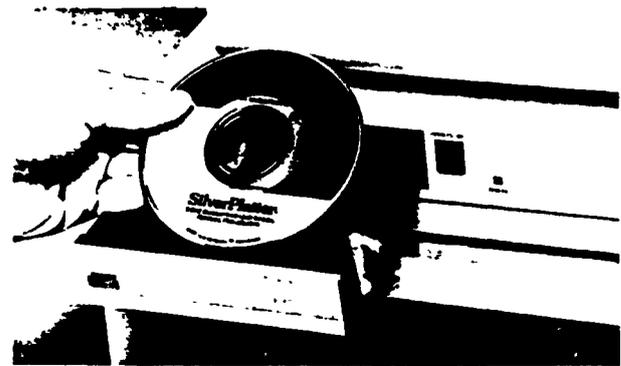

Information on psychology and behavioral sciences from the PsycINFO department of the American Psychological Association. Current disc covers 1981 to the present and is updated quarterly.

ERIC

Bibliographic database sponsored by the U.S. Department of Education, consisting of Resources in Education (RIE) file and the Current Index to Journals in Education (CIJE) file as prepared by the Information Systems Unit of ORI. Current disc covers 1983 to the present and is updated quarterly.

EMBASE

Summaries of the world literature in biomedicine and related disciplines produced by Elsevier Scientific Publishers. Annual discs from 1983 to present with quarterly updates.

AV ONLINE

Database of audiovisual materials from the National Information Center for Educational Media (NICEM). Covers the complete database through March 1986. Updated annually.

PAIS

Primary reference database for the public policy aspects of the social sciences, business, law and economics produced by Public Affairs Information Service. Covers the complete database to present. Pricing and updating to be announced.

SilverPlatter order form

Yearly subscription prices

- PsycLIT \$4,995
- ERIC \$2,995
- EMBASE \$9,995 (1984-1986)
\$12,400 (1983-1986)
- AV ONLINE \$795
- PAIS Please send me pricing when available.
- Compact disc drive \$700/year with a two year subscription (includes one year maintenance)
Two year lease/purchase \$1,295

What you need

Only an IBM PC, an XT or an AT with 512K memory (or IBM compatible). And, use an existing printer to output hardcopy of database information.

What you get with your SilverPlatter Subscription

- Powerful, user-friendly, SilverPlatter information retrieval software on a floppy disc
- Compact Disc (CD-ROM) with all the necessary information for the selected database
- On-line help screens for both the retrieval software and the database to be searched
- Comprehensive documentation for the first-time user as well as the experienced searcher
- Toll-free telephone support
- New releases and updates of the retrieval software
- A CD-ROM disc drive either included as an option in the subscription price or purchased as a separate item

ERIC on SilverPlatter

The Educational Resources Information Center (ERIC) database is the national U.S. bibliographic database covering the literature of education. One of the most widely searched databases in the world, it is now available on SilverPlatter Compact Discs. It is comprised of two separate files: (1) Resources in Education (RIE), handling the document and report "fugitive" literature, and (2) Current Index to Journals in Education (CIJE), handling the published journal article literature, as contained in over 775 major education-related serials/periodicals.

ERIC on SilverPlatter compact disc

Available to the public for years on magnetic tape and online, ERIC is now available in an exciting new high-tech format—compact digital disc, or CD-ROM, from SilverPlatter.

The entire ERIC database is provided on SilverPlatter CD-ROM discs, with indexes to access ERIC records and powerful and flexible search software. SilverPlatter offers the ERIC database for the first time in a totally local, self-contained, fixed cost system under your direct control without connect or communication costs.

The ERIC database is available on one or more archival discs that do not require updating (for example, 1966-1975 and 1975-1982). Data from 1983 to the current year is contained on a separate disc and is updated on a quarterly basis. Each disc is totally independent, containing all the records, indexes and software necessary for full use. The RIE and CIJE retrospective files are on separate discs while the current disc contains both RIE and CIJE records.

Searching ERIC on SilverPlatter compact disc

SilverPlatter's powerful and flexible search software is incorporated into ERIC's records on a compact disc. The user can perform all the search tasks available through the printed reference tools and most of the search tasks now possible on the major online systems without the connection and communication costs. For example, the user can:

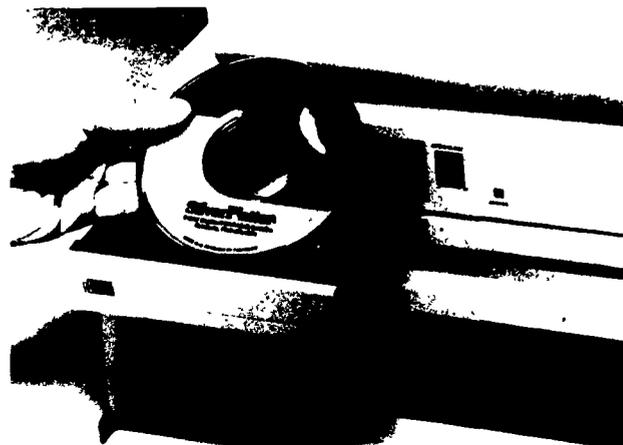

- SEARCH both subject matter fields (descriptors, identifiers, words in title, words in abstract) and non-subject matter fields (author names, institution names, publication type, language, geographic source, target audience, etc.).
- BROWSE the dictionary of available index terms.
- SPECIFY output requirements using Boolean operators: AND, OR, and NOT.
- INTERACT to adjust your requirements based on initial outputs at your workstation.

Additional SilverPlatter™ Searching Features

- Truncation capability, allows you to search all words with a common base prefix.
- Proximity searching, permits you to specify that certain words must be adjacent or near one another in the field searched.
- Context sensitive HELP information is contained on each disc to permit even first-time users to effectively conduct their own searches.

Subscribing to ERIC on SilverPlatter compact disc

- Everything you need is provided with a single subscription. It operates on your IBM personal computer with a compact disc drive that can be purchased from SilverPlatter. The subscription includes: compact discs (containing database, indexes and search software), documentation, and telephone Hotline support.
- Your costs are fixed and fully identified up front. The ERIC database on SilverPlatter compact disc provides unlimited access within your predefined budget.
- A number of different SilverPlatter database subscriptions can be supported on the same workstation.

For complete information about ERIC on SilverPlatter, contact:

Wellesley Hills, MA 02181
617-239-0306

SilverPlatter is a trademark and service mark of SilverPlatter, N.V.

The CD-ROM Services of SilverPlatter^(tm) Information, Inc.

Robert J. Allen

The SilverPlatter system is a complete, stand-alone system, consisting of an IBM (or compatible) personal computer, a CD-ROM drive, software, and one or more databases. The search and retrieval software is logical, powerful, and simple. Very large databases, such as ERIC and PsycLIT, will soon be available on the system for "local" installation in schools, libraries, and (even) psychiatrists' offices.

SilverPlatterTM Information, Inc., provides access to information databases in a convenient, readily available form. Information is provided on a fixed-cost basis that allows users to have unlimited, interactive access in their local environment—without per-hour connect charges from the online vendors and without charges for telephone connect time.

As the cost of computer memory has decreased, computer power has increased. Outwardly simple, but inwardly sophisticated, software programs have become user-friendly. For example, communications in a natural language (similar to "plain" English) can be supported. The SilverPlatter system has harnessed the remarkable storage capability of the optical digital disc to the personal computer's high performance and wide availability.

Ease of use is a design priority in the SilverPlatter system. The search software is user-friendly and there is virtually unlimited space on the disc for "help" information. Persons who are already familiar with the procedure of making an online search using such sources as DIALOG, BRS, and SDC will be comfortable with the SilverPlatter command structure. Those without prior experience will also be able to conduct effective searches, thanks to the extensive "help" information that is built into each compact disc database. For example, the "map" information provided on each disc allows the publishers to tell first-time users what they need to know about the database structure in order to conduct a productive search. This information also helps users achieve greater sophistication in developing search techniques. The SilverPlatter map, described in more detail below, consists of a main map that provides an introduction to and explanation of the

Allen is President of Robert Allen Associates, Inc., 49 Lexington St., Newton, MA.

database. Sub-level screens provide more detailed information about specific characteristics of the database.

Another feature of the SilverPlatter system is the tutorial database that will be incorporated into future releases. Complementing the database-specific information contained in the database map, this tutorial will utilize a sample database to show users, step-by-step, how to conduct searches with the SilverPlatter system. As a service to subscribers, SilverPlatter Information, Inc., will provide this tutorial on every SilverPlatter disc.

The SilverPlatter/CD-ROM Approach

SilverPlatter Information provides a variety of databases on compact optical discs with read-only memory (CD-ROM). It also provides the hardware and software that allow these databases to be used in a local environment.

The SilverPlatter system is a complete, stand-alone system. It consists of an IBM or IBM-compatible personal computer; a compact disc drive, one or more SilverPlatter compact digital discs containing fully-indexed databases; and the SilverPlatter search and retrieval software. (See Figure 1.)

SilverPlatter Information, Inc. has resolved to provide the new capability within the framework of a standardized system; that is, one which eliminates concern with changes in technology and hardware/software compatibility. Since it makes use of the CD-ROM (which is an internationally supported hardware standard already adopted by more than 40 manufacturers), SilverPlatter discs can be used on many machines. Any number of SilverPlatter databases can be supported on a single SilverPlatter

Figure 1: The SilverPlatter system, consisting of a microcomputer, laserdisc drive, software and data-base(s).

workstation. (SilverPlatter Information has submitted a proposal for the "Layout of Databases on CD-ROM" to the National Information Standards Organization [NISO]. A NISO subcommittee is currently working to develop this standard.)

"... the CD-ROM... is an internationally supported hardware standard already adopted by more than 40 manufacturers...."

CD-ROM is a perfect vehicle for carrying information to users. To the millions of people who use audio laser discs, the word "compact" in "compact disc" refers to the disc's size (since the amount of program material contained on the disc is not dramatically more than on conventional LPs). But with the *digital data* version of these laser discs, "compact" has considerably more meaning. In the 4¼ inch compact disc format almost 600 megabytes of digital information can be stored (the equivalent of approximately 200,000 pages of printed material). Optical discs are much more reliable than floppy discs, this makes them attractive to both database publishers and their users.

SilverPlatter also provides a mechanism for gathering information on the usage of the databases - information of value to both database publishers and user organizations. Such information is not normally available in online sources such as BRS and DIALOG.

The "Map" Function

The map information on SilverPlatter discs is designed by the database publisher. It consists of the following screens:

- An *introduction* screen, with a general description of the database, its contents, and application, and an overview of other information available through remaining map options. (See Figure 2)
- A *vocabulary* screen, which contains information on the overall terminology for the database and on paragraph-specific vocabulary, such as the structure of reference numbers, and the database thesaurus.
- A *fields* screen, which contains sample contents and a list of the database paragraphs. The fields screen also indicates which are non-searchable.
- A *noisewords* screen, which lists the non-indexed stop-words such as "an," "the," etc.
- An *examples* screen, which provides sample searches together with useful hints and tips.

Generally, each record in a database consists of a number of data fields (such as the name of the author). The identifying taps these fields have in the CD-ROM system (such as AUTH for name of author) are listed in the map. As users gain experience

with the structure of the database, they become familiar with all the fields listed in the map and become much more adept at making selective searches, (by field or material type) relevant to their specific search needs.

Conducting a search is not complex. The user controls the system with a small number of straightforward commands (FIND, SHOW, GLOSSARY, PRINT, and so on) and the powerful HELP command, which can be called at any time. HELP is a context-sensitive command; that is, it responds with assistance specifically related to where the user is in her or his dialogue with the database.

"Conducting a search is not complex."

A logical sequence of steps comprise the search. The initial selection of a database is followed by a series of interactive search and display steps. These continue until the user retrieves sufficient references or wishes to terminate the session. The session may be terminated by switching off the computer, search-

ing a new database, or replacing the disc. The basic components of the system are reviewed below.

SilverPlatter Searching

The following operations are among those the SilverPlatter search software allows users to perform. A user can:

- Search quickly and efficiently through large databases using either free-text or appropriate field qualifiers. Fully indexed databases let users find any word without having to learn or remember special vocabulary "key words." Searchers can look for specific phrases just as they would appear in the text. They can also scan a dictionary of all the words in the database (accessed via the GLOSSARY command).
- Expand a search, by looking for a family of words that begin in the same way (truncation) or by specifying alternative terms (using the OR parameter) and retrieving text containing any of the terms.
- Narrow a search to pinpoint desired information (by using the AND parameter) and eliminate un-

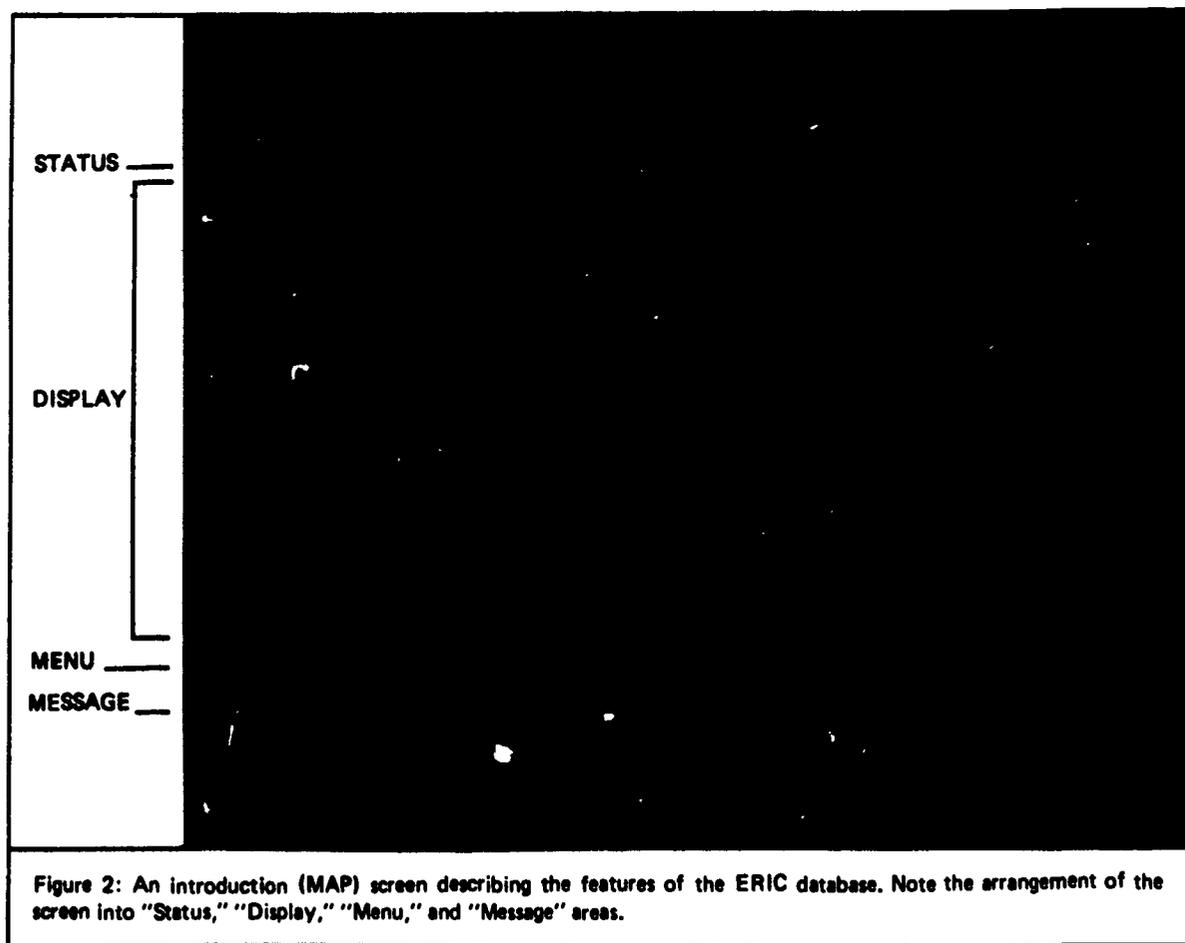

Figure 2: An introduction (MAP) screen describing the features of the ERIC database. Note the arrangement of the screen into "Status," "Display," "Menu," and "Message" areas.

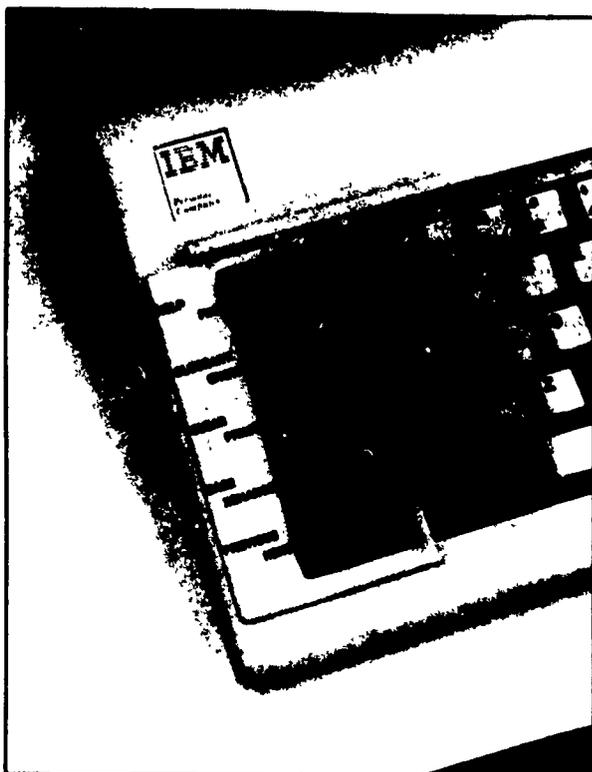

Figure 3: Definition of function keys when used with SilverPlatter.

wanted information (with the NOT parameter). Another means of limiting retrieval is by specifying various degrees of proximity. For example, AND will retrieve a record containing both words anywhere within the record. WITH locates all words in the same section or paragraph of the same record. The NEAR parameter will find words in the same sentence or subfield in a record, and ADJACENT will retrieve those words that are literally next to

"In an interactive "environment," users can adjust their search based on an initial results."

a specified search word. One may even specify "NEAR n"; n indicates that the linked elements must occur within the same sentence and within n words of one another.

- Display the information with the option of seeing any or all of the search results. The information can be read in continuous form or specific fields can be presented for display. Search terms are highlighted in the retrieved text.

In an interactive "environment," users can adjust their search based on the initial results. If the information is too voluminous (as indicated by the number in the "items" column) or too peripheral (as may be determined by reviewing highlighted

search terms in retrieved records), a refined search can be implemented using a more sophisticated combination of the search parameters. (See the section below on SHOW.) For example, a law student could narrow a search by specifying with logical operators only those legal cases dealing with "(Firearms) AND (Alcohol OR Drugs)." Searches can also be narrowed with use of such parameters as language, a range of dates, types of material (such as articles or monographs) and virtually any other category of information provided in the database.

A System Overview

Users interact with five basic types of screen, moving easily between them as necessary. Each screen has

- A *status* area (line 1) with the name of the service ("SilverPlatter"), the version of the software being used, the title of the currently selected database (such as ERIC), and, when displaying documents, the number of the current document.
- A *display* area (lines 2 through 22), the contents of which depend on where the user is in his or her dialogue with the database.
- A *menu* area that displays the commands currently available to the user. When a command that requires parameters has already been selected, this area will be used for parameter selection.
- A *message* area that is used for all prompts and error messages. A distinction is made between "user messages" (that is, prompts, warnings, and messages resulting from invalid user input) and "system error messages" (which are caused by the workstation hardware, software malfunction, a faulty disc, or invalid information on a disc).

There are two modes of command selection: screen oriented and function-key oriented. In the first, users peruse the commands, and activate the one they want with the ENTER key. As an alternative, they can type the first letter of the desired command (F= FIND). In the second mode, special function keys are used to select commands. Frequently used commands are normally performed via the function keys. (See Figure 3.)

SilverPlatter presents five basic screens:

1. The *Database Selection screen* shows the name and version of the database in use and lists the databases on the currently loaded disc. (Each disc lists a minimum of two databases—the main information database itself and a tutorial database.) In this opening screen there is a limited entry menu that offers the commands HELP, BASE (for selecting a new database), XCHANGE (for inserting a new disc), and ADMIN (for administrative functions).

2. The *Search screen* shows responses to FIND commands. Each response consists of a parameter and the number of documents indexed by that para-

meter. The parameter entered by the searcher is displayed to show exactly how it has been interpreted by the SilverPlatter system. As responses to the FIND commands are added and the display area is filled, older responses are automatically scrolled up and off the screen. They can be recalled with the PAGE UP key. The SilverPlatter system stores the results of up to 99 searches.

3. The *Display screen*, which can be more than a page long, displays the text of retrieved documents. To facilitate scanning the information, the system highlights the search words in boldface. It shows the number of the displayed document and the total number of documents retrieved (for example, "Item 1 of 12" shown on the status line).

4. The *Dictionary screen*, called via the GLOSSARY command, displays the contents of the dictionary in the alphabetical area of the word specified. This screen starts with the specified word, which is followed by subsequent entries in alphabetical order. Each entry consists of a *word*, the *number of occurrences* of that word in the database, and the *number of database documents* containing that entry. If the word sought is not in the database, the place where

it would have been in the glossary is displayed. This feature enables users to browse and become familiar with thesaurus terms and general database vocabulary. It also provides a handy means for checking spelling by merely typing in the first few letters or root of a word. (See Figure 4.)

The *information screens* use the same frame as all other screens and include a database entry screen, a database map screen, and help screens.

The database entry screen describes the contents of the database selected and includes copyright information.

The database-specific map screen explains the structure of the current database as well as the format and purpose of each data field. (See Figure 2.)

There are two types of help screens—command-specific help and general help. There is a command-specific help screen for every available top-level command except for HELP, PAGE UP, PAGE DOWN, NEXT, PREVIOUS, and RESUME.

Six general help screens constitute an important part of the user documentation.

a. The *introduction* screen explains how to use the HELP system, provides an introduction to com-

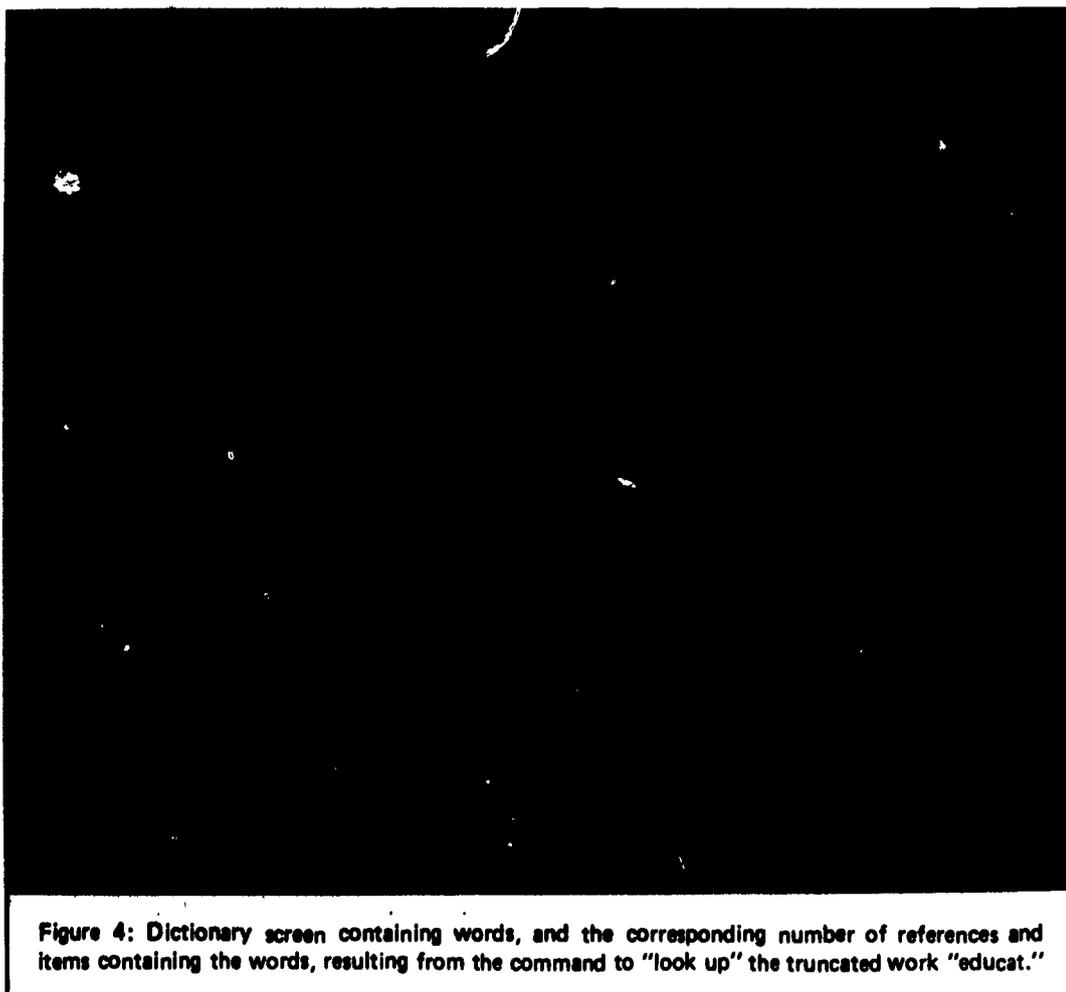

Figure 4: Dictionary screen containing words, and the corresponding number of references and items containing the words, resulting from the command to "look up" the truncated work "educat."

mand selection, and gives an outline of the other general help screens available.

b. The *commands* screen introduces the concept of a command, describes the commands available ("if you want to search a database, use the FIND command"), and refers the user to the parameters screen.

c. The *parameters* screen explains the concept of a parameter and describes how to identify default values, override default values, and move from parameter to parameter.

d. The *databases* screen describes the basic structure of a database at a general level and refers to the database map screen as a source of information about the current database.

e. The *discs* screen explains the handling and use of compact (CD-ROM) discs.

f. The *keyboard* screen reviews the use of the keyboard.

Commands

Commands available at any time are usually displayed in the commands (menu) area. If not, they can be called up by pressing the ESCAPE

"Upon selection, the command is either implemented immediately or the system asks for the input of specific additional parameters"

key. Most commands are selected by pressing the labeled function keys: HELP, FIND, SHOW, PRINT, BASE, XCHANGE, CLEAR, GLOSSARY, PREVIOUS and NEXT. Upon selection, the command is either implemented immediately or the system asks for the input of specific additional parameters:

- **HELP** gives access to information on how to proceed.
- **FIND** searches a database.
- **SHOW** displays retrieved documents
- **PRINT** prints retrieved documents.
- **BASE** selects a new database.
- **XCHANGE** signals that a new compact disc is to be inserted.
- **CLEAR** clears the system of stored details concerning previous search requests that are no longer needed. This command can clear all or selected searches.
- **GLOSSARY** displays a selected word and alphabetically adjacent words.
- **OPTIONS** sets display and other options.
- **MAP** shows information about the structure of the database in use, including information about the format and purpose of each data field.
- **ADMIN** allows the user to gain access to ad-

ministrative facilities.

Detailed information on any command's parameter is obtained by selecting the command and then pressing HELP.

A Closer Look at the Search Procedure

A search consists of manipulating the basic FIND and SHOW commands to search and retrieve selected information. Explanations of how these basic commands function are given below.

FIND Command

Moving from the database entry screen into the search screen merely involves hitting the ENTER key, after which the FIND command is automatically selected. The commands area will then prompt users to type in the word or string to be searched. (See Figure 5.) As searches are conducted, the system automatically assigns sequential statement or set numbers to them. These set numbers can be used in combination with each other or with a new string to define subsequent searches. For example, if searches have resulted in the following:

- | | |
|----------------|------------|
| 1. Alcohol | 26 [items] |
| 2. Child abuse | 38 [items] |

all items containing both "Alcohol" and "Abuse" can be retrieved by typing the set numbers "1 and 2" instead of retyping "Alcohol" and "Abuse." (See Figure 6.) When a search is looking for numbers as text in the database, the numbers are typed with quotation marks (for example, "2") to distinguish them from set numbers.

"The logical (or Boolean) operators—AND, OR—are used to achieve selectivity in the search."

Operators can review the database vocabulary with the glossary command and the structure of the database with the map command as often as necessary during the find or search phase.

The logical (or Boolean) operators—AND, OR—are used to achieve selectivity in the search. When the system is told to look for all items containing word A AND word B, it will retrieve only those items containing *both* words.

When the system is told to look for all items containing word A OR word B, it will retrieve items containing just word A, just word B, or both word A and word B. Obviously the OR command is a functional way to round up synonyms such as cow, calf, bull, cattle.

Using the proximity operators—WITH and NEAR—is another way to qualify a search. To find a word in the same paragraph or data field as another specific word, type "Juvenile WITH Authority." The search

Figure 5: SilverPlatter searches can incorporate Boolean operators such as AND and OR, and proximity concepts such as NEAR. Priority search relationships are indicated by parenthesis.

Figure 6: Search screen showing the number of items retrieved in preliminary searches and in a "combined" search.

will retrieve only those records that contain both words in the same data field (section) of the same record. To find words in the same sentence or sub-field of the same record, specify "Juvenile NEAR Authority."

Interpreting Search Strings

Search strings are interpreted by the system from left to right. Therefore, the ambiguous specification "ALCOHOL and DRUGS or ABUSE," for example, is seen as "(ALCOHOL and DRUGS) or ABUSE." This, of course, is logically not the same as "ALCOHOL and (DRUGS or ABUSE)." When displaying any string, the SilverPlatter system inserts the parentheses in order to verify precisely how the search string has been interpreted. Regardless of what combination of upper and lower case was entered, the system will display the words to be searched in upper case and the logical operators in lower case, for easy distinction.

When an operator's error prevents the system from interpreting a string, a message at the bottom of the screen advises the user. While more sophisticated searchers can use nesting, logical operators, and other parameters very effectively, novice users can

keep searches short and simple.

When a sufficient number of records has been retrieved, the records can be displayed with the SHOW command.

SHOW Command

The SHOW command is exceptionally versatile; it lets users separate the wheat from the chaff. In response to the SHOW command, the system displays items retrieved for the last search. The "commands-area" now prompts for the records and fields of data that the user would like to view. Specifically, the parameters and defaults are:

<u>Parameter</u>	<u>Default</u>
Sections (Fields)	ALL
Items (Records)	ALL (See Figure 7.)

The user is not required to see every data field in the record. If the user types HITS or just "H", the system responds with only those fields containing the search words or terms (for example: DATE, DESC[ription]). This is particularly useful in allowing users to determine quickly the relevancy of retrieved documents and to evaluate the accuracy of their search strategy.

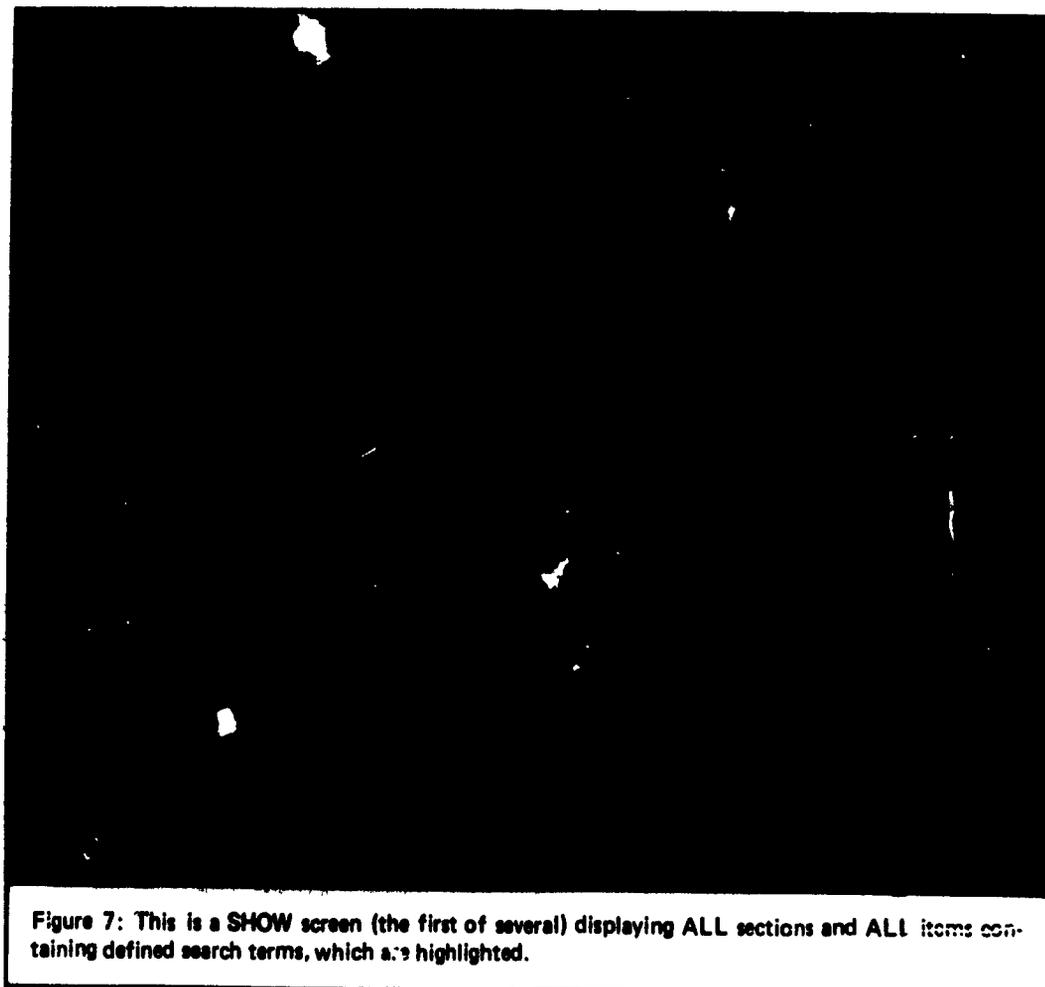

Figure 7: This is a SHOW screen (the first of several) displaying ALL sections and ALL items containing defined search terms, which are highlighted.

Users can specify those search items they wish to see by typing in the item numbers (for example, 7, 9, 12, 16, 24). In the same manner, users can specify a printout of the information that is essential to finding the desired documents (such as author or citation), as opposed to printing out the entire retrieved text. (See Figure 8.)

Pressing PAGE DOWN lets users browse through the complete text found in each record. The NEXT and PREVIOUS commands let them move forward or backward from record to record.

Summary

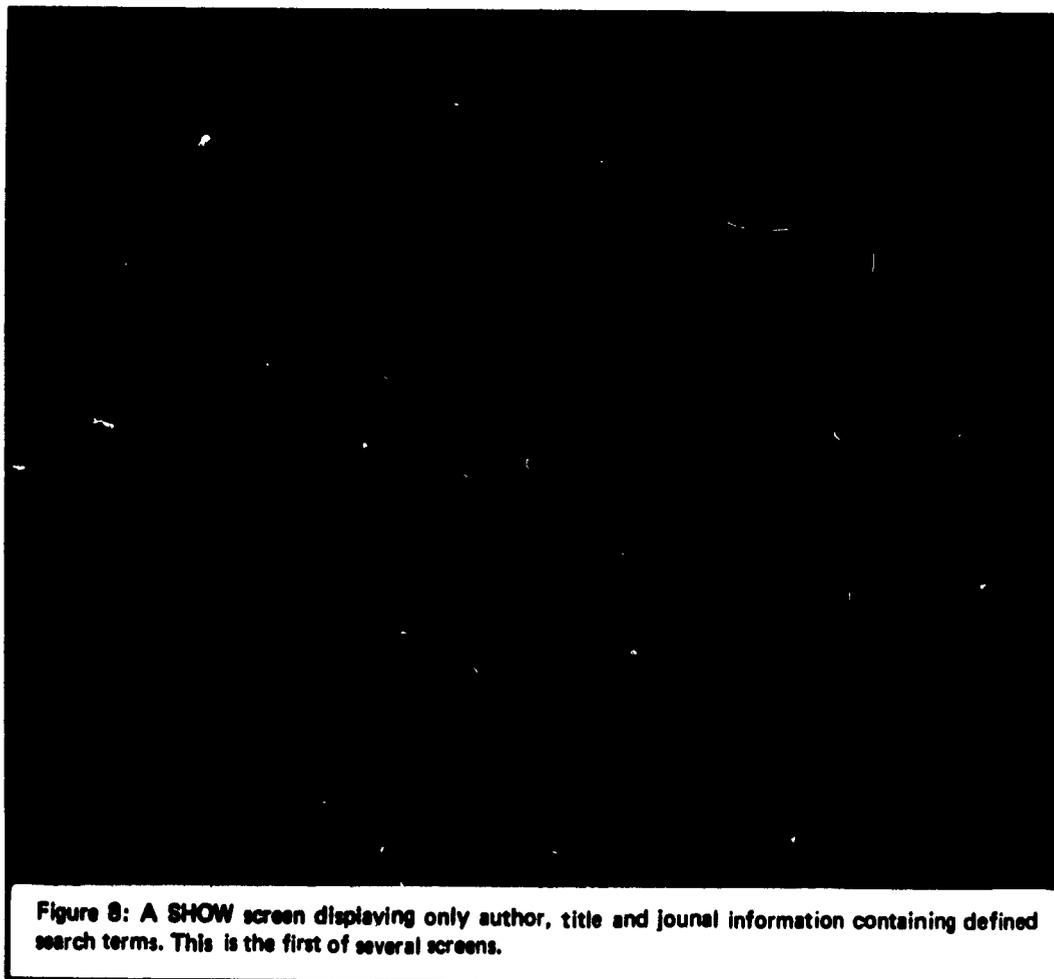

CD-ROM database systems (like those produced by SilverPlatter) place considerable search power into the hands of large numbers of end-users. This

"CD-ROM database systems... place considerable search power into the hands of large numbers of end-users."

is done in a way that provides not only simple access, but also the economic benefits of unlimited usage of the information, a fixed yearly subscription price, and no telephone connect charges. For information providers or database publishers, the system opens new markets, permits feedback and statistical information from users, and provides a system tailored specifically to the publisher's database.

SilverPlatter's compact disc-based systems has considerable advantages over other means of information access. As striking as these advantages may be, it is important to note that the capabilities described here represent only the first version of the software. Many new, enhanced features are being prepared by SilverPlatter for future software releases. These include the ability to store and use pre-defined search profiles and the ability to have logic indexes other than alphabetical ones.

SilverPlatter Information, Inc. is committed to insuring that the system is constantly responsive to the needs of its users. Among the programs planned to provide essential feedback are SilverPlatter user groups, which will also maintain a close relationship with database publishers.

3500

Sidebar 1: PsycINFO on CD-ROM

by Lots Granick

General

The collection and dissemination of information in the field of psychology is a major activity of the American Psychological Association (APA). As a membership organization of over 65,000 psychologists, the APA includes in its ranks most of the authors of original research in psychology, as well as most of the educators and administrators involved with students of psychology. *Psychological Abstracts*, a monthly publication of summaries of the world's literature in psychology and related disciplines, was established by the APA in 1927. The APA publishing program, which includes 18 primary journals and numerous books, dates from the 1890s.

In the intervening years of information collection and dissemination, the APA has remained attentive to changes in the needs of its readership and to the emerging technologies for meeting them. CD-ROM, simply as a new technology, would not necessarily involve the APA in its use. It appears, however, to offer solutions to some problems psychologists have in searching for information.

Background

The American Psychological Association's PsycINFO department produces *Psychological Abstracts*, *The Thesaurus of Psychological Index Terms*, and several other publications, in addition to the PsycINFO and PsycALERT databases. The department's involvement with the online dissemination of databases began in 1970. For most of the years since 1970, and increasingly in the last eight or ten, the flow of the database users regarding the various computer systems that make the databases available has been actively sought. While all the databases have been accessed well, many requests for change simply cannot be accommodated, because these requests require the very nature and structure of online databases.

In 1982 and 1983, the department began to hear the first rumblings of dissatisfaction from the academic and institutional libraries. The dissatisfaction was due to the increasing cost of the databases, the fact that mediated work was not available, and the fact that the initial-day after the databases were installed new manuals, new educational materials, and workbooks, and lower demand than expected had the goal of permitting end-users to search and retrieve information.

Granick is Director of PsycINFO, The American Psychological Association, 1400 R. Hill St., Arlington, VA 22201.

conjunction with other developments, specifically the increased number of requests for permission to download, PsycINFO reduced its connect hour royalty fee by 50 percent in 1983. Not all distributors passed the full 50 percent along to customers; nevertheless, the generally lower connect hour charge encouraged novice users to spend more time refining a search strategy. If these users refrained from displaying the full text of retrieved abstracts, the lower fee resulted in reduced costs for libraries.

The rising expectations of users has contributed to another evolution in need. User-friendly front-end systems began to appear and are helping to ease the problem for many users.

An increasing number of professionals and students (in psychology) are joining the ranks of end-users of online information. They know the vocabulary, and frequently are familiar with many of the actual references they want to retrieve. In the opinion of the PsycINFO staff, the general library patron and the specialist in psychology can best be served by a new technology—CD-ROM—and new retrieval software that require no extended training for effective use.

PsycLIT

The PsycLIT database, which is to be made available to end-users through CD-ROM technology (Silver-Platter); is a new compilation of all journal literature (the actual articles cited in the PsycINFO database and *Psychological Abstracts* since 1974). The serial publications incorporated into PsycLIT represent the source documents that are most widely available to students. The serial publications include those that are the primary, first publication outlets for research in psychology and publications that account for about 75 percent of the material covered in PsycINFO. Initially, including over 300,000 articles, the file will grow by about 20,000 articles per year. These additions will be available to end-users.

With the addition of online instruction and help materials, individuals can use the database to search and retrieve information. Searching can be done by keyword, by author, by title, by page of a book. It can also be done by a full-text sweep of the database. The database will provide a number of access points at all levels of the database. End-users will find in it the same information that is available in the printed form, but with the added benefit of telecommunications technology that is placing demands on a

Slide 2: ERIC on CD-ROM

by Ted Brandhorst

General

"ERIC" stands for the Educational Resources Information Center, an information system sponsored by the National Institute of Education (NIE) within the United States Department of Education.

ERIC was founded in 1963 in order to achieve bibliographic control over the educational English language, "fugitive" literature, research, and technical education, and to disseminate information and studies by educational institutions, organizations of projects and individuals, government agencies, instructional materials centers, etc. The literature is called "fugitive" because it is not controlled by conventional library systems. In 1968, journal articles began to be included in ERIC.

ERIC provides ready access to these segments of the literature on education. It does this through a variety of products and services, such as databases, abstract/announcement journals, periodicals, computer searches, online databases, document reproductions, and analyses and synthesis. The two principal ERIC publications are the monthly abstract journals *Resources in Education* (RIE) and *Current Index to Journals in Education* (CIJE), covering journal articles. ERIC also publishes the premier vocabulary of education, the *Thesaurus of ERIC Descriptors*.

ERIC's objective is to disseminate its bibliographic data as widely as possible throughout the educational community, (policy makers, researchers, administrators, teachers, counselors, and librarians) at the lowest possible cost to the consumer. Distribution via compact laser disc (CD-ROM) is the latest in a wide variety of strategies that ERIC has used over the years.

Organization

ERIC consists of a central government office that establishes policy, and funds and monitors the entire system; 16 subject-specific "clearinghouses" that collect the literature and produce information products; a central editorial and computer facility that maintains the database and prepares *Resources in Education* (RIE) and other products; a central "Document Reproduction Service" that prepares microfiche and document reproductions; and a commercial publisher that produces *Current Index to Journals in Education* (CIJE), the ERIC *Thesaurus*, and other publications.

Document Delivery

ERIC is notable among information systems in that it provides or tells you how to get reproductions of the documents and journals mentioned in its

Brandhorst is Director, ERIC Publishing & Reference Facility, 4832 Rugby Ave., Suite 301, Bethesda, MD 20814-3073.

abstract journals. ERIC obtains permission from authors and producers to reproduce approximately 95 percent of the documents currently indexed in *Resources in Education* (RIE). This means that in a monthly issue listing 1,000 documents, about 950 are abstracted and made available to users on other microfilm or paper. Instructions for obtaining the small number of items ERIC cannot make available are given there. The *Document Delivery Service* (DDS) at the ERIC Facility, 4832 Rugby Ave., Bethesda, MD 20814.

It is more difficult to provide copies of the articles listed in *Current Index to Journals in Education* because of copyright restrictions. However, users can obtain these reproductions such as from Microfilm International (Article Express Service), 300 North Zeeb Rd., Ann Arbor, MI 48106.

Computer Searching

The ERIC database (consisting of information from both abstract services—RIE and CIJE) is one of the most widely searched and heavily used bibliographic databases in the world today. Approximately 35 organizations all over the world purchase the ERIC tapes and provide computerized access to them. Via these primary sources, several hundred service centers that provide computer searches of ERIC to various places of users can be identified. The *Directory of ERIC Search Services*, a biennial compilation, attempts to identify those sources and to provide complete descriptions of each organization and its services. The last directory lists over 500 service points. It is estimated that over 250,000 computer searches are made of the ERIC file each year by other service centers.

The ERIC database can be searched either by computer via all three of the major vendors of online retrieval services: DIALOG Information Services, System Development Corporation (SDC), and Bibliographic Retrieval Services (BRS).

According to most surveys, the only bibliographic database in the United States that are used more frequently than ERIC are LEXIS, Chemical Abstracts, and MEDLINE. ERIC is used more than any other database in the social sciences.

The ERIC records are constructed so that users can use any of a wide variety of retrieval systems to identify the material one needs. Some of the ERIC data that can be searched are: periodicals titles, comparing instructions, publishing agency, document type, contract grant making, publishing date, publication type, language, document, geographic source, government level, target audience, and of course the indicators of subject content and quality level (descriptors, identifiers, and words in context).

SPECIAL ANNOUNCEMENT

ERIC DIGESTS ONLINE (EDO) A New Full Text Database

ERIC DIGESTS ONLINE (EDO), a full text database of short topical reports on education (called "Digests") from the 16 ERIC Clearinghouses, is now available on ED-LINE (an online information service for educators) via the online network known as The Source.

Users of EDO are able to access ERIC Digests through either menus or key words. A special feature permits users to comment on (or to read others' comments on) Digests in a field called "User Notespace."

Examples of titles in the new file are: "Full Day or Half Day Kindergarten?," "Qualities of Effective Writing Programs," "Dismissing Incompetent Tenured Teachers," and "Part-Time Faculty: Higher Education at a Crossroads." New Digests will be added to the EDO file on a monthly basis.

EDO is coordinated by project staff at the ERIC Clearinghouse on Elementary and Early Childhood Education, with the cooperation of the 15 other ERIC Clearinghouses.

Funding for EDO is provided by the Office of Educational Research and Improvement (OERI), U.S. Department of Education. Additional information and sample Digests may be obtained by writing to EDO Project, ERIC Clearinghouse on Elementary and Early Childhood Education, 805 W. Pennsylvania, Urbana, IL 61801 (217-333-1386).

For information on subscribing to The Source and ED-LINE, call ED-LINE at (703) 528-5840.

3565

MICROsearch for the IBM PC

The ERIC Clearinghouse on Information Resources has produced an IBM version of their product **ERIC MICROsearch**. The program is used to search the contents of specially prepared diskettes containing small subject-related segments of the ERIC database.

Equipment Required

ERIC MICROsearch will run on any of the IBM family of microcomputers (except the PC Jr.) and most fully compatibles. It requires 265K, IBM PC DOS, and either two disk drives or one drive and a fixed disk. A printer is useful, but not essential.

The Search Program

ERIC MICROsearch has been designed for use by those without training or experience in online searching. It uses a series of menus to guide the user through the process of a search. In addition to the manual, HELP can be accessed at any point in the search process by pressing a single key. Searching may be done on authors, on words in the title, and on descriptors (keywords taken from the THESAURUS of ERIC DESCRIPTORS) or Identifiers. It is possible to use three logical operators, AND, OR, and NOT, as well as right-hand truncation. To assist users in selecting search terms, an EXPAND command will display selected portions of any of the indexes.

Database Diskettes

Each database diskette contains between 300-450 bibliographic records in a particular subject area selected from *Resources in Education* (RIE) and *Current Index to Journals in Education* (CIJE). Each record includes Accession Number, Author, Title, Journal Citation, Descriptors, and Identifiers. (Abstracts have been omitted due to limited storage on the diskettes.) In addition to the files containing the bibliographic records, each database diskette contains the Basic Index (which consists of single words from the title, descriptor, and identifier fields), Author Index, and Descriptor Index.

Special Features

ERIC MICROsearch has several special features designed to assist in the search process. The RE-EXECUTE function permits the current search strategy to be automatically rerun on subsequent database diskettes without having to reenter the search terms. In addition, a routine has been provided that will allow database files to be combined on a fixed disk and new indexes generated. And finally, a STORE function will allow users to store the results of a search to an ASCII file to aid in the creation of bibliographies.

ERIC MICROsearch ORDER FORM

ERIC MICROsearch is available in two basic forms

The **DEMONSTRATION SET** serves to acquaint users with **ERIC MICROsearch** as well as to teach the concepts of online searching, computerized information retrieval, and search strategy. It contains

- Program Diskette
(Includes the search program plus programs to print the contents of the database diskettes)
- Database Diskette (Choices listed below)
- User Manual

• Please send **MICROsearch** demonstration sets at \$49.00 each. _____

Choose one database per set:

Educational Technology Library/Information Science

All users will need the level 2.0 program disk and a manual to search any of the database disks

INDIVIDUAL ITEMS may also be purchased separately.

• Please send Database disks at \$10.00 each. _____

Database disks

Educational Technology Library/Information Science

• Program disk (\$34.00 each) _____

• Manual (\$5.00) _____

POSTAGE AND HANDLING @ \$1.50 plus \$ 50 for each additional set _____

The ERIC Administrative Bulletin (EAB) is prepared by the ERIC Processing and Reference Facility on the basis of material submitted by all components of the ERIC system. EAB articles are reviewed and approved by Central ERIC before publication. The EAB is intended to be the "journal" of the ERIC system and a major means for the decentralized components of ERIC to communicate and interact with one another. The EAB is also a permanent record reflecting most of the major events in the life of the ERIC system (such as personnel changes, Standing Order Customer changes, etc.) and providing in printed form essential documents (such as ERIC policy and priority statements, Clearinghouse scope statement modifications, ERIC Processing Manual revisions, etc.) Submissions to the EAB are to be sent (using the standard form) to your respective monitor. The deadline for input to each monthly issue is the 10th of the month.

3585

ACQUISITIONS ADVISORIES

ERIC Logo Requires Circled "R"

The ERIC Logo  is a registered trademark. This means that the logo was registered with the United States Patent Office; such registration limits the logo's use to OERI and components of the ERIC system. The circled "R" that appears with the logo indicates such registration to the public; absence of such a symbol could lead to non-ERIC components using it on publications and giving the false impression that the documents are ERIC products.

Clearinghouses should note that the copies of the logo that they receive from the Facility for use in their publications contain this registration mark. In recent months some Clearinghouses have submitted for RIE processing IAPs without the "R". It has been added by the Facility to the copy going into the database. Clearinghouses are reminded that they should ensure that whenever the ERIC logo appears on any of their publications that the circled "R" also appears as well.

...Central ERIC

Harvard Education Letter Should be Added to Clearinghouse Mailing Lists

We would like to have the following person added to the mailing list of each ERIC Clearinghouse:

Ms. Helen J. Featherstone, Editor
The Harvard Education Letter
Harvard Graduate School of Education
Appian Way
Cambridge, Massachusetts 02138-3752

...Pat Coulter (ERIC)

EDRS Marketing Plan for ERIC

On June 24, 1986, EDRS announced via a mailing a new ERIC marketing plan. The EDRS offerings are detailed in a special brochure (Attachment 1A) and an accompanying letter (Attachment 1B) explains the distribution the brochure received.

...Vic Fortin (EDRS)

Scope of Interest Statements -- Should Be Carefully Observed in Both Selection and IAP Production in Order To Avoid Overlap With Other Clearinghouses

Lately, there has been concern voiced by some Clearinghouse, Facility, and CERIC personnel about the problem of scope overlap. It is vital for contractual and practical reasons for each Clearinghouse to maintain the integrity of its formal, contractually-stated scope of interest. While we all know there can be legitimate scope overlap on the part of incoming documents, this should be less so with ERIC-produced publications, such as Digests, IAPs, etc.

The Contracts and Grants Management Division of OERI has informed us that "spill over" of coverage or publishing efforts into other Clearinghouses' topical areas is potentially a serious contractual problem and in extreme cases could be subject to disallowal of costs after audit.

Maintaining the integrity of Clearinghouse scope statements has practical ramifications in, for example, the new offering by EDRS of microfiche packages grouped by Clearinghouse accession number. These packages could have their value seriously diminished if scope infringement were a common occurrence. Please make sure that Clearinghouse personnel are aware of your Clearinghouse's formal scope of interest statement and that they observe it both in the selection process and in the information analysis product process.

...Kevin Arundel (CERIC)

NETWORK NEWS

Thesaurus of ERIC Descriptors (11th Edition, 1986)

The Oryx Press has printed a flyer advertising the new Thesaurus edition that will be rolling off the presses later this year. The price is pegged at \$65. A copy of the flyer is reproduced as Attachment 2.

...Jim Houston (ERIC Facility)

BRS Inadvertently Drops Large RIE Records

The ERIC Facility recently discovered that BRS was inadvertently dropping RIE records that exceeded certain size limitations. This fact was called to their attention in a letter dated May 9, 1986. This letter and BRS's reply are reproduced as Attachment 3. The two 1986 deletions have been corrected. The three 1984 deletions and seven 1985 deletions will not be corrected until some future reload.

...Pat Brown (ERIC Facility)

3587

Writing Abstracts for ERIC-Text Searching

An article on this subject by Raya Fidel appeared in the March 1986 issue of the Journal of Documentation (v42,n1,p11-21) and was called to our attention by IR.

123 database producers were examined. 57 (46%) had instructions pertaining to how to write abstracts to enhance retrieval based on the full text of abstracts. The following were some of the major kinds of advice given:

- Complement descriptors (controlled vocabulary terms) with terms in abstracts (i.e. use synonyms, author language, or more specific terms in abstract)
- Use specific and well-accepted terminology for particular categories of information (e.g. materials, processes, products)
- Do not use the negative (e.g. use "sick" instead of "not healthy").
- Do not list terms that have a common last word in such a fashion that the common word must be assumed (e.g. don't say "upper, middle, and working class")
- Always spell out terms. Do not use abbreviations unless you express terms in both their abbreviated and complete forms.
- When a term in the abstract and a controlled Descriptor are essentially the same, record the term in the form used by the Descriptor (i.e., don't create minor and inconsequential variations among terms)
- Use in the abstract any terminology that would be useful as indexing, but that would not be picked up by the controlled vocabulary or other indexing fields, e.g., geographic names, product names, etc.

It seems clear that ERIC could use such advice written into the "Abstracting" section of the ERIC Processing Manual. The concurrence of the ERIC Steering Committee will be sought to accomplish this.

...Ted Branchorst (ERIC Facility)

3383

NASA's Data Field: "Country of Intellectual Origin" (CI)

The NASA database has a data element or field called "Country of Intellectual Origin" that corresponds in intent to ERIC's field "Geographic Source". It is sometimes interesting to compare the way other databases handle particular retrieval needs in order to determine whether your own design was good. For example, the two fields vary in the way each solved the fact that "United States" was a predominating element. NASA left out explicit mention of the "United States", thus requiring that a complicated exception procedure be followed during retrieval. ERIC opted to make it easier on the searcher by explicitly inserting "U.S." in applicable records.

A description of this relatively new NASA field appeared in the May 1986 STI-RECON Bulletin and Tech Info News (p.2) and is provided here as Attachment 4.

...Pat Brown (ERIC Facility)

ERIC Digests Online (EDO)

The Clearinghouse on Elementary and Early Childhood Education (ERIC/PE) has developed a handout for use in keeping users informed of the ERIC Digests Online (EDO) project. For your convenience, the handout is reproduced as Attachment 5.

...Joanna Eustace (ERIC Facility)

ERIC/CS Contract Awarded to National Council of Teachers of English (NCTE)

The National Council of Teachers of English (NCTE) in Urbana, Illinois, has been awarded a new two year contract for the continued operation of the ERIC Clearinghouse on Reading and Communication Skills. Under the new contract, the former responsibilities of the ERIC/RCS Speech Module in Annandale, Virginia, will be incorporated within those of the main Clearinghouse at NCTE. Mr. Michael Spooner has been appointed Assistant Director/Speech Communication and Journalism.

...CERIC

HE Clearinghouse Represented at Ramapo College Presidential Inauguration

Jonathan Fife, representing both the ERIC Clearinghouse on Higher Education and the George Washington University, was an official delegate in the inaugural procession for Dr. Robert Scott, new president of Ramapo College of New Jersey. Dr. Scott is a member of HE's national advisory board and is a strong supporter of ERIC. He has been particularly effective in making ERIC more visible to state education agencies and college trustees.

ERIC Technical Steering Committee Membership Changes

Many thanks to Amelita Fill and Dorothy Beling, who are leaving the Steering Committee. Amelita's term has expired and Dorothy is leaving ERIC/EC. We will sorely miss their expertise, institutional memory, broad outlook, and wonderful sense of humor.

At the same time, we welcome our incoming new members: Jim Palmer of ERIC/JC (representing the Western region), and Margaret Mann of ERIC/SP (representing the Eastern region). We look forward to their contributions.

...Pat Coulter (CERIC)

EC Says Goodbye to Two Key Staff Members

Dorothy Beling, Associate Director for Data Base Building, and Lynn Smarte, Associate Director for User Services, recently resigned their positions with the EC Clearinghouse. Both decided to do new things--Lynn to try fulltime motherhood and Dorothy to explore different career horizons. Their many contributions have helped us build and conduct a quality service program for the field of exceptional child education. Dorothy has been with the Clearinghouse for 13 years and Lynn for 12 years. They will both be greatly missed.

In addition to their Clearinghouse responsibilities, Dorothy and Lynn contributed their talents to ERIC system-wide projects. Dorothy served on the ERIC Technical Steering Committee, the Technology Committee, and organized the Eastern Regional Technical Meeting in 1984. She also led sessions at many technical meetings. Lynn authored a "Do-It-Yourself" workshop booklet on how to use ERIC and a major brochure "How to Start an ERIC Collection." She too served on the ERIC Technical Steering Committee and led sessions at various technical meetings.

NEW ERIC/CS INFORMATION ANALYSIS PRODUCTS:

Class Size and English in the Secondary School, by William L. Smith, et al., 1986.

Examines the question of class size specifically from the point of view of available research as related to secondary English and language arts instruction. Available from the National Council of Teachers of English, \$6.00 nonmembers, \$5.00 members.

Language Across the Curriculum in the Elementary Grades, by Christopher Thaiss, 1986.

Describes the language across the curriculum approach to learning, in which talking, writing, listening, and reading play critical roles in teaching all subjects. The research findings underlying this approach to teaching are reviewed, and the specific language across the curriculum methods of five elementary teachers -- teachers of first, third, and sixth graders, a speech therapist, and a teacher of learning disabled students -- are illustrated. Available from the National Council of Teachers of English, \$7.80 nonmembers, \$6.00 members.

TRIP (Theory and Research Into Practice) Booklets: Affecting Critical Thinking through Speech, by Virginia P. O'Keefe, 1986.

Intended for teachers, this booklet shows how spoken language can affect student thinking and presents strategies for teaching critical thinking skills. Available from the Speech Communications Association, \$6.50 nonmembers, \$6.00 members.

Answering Students' Questions About Words, by Gail E. Tompkins and David B. Yaden, Jr., 1986.

Designed to provide teachers with the necessary information to answer typical student questions about the English language, this booklet includes a brief history of the English language and student activities to stimulate further interest. Available from the National Council of Teachers of English, \$6.50 nonmembers, \$5.00 members.

Teaching Writing With a Word Processor Grades 7-13, by Dawn and Raymond Rodrigues, 1986.

Provides teachers with a review of current research and suggested techniques for teaching composition with a word processor. Available from the National Council of Teachers of English \$5.00 nonmembers, \$4.00 members.

NEW ERIC/CS INFORMATION ANALYSIS PRODUCTS:

"Educational Services to Handicapped Students With Limited English Proficiency: A California State-Wide Study" by Cegelka, Lewis, Rodriguez, and Pacheco.

Editors is a comprehensive resource for developing programs. Includes a literature review and analysis for over 100 promising practices. Stock #B621, 96pp., \$8.00, CEC member price \$6.80.

"Life Centered Career Education: Activity Books I and II" by Miller, Glascoe, and Kokaska are direct descendants of another successful publication of The Council for Exceptional Children, "Life Centered Career Education: A Competency Based Approach" (Broiin, 1978, 1983).

These two new activity books add to the Life Centered curriculum by providing planned activities to be used with elementary and secondary school students. Book I is stock #303 (Elementary Level) and Book II is stock #304 (Secondary Level). Each is \$9.95 regular price and \$8.45 for CEC member price.

"Teaching Learning Disabled Students at the Secondary School Level" by Zigmund, Sansone, Miller, Donahoe and Kohnke is a new addition to the series "What Research and Experience Say to the Teacher of Exceptional Children."

These provide practical suggestions for structuring and implementing programs that work. Topics include: Selecting a model; planning for instruction; organizing instruction to maximize student learning; beyond direct services; recommendations for teachers. 50pp. and regular price is \$6.00, \$5.10 CEC member price, stock #305.

HE

Post-Tenure Faculty Evaluation: Threat or Opportunity? ASHE-ERIC Higher Education Report No. 1, 1986, by Christine M. Licata, 101 pages.

A scholarly review of a volatile subject. Discusses post-tenure evaluation in terms of the need for accountability and productivity, while considering academic freedom and job security issues. Focuses on evaluation relationship to faculty development, and gives practical suggestions for implementation.

TWO NEW UNIQUE SUBSCRIPTION PLANS

ERIC® **FOR THE 80's**

BACKGROUND: ERIC — The Educational Resources Information Center, sponsored by the National Institute of Education, is now 20 years old. With the anniversary of this important educational database, we here at the ERIC Document Reproduction Service (EDRS) have recently completed a national survey of ERIC's Standing Order Subscribers.

We discovered that a large percentage of them feel that the 1980 thru 1985 issues of ERIC are the most often accessed and used by their students and faculty.

Therefore, we are now offering these selected years of the ERIC microfiche collection by a new monthly subscription format. You may purchase the entire collection for these years or now specialize in selected topics by choosing only individual clearinghouse issues and pay monthly.

REASON: For 20 years, ERIC has only been offered with prepayment of its issues. With this monthly subscription format, it is our goal to make ERIC more accessible to library systems like your own. Libraries that have strong potential need for ERIC but due to the ever expanding initial cost needed in the past have not been able to introduce this valuable research tool to their students, faculty or patrons

PROGRAM: Titled — "ERIC For The 80's" Now, through this program, a library can choose to receive these selected 6 years of ERIC from us immediately while paying for them on a monthly basis over the next 3 years.

Furthermore, in implementing this program we noted that many institutions have needs and interests by which only selected clearinghouse topics would best balance cost with assistance. For this reason, we are further separating the collection by clearinghouse specialty and have spread out the cost of each clearinghouse issue to be comparable with the cost of a magazine subscription.

We here at EDRS hope these two new plans assist you in your decision about the best way to go with ERIC. If I can be of further assistance or if more copies are needed of this information — please don't hesitate to call or drop me a note.

Sincerely,

Josh Retterer

3598

The Eric Clearinghouses provide users with ready access to literature in the field of education. Over 85,000 documents alone are housed in an "ERIC for the 80's" microfiche collection. Starting even an individual Clearinghouse Collection will provide users with educational literature that includes:

- Research Reports • Speeches • Curriculum Guides • Program Descriptions • Books • Conference Proceedings • Bibliographics • and Unpublished Manuscripts

There are 16 ERIC clearinghouses in the nationwide network. Each specializes in a different multidiscipline educational area. Each has responsibility within the network for acquiring the significant educational literature within their particular areas, selecting the highest quality and most relevant material, processing (i.e., cataloging, indexing, abstracting) the selected items for input to the data base, and also for providing information analysis products and various user services based on the data base. These 16 clearinghouses are listed below with brief scope notes describing the areas they cover.

ERIC Clearinghouse on Adult, Career, and Vocational Education (CE)
Ohio State University

All levels and settings of adult and continuing, career, and vocational/technical education. Adult education, from basic literacy training through professional skill upgrading. Career education, including career awareness, career decisionmaking, career development, career change and experience-based education. Vocational and technical education, including new subprofessional fields, industrial arts, corrections education, employment and training programs, youth employment, work experience programs, education/business partnerships, entrepreneurship, adult retraining, and vocational rehabilitation for the handicapped.

ERIC Clearinghouse on Counseling and Personnel Services (CG)
University of Michigan

Preparation, practice, and supervision of counselors at all educational levels and in all settings; theoretical development of counseling and guidance; personnel procedures such as testing and interviewing and the analysis and dissemination of the resultant information; group work and case work; nature of pupil, student, and adult characteristics; personnel workers and their relation to career planning, family consultations, and student orientation activities.

ERIC Clearinghouse on Handicapped and Gifted Children (EC)
Council for Exceptional Children

All aspects of the education and development of the handicapped and gifted, including prevention, identification and assessment, intervention, and enrichment, both in special settings and within the mainstream.

PLAN A

- 1980-1985 Total collection of issues from all 16 clearinghouses for these years.
- Includes Annual Cumulative Issues of RIE for these 6 years. \$46.25 Value—Free!
 - Shipping charges are included within this plan.
 - Monthly charge for this program is \$315/month for 3 years.

Note: The current monthly issue of ERIC costs approximately \$130/month with shipping charges. This means that for about \$445/month an organization will be able to develop a very good ongoing working collection of the ERIC Database.

ERIC Clearinghouse on Reading and Communication Skills (CS)
National Council of Teachers of English

Reading, English, and communication skills (verbal and nonverbal), pre-school through college, educational research and instruction development in reading, writing, speaking, and listening, identification, diagnosis, and remediation of reading problems, speech communication (including forensics), mass communication, interpersonal and small group interaction, interpretation, rhetorical and communication theory, speech sciences, and theater. Preparation of instructional staff and related personnel in these areas.

All aspects of reading behavior with emphasis on physiology, psychology, sociology, and teaching, instructional materials, curricula, tests/measurement, and methodology at all levels of reading, the role of libraries and other agencies in fostering and guiding reading; diagnostics and remedial reading services in schools and clinical settings. Preparation of reading teachers and specialists.

ERIC Clearinghouse on Educational Management (EA)
University of Oregon

The leadership, management, and structure of public and private educational organizations, practice and theory of administration; pre-service and inservice preparation of administrators; tasks and processes of administration; methods and varieties of organization and organizational change, and the social context of educational organizations.

Sites, buildings, and equipment for education; planning, financing, constructing, renovating, equipping, maintaining, operating, insuring, utilizing, and evaluating educational facilities.

ERIC Clearinghouse on Languages and Linguistics (FL)
Center for Applied Linguistics

Languages and language sciences, theoretical and applied linguistics, all areas of foreign language, second language, and linguistics instruction, pedagogy, or methodology; psycholinguistics and the psychology of language learning, cultural and intercultural context of languages, application of linguistics in language teaching, bilingualism and bilingual education, sociolinguistics, study abroad and international exchanges, teacher training and qualifications specific to the teaching of foreign languages and second languages commonly and uncommonly taught languages, including English as a second language, related curriculum developments and problems.

PLAN B

- 1980-1985 Individual Clearinghouses/Subscriber Selected
- Includes Annual Cumulative Issues of RIE for these years.
 - Shipping charges are not included in monthly charge due to the wide variety in weight for each Clearinghouse's issues
 - The monthly service charges for each clearinghouse are outlined in the chart to the right.

Note: Each Clearinghouse is symbolized by a two letter acronym which is explained above and also listed to the right. Example: "PS" symbolizes the clearinghouse specializing in Elementary and Gifted Children. Therefore, following the chart, to purchase the selected 6 year this Clearinghouse's issues by prepayment plan cost at \$1,041.00. Purchasing these same issues by the subscription format limits the cost as stated to \$35/month for 3 years. The estimated monthly cost to continue as an ongoing subscriber with this clearinghouse is \$15/month.

ERIC Clearinghouse on Higher Education (HE)
George Washington University

Topics relating to college and university conditions, problems, programs, and students. Curricular and instructional programs, and institutional research at the college or university level. Federal programs, professional education (medicine, law, etc.), professional continuing education, collegiate computer-assisted learning and management, graduate education, university extension programs, teaching-learning, legal issues and legislation, planning, governance, finance, evaluation, interinstitutional arrangements, management of institutions of higher education, and business or industrial educational programs leading to a degree.

ERIC Clearinghouse on Information Resources (IR)
Syracuse University

Educational technology and library and information science at all levels. Instructional design, development, and evaluation are the emphases within educational technology, along with the media of educational communication: computers and microcomputers, telecommunications (cable, broadcast, satellite), audio and video recordings, film and other audiovisual materials, as they pertain to teaching and learning. Within library and information science the focus is on the operation and management of information services for education-related organizations. All aspects of information technology related to education are considered within the scope.

ERIC Clearinghouse for Junior Colleges (JC)
University of California at Los Angeles (UCLA)

Development, administration, and evaluation of two-year public and private community and junior colleges, technical institutes, and two-year branch university campuses. Two-year college students, faculty, staff, curricula, programs, support services, libraries, and community services. Linkages between two-year colleges and business/industrial organizations. Articulation of two-year colleges with secondary and four-year postsecondary institutions.

ERIC Clearinghouse on Elementary and Early Childhood Education (PS)
University of Illinois

The physical, cognitive, social, educational, and cultural development of children from birth through early adolescence, prenatal factors; parental behavior factors; learning theory research and practice related to the development of young children, including the preparation of teachers for this educational level; educational programs and community services for children; and theoretical and philosophical issues pertaining to children's development and education.

ERIC Clearinghouse on Rural Education and Small Schools (RC)
New Mexico State University

Economic, cultural, social, or other factors related to educational programs and practices for rural residents; American Indians/Alaska Natives, Mexican Americans, and migrants, educational practices and programs in all small schools; outdoor education.

ERIC Clearinghouse for Science, Mathematics, and Environmental Education (SE)
Ohio State University

Science, mathematics, and environmental education at all levels, and within these three broad subject areas, the following topics: development of curriculum and instructional materials; teachers and teacher education; learning theory/outcomes (including the impact of parameters such as interest level, intelligence, values, and concept development upon learning in these fields); educational programs; research and evaluative studies, media applications, computer applications.

ERIC Clearinghouse for Social Studies/Social Science Education (SO)
Indiana University

All levels of social studies and social science education, content of the social science disciplines, applications of theory and research to social science education, contributions of social science disciplines (anthropology, economics, geography, history, sociology, social psychology, political science), education as a social science, comparative education (K-12), content and curriculum materials on "social" topics such as law-related education, ethnic studies, bias and discrimination, aging, adoption, women's equity, and sex education.

ERIC Clearinghouse on Teacher Education (SP)
American Association of Colleges for Teacher Education

School personnel at all levels, teacher selection and training, preservice and inservice preparation, and retirement; the theory, philosophy, and practice of teaching, curricula and general education not specifically covered by other clearinghouses, all aspects of physical education, health education, and recreation education.

ERIC Clearinghouse on Tests, Measurement, and Evaluation (TM)
Educational Testing Service

Tests and other measurement devices; methodology of measurement and evaluation; application of tests, measurement, or evaluation in educational projects or programs, research design and methodology in the area of testing and measurement/evaluation, learning theory in general.

ERIC Clearinghouse on Urban Education (UD)
Teachers College, Columbia University

Programs and practices in public, parochial, and private schools in urban areas and the education of particular racial/ethnic minority children and youth in various settings — local, national, and international; the theory and practice of educational equity; urban and minority experiences; and urban and minority social institutions and services.

IMPORTANT INSTRUCTIONS FOR ERIC SUBSCRIPTION PLAN

- Enclose check or money order payable to EDRS for first month
- U.S. Customers must enclose an authorized original purchase order
- Foreign Customers — Request instructions from address listed above. Must first establish account with EDRS. Future checks must be drawn on a U.S. Bank. No purchase orders accepted
- Shipping Charges
PLAN A. Shipping charges are included with purchase price
PLAN B. Shipping charges will be added to monthly invoice (Foreign shipments are based on International Postal Rates)

OTHER ERIC COLLECTIONS AVAILABLE FROM EDRS

STANDING ORDERS Subscription orders for microfiche copies of all ERIC reports announced in each issue of *Resources in Education* average \$130.00 per month

BACK COLLECTIONS Examples of cost for selected years if prepayment of issue is desired — postage extra

Reports in <i>Resources in Education</i> for 1980	1698 41
Reports in <i>Resources in Education</i> for 1981	1592 51
Reports in <i>Resources in Education</i> for 1982	1441 01
Reports in <i>Resources in Education</i> for 1983	1407 93
Reports in <i>Resources in Education</i> for 1984	1473 85
Reports in <i>Resources in Education</i> for 1985	1322 74

(Prices for additional years are available upon request)

GENERAL INFORMATION

1. PRICE LIST

The prices set forth herein may be changed without notice, however, any price change will be subject to review by the Contracting Officer within the Office of Educational Research and Improvement (formerly named National Institute of Education)

2. PAYMENT

The prices set forth herein do not include any sales, use, excise, or similar taxes which may apply to the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any, shall be borne by the Customer

Payment shall be made net thirty (30) days from date of invoice. Payment shall be without expense to CMC

3. REPRODUCTION

Express permission to reproduce a copyrighted document provided hereunder must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

4. CONTINGENCIES

CMC shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure or delay (a) is due to events beyond the control of CMC including, but not limited to, fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortage, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments, (b) is due to failures of performances of subcontractors beyond CMC's control and without negligence on the part of CMC; or (c) is due to erroneous or incomplete information furnished by Customer

5. LIABILITY

CMC's liability, if any, arising hereunder shall not exceed restitution of charges. In no event shall CMC be liable for special, consequential, or liquidated damages arising from the provision of services hereunder

6. WARRANTY

CMC MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER, INCLUDING ANY WARRANTY OR MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE

June 24, 1986

Dear Sirs,

I am writing this letter to keep you informed about a new marketing program we here at EDRS have prepared for the ERIC program. To start, we have developed a new subscription format to ERIC we call ERIC FOR THE 80's. This format is being offered to provide academic institutions a new alternative towards purchasing the ERIC microfiche collection for their faculty and students.

We began our marketing by contacting all the universities, colleges, and junior colleges within the U.S. that presently do not have an ERIC collection. A sample of the letter we sent to these schools is enclosed with this note. In addition to informing these institutions of a new format for purchasing ERIC, we provided each institution with a brief explanation of each clearinghouse's function and an EDRS order form for purchasing.

Furthermore, we have recently completed a direct mail campaign to a larger pool of potential ERIC users. Enclosed with this letter is a listing of the different academic groups we contacted.

For these institutions and educators, we prepared two almost identical flyers for their review. The only difference being in the generic title of the person addressed. Our research indicated that the correct title for the person to reach within the selected academic library systems should read - Director of Library and Media Services. For reaching the appropriate state library personnel, we discovered this title should be modified to read - Director of Library and Acquisitions. I am enclosing a packet of 25 each for your review and advertising use.

At this time, we have contacted over 32,000 libraries. It is our hope here at EDRS that this marketing effort will expand the use of ERIC and aid and assist the fine job performed by

you the clearinghouses.

Please note that with all of our marketing material, we have requested that they contact the EDRS facility. If by mistake an institution contacts you directly, would you please notify Thelma Rodriguez or myself so that this error can be corrected.

If after reviewing this information you have any questions, please do not hesitate to write or give me a call.

Sincerely

Josh Retterer

NEW!

Thesaurus of ERIC Descriptors

10th Edition - 1986

From reviews of the 10th edition:

"... brings an enormous range of educational literature to the fingertips of students and librarians."
—*Journal of Academic Librarianship*

"This thesaurus provides convenient access and is an indispensable guide. . . ."
—*Instructional Innovator*

"... a valuable tool for those who search the ERIC indexes and databases."
—*ARBA 85*

Free postage and handling

Thesaurus of **ERIC** Descriptors 11th Edition—1986

The Definitive Vocabulary of Education

The constantly changing information in the database of the Educational Resources Information Center (ERIC) reflects the dramatic growth in the field of education. To search this valuable database in either its electronic or print format, you need to know the most current special ERIC vocabulary—you need the new 1986 *Thesaurus of ERIC Descriptors*.

The *Thesaurus of ERIC Descriptors* lists terms used by the ERIC system in indexing and abstracting education literature, providing convenient access to the documents cited in *Resources in Education* and *Current Index to Journals in Education*. Without the new, updated thesaurus at your fingertips, you risk overlooking vital information!

Special Features

- Nearly 200 changes from the 10th edition
- An extensive introduction describing the ERIC system and providing keys for using the thesaurus
- Information displayed to aid searching in 4 ways: Alphabetical Display, Rotated Descriptor Display, Hierarchical Display (including broader and narrower relationships), and Descriptor Group Display (a table of contents to the Descriptors)
- Sturdy reinforced cloth binding designed to stand up to the thesaurus's continual heavy use!

Sample Thesaurus Entry (Alphabetical Descriptor Display)

The sample entry shows a central descriptor with several annotations and relationships:

- DESCRIPTOR**: The main term being displayed.
- ADD DATE**: A note indicating when the term was added to the thesaurus.
- POSTINGS NOTE**: A note indicating the number of times the term was used in indexing CUE and RIE.
- SCOPE NOTE**: A note indicating the usage definition of the term.
- USED FOR**: A note indicating the term's application.
- NARROWER TERM**: A list of terms that are narrower than the main descriptor.
- BROADER TERM**: A list of terms that are broader than the main descriptor.
- RELATED TERM**: A list of terms related to the main descriptor.
- DESCRIPTOR GROUP CODE**: A code indicating the descriptor's group.
- former descriptor used from 1974 to 1980**: A note indicating the term's previous status.

Thesaurus of ERIC Descriptors, 11th Edition—
1986. October 1986 / 640 pages / 8½ x 11 / Cloth-
bound / ISBN 0-89774-159-5 / \$65.00(t)

Ms. Bette Brunelle
BRS Information Technologies
1200 Route #7
Latham, NY 12100

Dear Ms. Brunelle:

We were recently searching the ERIC database on BRS when we discovered some missing accession numbers in recent data. It appears that BRS is deleting certain valid ED accession records when an extra long abstract is involved. For example, in the April 1986 issue of RIE, BRS deleted ED-263 913 and ED-263 384. Both these records had exceptionally long abstracts and we, therefore, deduce that that is the reason for the deletion. Indications are that in 1984 BRS deleted eight valid ED records for the same reason. We have not tested 1985 data, but presumably there are valid records in that year deleted for the same reason.

We cross-checked against DIALOG and SDC and both those organizations processed the records in question correctly.

The problem creates a difference between the BRS outputs and the outputs of the other online vendors that we assume you will want to correct. If you are unable to handle the record length involved, we would suggest you simply truncate the abstract rather than delete the entire record.

Please let us know your disposition of this matter.

Sincerely yours,

Ted Brandhorst, Director
ERIC Processing and Reference Facility

Mr. Ted Brandhorst
Director
ERIC Processing and Reference Facility
4833 Rugby Ave.
Suite 301
Bethesda, Md. 20814-3073

June 6, 1986

Dear Mr. Brandhorst,

I have recently looked at a recompiled version of the ERIC program on BRS/SEARCH. It has been changed to handle any size document. Updates from 1986 have been reloaded to recover documents # ED-263913 and ED-263384. The years 1984 and 1985 are missing 3 and 7 documents, respectively. The decision has been made not to reload these years of data. We regret the omission.

Please note that contacts should appropriately be made with our Database Technical Liason, Ms. Laurie Jacobson. Her supervisor is Ms. Roberta Kolman, Director of Product Development--BRS. Again, the current BRS version of ERIC will accept any length document.

Sincerely,

John Schumacher
BRS Product Development

How to Search Country of Intellectual Origin

—submitted by Dian Marincola

Country of Intellectual Origin (CI) refers to the national source or origin of a report. For translated reports, the origin of the original report is the determining factor, not the translation organization. It is a mandatory data element for all A, N and X accessions, and is displayed on NASA/RECON for these accession series from 1962 to date.

Each entry in the CI field is displayed in a standardized format, taken from an authority list. Use the EXPAND command to familiarize yourself with the form and lexicon of the valid country names or terms. As you look at the EXPAND display, note that there are entries for "International Organization," "Other," and "Unknown" and the UNITED STATES is omitted. Reports for which the CI cannot be determined are indexed to Unknown; Other is used if the source is not on the authority list; and International Organization is used if the report was a joint venture among several countries or was generated by an international organization, i.e., WMO, NATO, The Hague, etc.

Although the term UNITED STATES displays as a CI on a NASA/RECON accession, it is not directly searchable. The term UNITED STATES is omitted because the majority of the reports in the STI database are indexed to this term. Due to the size of the complete set, it is more effective to use an exception processing technique to locate reports from the United States in a set than to directly search on the term itself.

The Country of Intellectual Origin can be searched using the SELECT and EXPAND commands and the mnemonic CI. The SELECT command generates a set of accessions indexed to the country name entered; the EXPAND command provides an alphabetized display of the country names in the authority file and shows the number of accessions indexed to each.

Sets can be SORTed by Country of Intellectual Origin using the mnemonic CIO (as of this publication). Any set can be SORTed in ascending or descending order within a 5,000 accession limit.

EXAMPLE: SORT 1/CIO,d (descending order)
or SORT 1/CIO,a (ascending order)

To isolate accessions in a set whose Country of Intellectual Origin is the UNITED STATES, simply SORT the set by Country of Intellectual Origin in descending order. This clusters the UNITED STATES' accessions near the top of the sorted set. Next use the SPECIFY FORMAT option to display the accession number and the country of intellectual origin. Remember to use

the mnemonic CIO in the SORT command and in the SPECIFY FORMAT option. DISPLAY the sorted set in Format 4 and use the KEEP command to select the UNITED STATES accessions. The KEEP set, or set 99, now contains accessions with the UNITED STATES as the country of intellectual origin.

Note: Review the accessions indexed to "Unknown," many reports from the United States may be found in this set.

ERIC DIGESTS ONLINE: A NEW FULL TEXT DATABASE

ERIC DIGESTS ONLINE (EDO), a full text database of short topical reports on education from the 16 ERIC clearinghouses, is now available through ED-LINE (an online information service for educators) on The Source.

Users of ERIC DIGESTS ONLINE are able to access the online Digests through menus or key words. A special file feature permits users to comment or to read others' comments on Digests in "User Notespace."

Among the titles in the new file are "Full Day or Half Day Kindergarten?," "Qualities of Effective Writing Programs," "Dismissing Incompetent Tenured Teachers," and "Part-Time Faculty: Higher Education at a Crossroads." New Digests will be added to EDO monthly.

ERIC DIGESTS ONLINE (EDO) is coordinated by project staff at the ERIC Clearinghouse on Elementary and Early Childhood Education, in cooperation with the 15 other ERIC clearinghouses.

Funding for ERIC DIGESTS ONLINE is provided by the Office of Educational Research and Improvement, U. S. Department of Education. Additional information and sample Digests may be obtained by writing to EDO Project, ERIC/EECE, 805 W. Pennsylvania, Urbana, IL 61801.

For information on subscribing to The Source and Ed-Line, call Laura Bono of Ed-Line at (703) 528-5840.

EATING DISORDERS: COUNSELING ISSUES

Deborah Herbert

ANNOTATION: This Digest describes characteristics and extent of anorexia and bulimia, provides psychosocial and family profiles of the victims, and discusses the role of counseling programs.

KEY WORDS: Females, Adolescents, Anorexia Nervosa, Psychological Characteristics, Counseling Techniques, Family Characteristics, Bulimia, Eating Disorders

Bulimia and anorexia are binge-eating and starving disorders afflicting thousands of adolescent and young adult women each year.

CHARACTERISTICS OF BULIMIA AND ANOREXIA

Diagnostic criteria established in 1980 by the American Psychiatric Association include the following:

Bulimia

The majority of bulimics binge in secret and resort to self-induced vomiting or purging. A typical binge averages 4,000 calories, lasts an hour, and occurs twice a day. Diagnostic criteria include recurrent episodes of binge-eating; awareness that the eating pattern is abnormal and fear of being unable to stop voluntarily; and depressed mood and self-deprecating thoughts after binging.

Anorexia

Anorexics may also binge/purge and abuse physical exercise. Usually, they suffer from more severe psychological and medical problems than bulimics.

Diagnostic criteria include a 25% weight loss or a body weight 25% below normal; an intense fear of becoming obese that does not diminish with weight loss; a distorted body image (feeling fat or "just right" even when emaciated); and a refusal to maintain weight above a minimum norm for age and height.

EXTENT OF BULIMIA AND ANOREXIA

Estimates of the extent of eating disorders range from 500,000 for bulimia and anorexia combined to 5 million for bulimia alone. Estimates of incidence also vary, from 3.8% to 13% for bulimia and .6% to 11% for anorexia. The lack of consensus on data derives from variables inherent in victims' self-reports, an inconsistency among operational

PSYCHOSOCIAL PROFILE

The typical image of the eating disordered is the "model child" or "perfect little Princess"; behind this image lies a poor sense of self, intense need for approval; and compulsive high-achievement. Because flaws are seen as failures which can invite rejection, a pervasive anxiety dominates their lives. To cope socially, bulimics tend to be gregarious impression-managers, while anorexics may simply withdraw.

The wider context for these disorders, according to some theorists, is women's social dependency in a culture that idealizes thin female bodies. In this view, dependency defines females in terms of "other" rather than "self," making them highly responsive to external demands and rewards, less likely to develop internal resources, and especially vulnerable to perceived failure and rejection.

FAMILY PROFILE

Bulimics and anorexics typically come from families who depend excessively on each other and cannot handle stress and anger. "Enmeshed" is an apt description: what they consume, wear and do and how well they appear, behave, and perform are all regarded as everybody's business and extremely important.

Paradoxically, the eating disorder functions to preserve family stability. The victim secures some sense of identity, approval, and control through the special attention her illness requires; other members acquire a unifying focus for their own roles. The net effect is to reinforce the family's mutual dependencies and to hide underlying conflicts.

ROLE OF COUNSELING PROGRAMS

Multidisciplinary intervention programs offering individual and family or group counseling, as well as adjunct self-help or support groups, are able to help significant numbers of the eating disordered. The most successful program combines individual with family counseling and uses a team approach that includes a physician and nutritionist. Chemical dependency programs often provide useful models. The core elements of the three types of counseling programs are individual counseling, family counseling, and group counseling.

Individual Counseling

Individual counseling involves journal keeping; nutritional intervention; altering antecedent events; using cognitive-behavioral techniques; manipulating consequences; and eliciting the support of family and friends.

Family Counseling

Family counseling involves discussing realistically how the disorder affects each member; designing tasks to fit the developmental level of each member; providing alternate ways to respond to the illness; establishing rules of eating conduct to clarify areas of control and responsibility; helping members meet each others' emotional needs; and looking for abusive or addictive patterns in other members.

Group Counseling

Group counseling involves educating the group on family dynamics, dependency, stress management, nutrition, womens' issues, depression, feelings, sexuality and assertiveness; using a mix of therapeutic devices, such as rational-emotive techniques, gestalt and process techniques, spiritual counseling, neurolinguistic programming, behavior modification, desensitization and confrontation.

Among client populations of bulimics, 63% to 80% eventually become binge/purge-free; among anorexics, 50% regain normal weight and eating habits, 25% improve but have pronounced weight and/or eating habit problems, and 25% are resistant to intervention. Early identification and treatment are crucial to a successful outcome for both disorders.

Full-Day or Half-Day Kindergarten?

According to educator Barry Herman (1984) and others, the majority of 5-year-olds in the United States today already are more accustomed to being away from home much of the day, more aware of the world around them, and more likely to spend a large part of the day with peers than were children of previous generations. These factors, plus the demonstrated ability of children to cope with a longer day away from home, have created a demand in many communities for full-day kindergarten programs.

This Digest examines how changing family patterns have affected the full-day/half-day kindergarten issue, discussing why schools are currently considering alternative scheduling and describing the advantages and disadvantages of each type of program.

Changes in Family Patterns

Among the changes occurring in American society that make full-day kindergarten attractive to families are

An increase in the number of working parents. As reported by the National Center for Education Statistics (Grant and Snyder 1983), the number of mothers of children under 6 who work outside the home increased 34 percent from 1970 to 1980. The National Commission on Working Women (1985) reports that, in 1984, 48 percent of children under 6 had mothers in the labor force.

An increase in the number of children who have had preschool or day care experience. Since the mid-1970s, the majority of children have had some kind of preschool experience, either in Head Start, day care, private preschools, or early childhood programs in the public schools. These early group experiences have provided children's first encounters with daily organized instructional and social activities before kindergarten (Herman 1984).

An increase in the influence of television and family mobility on children. These two factors have produced 5-year-olds who are more knowledgeable about their world and who are apparently more ready for a full-day school experience than the children of previous generations.

Renewed interest in academic preparation for later school success. Even in families without both parents

working outside the home, there is great interest in the contribution of early childhood programs (including full-day kindergarten) to later school success.

Schools and Full-Day Kindergarten

School systems have become interested in alternative scheduling for kindergarten partly because of the reasons listed above and partly for reasons related to finances and school space availability. Some of these reasons concern

State school funding formulas. Some states provide more state aid for all-day students, although seldom enough to completely pay the extra costs of full-day kindergarten programs. Other states allow only half-day aid; in these states, funding formulas would have to change in order for schools to benefit financially from all-day kindergarten attendance.

Busing and other transportation costs. Eliminating the need for noon bus trips and crossing guards saves the school system money.

Availability of classroom space and teachers. As school enrollment declines, some districts find that they have extra classroom space and qualified teachers available to offer full-day kindergarten.

In addition, school districts are interested in responding to parents' requests for full-day kindergarten. In New York City, for example, parents who were offered the option of full-day kindergarten responded overwhelmingly in favor of the plan ("Woes Plague New York's All-Day Kindergartens" 1983).

Advantages of Full-Day Programs

Herman (1984) describes in detail the advantages of full-day kindergarten. He and others believe full-day programs provide a relaxed, unhurried school day with more time for a variety of experiences, greater opportunity for screening and assessment to detect and deal with potential learning problems, and more occasions for good quality interaction between adults and students.

While the long term effects of full-day kindergarten are yet to be determined, Thomas Stinard's (1982) review of 10 research studies comparing half-day and full-day

kindergarten indicates that students taking part in full-day programs demonstrate strong academic advantages as much as a year after the kindergarten experience. Stinard found that full-day students performed at least as well as half-day students in every study (and better in many studies) with no significant adverse effects.

A recent longitudinal study of full-day kindergarten in the Evansville-Vanderburgh, Ohio, School District indicates that fourth graders maintained the academic advantage gained during full-day kindergarten (Humphrey 1983).

Despite often-expressed fears that full-day kindergartners would experience fatigue and stress, school districts that have taken care to plan a developmentally appropriate, nonacademic curriculum with carefully paced activities have reported few problems (Evans and Marken 1983; Stinard 1982).

Disadvantages of Full-Day Programs

Critics of full-day kindergarten point out that such programs are expensive because they require additional teaching staff and aides to maintain an acceptable child-adult ratio. These costs may or may not be offset by transportation savings and, in some cases, additional state aid.

Other requirements of full-day kindergarten, including more classroom space, may be difficult to satisfy in districts where kindergarten or primary grade enrollment is increasing and/or where school buildings have been sold.

In addition to citing added expense and space requirements as problems, those in disagreement claim that full-day programs may become too academic, concentrating on basic skills before children are ready for them. In addition, they are concerned that half of the day's programming in an all-day kindergarten setting may become merely child care.

Advantages of Half-Day Programs

Many educators still prefer half-day, everyday kindergarten. They argue that a half-day program can provide high quality educational and social experience for young children while orienting them adequately to school.

Specifically, half-day programs are viewed as providing continuity and systematic experience with less probability of stress than full-day programs. Proponents of the half-day approach believe that, given the 5-year-old's attention span, level of interest, and home ties, a half day offers ample time in school and allows more time for the young child to play and interact with adults and other children in less-structured home or child care settings (Finkelstein 1983).

Disadvantages of Half-Day Programs

Disadvantages of half-day programs include midday disruption for children who move from one program to another and, if busing is not provided by the school, difficulty for parents in making transportation arrangements. Even if busing is provided and the child spends the other half day at home, schools may find providing the extra trip expensive. In addition, the half-day kindergartner may have little opportunity to benefit from activities such as assemblies or field trips.

Conclusion

While both full-day and half-day programs have advantages and disadvantages, it is worth noting that length of the school day is only one dimension of the kindergarten experience. Other important issues include the nature of the kindergarten curriculum and the quality of teaching. In general, research suggests that, as long as the curriculum is developmentally appropriate and intellectually stimulating, either type of scheduling can provide an adequate introduction to school.

Children's Peer Relationships

Christine B. Burton

Children's friendships have inevitable ups and downs. Yet the feelings of satisfaction and security that most children derive from interacting with peers outweigh periodic problems. For a number of children, however, peer relations are persistently problematic. Some children are actively rejected by peers. Others are simply ignored, or neglected. It even appears that some popular children have many friends but nevertheless feel alone and unhappy. This Digest examines factors that contribute to children's peer relationship problems and describes ways to help children overcome these problems.

Why Are Peer Relationships Important?

Children who are unable to form close or satisfying relationships with peers should be of concern to parents and teachers alike. For one thing, these children miss out on opportunities to learn social skills that will be important throughout their lives. Especially critical are the skills needed to initiate and maintain social relationships and to resolve social conflicts, including communication, compromise, and tact (Asher, Renshaw, and Hymel 1982). Children who lack ongoing peer involvements also may miss opportunities to build a sense of social self-confidence.

These children may develop little faith in their own abilities to achieve interpersonal goals and, thus, are discouraged by the normal ups and downs of social interaction. Implications for the children's future social and professional adjustment are obvious.

Finally, children without satisfying friendships may suffer from painful feelings of isolation (Asher, Hymel, and Renshaw 1984). School may be an unpleasant place for such children. They may ultimately become truant or drop out altogether (Kupersmidt 1983). Or, in their search for a sense of group belonging, the children may become vulnerable to the influence of delinquent or drug-abusing peers (Isaacs 1985).

What Factors Contribute to Peer Relationship Problems?

As adults become aware of children with significant peer relationship problems, their concern should focus on why such problems are occurring. Fortunately, recent research has expanded insight into the following factors that contribute to children's peer relationship problems.

Social behavior. Some children behave in an aggressive or disruptive manner and, hence, are rejected by peers. Other children withdraw from peer interactions and, in this way, limit their ability to gain acceptance and friendship (Coe and Kupersmidt 1983; Dodge 1983). Each type of ineffective social behavioral pattern can stem from different root causes. One possible cause is a lack of knowledge about effective interaction strategies. Another potential cause relates to the children's emotional states. Children who are anxious or fearful about peer relations are unlikely to behave in an effective manner. Academic problems also can contribute to ineffective social behavior. Children who cannot engage themselves with classroom work assignments often disrupt and irritate their peers (Burton in press).

Differentness. Similarity fosters social acceptance. Conversely, children tend to encounter social rejection when they are perceived to be dissimilar from their peers. This may occur when children are of a different ethnic group or sex, are physically unattractive or handicapped, or are newcomers to their classrooms (Asher and others 1982).

Family problems. Family problems can have damaging effects on children's peer relations. For example, children of divorcing parents may act out feelings of anger at school, eliciting rejection from peers in the process. Children with family problems, such as parental alcoholism, may feel reluctant to bring friends home, avoiding close friendships as a result.

Reputation. Even if children overcome the circumstances that originally led them to experience peer problems, a reputation as a social outcast is extremely difficult to change.

How Can Children Overcome Peer Relationship Problems?

Children require help from adults if they are to overcome serious peer relationship problems. The most successful helping strategies are matched to the specific needs of the children involved.

Social skills training. Children whose behavior leads to social rejection often need to learn new interpersonal skills. In such cases, specific instruction on ways to make peer interactions mutually satisfying and productive can be effective in improving the children's peer relations (Asher and others 1982).

Intervention for related problems. When peer problems co-occur with serious academic problems, children may need intensive academic intervention if they are to become accepted members of their classroom groups (Coie and Krehbiel 1984). Similarly, children should be given school support for dealing with family problems, when possible, to minimize potential adverse effects on the children's peer relations.

Nonthreatening social experiences. Large groups can be threatening to children who lack self-confidence. Shy children may therefore benefit from opportunities to interact with peers in small groups. Parents can encourage shy children to invite classmates over one at a time for special activities. Or shy children can be encouraged to develop outside interests, like music or art, that will provide a natural basis for interacting with other children. Both of these approaches can boost shy children's self-confidence and may help them start friendships in the process.

Cooperative classroom projects. Cooperative group projects can foster peer acceptance of children who are trying to improve their social reputations, including children who are seen as different by their classmates. Under this scheme, teachers assign interesting tasks to small work groups. The group members must work cooperatively to achieve the tasks. In so doing, they must interact with peers they would typically avoid and often discover new bases for liking them (Bierman and Furman 1984; Isaacs 1985).

General Guidelines for Adults

Beyond intervention for specific peer problems, there are several general strategies that may help all children maintain a healthy outlook on their own social lives (Burton in press):

- Give children explicit opportunities to share any

peer-related concerns they might have. Show respect for children's unique social needs. Some children may be contented with few friends. Some popular children may have such high expectations that they never feel socially successful.

- Create social options for children without creating pressures. Take care not to communicate the expectation that children should be liked by "all of the people all of the time."

Conclusion

In sum, the message regarding children's peer relationships is a clear one. Peer relationships are important contributors to the quality of both children's current lives and their future development. Children who have difficulty in relating to peers can be helped. Such intervention is most effective when it is tailored to fit the specific nature of the children's peer problems.

ERIC DIGESTS ONLINE!

A brand new information service designed to give education leaders a fast, accurate summary of key education issues will be available exclusively on EDLINE's National Network's menu starting April 1, 1986.

Called ERIC DIGESTS ONLINE (EDO), the new service has been developed by the Educational Resources Information Center (ERIC). EDO consists of over 100 digests on issues that ERIC considers of critical importance to educators. New digests will be added to EDO monthly, and each digest will be 1000 to 1500 words in length (approximately 2 screens). Digests will be deleted when they no longer are current.

EDO reports are produced by the 16 clearinghouses in the ERIC system. And, each digest is reviewed by content specialists before going on-line.

"Now it will be easy for busy educators to get up-to-date summary information on critical topics without having to personally review hundreds of documents," explains Mima Spencer, director of the EDO project.

The EDO main menu consists of an introduction of ERIC DIGESTS ONLINE, fast commands, selections for searching by menu or keyword, and new ERIC DIGESTS. General categories of digests include:

1. Teachers (K-12)
2. Administrators (K-12)
3. Students (K-12)
4. School/Community Groups
5. Parents/Family
6. Special Education (K-12)

7. Subject/Curriculum (K-12)
8. Testing/Evaluation
9. Computers/Technology
10. Counseling/Guidance
11. Adult/Career/Vocational Education
12. Higher Education
13. Libraries/Information

These categories are then broken down into sub-menus. For instance, under the category, "administrators" you can read management information from the following selections: 1) Teachers, 2) Students, and 3) Policies and Practices.

Those three categories then have a selection of topics that you can read. If you select "Teachers" you can read: "Finding and Keeping Teachers," "Dismissing Incompetent Teachers," "Merit Pay," "Developing Homework Policies," "What First Year Teachers Need To Know," and more!

In addition to reading the digests, a special feature of EDO invites users to comment on the digests, or read others' comments. This feature allows users to benefit from the sharing of opinions from educators across the board.

The ED-LINE staff is excited about the possibilities of having such a comprehensive, "issues management," database on ED-LINE for our subscribers. For more information contact Mima Spencer or Diane Rothenburg, ID#SLS223. ERIC is the fast command.

ED-LINE and ED-LINER are not copyrighted. You may distribute any number of hard copies. However, electronic distribution is prohibited.

The ERIC Administrative Bulletin (EAB) is prepared by the ERIC Processing and Reference Facility on the basis of material submitted by all components of the ERIC system. EAB articles are reviewed and approved by Central ERIC before publication. The EAB is intended to be the "journal" of the ERIC system and a major means for the decentralized components of ERIC to communicate and interact with one another. The EAB is also a permanent record reflecting most of the major events in the life of the ERIC system (such as personnel changes, Standing Order Customer changes, etc.) and providing in printed form essential documents (such as ERIC policy and priority statements, Clearinghouse scope statement modifications, ERIC Processing Manual revisions, etc.) Submissions to the EAB are to be sent (using the standard form) to your respective monitor. The deadline for input to each monthly issue is the 10th of the month.

ACTION ITEM

RIE Processing Advisory -- Duplicate Clearinghouse Accession Numbers

Over the last few issues of RIE there has been a dramatic increase in duplicated Clearinghouse accession numbers, i.e., two documents submitted with the same number. The August RIE contained 10 records involving such duplication. The Facility's editorial and computer staff have to perform many operations to straighten out such duplication: contacting the Clearinghouse to determine which document gets the original number and which gets a new number, correction of the number on the document itself, doublechecking both resumes to ensure that the data are with the proper document, tracking both documents through the re-processing -- including receipt of a re-transmitted record to go with the newly assigned number, etc. All of these activities require extra time and care to ensure that they are accurately performed.

It appears, from conversations with Clearinghouses submitting such duplicate numbers, that part of the problem is caused by the computerization of some portion of the accessioning activity. In converting to the computer, some Clearinghouses are merely maintaining a list of numbers with no titles assigned; they then fill out the ADR data at a later date. Such a procedure can easily result in duplicate accession numbers being assigned if someone forgets to write a number down. Since it is understandable that staff may find it inconvenient to go up on the computer every time they assign numbers, the Facility continues to make available the ADR forms that can be used as a paper copy log.

Assignment of Clearinghouse Accession Numbers should always follow these steps:

1. Entry on the ADR (Acquisitions Data Report) -- including accession number, title, other data as required.
2. Entry of the accession number on the document; and
3. Entry of the accession number on any subsequent paperwork or computer record.

Until now the Facility has made every effort to fix the duplicate numbers with the least amount of work on the part of the Clearinghouse. However, if there is no reduction in duplicated accession numbers, because of staff and time constraints the Facility will start to pull both documents (along with any related documents) and the accompanying resumes from processing and to return them to the Clearinghouse for re-accessioning and retransmission.

NETWORK NEWS

New Director for the ERIC Clearinghouse on Languages and Linguistics

After five years as Director of ERIC/CLL, John Clark left the Clearinghouse and the Center for Applied Linguistics on May 30 to accept a position with the Defense Language Institute in Monterey, California. He will be in charge of DLI's testing program, as well as having responsibilities in the areas of computer-assisted instruction and testing. John's leadership, guidance, encouragement, enthusiasm, and professionalism are already sorely missed by the ERIC/CLL staff.

We are fortunate, however, to have succeeded in luring yet another language testing expert away from ETS (whence came John Clark five years ago), Dr. Charles Stansfield. Since 1981, Charlie has been Associate Program Director for the Test of English as a Foreign Language (TOEFL). Prior to that time, he was Assistant and then Associate Professor of Spanish at the University of Colorado. He has a B.A. in Spanish, an M.A. in Foreign Language Education, an M.S. in Teaching English as a Second Language, and a Ph.D. in Foreign/Second Language Education. His strong background in both ESL and foreign language education will stand him in good stead in his new position as Director of ERIC/CLL. He will officially join our staff on September 22, 1986.

The Office of Educational Research and Improvement (OERI) -- America's Education Fact Finder

OERI has prepared a brief 4-page handout (dated July 1986) describing the various services of its five program offices. The handout is provided for Clearinghouse use as Attachment 1. ERIC is mentioned on page 2 as a database of the Information Services (IS) program.

...Ted Brandhorst (ERIC Facility)

Governors' Aides Responsible for Education Policy

In the process of compiling a mailing list for an IAP on "blue ribbon" commissions, HE obtained a special list of Governors Aides that are responsible for education policy in their respective states. The COED Executive Committee thought the list might be useful to all Clearinghouses for standard distribution of Digests, etc. The list is reproduced as Attachment 2.

ERIC/CE Develops New Acquisitions Brochure

ERIC/CE has developed a new acquisitions brochure (See Attachment 3) that helps cut down on paperwork. The front page of the four full pages is a letter that can be changed to allow us to target a specific audience. The generic brochure, which is attached, is useful for answering phone-in or walk-in requests for information on submitting documents.

...Judy Wagner (CE)

ERIC Acquisitions Arrangements List Update

The ERIC Acquisitions Arrangements (EAA) list has been updated and the changes are included here as Attachment 4. A total of 37 additions, changes, and deletions have been made based on Facility information and forms sent to us by Clearinghouses.

The list of changes is arranged in alphabetical order by organization name and follows the same form as the January 1986 list. The January 1986 EAA list should be updated by changing, adding, or deleting entries as necessary in alphabetical order. A change in an arrangement is shown by a percent sign (%) and an arrangement which has been removed is marked with an "X". All other entries are additions to the previous list.

In order to keep the list as current and informative as possible, changes will continue to be issued in this way via the EAB until the overall volume of changes warrants a completely revised list. The Facility Acquisitions staff appreciates the cooperation of the Clearinghouses in submitting changes to their arrangements as they occur, so that the List will continue to be a useful tool for all components of the ERIC system.

UD Has a New Location (But Same Mailing Address)

UD has moved to new quarters. When you visit us - and we hope you will - please come to Room 300, Main Hall, Teachers College, 525 West 125th Street, New York, New York. Our mailing address, however, remains the same: Teachers College, Box 40, Columbia University, New York, New York 10027.

...Wendy Schwartz (UD)

Write-Up on ERIC in "Introduction to United States Public Documents", by Joe Morehead

The write-up on ERIC that appears in the above cited reference work (See Attachment 6) is unusually thorough and good. It was published in 1983 and is just beginning to show its age three years later, but is still a model of completeness.

This is at least partially attributable to the fact that the author took pains to check his text with ERIC before going to press.

...Joanna Eustace (ERIC Facility)

CONSER Abstracting & Indexing Project -- ERIC Participation Reveals Degree of Overlap Between CIJE and Other Major Index Services

The ERIC Facility recently cooperated with the CONSER Project at the Library of Congress in a special effort designed to establish bibliographic control over the serials covered by the nation's Abstracting and Indexing (A&I) services. Some 85 A&I services participated, contributing more than 101,000 serial titles.

As a benefit of participation, selected statistics have been returned to ERIC. For example, 767 serials covered by CIJE were reported to CONSER. Of these, 82% were U.S., 15% were foreign, and 3% were Canadian. Of perhaps greater interest are the statistics pertaining to overlap. Attachment 7 is a list of all the major A&I services that covered one or more serials also covered by CIJE. The list is arranged alphabetically by the name of the service and provides two numbers: (1) the absolute number of journal titles covered by both CIJE and the service in question, and (2) the percentage that number is of the 767 total titles.

3534

The series that overlapped the most with CIJE (down to a level of 28 titles) were the following:

<u>A&I Service</u>	<u>Titles Overlapping With CIJE</u>	<u>% of CIJE Titles Overlapping</u>
1. Education Index	297	38.87%
2. Psychological Abstracts	222	29.06%
3. Sociological Abstracts	187	24.48%
4. Social Welfare, Social Planning	109	14.27%
5. Exceptional Child Education	95	12.43%
6. Women Studies Abstracts	86	11.26%
7. Public Affairs Information Service	82	10.73%
8. Language and Language Behavior	77	10.08%
9. Book Review Index	76	9.95%
10. Reference Sources	76	9.95%
11. Excerpta Medica	74	9.69%
12. Historical Abstracts	73	9.55%
13. Social Sciences Index	68	8.90%
14. Biological Abstracts	58	7.59%
15. MLA International Bibliography	57	7.46%
16. Index Medicus	55	7.20%
17. Language Teaching	52	6.81%
18. Social Work Research & Abstracts	48	6.28%
19. Media Review Digest	47	6.15%
20. Cumulative Index to Nursing	43	5.63%

3835

<u>A&I Service</u>	<u>Titles Overlapping With CIJE</u>	<u>% of CIJE Titles Overlapping</u>
21. INSPEC	43	5.63%
22. Hospital Literature Index	40	5.24%
23. ABI/INFORM	37	4.84%
24. Library and Information Science Abstracts	35	4.58%
25. Library Literature	35	4.58%
26. Energy Research Abstracts	34	4.45%
27. Environment Abstracts	34	4.45%
28. Chemical Abstracts	33	4.32%
29. International Aerospace Abstracts	32	4.19%
30. Writings on American History	30	3.93%
31. Popular Magazine Review	30	3.93%

Microfiche Envelopes Offered by National Commercial Envelope Company

Ever since EDRS dropped the microfiche envelopes, there have been several firms offering such envelopes to SOC's should they want to retain that method of storage. The latest offering received is from National Commercial Envelope Company and is reproduced here (as Attachment 8) for Clearinghouse use in responding to SOC inquiries.

...Ted Brandhorst (ERIC Facility)

PERSONNEL

Personnel Changes at ERIC/SE

ERIC/SMEAC has recently lost two staff members. Pamela Kern, who worked with RIE and CIJE processing, completed her Bachelor's degree in Marketing and was subsequently employed by a major local and regional bank. Dr. John Novak, who coordinated abstracting and indexing and assisted with user services, accepted a faculty position in biology and science education at Eastern Michigan University. Both Pam and John have made strong contributions to the ERIC/SE program and will be missed.

Ms. Marylin Lisowski, a doctoral student in science and environmental education at Ohio State University, has assumed the position of coordinator of indexing and abstracting. Marylin has been on the SMEAC staff for the past year. Another doctoral student will join our staff in the Fall to do the work usually done by Dr. Novak. We are currently interviewing to replace Pam. Mrs. Linda Shinn, Administrative Assistant, should be contacted for any RIE and CIJE processing questions.

...Robert W. Howe (SE)

Personnel Changes at UD

Carolyn Riehl, who was UD's in-house editor for nearly a year, and an abstractor before that, has moved on to a new project. She will be managing a study of dropout prevention efforts in the New York City public schools.

UD's new editor is Wendy Schwartz. She has written and edited material on virtually all the social sciences, and has been the director of a public foundation supporting social change projects.

NEW ERIC/CS INFORMATION ANALYSIS PRODUCTS:

Post-Tenure Faculty Evaluation: Threat or Opportunity? ASHE-ERIC Higher Education Report No. 1, 1986. By Christine M. Licata.

ABST Factors that have led to post-tenure evaluation of faculty are considered, along with limitations of tenure in general and current post-tenure evaluation practices. Positions of advocacy and opposition to post-tenure evaluation are identified, along with practical considerations that institutions might consider before modifying or implementing a formal process for post-tenure evaluation. Three purposes of post-tenure evaluation are identified: to supply documentation for removal for incompetence; to provide input for decisions in the areas of reductions in force, merit raises, and promotions; and especially to support faculty development and improved instruction. Five principles of faculty evaluation are recommended: a clearly defined purpose, multiple sources of input of the evaluation, identifying areas and criteria to be assessed, measurable standards, and a flexible and individualized evaluation plan. Appended is a summary of a survey of 30 institutions, 16 of which had a formal post-tenure evaluation plan. Information is provided on evaluation objectives, effectiveness, frequency, participants, process followed, and the names of the 16 institutions. Also appended are information on sources of sample rating forms for faculty evaluation.

WORKSHOPS/CONFERENCES/MEETINGS

<u>CH</u>	<u>DATE</u>	<u>LOCATION</u>	<u>STAFF</u>	<u>COMMENTS</u>
CE	Jul. 7, 1986	Cincinnati, Ohio	Susan Imel	Susan Imel and Judy Wagner presented "The ERIC Database: A Resource for Corrections Educators" at the Correction Education Association annual convention in Cincinnati, Ohio on July 7, 1986.
HE	June 22-25, 1986	Orlando, FL	Jonathan Fife Lynn Barnett	Attended the Annual Forum of the Association for Institutional Research. Staffed an exhibit booth, provided free ERIC computer searches, and arranged for conference papers to be collected and screened for ERIC.
KE	June 17, 1986	Washington, DC	Christopher Figaux	Attended the annual workshop of EdPress, where Secretary Bennett was the keynote speaker.

Office of Educational Research and Improvement

America's Education Fact Finder

July 1986

3842

DID YOU KNOW... that the U.S. Department of Education has a wealth of statistical and research information? That the data are available on disk, tape, and in hard-copy? That for a fee, special tabulations can be run on computer specifically to meet your information needs?

These services and more are offered by the Department of Education's Office of Educational Research and Improvement (OERI).

OERI supports and conducts research on education, collects and analyzes education statistics, administers grant and contract programs to improve libraries and library education, and disseminates information to parents, students, teachers, school administrators, policymakers, researchers, the media, and others.

The work of OERI is carried out by five program offices – Office of Research, Center for Statistics, Programs for the Improvement of Practice, Library Programs, and Information Services.

Office of Research – The Office of Research (OR) supports the scholarly and academic work of individuals and institutions. The research is designed to advance knowledge about educational practice and is aimed at solving or alleviating specific education problems. OR supports basic and applied research, evaluations, and analyses of Federal, State, and local educational policies. A major OR function is to fund and coordinate research conducted by 14 national educational research and development centers based in universities. In addition, OR administers a program of unsolicited, field-initiated research projects and several small grant programs.

The educational research and development centers conduct research in the following areas: teaching, learning, teacher education, reading, writing, education and employment, effective elementary and middle schools, effective secondary schools, postsecondary teaching and learning, postsecondary governance and finance, State and local policy development and leadership, bilingual and foreign language education, educational technology, and student testing, evaluation and standards.

Center for Statistics – The Center for Statistics (CS) collects, analyzes, and disseminates statistics on the condition of education in the United States, and helps State and local education agencies improve their statistical systems.

The Center's activities include: Maintaining data bases on public and private elementary and secondary, postsecondary, vocational, and adult education to monitor trends in enrollments, staff, and finances. The data bases are the core of the Center's most widely used publications, *The Condition of Education* and *The Digest of Education Statistics*. The Center also administers the collection and analysis of data from specialized surveys, including the National Assessment of Education Progress (NAEP) and a longitudinal studies program. NAEP surveys the education attainments of 9-, 13-, and 17-year-olds in 10 learning areas, including reading, writing, and math. The longitudinal studies (High School Beyond and the National Longitudinal Study of 1972) follow the progress of students as they make the transition from high school, through college, to work and family formation.

3643

Data from these and other Center data bases permit informed debate and decision-making on educational policies and practices.

Programs for the Improvement of Practice-- The primary mission of Programs for the Improvement of Practice (PIP) is to ensure that education data, research findings, and exemplary practices are easily accessible to teachers, school administrators, and others seeking to improve American education. PIP activities are concentrated on learning from practices that work and sharing this information nationally. Housed in PIP are the regional educational laboratories, the National Diffusion Network, and the recognition programs for schools.

The nine regional educational laboratories provide research, development, and technical assistance within their multi-State regions. The National Diffusion Network helps schools and colleges adapt exemplary education programs through State facilitators who provide training on model programs. The school recognition programs identify unusually successful schools, reward their excellence with national recognition, and provide information to all schools about the qualities that make a school outstanding.

Library Programs -- Library Programs (LP) administers grant and contract programs to State Library administrative agencies, State educational agencies, institutions of higher education and other public or private agencies, institutions, and organizations. These programs are for the improvement of public library services, the construction of public libraries, interlibrary cooperation,

acquisition of postsecondary library resources, support of training and research in library and information science, strengthening of major research libraries, improvement of library services for Indian tribes, and literacy programs in State and local public libraries.

Information Services -- The Information Services (IS) program coordinates the agency's external liaison activities and serves as the support group for the other OERI components. In addition to providing writing, editing, and graphics services in-house, IS offers a variety of services to people and organizations outside the Department of Education.

IS sells education data on tape and runs special tabulations against OERI data bases, maintains the Department of Education Library, and administers ERIC (the Educational Resource Information Center), the world's largest computerized educational information data base.

In an effort to reach a broader audience Information Services operates a toll-free number through which the Department, other Federal, State, and local agencies, outside organizations, the Congress, the media, and the public can get answers to questions about education statistics, research, technology, and programs.

For more information about OERI or to get assistance with your education questions, call toll-free 800-424-1616 (in the metropolitan Washington, D.C. area call 626-9854), or write:

Information Services, OERI
555 New Jersey Avenue NW.
Washington, D.C. 20208

How to Apply for Funds

OERI announces its intention to support new work through a Request for Proposals or grants competition. A Request for Proposals (RFP) solicits bids from qualified researchers to accomplish a specific task. The *Commerce Business Daily* publishes summaries of all RFP's as they are issued.

A Grants Competition solicits a variety of research approaches to a broad problem area. Grant competitions are announced in the *Federal Register*.

The ERIC Clearinghouse on Adult, Career, and Vocational Education (ERIC/ACVE) is one of 16 clearinghouses in the Educational Resources Information Center (ERIC)—the nation's largest educational information system. Send us your materials and we will make this information available to others.

ERIC serves a wide audience of teachers, administrators, researchers, students, and others by abstracting and indexing documents for announcement in *Resources in Education* (RIE) (a monthly abstract journal) and in a computer database. Documents are made available in microfiche and paper copy from the ERIC Document Reproduction Service (EDRS). Microfiche collections of ERIC documents are also available to the public at over 700 locations throughout the world.

There are some concrete advantages to submitting materials to ERIC. These include free publicity, wide dissemination, quick retrievability via online database search services, and the fact that ERIC documents never go out of print. Additionally, ERIC sends a complimentary microfiche to each contributor when the document is announced in RIE.

Submit your materials to be considered for the database simply by sending them to ERIC/ACVE together with the completed reproduction release form (on the next page).

This brochure describes the scope of ERIC/ACVE, types of documents to send, selection criteria, and other information about the submission process. We encourage you to send your materials today!

The ERIC Clearinghouse on Adult, Career, and Vocational Education is funded by the Office of Educational Research and Improvement, U.S. Department of Education.

U.S. DEPARTMENT OF EDUCATION
Educational Resources Information Center (ERIC)

REPRODUCTION RELEASE (Specific Document)

I. DOCUMENT IDENTIFICATION

Title: _____
Author(s): _____
Corporate Source (if appropriate): _____ Publication Date: _____

II. REPRODUCTION RELEASE

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche and paper copy (or microfiche only) and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce the identified document, please CHECK ONE of the options and sign the release below.

CHECK
HERE

Microfiche
(4" x 6" film)
and paper copy
(8 1/2" x 11")
reproduction

"PERMISSION TO REPRODUCE THIS
MATERIAL HAS BEEN GRANTED BY

[PERSONAL NAME OR ORGANIZATION]

[AS APPROPRIATE]

TO THE EDUCATIONAL RESOURCES
INFORMATION CENTER (ERIC)."

OR

Microfiche
(4" x 6" film)
reproduction
only

"PERMISSION TO REPRODUCE THIS
MATERIAL IN MICROFICHE ONLY
HAS BEEN GRANTED BY

[PERSONAL NAME OR ORGANIZATION]

[AS APPROPRIATE]

TO THE EDUCATIONAL RESOURCES
INFORMATION CENTER (ERIC)."

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but neither box is checked, documents will be processed in both microfiche and paper copy.

SIGN
HERE

"I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce this document as indicated above. Reproduction from the ERIC microfiche by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction of microfiche by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries."

Signature _____ Printed Name _____

Organization _____

Address _____ Position _____

_____ Tel No: _____

_____ Zip Code _____ Date _____

III. DOCUMENT AVAILABILITY INFORMATION (Non-ERIC Source)

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents which cannot be made available through EDRS.)

Publisher/Distributor: _____

Address: _____

Price Per Copy: _____ Quantity Price: _____

IV. REFERRAL TO COPYRIGHT/REPRODUCTION RIGHTS HOLDER

If the right to grant reproduction release is held by someone other than the addressee, please provide the appropriate name and address:

SUBMITTING DOCUMENTS TO ERIC: HERE'S HOW AND WHY

ERIC/ACVE Scope

The ERIC Clearinghouse on Adult, Career and Vocational Education acquires documents in all areas of adult and continuing education from basic literacy training through professional skill upgrading; vocational and technical education covering all service areas for secondary, postsecondary, and adult populations; career education and career development programs for all ages and populations in educational, institutional, business, and industry settings.

Types of Documents to Submit

- Research reports
- Annotated bibliographies
- Conference papers
- Instructional materials
- Essays, position papers
- Program descriptions and evaluations
- Curriculum guides
- Proceedings
- Lesson plans and teaching guides
- Resource guides

ERIC cannot accept nonprint materials, but if there is an associated printed text, we will include it as long as a source of availability for the nonprint component can be cited.

Practitioner-Oriented Materials

ERIC is particularly interested in collecting materials ready for immediate application in the classroom or school. Examples of such materials are fact sheets, games, worksheets, bulletin board ideas, promising practices, public relations materials, and practice handbooks, particularly those that are teacher-made, locally produced, or developed by sources not previously tapped by ERIC.

Selection Criteria

All materials are evaluated by subject specialists according to the following criteria:

- Significance
- Relevance
- Timeliness
- Applicability
- Authority of author
- Comprehensiveness
- Clarity of presentation
- Reflection of emerging trends
- Capability of meeting users' needs
- Generalizability

Every item submitted is given careful consideration. If an item is not selected for ERIC, authors are given an explanation of why it did not meet the selection criteria.

Reproduction Release

To include materials in the database and make them available from EDRS, we must have the permission of document contributors on a reproduction release form. We must have this permission regardless of whether the material is formally copyrighted. Granting this permission to ERIC does not affect your copyright status. If the material is also available from another source, we will cite this availability in the abstract if the information is provided on the release form. A reproduction release form is included on the second page of this brochure.

Materials for which releases are not granted will be considered for announcement only if they are noteworthy educational documents available from a clearly specifiable source and only if this information accompanies the document in some form.

Reproducibility

For microfiche and paper reproduction, documents should be legible and easily readable with clear, dark type on white or light background. They may be typeset, typewritten, photocopied, or otherwise duplicated. Standard 8½ x 11" paper is preferred. Very small type does not reproduce well.

Automatic Acquisitions Arrangements

To ensure the continuous consideration of your materials, you could place ERIC/ACVE on your mailing list to receive automatically copies of documents produced by your organization. To avoid repeated requests for reproduction release, you could complete a blanket release form that would cover any materials submitted by your organization. Contact the Acquisitions Coordinator for details about an automatic arrangement.

Where to Send the Documents

Send two copies to:

Acquisitions Coordinator
ERIC Clearinghouse on Adult, Career, and Vocational Education
National Center for Research in Vocational Education
1960 Kenny Road
Columbus, OH 43210-1090

To speed processing, be sure to send reproduction releases with your documents.

Current Index to Journals in Education (CIJE) Monthly

ISSN: 0011-3565

Size/Binding: 8 1/2 X 11 Paperbound

Publication Schedule: Monthly

Description:

This monthly journal and its companion publications provide an array of reference resources that offer access to the vast world of educational literature. The material contained in these publications is collected and produced by specialists from the sixteen clearing-houses of the Educational Resources Information Center (ERIC), a division of the National Institute of Education. Each monthly issue of the CURRENT INDEX TO JOURNALS IN EDUCATION indexes an average of 1,500 journal articles from approximately 780 publications. Each entry includes complete bibliographic information and a thoughtful annotation written by an ERIC specialist. Access is facilitated by Subject, Author, and Journal Contents indexes. No other publication offers the comprehensive coverage and incisive annotations contained in each issue of CIJE.

Note:

Single issues from April 1979 through December 1985 are available for \$16.25 each in the U.S., Canada, and Mexico; \$18.00 each elsewhere. The back issue for March 1979 is out of print.

Issues published prior to March 1979 were published by Macmillan Inc., 866 Third Avenue, New York, NY 10022.

Use of the CIJE MONTHLY is augmented by the CIJE Semiannual Cumulations and the CIJE Microfiche Cumulations and Annual Updates.

CIJE subscriptions run from January through December. Subscriptions may begin at any time throughout the year but will be retroactive to January of that year.

Order both the CIJE MONTHLY and the CIJE SEMIANNUAL CUMULATIONS at the same time and SAVE!

Available on standing order with a 5% discount.

Prices are listed on the reverse side.

Current Index to Journals in Education (CIJE) Semiannual Cumulations

ISSN: 0011-3565

Size/Binding: 8 1/2 X 11 Clothbound

Publication Date: Semiannually in September and February

Description:

To consolidate the valuable information contained in the CIJE monthly issues in a format suitable for permanent reference, The Oryx Press publishes the CIJE SEMIANNUAL CUMULATIONS. Twice a year six monthly issues are integrated into a single clothbound volume with cumulated Subject, Author, and Journal Contents indexes, which enhance the usefulness of the work.

Resources in Education (RIE) Annual Cumulation

ISSN: 0197-9973

Size/Binding: 8 1/2 X 11 Clothbound

Publication Schedule: Annually in March

Description:

The Educational Resources Information Center (ERIC), which provides the material for the Current Index to Journals in Education (CIJE), also publishes its own journal, Resources in Education (RIE). RIE covers current educational research findings, technical reports, speeches, unpublished manuscripts, and books. The Oryx Press publishes the RIE ANNUAL CUMULATION (clothbound) to bring this valuable information together annually in three easy-to-use volumes. The entries in the two volume Abstracts cite author, source, publication date, availability, and the price of the original report as well as providing a clear 200-word abstract of the contents. The third volume (Index) provides titles and ED (accession) numbers for the documents and report literature in cumulated Subject, Author, Institution, Publication Type, and Clearinghouse Number/ED Number Cross-Reference indexes.

Note:

Microfiche become available as the bound editions are sold out.

RIE Monthly editions are published by the U.S. Government Printing Office, Washington, D.C.

Use of the RIE ANNUAL CUMULATION is augmented by the RIE/CIJE Microfiche Cumulations and Updates.

Order both the ABSTRACTS and the INDEX at the same time and SAVE!

Available on standing order with a 5% discount.

Resources in Education/ Current Index to Journals in Education (RIE/CIJE) Microfiche Retrospective and Semiannual Cumulations, Annual Updates, Abstracts, and Index

Description:

The Educational Resources Information Center (ERIC), which provides the material for the Current Index to Journals in Education (CIJE), also publishes the monthly journal Resources in Education (RIE). RIE covers current educational research findings, technical reports, speeches, unpublished manuscripts, and books. The Oryx Press combines this coverage with that offered by CIJE, bringing the whole world of educational research together. Both are now accessible through these special microfiche cumulations. Covering more than a decade of important educational literature (1966-1980), these CUMULATIONS offer ease of use and tremendous savings of space and storage. A Combined Subject Index provides a completely integrated cumulation of all document and journal article titles, arranged by major descriptors and identifiers, using the latest ERIC vocabulary. You can keep your valuable RIE/CIJE MICROFICHE collection completely up-to-date through ANNUAL UPDATES which contain Main Entry Sections for RIE and CIJE, an accumulated Fiche Index from 1966 to the present, along with the useful Combined Subject Index.

Note:

RIE monthly editions are published by U.S. Government Printing Office, Washington, D.C. All CIJE publications prior to March 1979, published by Macmillan Inc., 866 Third Avenue, New York, NY 10022.

Prices are listed on the reverse side.

EDUCATIONAL RESOURCES INFORMATION CENTER

The administration's federal budget proposal for FY 1983 called for the abolition of the Department of Education, an entity that was established in 1980 (30 Stat. 668), and its reorganization as a subcabinet foundation with reduced regulatory power and funds. As of 1982, however, the Department (ED) survives. The Educational Resources Information Center (ERIC), a nationwide information network, is a unit of the National Institute of Education (NIE) within the Education Department. Its purpose is to acquire, index, and disseminate timely education-related materials for the use of teachers, administrators, researchers, students, and other interested persons. This is accomplished by a central coordinating staff in Washington, DC, and sixteen clearinghouses located at universities or professional organizations across the country. Each clearinghouse is responsible for a particular subject area of education and for collecting all relevant unpublished, noncopyrightable material of value in that area. Clearinghouse areas include rural education; adult, career, and vocational education; reading and communication skills; and information resources. The latter, known as ERIC/IR, is located at Syracuse University in New York and is sponsored by the university's School of Information Studies and School of Education.

BIBLIOGRAPHIC TOOLS

Two major indexing/abstracting services provide the bibliographic control of educational materials screened by the clearinghouses and accepted into the ERIC database. *Resources in Education* (RIE) announces "document" literature, and *Current Index to Journals in Education* covers "journal" literature.

RESOURCES IN EDUCATION

RIE, a monthly abstract journal, is sold through the Superintendent of Documents and is distributed to depository libraries (ED 1.310; item 466-A). It consists of a main entry section composed of "resumes" and indexes by subject, author, institution, publication categories (books, dissertations, reports, audiovisual materials, etc.), and clearinghouse number/ED number cross-references. Other features of RIE include New Thesaurus Terms, ordering information, and a current list of ERIC clearinghouses. Semiannual indexes (January-June; July-December) are available for sale or on deposit. An annual cumulative index by subjects, authors, and institutions is available for sale from the Oryx Press, Phoenix, Arizona.

On July 19, 1982, Survey 82-16 that accompanied *Depository Shipping List No. 17,246* offered depository libraries the opportunity to subscribe to *Education Documents Announced in RIE* (ED 1.310/2; item 466-A-3). The annotation for this new category conveyed the impression that *all* the documents listed in RIE would be made available on microfiche. The September 1982 issue of *Administrative Notes* apologized for this inaccuracy, stating that "only those publications printed by the National Institute of Education or otherwise federally funded will be distributed to depository libraries. Thus you will not receive all of the documents announced in RIE. Under Title 44, section 1903, GPO is only authorized to distribute Government publications." Unfortunately, even this putative clarification was misleading. It remained for ERIC officials to provide the correct information. The fact is that *Education Documents Announced in RIE* comprise somewhat less than 10 percent of ERIC's total announcements. The 100 or so documents per issue of RIE obtained from ERIC by GPO for this microfiche shipment represent *only* those Department of Education prepared or sponsored documents that have been issued by the entity *and* that have met ERIC selection criteria. They do not necessarily represent the total departmental output.

CURRENT INDEX TO JOURNALS IN EDUCATION

CIJE is a monthly guide to current periodical literature in education. Articles published in almost 80 education and education-related journals are indexed and abstracted by the sixteen clearinghouses plus the San Mateo (California)

3667

Educational Resources Center (SMERC), which provides information on journals that do not fall within the subject disciplines of the regular clearinghouses. Copies of many of the articles included in CIJE are available from University Microfilms International, Ann Arbor, Michigan, indicated by the words "(Reprint: UMI)" in the main entry section.

The main entry section of CIJE includes full bibliographic information and an "annotation" (abstract) of the article, followed by indexes for subjects, authors, and journal contents. Prior to 1982, CIJE was not a depository library item; the monthly issues and semiannual cumulations were and continue to be published by Oryx Press and sold to libraries in a printed edition. Beginning in January 1982, however, CIJE became a depository item (ED 1.310/4; item 466-A) and was made available to depository institutions in a microfiche format.

THESAURUS OF ERIC DESCRIPTORS

The *Thesaurus of ERIC Descriptors*, ninth edition, was published in a clothbound edition by Oryx Press in 1982. In addition, it is distributed through GPO on microfiche to depository libraries. The *Thesaurus* is a controlled vocabulary of educational terms called "descriptors" which conform to the major terms used in the subject indexes of both RIE and CIJE. Subjects can be located through a main Alphabetical Display providing a variety of information including terms no longer valid; a Rotated Descriptor Display grouping related terms in an alphabetical index; a Hierarchical Display providing "generic trees" for each descriptor; and Descriptor Groups serving as a "table of contents" for the *Thesaurus*. The *Thesaurus* is kept current by the sections in both RIE and CIJE called New Thesaurus Terms until a new revision of the basic *Thesaurus* is published.

IDENTIFIER AUTHORITY LIST

In addition to descriptors, "identifiers" (which are *not* found in the *Thesaurus*) are semi-controlled retrieval terms intended to add a depth to indexing that is not always possible with descriptors alone. An identifier is usually the name of a specific entity like a project, public law, organization, item of equipment, group, person, or place. It may also be a new concept, under consideration for descriptor status once its scope, definition, and "staying power" have been established. Transitory identifiers or those represented in the literature infrequently do not achieve descriptor status.

The *Identifier Authority List (IAL)* is an alphabetical arrangement of preferred identifier forms that are used to achieve consistency in indexing and searching alike. Issued semiannually in printed form, it serves as a companion volume to the *Thesaurus*. Additional identifiers continue to be added to the IAL as a result of the monthly RIE and CIJE input to the database, and items are purged from the IAL as they are upgraded to descriptor status and shifted to the *Thesaurus*. The IAL is available for sale from the ERIC Processing and Reference Facility, Bethesda, Maryland.

DUPLICATION OF INFORMATION

While a few documents in RIE are also found in GRA&I in COSATI Subject Category 5 (Behavioral and Social Sciences), the "incursion is numerically

106 / 5—Technical Report Literature

insignificant."¹⁶ Approximately 4 percent of RIE duplicates information found in *Dissertation Abstracts International*. However, there is a 25 percent overlap in the journals regularly scanned and indexed in CIJE and *Psychological Abstracts*. A much greater duplication is found "between CIJE and *Education Index ...* though CIJE covers about three times the number of journals as does *Education Index*."¹⁷

ONLINE SEARCHES

The documents and journals in RIE and CIJE may be searched online via DIALOG, ORBIT, and BRS.

Figures 8 and 9 show, respectively, sample main entries for RIE and CIJE. Main entry arrangement is by ERIC accession number; there is also a clearinghouse accession number which identifies the clearinghouse responsible for the preparation of the bibliographic information in each entry.

Figure 8
Resources in Education: Sample Entry

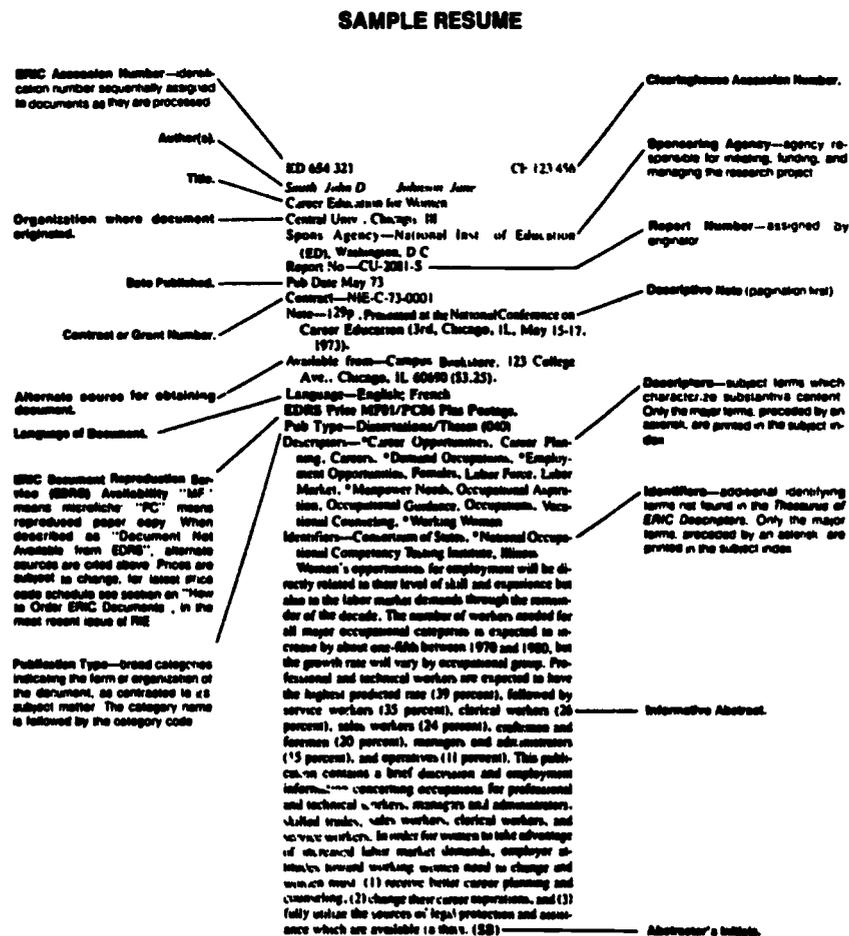

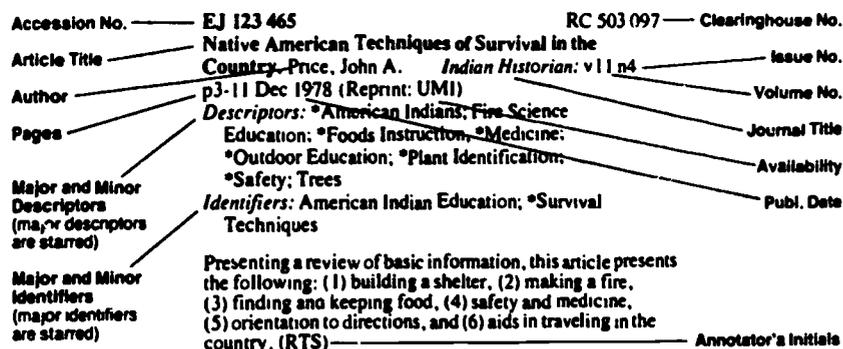

Figure 9
Current Index to Journals in Education: Sample Entry

Main Entry Section

Complete information about each article included in CIJE is given in the Main Entry Section, which is arranged by Clearinghouse and sequential EJ numbers.

OTHER ERIC PRODUCTS AND SERVICES

Most documents announced in RIE may be purchased from the ERIC Document Reproduction Service (EDRS) in Arlington, Virginia, in paper copy or microfiche. Each issue of RIE contains an order form, which one can photocopy, that gives the current unit price schedules for paper copy and microfiche.

EDRS special microfiche products include *RIE Cumulative Subject Index, 1977-1980*, *RIE Cumulative Institution Index, 1977-1980*, *RIE Cumulative Title Index, 1966-1980*, *RIE Cumulative Author Index, 1966-1980*, and *RIE/CIJE Cumulative Descriptor/Identifier Usage Report, 1969-1980*. The latter is a concise cumulative index containing in four separate lists all the terms used in each publication with the ED or EJ numbers for the documents or articles to which they were assigned. The fiche provides the only published access to minor identifiers. A *Directory of ERIC Microfiche Collections*, revised periodically, lists subscribers to the collections alphabetically by state and name of institution.

In addition to collecting the literature of education for announcement in RIE and CIJE, the ERIC clearinghouses analyze and synthesize information into research reviews, bibliographies, state-of-the-art studies, and interpretive studies on topics of interest to users. Called *Information Analysis Products (IAPs)*, these studies are usually available directly from the appropriate clearinghouse. When announced in RIE, they are available in paper copy or microfiche from EDRS. Periodically, ERIC prepares bibliographies of its IAPs, and these are assigned an accession number and abstracted in RIE.

Microfiche cumulations of RIE (1966-1980) and CIJE (1969-1980) are available from Oryx Press. The fiche consist of separate RIE and CIJE main entry cumulations and a combined RIE/CIJE subject index containing the major descriptors and identifiers assigned to all abstracts. The combined subject index is based on the ninth edition of the *Thesaurus of ERIC Descriptors* and references

110 / 5 - Technical Report Literature

the titles of the items indexed rather than simply the ED or EJ accession numbers. Moreover, a fiche index is included in the combined subject index, a feature which guides the user from any given subject index term to the exact fiche number and location of that term. The basic RIE and CIJE cumulations are updated annually.

These and many other products and services are announced in issues of RIE and CIJE, in brochures issued by the National Institute of Education, in *Users Interchange*, a mimeographed newsletter prepared by the staff of the ERIC Processing and Reference Facility, Bethesda, Maryland, and in announcements from the clearinghouses. For example, *ERIC/IR Update*, a bulletin issued periodically by the Clearinghouse on Information Resources, contains useful news of ERIC products and services, trends, and developments for library and information science professionals.

DOCUMENTS EXPEDITING PROJECT

Mentioned earlier in this chapter, the Documents Expediting Project (DocEx) is located within the Exchange and Gift Division of the Library of Congress. It provides member libraries a centralized service for acquiring non-depository publications generally not available for purchase either through GPO or from the issuing agency.

In 1980 membership in DocEx included 124 university, public, and special libraries and other organizations. Thirteen new libraries joined the project during the year. Moreover, in 1980 DocEx sent 4,022 titles to member libraries, "an increase of 1,000 titles over the previous year."¹⁸ Annual subscriptions range from \$225 to \$750 in increments of \$25; members paying the higher rates enjoy priority in distribution of titles when a limited number of copies are available.

Although DocEx affirms that one copy of every publication it receives for distribution to subscribers is sent to the Superintendent of Documents for inclusion in the *Monthly Catalog*, a number of libraries have complained that "shelves of materials" distributed by DocEx await the assignment of SuDocs classification numbers.¹⁹

Every new item offered by the Superintendent of Documents reduces the attractiveness of DocEx to depository libraries. Over the years, depository institutions that have looked to the Project for acquiring series like committee prints, Senate executive reports, Senate treaty documents, and CIA Reference Aids, have found that these titles are now available for deposit in either paper copy or on microfiche. Nevertheless, the Project continues to serve a useful purpose for libraries, and it is patently a boon for non-depository institutions.

CONCLUSION

In addition to federal agencies involved in the sale, distribution, and bibliographic control of information produced by or for other federal entities, a growing number of commercial firms supply libraries and other institutions with non-depository publications. For example, Congressional Information Service provides many congressional and statistical non-depository series on microfiche, numerous federal district and appellate court decisions no longer published by the federal government are issued by several private companies, and the Readex Microprint Corporation offers all non-depository titles listed in the *Monthly Catalog* since 1953.²⁰

ERIC FACILITY
ATTN: W.T. BRANDHORST
933 RUGBY AVENUE-SUITE 303
ETHESDA, MARYLAND 20014

Dear Sir:

Computer Microfilm has been granted permission to furnish ERIC Microfiche without the envelopes that protect the fiche from scratches and fingerprints. To keep your fiche in a readable condition it is in your best interests to use Microfiche envelopes.

These envelopes are now available at the following prices:

1,000	-	\$36.98M
5,000	-	\$12.33M
25,000	-	\$11.58M
50,000	-	\$11.14M
100,000	-	\$10.32M
250,000	-	\$ 8.98M

The controlled pH level is 8.4 pH to 9.3 pH, well over the required ANSI (American National Standards Institutes) minimum level of 7.5 pH to protect fiche from acids and other impurities found in paper.

Terms are Net 30 days with shipping charges added to the invoice.

We look forward to serving you.

Sincerely yours,

James R. Cullifer

ERIC PUBLICATIONS

MEETINGS

LIST OF ATTACHMENTS

The ERIC Administrative Bulletin (EAB) is prepared by the ERIC Processing and Reference Facility on the basis of material submitted by all components of the ERIC system. EAB articles are reviewed and approved by Central ERIC before publication.

The EAB is intended to be the "journal" of the ERIC system and a major means for the decentralized components of ERIC to communicate and interact with one another. The EAB is also a permanent record reflecting most of the major events in the life of the ERIC system (such as personnel changes, Standing Order Customer changes, etc.) and providing in printed form essential documents (such as ERIC policy and priority statements, Clearinghouse scope statement modifications, ERIC Processing Manual revisions, etc.) Submissions to the EAB are to be sent (using the standard form) to your respective monitor. The deadline for input to each monthly issue is the 10th of the month.

ACTION ITEMS

Indexing Advisory -- Mandatory Educational Level Index Terms

How is it that, after all these years, ERIC indexers still forget to assign mandatory educational level Descriptors ("levelers") and that indexing supervisors still fail to stress the importance of levelers and to detect their omission? Why do we so often forget one of the major rules of ERIC indexing, i.e.:

"One or more of these special Descriptors 14 broad levelers must always be used to index educational level when the document deals with such levels. To assure assigning of an educational level Descriptor when appropriate, indexers are encouraged to select the educational level term first, before further indexing."

(EPM, p. VII-21)

All Clearinghouse processing supervisors are surely noticing the many leveler term additions made by the Facility on the returned "ED" LIDS. But, what about the "EJs"? To help illustrate the problem, I have attached a recent letter from a disgruntled user and my somewhat red-faced reply (see Attachment 1). I obscured certain words in the user's letter to avoid embarrassing anyone in particular. All of us share the blame, but ultimate responsibility for the application of levelers falls on the shoulders of the ERIC Clearinghouse indexers. So, I would ask you indexers to get together in your Clearinghouse and to remind yourselves of mandatory levelers and their importance in everyday retrieval. If only all our problems could be solved as easily as this one!

...Jim Houston (ERIC Facility)

EDRS Granted Price Increase

EDRS has been granted a price increase, effective October 20, 1986. New EDRS Order Forms have been sent to all ERIC components. The prices are:

<u>Subscriptions:</u>	Regular Diazo Fiche	.08 per fiche
	Silver Fiche	.168 per fiche
<u>Special Orders:</u>	Special Collections	.132 per fiche
	Backfile Collections	.078 per fiche
<u>On Demand Orders:</u>	Microfiche	.78 (1-4 fiche) +.16 for each additional fiche
	Paper Copy	1.85 (1-25pages) +1.85 (for each additional 1-25 pages)

...Vic Fortin (EDRS)

SEARCHING

DIALOGLINK Found By FL to Be a Great Money-Saver

A summer issue of Chronolog advertised a software package called DIALOGLINK that is designed to help searchers organize search strategies offline and keep track of online charges. ERIC/CLL purchased the \$10 demonstration diskette from DIALOG and used it on our IBM-PC to update all of our ready-made searches. The DIALOGLINK documentation is clear and well-written, and the search program is easy to use. All normal search functions and telecommunications networks are available when using DIALOGLINK. Once the phone numbers are entered into the configuration program, DIALOGLINK automatically calls them every time the searcher logs on, transferring from one number to the next if a busy signal is received. DIALOGLINK allows the searcher to type and edit the search strategy offline, then either save it or send it online immediately. While the search is being executed online, the screen displays a variety of information: the results of the sets that have been sent and processed; the sets that are currently being processed; and the sets that have yet to be processed. The sets waiting to be processed are in what DIALOGLINK calls a "buffer zone," and the searcher can add to or modify anything in the buffer zone while the processing of other sets continues. The ability to type and edit both offline and simultaneously with processing can cut online time drastically. We have decided to purchase the full DIALOGLINK software package for \$125, and expect that it will rapidly pay for itself in decreased online time. If you have questions or would like more information about DIALOGLINK, contact Laura Wenzel at ERIC/FL.

...Laura Wenzel (FL)

DIALOG'S ERIC Bluesheet Revised

DIALOG has published a revised ERIC Bluesheet that reflects the various file changes of the last few years. The revision (duplicated here as Attachment 2) replaces the older Bluesheet dated December 1980.

...Ted Brandhorst (ERIC Facility)

"DIALOG on Disc" Offers ERIC as First Product

At the Onlire '86 conference in Chicago on November 4, 1986, DIALOG announced that the ERIC database would be its first CD-ROM product.

A copy of the DIALOG Price List and a description of the system for this product are provided as Attachment 3.

...Ted Brandhorst (ERIC Facility)

ERIC's DIALOG Bluesheet -- in Japanese!

DIALOG has very kindly sent us an example of their Bluesheet on ERIC translated into Japanese (see Attachment 4). We have requested that they send us any other such translations that they come across.

...Jim Houston (ERIC Facility)

SDC Search Service (ORBIT) Sold to Pergamon

The SDC Search Service (more recently called the ORBIT Search Service) was recently sold to the Pergamon Group of Companies. A copy of the announcement and Press Release appears as Attachment 5.

Only about 1% of ERIC online usage is done via SDC/ORBIT. It will be interesting to see whether this percentage changes under the new management.

...Ted Brandhorst (ERIC Facility)

SilverPlatter and ORI Announce That ERIC Backfile Will Be Available on Two Discs (1966-1975); 1976-1982) in 1986

Originally, SilverPlatter and ORI announced that the ERIC backfile would be subdivided into two discs for RIE and one disc for CIJE (a total of three discs). It has subsequently been discovered that the backfile will fit on two discs if the data are combined and the total available disc space is utilized.

In view of the advantage to the user in having fewer discs, it is now planned to issue the ERIC backfile on two chronologically organized discs, with RIE and CIJE data combined on both discs. Disc one will contain data for 1966-1975. Disc two will contain data for 1976-1982. The price for the backfile will be a flat one-time charge of \$2000. Orders are being accepted for the backfile, with delivery anticipated before the end of the calendar year.

NETWORK NEWS

Council of ERIC Directors -- ERIC Facility Report

The ERIC Facility presented a brief report at the meeting of the Council of ERIC Directors on September 10-12, 1986. A copy of the summary report appears as Attachment 6.

...Ted Brandhorst (ERIC Facility)

MULTILINK ID's

When using MULTILINK to request information or materials, please always identify your Clearinghouse. When we receive a message from a person not yet in the ERIC Directory, we have no way of telling where to send the response.

...Pat Brown (ERIC Facility)

Special Projects at the ERIC Clearinghouses

At the recent COED annual meeting, two lists of "special projects" were circulated, together with brief information on selected projects. Since there was some overlap between the two lists, we have prepared a composite list for the convenience of EAB readers.

The titles of the projects, and their host Clearinghouse, are noted below. Attachment 7 provides additional detail on selected projects.

<u>Clearinghouse</u>	<u>Project</u>
CE	Disseminating locally developed practices through ERIC
CS	Exemplars of excellence: high school literary magazines
EA (1)	Produce and disseminate a third annual issue of <u>Research Roundup</u> to NAESP members (elementary school principals)
(2)	Produce and disseminate four additional issues of the <u>Best of ERIC on Educational Management</u> to AASA members (superintendents).
EC	Gather, analyze, and synthesize information on the U.S. Department of Education's Special Education Programs (SEP programs), for purposes of interagency information dissemination

- HE (1) Work with DIALOG to produce computer search workshops at colleges and universities (DIALOG-ERIC/HE Classroom Instruction Project)
- (2) Expand coverage of the Chronicle of Higher Education in CIJE (not every article, but all "major" articles)
- IR (1) Microcomputer-Based Bulletin Board
- (2) MICROSearch Retrieval Software for the IBM-PC
- (3) Conclusion Brochures Project: a new product designed to summarize research findings on selected topics. ERIC/IR will coordinate production by the Clearinghouse of these 500-600 word brochures which will also cite approximately five to six key references. Printed on a standard size sheet of folded paper, each brochure will have a cover, two columns of text, and a back panel for the references.
- JC (1) Search Strategy File (Prestructured "hedged" that can save users time when searching broad subject areas)
- (2) Vocabulary Review Group (VRG) Chairmanship
- PS ERIC Digests Online (EDO) with ED-LINE
- SO COED Activities (Costs for)
- UD ERIC Yearbook (Trends and Issues) Project. Covers coordination and editing of chapters submitted by all ERIC Clearinghouses.
- ERIC FACILITY (1) Store and distribute selected OERI publications in response to document requests received from the public and other sources.
- (2) Design and maintain a database covering files of numeric/statistical data dealing with education (start with OERI/CES files).

ERIC Featured in ALA Yearbook of Library and Information Services

A review of the current status of the ERIC system is included in the 1986 volume of the ALA Yearbook (See Attachment 8). This review is an annual feature, with copy usually written by Don Ely and Barbara Minor of IR.

...Pamela W. McLaughlin (IR)

FL Develops ERIC Anniversary Notice For Use by Journals Indexed by CIJE

In connection with ERIC's 20th Anniversary, the FL Clearinghouse has developed a notice that can be used by journals regularly covered by CIJE.

The notice represents an innovative approach to celebrating ERIC's birthday and may be of interest to other Clearinghouses. It is reproduced here as Attachment 9.

...Laura Wenzel (FL)

DANTES (Defense Activity for Non-Traditional Education Support)

An often overlooked outlet for ERIC Clearinghouse publications is the U.S. military services.

DANTES (the Defense Activity for Non-Traditional Education Support) provides nontraditional (that is, outside the formal classroom) educational programs for U.S. servicepersons. Although DANTES is administered by the Navy, it serves all branches of the armed forces. One of its duties is to distribute informational materials to Education Centers serving all active duty military personnel worldwide.

Peter E. Peters, manager of reference publications for DANTES, recently informed us that one of our products (the April 1986 expanded edition of The Best of ERIC on Educational Management on "Microcomputers and Instruction") has been selected for this worldwide distribution. DANTES will reproduce 5,000 copies and send them to education service officers who coordinate the voluntary education programs.

In a recent phone conversation, Mr. Peters said he receives newsletters from all the Clearinghouses and watches for materials that would be useful for DANTES. Last fall, an advisory panel reviewed a number of publications from the Clearinghouses; although ours was the only one to be selected at that time, Mr. Peters is hopeful others will be chosen. One topic he is particularly interested in at present is "student study skills". He would appreciate receiving any Clearinghouse publications on this or other topics that may be of use to servicepersons pursuing a nontraditional education.

...Stuart C. Smith (EA)

CE Receives Request From "The Fench"

CE recently received a request from a staff member of the Presidential Commission on the Bicentennial of the Constitution for materials and information on adult literacy. The materials were to be for the use of former Chief Justice Warren Berger. We sent him two information analysis papers, two ERIC digests, and a mini-bib on adult literacy. The caller said, "The Chief Justice will be very grateful!"

WORKSHOPS and SITE VISITS

State Scanning Network (SSN) Visits HE

As a result of a referral to HE by a member of the ERIC Redesign Study Group, Lauren Cook of the State Scanning Network (SSN) met with HE's Laura Casal on August 6. The SSN is affiliated with the National Governors Association and is an information network serving state policymakers and governors. Ms. Cook was given a general introduction to ERIC and a demonstration of online searching of the ERIC database. She noted that changes in the Federal involvement in higher education have made higher education a top priority within state government. SSN is still in the planning stages and ERIC will be instrumental in providing access and dissemination of its information.

Other Clearinghouses interested in putting SSN on their Digest distribution lists can use the following address: Lauren Cook, State Scanning Network (SSN), 400 North Capitol St., Suite 291, Washington, DC 20001

...Lynn Barnett (HE)

HE Visits Library of Congress (LC)

Laura Casal, HE User Services Coordinator, spent the morning of October 10 at the Library of Congress, reviewing services available to the public. Time was spent in the computer services room, microfilm room, and general information area. HE frequently refers users to the Library of Congress for such things as copies of dissertations, and it was nice to once again be reassured by the quality of LC's services and the helpful attitude of its staff.

...Lynn Barnett (HE)

HE Does Workshop at Organization of American States (OAS)

Education is a hot topic at the Organization of American States (OAS). So discovered Laura Casal (HE) when she did an October 15 workshop on ERIC and other education-related databases for the OAS library staff. Laura was very impressed by the volume of questions they receive in the area of education. Ms. Beverly Wharton of OAS thought ERIC could answer many of the general questions she receives concerning education. Any Clearinghouse wanting to add OAS to its Newsletter or Digest mailing list can direct mailings to: Organization of American States, Library, 17th Constitution Ave., NW, Washington, DC 20005 (ATTN: Beverly Wharton)

...Lynn Barnett (HE)

HE Meets the Press

Laura Casal met with John Maclean, a reporter for the Chicago Tribune, to discuss college costs and their affect on higher education institutions, faculty, and students. Mr. Maclean was delighted to discover the ERIC database and requested several computer searches. The meeting also included a stop at the library of the American Council on Education and a meeting with librarian Mary Font. Mr. Maclean was referred to the HE Clearinghouse by Jim Bencivenga.

...Lynn Barnett (HE)

PERSONNEL

Smarte, Beling Resign -- Conrad Joins CEC/ERIC Staff

Lynn Smarte and Dorothy Beling, key staff members at the ERIC Clearinghouse on Handicapped and Gifted Children, resigned their positions during the spring of 1986. Their excellent contributions to the entire ERIC system will be sorely missed.

Lynn Smarte, Associate Director for User Services, was an ERIC employee for 12 years. In addition to supervising EC's responses to the field, Lynn developed user services products, was an online searcher par excellence, and was a popular giver of ERIC workshops. Lynn became a mother for the first time on February 10 and has decided to fulfill her motherhood duties on a full time basis.

Dorothy Beling had a tenure with EC that spanned 14 years. She first served the Clearinghouse as an abstractor/indexer, but soon took on greater responsibility. For the past eight years she has been the Director of Database Building Activities. Dorothy actively participated in the ERIC Technology Committee and also used her specialized knowledge to bring major improvements to EC's inhouse technology capabilities. Dorothy's decision to leave CEC is prompted by a desire to make a major career change.

3697

Judi Conrad has been employed as Associate Director for Management, a position that combines the ERIC responsibilities formerly carried out by Lynn and Dorothy. As most EAB readers already know, Judi comes to EC with excellent credentials in the ERIC operation. She has just finished a five year assignment with the Federal government, a large part of which was spent as a Clearinghouse monitor with Central ERIC. Prior to that she spent five years at the ERIC Clearinghouse on Rural Education and Small Schools as an indexer/abstractor and as an outdoor education scope monitor. We welcome Judi Conrad to EC.

...Donald K. Erickson (EC)

Major Staff Changes at TM

Don Melville retired in August 1986 from his position as Director of ERIC/TM. The new Director is Gary Echternacht.

Emma Gonzales Stupp resigned in July as Associate Director of ERIC/TM to move with her family to North Carolina. Betsy Smith, formerly User Services Coordinator, has been named the new Associate Director.

Lucie Olson is the new User Services Coordinator.

A new Indexer/Abstractor, Jamileh Amirzafari, arrived at TM in August. Jamileh comes to TM from the Library of Princeton University.

Jean Killmer has replaced Pat Tomko as Secretary.

Your patience while everybody settles into their new assignments is appreciated.

...Betsy Smith (TM)

Charles Missar Retires From OERI

After almost thirty-three years with the Federal Government, Charles Missar has retired. He has been known for his almost limitless knowledge of sources and resources in both the education and the library fields. He was a teacher in his native Cleveland before serving in various capacities as reference librarian/referral specialist with the U.S. Weather Bureau, the U.S. Navy, the Defense Documentation Center, and the Library of Congress, then joining ERIC in 1966 as one of the "pioneers" of the system. His breadth of knowledge was only matched by his uncommon courtesy, helpfulness, and willingness to use any and all resources to answer a client's question. All who worked with him at CERIC and OERI will miss this true gentleman. We wish him the best!

...CERIC

3698

Staff Changes at HE

We should have known it was too good to be true! HE's recently acquired secretary, Suzanne Trapasso, has decided her heart is really in teaching and has left us for 20 sixth graders.

On a much happier note, Laura Casal has finished her Master's degree in American literature and has come back to the Clearinghouse full-time. We're excited about expanding our user services area.

...Lynn Barnett (HE)

SO Welcomes Cheryl Cohen as User Services Director

SO welcomes Cheryl Cohen to the staff as its new User Services Director. Cheryl has had many years of experience in User Services/Outreach. Cheryl would like to receive copies of the Clearinghouses' newsletters and says thanks in advance for the help.

...Jane Henson (SO)

Berkner to Head Oryx Press New York Office

"The Oryx Press is happy to announce the appointment of Dimity S. Berkner, Vice President for New Business and Market Development. Dimi heads the new regional office for Oryx Press located at 121 W. 27th St., Suite 302, New York, NY 10001. She can be reached at (212) 206-7312 and will be glad to see members of the ERIC family whenever they visit New York City."

...Oryx Press

New Secretary at HE

HE announces Juanita Nur as its new Clearinghouse secretary. She comes to us with experience at the Department of Education, among other places, and is a welcome addition to our staff.

Increasing Student's Learning: A Faculty Guide to Reducing Stress Among Students
ASHE-ERIC Higher Education Report No. 4, 1986, by Neal Whitman, David Spendlove,
and Claire Clark, 84 pp.

Examines the connection between stress and learning. The authors, all on the faculty of the University of Utah School of Medicine, offer many useful suggestions for faculty to help students cope with pressure and also to avoid causing undue stress within the classroom. (\$10.00 from the Association for the Study of Higher Education, One Dupont Circle, Suite 630, Washington, DC 20036 10% discount for any 15 or more; 20% discount to book stores).

Blue Ribbon Commissions and Higher Education: Changing Academe from the Outside. ASHE-ERIC Higher Education Report No. 2, 1986, by Janet Johnson and Lawrence Marcus, 96 pages.

Reviews situations that prompt establishment of blue ribbon commissions and focuses on practical factors that makes them work effectively. A good book for policymakers looking at reform. (\$10.00 from the Association for the Study of Higher Education, One Dupont Circle, Suite 630, Washington, DC 20036. 10% discount for any 15 or more, 20% discount to book stores).

Responsive Professional Education: Balancing Outcomes and Opportunities.
ASHE-ERIC Higher Education Report No. 3, 1986, by Joan Stark, Malcolm Lowther,
and Bonnie Hagerty, 127 pages.

Examines professional education at the undergraduate level and identifies six competencies and five professional attitudes that should be generic outcomes of a professional preparation program. (\$10.00 from the Association for the Study of Higher Education, one Dupont Circle, Suite 630, Washington, DC 20036. 10% discount for any ten or more, 20% discount to book stores).

UNIVERSITY OF NORTHERN IOWA · Cedar Falls, Iowa 50613

Library
Reader Service Department
319-273-2438

August 27, 1986

Mr. Ted Brandhorst
ERIC Processing and Reference Facility
4833 Rugby Ave., Suite 301
Bethesda, MD 20814-3073

Dear Mr. Brandhorst:

I am writing about a problem I have encountered on several occasions when performing online searches in the ERIC database.

Simply stated, there appears to be a significant percentage of records put into the ERIC database since 1975 which have not been assigned an appropriate mandatory educational level descriptor.

I have enclosed a copy of a search that illustrates this point. It is a search for materials on predicting student success in [REDACTED] class on the secondary level.

After creating an initial set by combining the terms [REDACTED] and predict \$ (102 items), I narrowed it even further by limiting it to materials since 1975 (when educational level descriptors became mandatory), which left a set of 57 items. Next, those items assigned a secondary education descriptor (secondary-education, elementary-secondary-education, junior-high-schools, high schools) were selected which produced a set of 24 items. Finally, those 24 items dealing with secondary education, as well as (for ease of illustration) items concerning higher-education and two-year-colleges, were removed from the set of 57. What remained was a set of ten items. In theory, none should deal specifically with secondary education. An examination of the ten items however reveals that six of the ten do indeed deal with some level of secondary education.

Depending on one's perspective, this represents an error rate of either 60% (6 of 10 remaining items), 20% (6 of a total of 30 items concerning secondary education), or 10.5% (6 of 57 original items). In terms of my client's interests, the error rate is 20%. If I had depended entirely on the educational level descriptors, we would have missed 20% of the relevant citations.

Is there an explanation for this? After examining the material about mandatory educational level descriptors in ERIC Thesaurus and the ERIC Processing Manual (copies enclosed), there doesn't seem to be much alternative than to conclude errors in indexing.

This problem really concerns me, as I encounter it on a recurring basis. While I do

3707

Mr. Ted Brandhorst
Page 2
August 27, 1986

use the educational level descriptors, I no longer trust them to be assigned consistently. As a result, searches are more complex, and more costly for my clients.

I would appreciate hearing your comments on the matter.

Sincerely,

Tom Kessler

September 16, 1986

Mr. Tom Kessler
University of Northern Iowa
Library
Reader Service Department
Cedar Falls, IA 50613

Dear Mr. Kessler:

Your letter of 8-27-86 on mandatory levelers was given to me for a reply. We regret the absence of mandatory levelers on the six citations mentioned in your letter. There can be no doubt that the omissions were errors in indexing.

The ERIC system constantly strives for consistency and accuracy in indexing. However, realization of perfection in this area has always been elusive. ERIC's indexing is decentralized across 16 subject-area Clearinghouses and nearly 100 full- and part-time indexers. The level of editorial control among the Clearinghouses fluctuates drastically and seems to vary year-to-year with levels of operational funding. The ERIC Facility has been responsible over the years for an additional centralized edit of the "ED" portion of the database. This includes a check of the leveling Descriptors, but with the equivalent of 3½ people reviewing 1100-1200 citations and accompanying documents every month, it can be understood why a single cataloging element among many in a complex scheme might occasionally be overlooked. The "EJ" portion of the database is currently reviewed centrally by Oryx Press after receiving monthly input from the Clearinghouses. This, however, is principally a spelling check and has never included monitoring the indexing content. The U.S. Department of Education has been considering letting the ERIC Facility edit the "EJ" input, and, should this occur, some additional consistency will be seen in the database input.

None of this, of course, excuses erroneous indexing, but I want to convey to you our continuing commitment to a cleaner database and a hope that your "trust" of ERIC's leveling Descriptors may someday be restored. In the meantime, I will add levelers to the six records in question in the ERIC Master file; these updates will show on the online vendor files only after the next general reload, which should occur within the next couple of years. I will also circulate your letter among the ERIC Clearinghouses via our internal administrative bulletin; perhaps, this will motivate Clearinghouse indexers to be a little more careful in remembering to assign mandatory levelers.

I appreciate your comments and hope that ERIC better serves you and your clients in the future.

Sincerely,

Jim Houston
Lexicographer

ERIC Bluesheet Revised

We are including a revised Bluesheet For **ERIC (File 1)** with this month's **CHRONOLOG**. The revision reflects several changes and enhancements to the file that have been announced in the **CHRONOLOG** over the past few years. This revision replaces the earlier Bluesheet, issued in December 1980. Please discard the old File 1 Bluesheet at this time. □

ERIC

DIALOG® INFORMATION RETRIEVAL SERVICE

FILE DESCRIPTION

ERIC is the database of educational materials collected by the Educational Resources Information Center of the U.S. Department of Education. ERIC consists of two subfiles: (1) *Resources in Education* (RIE), covering documents, and (2) *Current Index to Journals in Education* (CIJE), covering approximately 750 journals and serial publications. Most records in ERIC contain informative abstracts.

SUBJECT COVERAGE

The ERIC database is organized by the following sixteen broad subject areas, each one of which is the responsibility of a separate ERIC Clearinghouse:

- Adult, Career, and Vocational Education
- Counseling and Personnel Services
- Elementary and Early Childhood Education
- Educational Management
- Handicapped and Gifted Children
- Higher Education
- Information Resources
- Junior Colleges
- Languages and Linguistics
- Reading and Communication Skills
- Rural Education and Small Schools
- Science, Mathematics, and Environmental Education
- Social Studies/Social Science Education
- Teacher Education
- Tests, Measurement, and Evaluation
- Urban Education

SOURCES

The RIE subfile contains records of many different types of documents: research/technical reports, conference papers, conference proceedings, program descriptions, opinion papers, bibliographies, state-of-the-art reviews, legal/legislative/regulatory materials, dissertations, classification schemes, teaching guides, curriculum materials, lesson plans, course descriptions, pamphlets, guides and many other "fugitive" materials.

The CIJE subfile contains records of journal articles and other items contained in copyrighted serial publications. CIJE covers approximately 750 professional journals that are education-related or that regularly contain education-related articles.

DIALOG FILE DATA

Inclusive Dates: RIE (1966 to the present); CIJE (1969 to the present)
Update Frequency: Monthly (approximately 2,600 records per month)
(RIE approximately 1,100 records per month)
(CIJE approximately 1,500 records per month)
File Size: 591,715 records as of July 1986

DOCUMENT DELIVERY

About 98% of the items in the RIE file can be purchased in paper copy and/or microfiche from the ERIC Document Reproduction Service (EDRS). These items may be ordered online via DIALORDERSM using ORDER ERIC. Refer to the ERIC Yellowsheet for details. Articles in the CIJE file can be consulted in the original journals or they can be purchased from journal article reprint services (e.g., UMI Article Clearinghouse).

ORIGIN

ERIC is sponsored by:
U.S. Department of Education
Office of Educational Research and Improvement (OERI)
Educational Resources Information Center (ERIC)
Washington, DC 20208

Questions concerning file content should be directed to:
ERIC Processing and Reference Facility
4833 Rugby Avenue, Suite 301
Bethesda, MD 20814
Telephone: 301/656-9723

ERIC is a public domain database and encourages the further dissemination of its bibliographic data. There are no special terms or conditions restricting its use.

DIALOG OnDisc ERIC service includes disc(s), quarterly CDROM updates, DIALOG OnDisc™ Manager search and telecommunications software, documentation, telephone searching assistance hotline, and shipping. Contact DIALOG Marketing for information on prices for quantity orders.

TRIAL OFFER

If you are not completely satisfied with your DIALOG OnDisc product, you may terminate the agreement within 90 days of contract acceptance for a pro-rated refund of the yearly license fee.

OTHER DOCUMENTATION

<i>Guide to DIALOG Searching</i> (Text only)	\$25	0920007-8
U.S. prices only. Other prices apply outside the U.S.		

Documentation handling fee of \$5 per order waived for orders placed through DIALORDER. For expedited handling of document orders within the U.S., add \$25; for expedited handling outside the U.S., add \$50. Prices do not include any applicable local taxes.

EQUIPMENT FROM OTHER SUPPLIERS

Philips CDROM reader (model CM-100) and controller card with cable	\$740	12SPC011
--	-------	----------

DIALOG will facilitate your purchase of Philips CDROM readers directly from the manufacturer at this special price. Price includes shipment to continental U.S. to customs broker. Make out a separate check or P.O. to Laser Magnetic Storage, 200 Park Ave., Suite 5501, New York, New York 10166. Attn: Rob Van Eijk.

Please indicate quantity and price of CDROM readers on order form and attach a separate check or purchase order to it and send to DIALOG (do not send it to Laser Magnetic Storage). If not prepaid, payment is due within 30 days of invoice date. You may return equipment in complete and good condition and original packaging within 30 days from invoice date at no charge if not fully satisfied.

WORKSTATIONS

A complete program for equipment acquisition, installation, and maintenance is available by arrangement with a supplier chosen by DIALOG. Workstations may be purchased or leased. The workstation includes an IBM PC/XT compatible, color monitor, fixed disk, modem, Philips CM-100 CDROM reader, and a printer. Equipment installation and ongoing maintenance from the supplier are automatically included with the leased workstations and are optional for purchased workstations. Contact DIALOG Marketing for complete details.

To order, please return the enclosed Business Reply Card to DIALOG for an Order Form and License Agreement or call DIALOG Marketing for more information at 800-3-DIALOG or (415) 858-3785.

DIALOG
INFORMATION SERVICES, INC.

DIALOG ONDISC™ ERIC

**“DIALOG OnDisc
ERIC offers
educators, students,
and librarians
immediate access to
educational materials
from hundreds of
periodicals and
reports.”**

DIALOG OnDisc ERIC, the first database in the Dialog family of CDROM products, provides immediate access to abstracts of articles published in over 700 educational journals, and thousands of research reports, evaluation studies, curriculum guides, and lesson plans collected by the Educational Resources Information Center.

DIALOG OnDisc ERIC corresponds to two printed indexes: Resources in Education (RIE), which covers significant educational documents, and Current Index to Journals in Education (CIJE), an index to more than 700 periodicals of interest to every segment of the educational community. The complete thesaurus of ERIC descriptors is also searchable in DIALOG OnDisc ERIC.

The ERIC database contains a wide variety of information covering adult and vocational education, teacher education, reading and communication skills, handicapped and gifted children, tests, measurement, and evaluation, higher education, and information resources.

Unlimited searching for a wider audience

The capability to access information locally and at a fixed cost means that libraries and educational institutions can provide wide-ranging, education-related information to the entire academic community. Using personal computer workstations in libraries, students, faculty members, and others in the community can search DIALOG OnDisc ERIC for themselves. And searching couldn't be easier or faster—the DIALOG OnDisc Manager software retrieves information extremely quickly, with retrieval speed and power comparable to DIALOG online services. Time-consuming literature and document searches previously done manually by students and researchers now take only minutes with DIALOG OnDisc ERIC. A special “easy menu” option makes searching by novices a simple and rewarding process.

Students and educators use ERIC for general coursework needs, term papers, dissertations, and bibliographies. As a student at one large university noted: “This method of delivery of information is more quickly accessible than through printed publications. In 15 minutes, I did two quick searches and came up with new material for my paper. This process would probably have taken me several hours to do manually.” Another student responded that “Searching ERIC was great. Wish I'd known about it sooner and saved all that time going through the abstract catalogs. This is just what graduate students need.”

Produced by DIALOG, the world's largest online databank

DIALOG OnDisc ERIC is produced by Dialog Information Services, Inc., a subsidiary of Lockheed Corporation. Dialog has offered online access to references, abstracts or complete text of published literature since 1972. Dialog is the acknowledged world leader in electronic information distribution, with a collection of more than 270 databases used by 80,000 customers in 76 countries. Like DIALOG's online version of the ERIC database, DIALOG OnDisc ERIC provides access to information sources quickly and easily. You even search DIALOG OnDisc ERIC the same way you search DIALOG online, but the information is retrieved locally via your personal computer from a CDROM disc in a CDROM reader. Because the search techniques are the same, you can learn about searching DIALOG OnDisc at standard DIALOG training seminars. You can even practice on CDROM at seminars held in our field offices.

DIALOG OnDisc ERIC – current only or complete file

DIALOG offers two different DIALOG OnDisc ERIC products: you can license only current ERIC information from 1981 to the present on one disc, or the complete ERIC file, 1966 to the present, on three discs. The current disc is updated quarterly and automatically shipped to all subscribers. After receiving your updated current disc, you simply send the old disc back to Dialog. DIALOG OnDisc ERIC includes DIALOG's own search retrieval software—the DIALOG OnDisc™ Manager which offers two searching options, the DIALOG command language and a menu option, making it fast and easy for both experienced DIALOG searchers and complete novices to find the information they need.

The best of both worlds

DIALOG OnDisc Manager software includes communications software so that you can take advantage of the full power of DIALOG OnDisc ERIC when teamed with searching DIALOG online. If you want to access more current ERIC information between quarterly updates, you simply save your CDROM search and switch to DIALOG online for the most up-to-date information available (at current online rates). You can also take advantage of complimentary DIALOG online databases, such as PsycInfo, Exceptional Child Education Resources, Magazine Index,™ Social Scisearch,® and many more!

A yearly prepaid license fee covers your unlimited use of the DIALOG OnDisc ERIC database. As a trial offer, you may terminate your agreement within 90 days of contract acceptance for a pro-rated refund of the yearly license fee if you are not completely satisfied with the product.

DIALOG OnDisc subscriptions come with complete documentation and toll-free telephone hotline support for searching assistance 24 hours a day, 5 days a week, and on Saturdays from 10 am to 6 pm Eastern time.

Required equipment for DIALOG OnDisc ERIC

You may already own some of the equipment needed for DIALOG OnDisc ERIC. DIALOG OnDisc ERIC requires the following equipment:

- IBM PC or compatible personal computer and IBM PC DOS Version 2.0 or higher
- 384K RAM (minimum required, 640 RAM recommended)
- Hard storage disk with at least one megabyte of free space.
- Philips CM 100 CDROM reader or a Hitachi CDR-1502S reader with controller card, both industry standard brands.
- A Hayes-compatible modem or certain other models are necessary to take advantage of online searching.

If you don't have a CDROM reader, you can purchase a Philips CDROM reader through a special Dialog/Philips arrangement. Or, you can lease the entire personal computer workstation with CDROM reader through special arrangements Dialog has made with equipment vendors. These vendors offer assistance with workstation installation and on-going equipment support. Contact Dialog Marketing for more information on options for leasing and/or purchasing equipment.

Getting started

To order, refer to the price list located on the reverse of this flyer. Please contact Dialog Marketing for a complete order form and license agreement. Dialog Information Services, Inc., Marketing Department, 3460 Hillview Avenue, Palo Alto, CA 94304. If you would like additional information or a demonstration, call Dialog Marketing at 800-3-DIALOG or 415-858-3785.

Eric Processing and Reference Facility
4833 Rugby Avenue
Suite 301
Bethesda, MD 20814

Dear Mr. Brandhorst:

As a result of a change of emphasis in SDC's business strategies brought about by the recent merger of Burroughs Corporation with Sperry Corporation, the ORBIT Search Service division has been sold to the Pergamon Group of Companies, where it will be operated under a newly formed subsidiary, ORBIT Information Technologies Corporation of McLean, Virginia. I am enclosing a copy of the press notice recently released by Pergamon which expresses their commitment to the online information business.

SDC has had a favorable association with its customers and data base owners since 1972. As we transfer this business to Pergamon we want to assure you that Pergamon has a clear commitment to the continuing success and excellence of service that has characterized SDC's operation of ORBIT for both its data base owners, and its thousands of customers worldwide.

I want to personally convey to you the sincere thanks of the ORBIT Search Service management and staff for the many years of support that you have given us.

I am confident that your association with Pergamon in the future will continue to be a mutually rewarding one.

Sincerely,

Arthur Schwartz
Director, Western Operations
SDC Services Group

PRESS RELEASE

PERGAMON ACQUIRES ORBIT SEARCH SERVICE FROM SYSTEM DEVELOPMENT CORPORATION

McLEAN, VIRGINIA, September 25, 1986--The Pergamon Group of Companies has acquired the business and certain assets of the ORBIT Search Service Division of System Development Corporation, a subsidiary of the Burroughs Corporation. The announcement was made by Mr. Robert Maxwell, chairman of the Pergamon Group of Companies, based in London. Included in the acquisition is the popular ORBIT Text Retrieval Software System.

The operations of the ORBIT Search Service will be carried on by a newly formed Pergamon company, ORBIT Information Technologies Corporation, which will have its headquarters in McLean, Virginia. Jim Terragno, has been named President of the new company. During a brief transition period, the ORBIT Search Service will continue to be provided by System Development Corporation to the high standards that have been its hallmark since its establishment in 1972.

The ORBIT Search Service, based in Santa Monica, California, is a leading online vendor of some 60 databases for use by the scientific and technical information communities. Among its more important databases offered on the ORBIT Search Service are the World Patent Index, produced by Derwent Publications Ltd., and the databases produced by the American Petroleum Institute, the Chemical Abstracts Service and the University of Tulsa. In addition, the ORBIT Search Service is the exclusive online vendor of the Japanese Patent Information Organization's English language abstracts of Japanese patents, "JAPIO".

A Pergamon affiliate, Pergamon InfoLine Ltd. of London, is the leading online database vendor in Britain, offering some 50 databases. Pergamon InfoLine's databases include the International Patent Documentation Center's (INPADOC) database of patent information from over 50 countries as well as databases covering the literature in industrial research such as rubber and plastics (RAPRA), surface coatings (WSCA), and printing and paper (PIRA). Pergamon InfoLine is also the leading vendor of databases containing information on U.K. business and industry.

"We believe that the ORBIT Search Service and Pergamon InfoLine, operated in conjunction with each other, will constitute the leading online vendor of patent, scientific and technical information in the world," Mr. Maxwell said.

Council of ERIC Directors

Sept. 10-12, 1986

ERIC Facility Report1. ERIC Directories/Brochures

The camera-ready art for the following three products have recently been transmitted from OERI to GPO and will presumably be printed sometime during the next 30 days: Directory of ERIC Information Service Providers; Pocket Guide to ERIC; Submitting Documents to ERIC.

2. ERIC Thesaurus (11th Edition)

The updated tapes and revised introductory matter for the 11th edition have been sent from the Facility to Oryx Press and will presumably result later on this year in a new 11th edition (now being advertised by Oryx for \$65). Some 224 new terms have been added since the 10th edition of 1984.

3. ERIC Anniversary Logo

Copies of a special ERIC 20th anniversary logo (in "stat" form) were distributed to all ERIC components for their use with anniversary activities, as appropriate.

4. "First Lessons"

First Lessons (by Secretary Bennett), the most recent publication in the "Excellence in Education" series, arrived at the Facility on August 27 in 6,000 copies. It will be processed as a priority document for the October issue of RIE. The Clearinghouses have all been sent copies. The Facility will be handling document requests for OERI/IS.

5. ERIC-on-SilverPlatter CD-ROM Discs

The first ten subscribers to the ERIC database on CD-ROM disc were sent their initial shipment of data and software on August 29. The "Current File" contains RIE/CIJE data from 1983 to the present. The "Archival File" contains data from 1966 through 1982 and will be available before the end of the calendar year.

6. Statistical/Numeric Databases in Education

A new ERIC file has been mandated. The file will contain descriptions of statistical/numeric databases containing

education-related data. The files of the Center for Statistics (CS) will be the first group described. Subsequently, the Clearinghouses will be asked to contribute file descriptions. The Facility is in the process of designing the file and a resume input form.

7. RIE Document Volume

The quantity of documents processed for RIE has fallen from a high of 16,756 in 1979 to 12,803 in 1985. The reduced number of microfiche cards is resulting in lower subscription revenues at EDRS and could result in increased prices. The quantity of Federal documents available that are relevant to education has also fallen during this period. If RIE volumes are to remain at the 15,000 document level, the documents will have to come from the local and state levels.

8. Clearinghouse Processing of Out-of-Scope Documents

Perhaps the lower quantity of documents is a cause, but the Clearinghouses are doing less intra-system transferring and more processing of documents out of their subject scope. Please carry a caveat back to your processing staff to increase their quality control efforts in this important area.

9. Computerization of Clearinghouse Internal Processes -- Impact on Recordkeeping

Across the past year there has been a large increase in the occasions when a Clearinghouse uses the same Clearinghouse accession number twice. This can perhaps be attributed to the gradual computerization of acquisitions records and the discontinuance of older manual recordkeeping systems. Since this is one of the most troublesome and time-consuming errors that can occur, we urge you to arrange your internal processes so that it is less likely that CH accession numbers will be used more than once.

10. ERIC Acquisitions Arrangements (EAA) -- Addition of Mailing Addresses to File

We are currently in the midst of a project with the Clearinghouses, to review and verify all arrangements listed in the EAA and to add mailing address information. This is still in process, but when completed will permit the automatic production of mailing labels for all EAA entries. These labels would be primarily for Clearinghouse use, to assist them in making regular contact with their arrangements.

11. CIJE Editorial Functions

The recent ERIC Facility RFP contained a task covering CIJE editorial functions. If this task is funded, the Facility will edit CIJE resumes in the same way it currently edits RIE

resumes. Oryx Press would receive a fully-corrected ERIC Master File tape each month (complete with EJ numbers) from which CIJE would be produced. October would be the transition month. Details of the changeover must be worked out with Oryx Press and Central ERIC.

12. ERIC Clearinghouse Publications (1986)

We are coming to the end of the RIE issue year for 1986. If you have any ERIC Clearinghouse publications that you want listed in the 1986 edition of the next annual bibliography of ERIC Clearinghouse Publications, then you should see that they get in the last few remaining issues of RIE for 1986.

13. "Inter Ed" -- A Meeting of ERIC with the Australian Education Index, (AEI), British Education Index, (BEI) and Canadian Education Index (CEI).

On August 4-6, ERIC met with representatives from AEI, BEI, and CEI. The objective was to explore what coordination, cooperation, and joint projects might be of mutual advantage. A report is being prepared by the Facility.

Special Project

ERIC Clearinghouse on Adult, Career, and Vocational Education

DISSEMINATING LOCALLY DEVELOPED PRACTICES THROUGH ERIC

Purpose

To ensure increased use of ERIC by practitioners, it is important to (1) promote the idea that ERIC is now including practice-oriented materials that can be identified by using the new target audience field, and (2) encourage practitioners to document practices that they have developed and to submit these practice descriptions to the ERIC system. This special project developed system-wide products that respond to these needs.

Product 1: "Did You Know That ERIC Has Practice Materials?"

This product is a brochure that contains descriptions of how "real life" practitioners have used practice materials from ERIC, how to search ERIC using the new target audience field to find practices, and how to submit practice materials to ERIC.

Product 2: "Developing Practice Descriptions for ERIC" Information Packet

An information packet containing a form and a guide was developed to provide guidelines to encourage practitioners to document practices for submission to ERIC. The form focuses on key information that needs to be included in a practice description to ensure that the description will be helpful to others. The guide gives specific procedures for completing the form.

Dissemination

Five-thousand (5,000) copies of the brochure, "Did You Know That ERIC Has Practice Materials?" will be printed and 250 copies will be sent to each clearinghouse and 1,000 copies will be sent to the ERIC Facility for dissemination. Camera-ready copy, suitable for reproduction, and 10 copies of the information packet will be sent to each clearinghouse and to the ERIC Facility.

Special Project--Exemplars of Excellence: High School Literary Magazines

This special project, completed in May 1986, involved providing useful information about the production of literary magazines as superior in the Program to Recognize Excellence in Literary Magazines, sponsored by the National Council of Teachers of English. Some 124 magazines achieved the "superior" ranking, indicating a high degree of excellence. But there is a need for information on how such magazines achieve this level of excellence. The project coordinator for "Exemplars of Excellence" selected 20 broadly representative superior-ranked magazines from the array of 124 and then gathered information on such factors as how support for the journal is generated within the school and/or community; how submissions are encouraged in the school, and how they are edited and evaluated before publication; the extent to which the journals are produced, edited, and printed by students; and related factors. Telephone interviews with teacher advisers and student editors provided further insights into how excellence was stimulated in the development of these superior literary magazines.

The result was 20 entries into the ERIC system, each consisting of two parts: (1) a descriptive essay giving clear and helpful information on how the magazine was developed within the school; and (2) the magazine itself, as an appendix to the description. Since teachers, students, and English/language arts supervisors presently have no body of materials that provide concrete help in generating the kinds of literary magazines that have been judged as superior by panels of expert teacher evaluators, this project fills an important gap in the literature.

**ERIC Clearinghouse on Educational Management
Dissemination of a Third Annual Issue
of Research Roundup
to Elementary School Principals**

Research Roundup is a four-page newsletter that summarizes the findings of major research projects of specific interest to elementary and middle school principals. It is prepared by the Clearinghouse for publication by the National Association of Elementary School Principals (NAESP). ERIC/CEM and OERI are conspicuously credited for its preparation.

The format includes, on page 1, a short introduction and overview of the topic and the state of research followed by, on pages 2-4, summaries of five or six relevant, significant research studies. No attempt is made to evaluate the studies or to elaborate the practical implications of their findings.

Until this year the Clearinghouse has prepared two annual issues of Research Roundup. Following distribution of the inaugural issue in November 1984, NAESP polled its membership and found support for the series that excelled even its own expectations. Consequently, NAESP requested that we add a third annual issue. Samuel Sava, the association's executive director, assured Philip K. Piele in a letter dated May 16, 1985, "that three annual issues of the NAESP Research Roundup will greatly assist in disseminating the good work of your clearinghouse to principals and teachers." We requested funding for a third annual issue in a special project that was approved earlier this year by OERI.

NAESP prints and distributes each issue to its 24,000 members. The first issue of 1986 was distributed in April ("Teacher Evaluation"). Camera-ready mechanicals of the second issue on ("The Principal as Instructional Leader") were sent to NAESP in August for distribution in October. The third and final issue of 1986--on the subject of teacher testing--is scheduled for distribution in January 1987.

**SPECIAL PROJECT
ERIC Clearinghouse on Educational Management
Dissemination of Research Findings to Superintendents**

A primary objective of the ERIC system is dissemination of timely and relevant information about current educational issues and practices to school board members, superintendents, principals, teachers, and other educators.

During 1986 we are preparing and distributing four issues of The Best of ERIC on Educational Management to the 17,500 members of the American Association of School Administrators (AASA), a professional organization serving the needs of school superintendents.

Because we did not learn of the funding of this special project until August 22, we have made no progress on it except for the identification of topics. Anticipating that funding would be approved, we consulted with AASA earlier this summer on the association's choice of topics. The following have been mutually agreed upon:

Identifying "at risk" students
Teacher tenure
School Business Partnerships
Recruitment and Selection of Teachers

The first two issues will be ready for mailing by early November, and the other two will be mailed likely in mid-January.

We are convinced that this project is a cost-effective outreach for OERI to a professional organization that lacks the resources to meet its members' needs for information. For the funding provided, a total of 74,500 products will be printed and disseminated each year--at an average cost per product of less than 20 cents.

SPECIAL PROJECT: INTERAGENCY INFORMATION DISSEMINATION**ABSTRACT**

CEC was awarded a contract by Special Education Programs (SEP), U.S. Department of Education, which involves the design and implementation of a national plan for the purpose of sharing currently funded and completed SEP research projects. This project has focused its efforts on: 1) abstracting, cataloging and disseminating information on currently funded SEP projects to policymakers, practitioners and teacher educators; 2) gathering the results of recently completed SEP funded projects for the purpose of disseminating the most current research findings to content appropriate audiences; and 3) assessing the contribution of special education research to policy and practice.

To achieve these goals, the project has developed a Directory of currently funded SEP projects and principal investigators, Topical Directories in over 20 subject areas, and Research Summaries on selected topics. The information contained in these products has received a positive response from organizations and individuals such as State Directors, researchers, teachers, and policymaking groups. Announcements on the availability of the Directories are in Exceptional Children and on CEC's SpecialNet Bulletin Board. During the Project's second year, announcements will be sent to the editors of newsletters and journals of each CEC Division.

During the second year, project staff is also designing and initiating a national dissemination plan for the purpose of sharing the findings of completed SEP funded projects. These findings will be available to content appropriate audiences such as teachers and policymakers.

Through a variety of approaches which include the selection of an instructional concept, oral history interviews and a text book analysis, the Special Project has begun the complex task of demonstrating a relationship between research and practice. Future products include a series of papers and video tapes on the impact individualization has on this relationship.

1. Special Project: The Chronicle of Higher Education -- Expanded Coverage

NEED FOR PROJECT: ERIC aims to cover the literature of education and to make it known to practitioners and other users. Over the years there has been a gap in the coverage of the periodical literature, specifically the coverage of The Chronicle of Higher Education.

The Chronicle is the most widely used periodical in postsecondary education, with a weekly circulation of 75,000. Readers of The Chronicle include ERIC users in a variety of disciplines and clearinghouse scope areas. For example, a typical issue may include articles relevant to educators in foreign languages, sociology, the arts, computer science, etc., as well as many articles on higher education administrative topics such as admissions standards.

Periodically, both the ERIC Clearinghouse on Higher Education and the ERIC Facility have been asked by users why ERIC does not cover The Chronicle adequately. (It has been covered only sparsely just since 1984.) The attached sample letters support this point, with one user stating, "my colleagues shared my reaction of incredulity that the key source of news and information for the higher education community was not covered in what we have always considered to be the best database." Another notes that "the articles published in The Chronicle [are] as important as those published in other CIJE-indexed journals."

The Chronicle has not been covered adequately in the past because of budget constraints. It could not simply be "picked up" and added to the general CIJE workload of the Clearinghouse. A compromise plan was adopted in 1984 when the Clearinghouse began indexing and annotating 1-2 articles per issue (out of a possible 10-15 good ones). These selected articles provided primarily statistical data that convey frequently requested information that users cannot identify easily from other sources.

This special project would provide the Clearinghouse with sufficient funds to index and briefly annotate selected articles of interest to a large segment of the education community. The impact would be significant systemwide, affecting both manual and online searching of the education literature.

PROJECT OBJECTIVES: To fill a gap in CIJE coverage by providing ERIC users with timely online and manual access to significant articles in The Chronicle of Higher Education.

3727

PROJECT ACTIVITIES: The Clearinghouse on Higher Education would identify, index, and annotate selected articles from The Chronicle and transmit resumes bimonthly to the ERIC Facility for CIJE input.

2. Special Project: DIALOG-ERIC/HE CLASSROOM INSTRUCTION PROJECT

DIALOG Information Services is in the process of developing a Classroom Instruction Program (CIP) on the use of databases. The program will include student workbooks, a teacher's guide, and search time. The royalties on the search time have been waived and there are no line charges. A classroom set of the program materials will be available in early 1986 for about \$300. The availability of this program, along with the support and cooperation of DIALOG through its Washington Office and the CIP Project Manager, will enable ERIC to meet a major goal of practitioner use of the database.

PROJECT OBJECTIVES: To assess the effectiveness of the DIALOG Classroom Instruction Program in six college classrooms.

PROJECT ACTIVITIES: ERIC/HE staff will work with DIALOG staff in the refinement of instructional materials in the initial developmental phase of this project. In the next phase, ERIC/HE will identify six college faculty in the metropolitan Washington, D.C., area who are interested in this project. The six faculty will receive free training from DIALOG in online database use in general and in the specifics of the use of the DIALOG Classroom Instruction Program. While ERIC will be featured as a useful database, other databases (e.g., Magazine Index) will be accessible as well.

Following training the teachers will be asked to work with their students in implementation of the program. An ethnographic design will be used to assess the program. Clearinghouse staff will observe faculties and students using the program and will conduct structured interviews with both faculty and students on their perceptions of the effectiveness of the program. Included in the assessment will be: (1) perceived changes in how faculty and students search for information compared with previous patterns; (2) the usefulness of the online databases for instruction; (3) the usefulness of particular databases in helping students and faculty do their investigations; and (4) needed improvements in the use of online databases for instructional purposes.

This project is viewed as a small pilot effort, but one that can have far reaching implications for ERIC. The results of the project will be reported to Central ERIC, to DIALOG, and to those who participate in the program. It is anticipated that there will be a second year to the project.

The ERIC Search Strategy File

The ERIC Search Strategy File is a manual for end user searchers who want to search the ERIC database online. It is intended to: 1) help searchers prepare their own topics for an online search in ERIC, and 2) provide a ready file of tested search strategies on a variety of educational topics.

Part One of the manual contains a series of ERIC descriptor families. Based upon the notion of search "hedges", a descriptor family pulls together related descriptors, identifiers, and free-text terms that, taken together, cover the scope of a topic (such as physical disabilities). These descriptor families are designed for high recall and can be saved on line. Users will be directed to AND these families with other terms as they develop search strategies.

Part Two contains a file of tested search strategies on 160 topics (10 from each Clearinghouse scope are.) Each strategy is presented in both DIALOG and BRS format, and may include features such as truncation, free-text searching, limiting to major descriptors, etc., that were deemed necessary during the testing of the strategy in order to produce the desired results. Users will be directed to select strategies carefully and to use one only if it fits their exact need. Suggestions on how to alter a strategy are included.

The Appendices contain brief searching aids that explain some of the more common searching techniques and features used in the manual. Users will be directed to vendor manuals for detailed information.

The three major vendors, DIALOG, BRS and SDC have been contacted concerning this project, primarily to solicit ideas for future dissemination of the project.

3730

The ALA Yearbook of Library and Information Services: 1986
Article on ERIC

ERIC

About 1,070 documents were announced in 1985 in each issue of *Resources in Education*, the monthly index of documents from the Educa-

tional Resources Information Center (ERIC). The 12,803 documents processed during the year brought the total number of documents entered in the database since its inception in 1966 to 253,128 at the end of 1985. The full text of 98.5 percent of the documents announced in RIE in 1985 is available in the ERIC microfiche collection, with 87.3 percent available in both paper and microfiche copy from the ERIC Document Reproduction Service, 11.2 percent available from EDRS in microfiche only, and 1.5 percent available only from the sources stated in RIE for each document. EDRS distributed more than 18,000,000 microfiche in 1985, including monthly shipments to 730 subscribers worldwide and on demand copies. More than 50,000 titles were also distributed as paper copy to individual customers.

The microfiche collection is also available for use in some 730 libraries and information centers that have complete or substantial collections of the ERIC microfiche. Access to the collection is provided by RIE, which has over 1,800 subscribers.

A total of 18,000 journal articles were annotated for *Current Index to Journals in Education*, the monthly index of the journal literature from ERIC, and average of 1,500 per month in 1985. The total number of articles announced in CIJE since the implementation of this service in 1969 was 323,038 by 1985. Journals covered by CIJE are available through many libraries, and reprints of individual indexed articles are available from University Microfilms International for about 75 percent of the more than 700 journals covered. There were over 1,700 subscribers to CIJE in 1985.

The number of citations in the ERIC database at the end of 1985—including documents and journal articles—totaled 576,162.

Database Activities. For the first time since November 1986, prices charged by the U.S. Government Printing Office for a subscription to RIE were reduced significantly in February. The cost of a domestic subscription to 12 monthly issues of RIE was reduced 46 percent, from \$95 to \$51, and reductions in rates for the semiannual cumulative indexes and foreign subscriptions to RIE were also substantial.

Prices for microfiche and paper copy of ERIC documents produced by EDRS were changed in October. Microfiche prices were reduced by approximately 30 percent, from \$.87 to \$.75 for up to five microfiche for a single document, and the price code for paper copy was simplified by basing the total cost of a document on a flat rate—\$1.80—for each unit of 25 or fewer pages.

EDRS also updated its series of microfiche search aids for ERIC documents—RIE Cumulative Author Index, RIE Cumulative Title Index, RIE Identifier Usage Report, and the Cumulative Annual RIE. The microfiche for 1986-84 were made available early in 1985, and cumulations including 1985 data were to be available early in 1986. The monthly issues of RIE are also available on microfiche, and standing orders for the microfiche edition are available.

Oryx Press, the publisher of CIJE, published *CIJE Author Index, 1969-1984* in 1985. This cumulative index lists alphabetically each author cited in CIJE whose name appears in the Author Index of individual issues, and provides the information needed to find the full citation. The first tool of its kind for CIJE, the volume is more than 2,000 pages long. Oryx Press has also made available annual updates of its microfiche publication, the *RIE/CIJE Microfiche Cumulation 1986-1980*, for 1981, 1982, and 1983. These microfiche sets include RIE Abstracts, CIJE Abstracts, and the Combined RIE/CIJE Subject Index.

New Access Points. A new online digest file developed by the ERIC Clearinghouse on Early Childhood Education with funding from the National Institute of Education was pilot tested on Ed Line of *The Source* in November. The test database contained 48 digests—brief reports on educational topics (approximately 1,000 words)—produced by the ERIC Clearinghouses. About 40 more digests were to be included in the file on its availability to the public by early 1986. Designed to provide educators, particularly policymakers, with current information on education, this file was planned to be an ongoing project, and access through other vendors in the future will be explored. (These digests are also available in paper copy from the clearinghouses which produced them.)

The MICROsearch program and database disks for the Apple II microcomputer series, which were developed by the ERIC Clearinghouse on Information Resources, were also scheduled to be available for the IBM PC early in 1986. The two versions of this microcomputer program, which was designed for searching the contents of specially prepared diskettes containing subject-related segments of the ERIC database, follow the same general format; however, the new IBM version includes several enhancements: color screen, faster retrieval time, increased number of citations per disk, more extensive online HELP instructions, and the ability to move citations on the database disk to the hard disk and reformat the indexes.

The ERIC database on 4-3/4-inch compact optical disks was introduced at the American Library Association's Annual Conference in July by SilverPlatter, Inc. For a set annual or monthly rate, subscribers to the SilverPlatter Service receive the complete database on CD ROM disks and the use of a microcomputer information workstation, which includes a keyboard, monitor, disk player, and search/retrieval software. Archival files will be stored on a separate disk, and disks with updates of the current files will be distributed on a quarterly basis. An alpha test of the disk

system was to be conducted at four sites over a two-month period early in 1986, using the ERIC files for 1983-85. The system was to be available to subscribers later in the year.

Current Status. An information system funded through the U.S. Department of Education's National Institute of Education, ERIC focuses on the ephemeral literature of education—e.g., research reports, project descriptions, conference papers, curriculum guides, and program descriptions—with emphasis on materials useful to practitioners and policymakers. Each of the 16 clearinghouses in the decentralized network collects and processes information on particular areas and aspects of education for inclusion in the ERIC database and announcement in RIE, and selects and annotates articles from professional journals in its scope area for CIJE. The contents of these two indexes make up the ERIC database, which is available for online searching.

In addition to actively soliciting documents and processing them for the database, the individual clearinghouses publish literature reviews and resource guides, digests, minibiographies, and other materials on topics of current interest in their scope areas, and provide reference services for ERIC users.

SAMPLE

July 01, 1986

Humphrey Tonkin, Managing Editor
Language Problems & Language Planning
University of Texas Press
P.O. Box 7819
Austin, TX 78722

Dear Mr. Tonkin:

The ERIC system is celebrating its 20th anniversary this fall, and we would like to give you a chance to join in the celebration.

The ERIC Clearinghouse on Languages and Linguistics has been indexing articles from Language Problems & Language Planning since 1979 and announcing them in the monthly abstract journal, Current Index to Journals in Education (CIJE). We thought you might like to take advantage of our 20th anniversary to remind your readers of the benefits of using the ERIC database, both to locate information on topics in education, and as a means of having their own work widely disseminated throughout the education community.

We are enclosing camera-ready copy that you can use in your journal's November or fall issue (or anytime between November 1986 and November 1987). Please let us know if you need a smaller notice or a different shape.

Thank you for helping us get the word about ERIC out to benefit the entire education community!

Sincerely,

Laura Kay Wenzel

Laura K. Wenzel
User Services Coordinator

LKW/jem

3733

Join your colleagues in celebrating the 20th anniversary of the world's largest and oldest education database -- ERIC! Discover the surprises in store for you!

In 1966, the Office of Education began collecting and making available "fugitive" documents on education. This database of documents is called ERIC, the Educational Resources Information Center. A few years later, ERIC began to index professional journals, such as the one you are reading now.

Twenty years and 600,000 documents and journal articles later, ERIC is now the place to go for these hard-to-find documents:

- research reports,*
- conference papers,*
- locally developed classroom materials,*
- and other unpublished work of interest.*

The system also produces quality state-of-the-art papers, bibliographies, and fact sheets on pertinent issues in education.

After 20 years, isn't it about time you submitted a document?

- Your document will be reproduced on microfiche and distributed, at no cost to you, to more than 700 collections.
- Your document will be announced to about 5,000 organizations.
- A description of your document will be retrievable by a growing number of online database searchers.
- Your work will never go out of print because ERIC documents remain available from the ERIC Document Reproduction Service.

Using ERIC is a piece of cake.

- ERIC microfiche collections can be found at libraries in 700 locations.
- You can conduct manual searches or request computer searches of the database at these locations.
- You can perform database searches on your personal computer.
- You can order your own microfiche and paper copies of ERIC documents from the ERIC Document Reproduction Service.
- You can view documents and make paper copies at your local ERIC microfiche collection.

ERIC Clearinghouse on
Languages & Linguistics

John L. D. Clark, Director
Jeanne Rennie, Associate Director

July 17, 1986

Dr. Lilian G. Katz
ERIC Clearinghouse on Elementary and
Early Childhood Education
University of Illinois
College of Education
805 West Pennsylvania Avenue
Urbana, Illinois 61801-4897

Dear Dr. Katz:

Enclosed please find the notice we mentioned in electronic mail regarding ERIC's 20th anniversary. This notice was sent to the editors of the journals ERIC/CLL covers for CIJE, with the intent that it be reproduced in these journals as a free service announcement sometime during the anniversary year. Also enclosed is a sample letter that accompanied the notice.

The notice was produced on the Center for Applied Linguistics' (CAL) Xerox Star word processor, except for the piece of cake, which was created by CAL's unofficial resident artist, Lynn Thompson. If you would like to send this notice to the journals your clearinghouse covers for CIJE, let us know and we will change the address at the bottom and send you as many copies as you need at 10¢ a page, plus postage. All copies must be made by the Xerox Star, as the balloons will not reproduce properly on photocopiers.

We are interested in hearing your reactions to this notice and also in learning what steps your clearinghouse is taking to publicize ERIC's anniversary.

Sincerely,

Jeanne Rennie
Associate Director

<u>ERIC PUBLICATIONS</u>	8
<u>MEETINGS</u>	9
<u>LIST OF ATTACHMENTS</u>	10

With this issue of the EAB, we are including for the first time an annual index covering all 1986 issues. The next issue will be a combined January - February 1987 issue, after which we hope the volume of Clearinghouse submissions will permit us to get back on a monthly basis.

The ERIC Administrative Bulletin (EAB) is prepared by the ERIC Processing and Reference Facility on the basis of material submitted by all components of the ERIC system. EAB articles are reviewed and approved by Central ERIC before publication. The EAB is intended to be the "journal" of the ERIC system and a major means for the decentralized components of ERIC to communicate and interact with one another. The EAB is also a permanent record reflecting most of the major events in the life of the ERIC system (such as personnel changes, Standing Order Customer changes, etc.) and providing in printed form essential documents (such as ERIC policy and priority statements, Clearinghouse scope statement modifications, ERIC Processing Manual revisions, etc.) Submissions to the EAB are to be sent (using the standard form) to your respective monitor. The deadline for input to each monthly issue is the 10th of the month.

ACTION ITEMS

Indexing Advisories

Recently, while developing some materials for use in the training session held at the SO Clearinghouse, we assembled a list of "indexing advisories" (See Attachment 1) that seemed general enough to share with all the Clearinghouses. Most of the points reiterate existing EPM guidelines, but some are old "understandings" that are not yet adequately treated in the EPM. Please read through them and pass them along to your indexing staff.

...Carolyn Weller (ERIC Facility)

ERIC Facility Changes Location (But Keeps Same Telephone Number) -- Help Spread the Word

After 17 years at the 4833 Rugby Avenue location, the ERIC Facility lost its lease. It was forced to move and on December 20, 1986 it re-located to:

4350 East-West Highway
East-West Towers, Suite 1100
Bethesda, MD 20814-4475

The new location is directly across from Bethesda-Chevy Chase High School and is only two blocks east of the Bethesda Metro stop at the intersection of East-West Highway and Old Georgetown Road.

We have managed to keep the same telephone number 301-656-9723 and the Postal Service has agreed to forward all mail directed to us at the old address without putting it through the re-addressing process and without limiting the time period. Nevertheless, a change of address notice is being sent to all contact points.

We would be grateful if the Clearinghouses could help spread the word concerning our new address.

...Ted Brandhorst (ERIC Facility)

ERIC Clearinghouse Publications Should Use OERI Logo in All Situations Where NIE Logo Was Previously Mandated

The use of the NIE Logo was mandated on page V-6 of the "Administrative Procedures and Guidelines for ERIC Clearinghouse Management".

Until such time as these guidelines are revised, please substitute the OERI Logo for the NIE Logo in all mandated usages.

...Pat Coulter (CERIC)

NETWORK NEWS

SMERC to Discontinue Service Outside San Mateo County

After June 30, 1987, the San Mateo Educational Resources Center (SMERC) will no longer provide search services outside its own county area.

For a number of years, SMERC has been the heaviest single searcher of the ERIC database in the country. SMERC's experience with the ERIC database made them one of the most important reactors and commenters on ERIC's activities.

A letter from SMERC's Director, explaining the retrenchment, is provided as Attachment 2.

...Ted Brandhorst (ERIC Facility)

ERIC-on-CD-ROM -- SilverPlatter and DIALOG Systems Both Being Tested by IR Clearinghouse

ERIC on CD-ROM is now available through both SilverPlatter and DIALOG. The IR Clearinghouse is testing and evaluating both systems. Any Clearinghouse that is considering purchase of a CD-ROM system may want to contact Pam McLaughlin or Jane Klausmeier at IR for information about the functioning of both systems.

...Don Ely (IR)

OCLC Makes ERIC Its First CD-ROM Product

OCLC has made an advance announcement at the ALA Midwinter Meeting (Chicago, January 17-20) that its very first CD-ROM product (to be available in April 1987) will be the ERIC database.

The OCLC offering is priced exceptionally low in order to attract its large base of 5000+ OCLC member libraries. The for-profit vendors that currently offer ERIC on CD-ROM will no doubt complain of this ultra-competitive pricing on the part of a non-profit organization that has yet to offer its own database on CD-ROM, but in all likelihood they will be forced either to cut prices to be competitive or to cease offering ERIC.

Attachment 3 consists of the OCLC literature describing and pricing this new product.

...Ted Brandhorst (ERIC Facility)

3764

Developing Educational Practice Descriptions for ERIC (Guidelines for Potential Submitters)

The ERIC/CE Clearinghouse has developed a brief set of guidelines for education practitioners who are considering documenting exemplary educational practices for possible inclusion in the ERIC database. The guidelines are provided here as Attachment 4.

...Ted Brandhorst (ERIC Facility)

IR Clearinghouse Special Projects Summary

The Clearinghouse on Information Resources has been funded to perform three special projects. The first project involves the conversion of the ERIC MICROsearch program to operate on the IBM-PC. Though the IBM version follows the same conceptual structure as the Apple version, it uses menus instead of a formatted screen. Several enhancements have been added to the new version, including the ability to combine multiple database disks on a single hard disk, browsing of indexes, faster retrieval time, and increased number of citations per disk.

IR is also currently operating a bulletin board for access to ERIC through our Clearinghouse after hours. Users of microcomputers with communications capability can access the board by dialing (315) 423-1049 from 5:00 P.M. - 8:30 A.M., Monday - Thursday and all weekend from 5:00 P.M. Friday until 8:30 A.M. Monday. Bulletin board users can read notices and leave questions for other users to respond to or to be addressed by our User Services Coordinator. Shortly, they will be able to upload and download ERIC Digests and/or program files. Response so far appears largely to be from microcomputer enthusiasts. With the new school year starting, IR hopes to attract more of the educationally-oriented.

The third project is a one-year pilot project designed to create a series of 12 "Conclusion Brochures." These brochures are intended to provide summaries of significant research conclusions and will include five to six references each. A priority list of possible topics for Conclusion Brochures will be developed from suggestions generated by the ERIC Clearinghouses. The primary target audiences for the brochures are parents, teachers, and school administrators. Other audiences might include mass media education correspondents, school board members, legislative aides in education, and public officials. Dissemination and distribution will be aimed at multiplier organizations and persons, including state and federal departments of education, professional associations, and education editors. During this pilot phase, a special effort will be made to reach school librarians, particularly in New York State. Dissemination at these points will be monitored and evaluated. Overall evaluation will be based upon data from distribution locations.

...Don Ely (IR)

3765

ALA Yearbook (1987) - ERIC Write-Up Done by IR

The IR Clearinghouse annually prepares a summary of ERIC's activities for the year for publication in the ALA Yearbook.

The write-up for the 1987 Yearbook (covering 1986) appears as Attachment 5.

...Ted Brandhorst (ERIC Facility)

Teleconferencing by CE Introduces Graduate Students to ERIC

Teleconferencing has proven to be an ideal method of introducing graduate students to ERIC. Susan Imel has spoken by phone to adult education graduate students at Kansas State University in Manhattan (Kansas) and Elmira College in Elmira (New York). In both instances, she worked with the professor to tailor the presentation for the class. Materials were sent in advance to be distributed during the teleconference and students were also encouraged to contact appropriate ERIC/CE staff for special assistance, such as with a search strategy. Students in the Kansas State Seminar submitted their final papers for consideration for ERIC and several were accepted. Most participants in the Elmira College class requested a guide for developing practice-oriented materials for ERIC so that some of them may also eventually become ERIC document contributors.

...Judith O. Wagner (CE)

ERIC/RC Publications Used as Classroom Materials by Schools and Universities

Several of ERIC/RC's publications are being used this fall in a variety of ways around the country. "Before School Starts: A Handbook for New Elementary Rural/Small School Teachers" has been purchased for use by all elementary preservice teachers at Western Carolina University. "The Mexican American Child in Special Education" was recently distributed to 20 participants in an inservice workshop on serving bilingual students in special education which was given by the Gadsden School District, Anthony, New Mexico. CRESS' "Teaching in the Outdoors" series--currently available for math, science, and social studies--is being used as a supplementary text material for several courses in teacher education at Northern Illinois University (NIU). In addition, the series is available in the NIU bookstore for all elementary education majors.

...Betty Rose D. Rios (RC)

NASEDIO Gives EC IAP Their Award of Distinction

The National Association of State Education Department Information Officers (NASEDIO) has selected a two-volume EC IAP for their Award of Distinction. The IAP is entitled "Life Centered Career Education: Activity Book One and Two", by Lynn Miller, Lynda Giascoe, and Charles J. Kokaska.

NASEDIO reviewers found the planned activities targeted for elementary and secondary school students to be "useful and imaginative as well as informative and practical".

...Judi Conrad (EC)

PERSONNEL

Staff Changes at ERIC/FL

On October 14, 1986, Anne Marie Harnett left her position as Processing Coordinator at ERIC/FL to accept a full-time position as Acquisitions Coordinator at the new National Clearinghouse for Bilingual Education. We will miss her many years of abstracting, indexing, and editing experience, but wish her well in her new job. We had the good fortune to find a very competent replacement for Anne Marie. Ms. Tarey Reilly, who holds a B.A. in French and an M.A. in Teaching English as a second language, joined the ERIC/FL staff on October 23. Tarey recently returned to the United States after several years in Kuwait and Jordan where she taught both French and English. She will be working half-time at the Clearinghouse, editing all of our RIE and CIJE resumes. We welcome her aboard.

ERIC/FL has also added a new staff position, that of writer/editor/coordinator of our ERIC Digests and Q&A Fact Sheets. Ms. Maggy McFerren, a long-time staff member of the Center for Applied Linguistics, will be working 30% of her time in this new position. Maggy has a B.S. in French and an M.A. in Arab Studies, as well as many years of writing and editing experience. We welcome her to the ERIC/FL staff.

...Jeannie Rennie (FL)

Personnel Changes at ERIC/RC

Deborah Fox, who was the Information Specialist at ERIC/RC, has accepted a position at the National Council of Teachers of English (NCTE) as Administrative Assistant to Jack Maxwell, Executive Director of NCTE. Sylvia Taber is RC's new Information Specialist and the two new research assistants (abstractors/writers) are Jacqueline Dorney and Julie Kosarin.

ERIC PUBLICATIONS

CS

ERIC First Analysis: Agricultural Policy, 1986-87 National High School Debate Resolutions, by David L. Wagner and Douglas Fraleigh, 1986.

Designed as a framework from which high school debate students, coaches, and judges can evaluate the issues, arguments, and evidence concerning which agricultural policy would best serve the United States, this booklet provides guidelines for research on the 1986-87 debate resolutions selected by the National Federation of State High School Associations. Available from the Speech Communication Association, \$5.00

Language Diversity and Writing Instruction, by Marcia Farr and Harvey Daniels, 1986.

Offers a theoretical framework and some practical suggestions to educators who wish to improve the teaching of writing to high school students who are native speakers of nonstandard English dialects, including adolescents from urban black, bilingual Hispanic, white ethnic, rural, and other linguistically diverse backgrounds. Available from The National Council of Teachers of English, \$7.00 members, \$9.75 nonmembers.

TRIP (Theory and Research into Practice) Booklet: Creative Approaches to Sentence Combining, by William Strong, 1986.

Describes the theory and research of sentence combining and discusses instructional issues such as sentence combining versus real writing and growth in sentence-making skills. Also provides a context for sentence combining and answers practical questions about using sentence combining in the classroom. Available from The National Council of Teachers of English, \$5.25 members, \$7.00 nonmembers.

Recommended English Language Arts Curriculum Guides, K-12, 1986.

Prepared by the NCTE Committee to Evaluate Curriculum Guides and Competency Requirements, Adele H. Stern, Chair, and the staff of the ERIC Clearinghouse on Reading and Communication Skills. Lists and annotates carefully planned and well-written curricula reviewed by the committee. Available from the National Council of Teachers of English, \$2.00 members, \$2.50 nonmembers.

WORKSHOPS/CONFERENCES/MEETINGS

<u>CH</u>	<u>DATE</u>	<u>LOCATION</u>	<u>STAFF</u>	<u>COMMENTS</u>
CE	Oct. 22-25, 1986	Hollywood, FL	Susan Imel	Attended the American Association for Adult and Continuing Education (AAACE) Conference where she gave a presentation: "Databases: Tools for Program Development." She also participated in two sessions with authors of ERIC Information Analysis Papers. These sessions were titled, respectively: "Professional Certification is Not Certification!" and "Adult Literacy: Issues and Ideas."
CS	March 1-4, 1986	San Francisco, CA	Charles Suhor	Attended Association for Supervision and Curriculum Development meeting. Conducted an ERIC presentation, "English Curriculum K-12 -- Inside and Out."
CS	Mar. 13-15, 1986	New Orleans, LA	Charles Suhor	Attended the Annual Meeting of the Conference on College Composition and Communication and conducted an ERIC presentation, "Language and Jazz: Some Explorations."
CS	Aug. 3-6, 1986	Norman, OK	Jane McClellan	Attended the Annual Meeting of the Association for Education in Journalism and Mass Communication. Met with the AEJMC Committee to Cooperate with ERIC.
CS	Oct. 22-25, 1986	Knoxville, TN	Karl Koenke	Attended the Annual Meeting of the College Reading Association. Presented, with colleagues, research on reading clinics.
CS	Nov. 13-16, 1986	Chicago, IL	Michael Spooner Jane McClellan	Attended the Annual Meeting of the Speech Communication Association. Michael Spooner presented a paper, "Confessions of a Dictator: Implications of the Voice-Activated Typewriter". Met with ERIC/RCS document evaluators, conducted free computer searching, displayed ERIC/RCS materials.
CS	Nov. 21-26, 1986	San Antonio, TX	Charles Suhor Jane McClellan Karl Koenke Michael Spooner Sylvia Taber	Attended Meeting of the National Council of Teachers of English. Sponsored a session on teacher testing, exhibited ERIC/RCS materials, conducted free computer searching. Sponsored a workshop, "Unblocking Critical Thinking in the Classroom".
HE	Nov. 3-6, 1986	Chicago, IL	Lynn Barnett	Attended Online '86 meeting on behalf of both HE and the ERIC Technical Steering Committee.

INDEXING ADVISORIES

1. Remember "Educational Levelers." Get into the habit of assigning these levelers first, before any other indexing is done. (See next EAB for an expanded write-up on this problem.)
2. Index specifically to the level of the document/article.
 - a. Avoid overuse of very broad indexing terms like CURRICULUM, EDUCATION, INSTRUCTION, SKILLS, INTERDEPENDENCE (Iden), whenever possible. (Frequent use of EDUCATION is particularly inappropriate in an "education" database, especially as a major to our manual indexes.)
 - b. Use Identifiers when specific Descriptors aren't available, e.g.:
 - An article on "thinking skills" should be indexed
DESC_Skills / IDEN_*Thinking Skills
(note that the BT SKILLS is minor).
 - An article on World War II Victory Gardens might be indexed
DESC_*Agricultural Production; *Social History /
IDEN_*Food Scarcity; Victory Gardens; *World War II.
 - c. Most Identifiers aren't scoped, so don't plop them around before giving them some thought, e.g.:
 - One article citation used "Research in Education" incorrectly as an Identifier for "Educational Research." EDUCATIONAL RESEARCH, of course, is a perfectly good Descriptor. "Research in Education" is the earlier name for ERIC's abstract journal RIE.
3. Try to follow Thesaurus Instructions exactly, e.g., don't use MOTHERS and EMPLOYED WOMEN for "employed mothers" when the Thesaurus says in this case to use MOTHERS and EMPLOYED PARENTS. (Of course, EMPLOYED WOMEN could be an additional index term, added at the indexer's option.)
4. Never index Thesaurus UFs as Identifiers. If a UF is erroneous or is determined to be an indexing necessity, it should first be deleted from the Thesaurus, then elevated, if necessary, to a postable Descriptor or to Identifier status.
5. Use FOREIGN COUNTRIES consistently as a minor Descriptor for documents/articles about countries (populations included) other than the U.S.A. This provides users with an easy way of partitioning the file between U.S. and non-U.S. materials. Use FOREIGN COUNTRIES in addition to DEVELOPING NATIONS and, when non-U.S., DEVELOPED NATIONS.
6. Use specific geographic Identifiers for documents/articles about specific foreign countries (in addition to the general Descriptor FOREIGN COUNTRIES), e.g.:
 - A recent citation on "Schools in Mexico" had no geographic Identifier.

Try to be consistent in majoring such identifiers for the sake of the manual indexes, e.g.:

 - Another citation on "South Africa: Another Look" had the Identifier South Africa, but unfortunately not as a major.

Don't be reluctant to further subdivide these Identifiers (just as you do for U.S. States), e.g., Mexico (Tijuana), South Africa (Pretoria).

Use the Identifier United States sparingly, usually for various subdivisions (see IAL listing) or for overall comparisons with other countries; otherwise, it is implied by its absence.
7. Do not use the Identifiers Third World and/or Third World Education Systems for "developing countries." Use, instead, the Descriptor DEVELOPING NATIONS and other appropriate terms (not EDUCATION, if at all possible).
8. For documents/articles about the 200th anniversary of the U.S. Constitution, use the Identifiers *Bicentennial and *United States Constitution. The Descriptors CONSTITUTIONAL HISTORY and CONSTITUTIONAL LAW may be used additionally, at the indexer's option.

smerc information center

san mateo county office of education

November 24, 1985

Mr. Ted Brandhorst, Director
ERIC Processing and Reference Facility
ORI, Inc., Information Systems
4833 Rugby Ave., Suite 301
Bethesda, MD 20814

Dear Mr. Brandhorst:

Since 1968, the SMERC Information Center has provided information services to educators. We have continually supported and promoted ERIC, introducing thousands of practitioners to its rich resources. Our long-standing working relationship with ERIC includes our participation in the Vocabulary Review Project and Clearinghouse Proposal Reviews, and our implementation of the National Education Practice File under a two-year contract with ERIC.

Throughout its eighteen-year history, SMERC has served subscribing agencies all over the country. Important developments in the needs and priorities of the San Mateo County Office of Education and its primary clients, the San Mateo County School districts, have led to a very difficult but critical decision. After June 30, 1987, SMERC will no longer be able to serve agencies or individuals outside the San Mateo County public schools system. We will continue to provide full service to San Mateo County educators.

This decision was reached through a great deal of analysis and deliberation, with considerable attention to the implications for the subscribing agencies. During the eight months remaining before June 30, SMERC will continue full service to subscribers, and we will do whatever we can to help them make the transition.

We support your efforts to maintain the full capacity of the ERIC system to serve educators. We appreciate your commitment to educational information services, which has helped sustain SMERC through the years. Although our future activities will be more limited in scope, we will always promote and support ERIC.

Sincerely,

Nasus Raze

Nasus Raze, Director
SMERC Information Center

OCLC Introduces Reference Databases on CD-ROM

ERIC Databases Available on OCLC's Search CD450 System

Search CD450 for Education

The OCLC Search CD450 titles in education are the first in a series of OCLC reference databases on compact disc. Bibliographic and citation databases obtained from a variety of sources will be supplemented by specially created, subject-related subsets of the OCLC Online Union Catalog. Each Search CD450 offering will use the same software, allowing your patrons and staff to access bibliographic information for many subject areas through one familiar system.

The Search CD450 education package includes three databases on five separate compact discs for your library's use:

1. **ERIC database.** 1982-present. (Quarterly or annual subscription)

Includes two separate files:

- **Current Index to Journals in Education (CIJE)**, 1982-present
 - **Resources in Education (RIE)**, 1982-present
2. **Current Index to Journals in Education.** 1969-1981
 3. **Resources in Education.** 1977-1981
 4. **Resources in Education.** 1967-1976
 5. **Education Materials in Libraries.** A subset of the OCLC Online Union Catalog containing education-related bibliographic records representing all types of materials. (Annual subscription)

Backfile discs (2, 3, and 4 above) are available as one-time purchases. You can subscribe to updated copies of the current ERIC disc either quarterly or annually. The Education Materials in Libraries disc is updated annually.

Reference Services

Reference Databases on CD-ROM January 1987

Search CD450 System

General Description

OCLC's new reference product, the Search CD450 system, provides access to reference databases stored on compact discs. Compact discs accommodate large files of information that can be retrieved using a microcomputer, a CD-ROM (Compact Disc Read Only Memory) reader, and OCLC® search software. Compact disc technology provides local access to information, reduces time-based telecommunications and search charges, and uses a very reliable medium for information storage. With the new OCLC Search CD450 system, your patrons and staff will have affordable in-house access to many reference databases.

Features and Advantages

The OCLC Search CD450 system includes sophisticated, easy-to-use search software that will allow your patrons and staff to take full advantage of reference databases in your library. In addition to local data access, the Search CD450 system allows local profiling so your library staff can alter options for searching, display, and printing.

Searching. These flexible searching techniques may be used alone or in complex search statements: single words, phrases (with assumed adjacency of the terms in the phrase), AND, OR, NOT, and ADJacency operators, right truncation, range searching, limitation of search to one or more specific fields, and retrieval by a controlled vocabulary (descriptors, subject headings). Search progress is tracked, so long searches can be detected and canceled if necessary.

Index. The index-browsing function can be invoked at any time, even while a search is being entered. Indexed terms are displayed with the number of occurrences in the database. Words in the index can be transferred directly to the search statement.

Search History. The last twenty searches in the current search session, including the number of records retrieved, can be displayed at any time. Previous search results can be easily selected and incorporated in a new search.

User Interface. The OCLC Search CD450 interface is especially designed for patrons, making the steps and options as clear as possible. The basic user options are displayed on the screen at all times as function

key values. The straightforward options prevent your patrons and staff from getting lost in complex menu mazes and allow them to select the next step. The system includes context-sensitive help screens.

Printing and Saving. You may print records or save them on diskette or fixed disk. Your library staff profiles the system to determine which drive is used for saved records. The downloaded records are in ASCII files that can be used with other software to create reports and bibliographies.

Relevancy. The Search CD450 system displays the most relevant citations first. Relevancy is calculated by counting the number of times the search terms appear in each record retrieved. Records are displayed with the highest scoring record first. The scoring results can also be displayed in a graph, allowing the user to see at a glance the range of scores in the set of retrieved records.

System Configuration

The OCLC Search CD450 system will run on

- An OCLC M300XT Workstation or IBM PC XT or PC AT, each with at least 512K random-access memory (RAM)
- A 10MB fixed-disk drive or hard card
- A CD-ROM reader

Support

Each Search CD450 order includes a user manual, reference guide, search software diskette, and compact disc(s). One year of software maintenance is included in the purchase price. Your OCLC Search CD450 system will receive full OCLC support, including the assistance of the User Contact Desk (UCD). You can reach the UCD at these toll-free numbers:

- National: 800-848-5800
- Ohio: 800-282-7306

Projected Availability

April 1987

(614) 764-6000

- Use a Boolean operator to include another significant word in the file search. For example:

- 1 Type a word, a colon (:), the abbreviation tl, a space, and, then a space.
- 2 Next type another word, a colon (:), and the abbreviation tl.
- 3 Press the return key to start searching.

EXAMPLE: kindergarten tl and tl

Limit a Search to Other Specific Fields

To Search	Type	Example
Abstracts	[word]:ab	
Subjects	[word]:su	
Year of Publication	[year]:yr	

Notes: Type a colon (:), not a semicolon (;) after a term, without a space. If you use a colon to limit a search to a specific field, only records that contain the term(s) in that field will be retrieved. Other field limitations are available in various databases. See list in database fact sheets.

Select a Search CD450 Display Format

Search CD450 provides several formats for displaying records. You may want to switch to one of the shorter formats when you print or save records.

To select a format:

- 1 Press <F8> to see the available formats.
- 2 Use the up and down arrow keys to highlight a format, then press the return key. Records will display in the selected format, and they will be printed or saved in the format selected for display.

Key	Name	Function
<F1>	Help	Request assistance with current task
<Ctrl> + <F1>	Database	Request information on the database you are using
<F2>	Index	View index entries surrounding the term you enter Scroll through the index Copy terms from index into a query
<F4>	History	Review past queries Copy past queries into a new query
<F5>	Previous	View previous record in a retrieval set
<F6>	Next	View next record in a retrieval set
<Ctrl> + <F5> or <F6>	Show	View specific record in a retrieval set
<F7>	Print	Print records in a retrieval set
<Ctrl> + <F7>	Save	Save records in a retrieval set on a diskette
<F8>	Graph	View graph showing scores—how many times query terms occur in each record of a retrieval set Press <F8> again to remove graph from screen
<F9>	Format	Select format for record display and for printing and saving records
<F10>	Quit	Erase current session, begin a new work session
<ESC>	Escape	Leave a function (except <F8>), return to Query Window
<←>	Return	Choose a database; begin searching, printing, or saving records
<↑> or <↓>	Arrows	Highlight a selection; scroll through a record
<PgUp> or <PgDn>	Page	View next or previous screen in a record

- 1 Press <F10>. A message will appear on the screen asking if you want to end your work session.
- 2 Press the return key. Queries you entered will be erased, and Search CD450 will restart, allowing you to begin a new work session in the database you choose.

PRINTING OR SAVING RECORDS

PRINT Records

- 1 Make sure the printer is ready.
- 2 Press <F7>.
- 3 Type the numbers of the records from the current search results that you want to print. To print all of the records, type all.
- 4 Press the return key. The records will print out on the printer.

SAVE Records

- 1 Records are always saved to a file named DOCS.(n), where (n) stands for number.
- 2 Place a formatted diskette in Drive A (unless records are saved on the hard disk for printing later).
- 3 Press <CTRL> and <F7>.
- 4 Enter the numbers of the records from the current search results that you want to save. To save all of the records, type all.

Press the return key. Records will be stored on the diskette or hard disk. The file created can be transferred to any processing package that can read ASCII files.

Online Computer Library Center

Dublin, Ohio 43017-0702
(614) 764-6000

1987 January

Search CD450 is a microcomputer-based reference tool whose powerful searching software gives you full, flexible access to large reference databases stored on compact discs.

When the system is ready for use, the Database Selection Menu displays.

To choose a database to search: Use the up and down arrow keys (↑ and ↓) to highlight a database name, then press the return key (↵). Note: Keystroke instructions are given for the IBM PC keyboard. For other terminals, press the equivalent keys.

An Introductory Screen appears. Type a term that describes your subject and press the return key. Press <F1> for Help if necessary.

Database: CUE

Search CD450 Reference Guide

SEARCHING

Start with a Simple SUBJECT Search

- 1 Type a term that describes your subject. It will appear in the Query Window.
EXAMPLE: 1 > kindergarten
- 2 Press the return key to start searching.
- 3 Check the results which appear in the Results and Display Windows.
 - No records found? Go to Step 6.
 - One or more records found? Go to Step 4.
- 4 Press <F8> to view the next record if more than one record was retrieved.
- 5 Press <F7> to print records or <CTRL> and <F7> to save records on a diskette.
- 6 Type in another query to
 - Try a NEW subject term (if no records were found).
 - EXPAND your search to find more records.
 - NARROW your search to find fewer, more relevant records.
- 7 Return to Step 1 to enter a different query.
- 8 Press <F10>, then press the return key to erase your work and leave Search CD450 ready for the next user.

REFINING YOUR SEARCH

EXPAND Your Search

- Use the OR operator to search for related terms. Press the return key to start searching.
EXAMPLE: 1 > kindergarten or preschool
- Use the History function to copy terms from past queries into a new query.
 - 1 Press <F4> to review past queries, which will appear in the History Window.
 - 2 With the up and down arrow keys, highlight a query, then press the tab key (⇧) to copy it into a new query. The selected query will appear in the new query as its number followed by an exclamation point (!).
 - 3 Type or followed by a space. Then type another term, or repeat Step 2 to copy another past query into the new query.
 - 4 Press the return key to start searching.
EXAMPLE: 1 > kindergarten
2 > ! or preschool

Sample History Window

- Use truncation to search for words beginning with the same letters.
 - 1 Type the root form of a word.
 - 2 Type an asterisk (*) to stand for any ending.
 - 3 Press the return key to start searching.
EXAMPLE: 3 > read* (Retrieves: read, reading, ready, etc.)
- Check the Database Index to look for related terms, see the number of times a term appears in the database, and copy index terms into a new query.
 - 1 Press <F2> to open the Index Window.
 - 2 Type a word and press the return key. The Index Window shows this word and the words surrounding it.
 - 3 Use the up and down arrow keys or the <PgUp> and <PgDn> keys to see more entries. Numbers show how many times a term occurs in the database.
 - 4 Use the arrow keys to highlight a word; press the tab key to copy it into your new query.
 - 5 Press the return key to search the terms in your new query.

NARROW Your Search

- Use AND to combine terms and find records containing both terms.
 - 1 Type a term, a space, and, a space, another term.
 - 2 Press the return key to start searching.
EXAMPLE: 4 > kindergarten and reading
- Remember that you can use the History function to combine terms from past queries.
EXAMPLE: 4 > ! and reading

- Use ADJ (Adjacency) to search for a significant phrase.
 - 1 Type the first word of a phrase, a space, then the second word.
 - 2 Press the return key to start searching.
EXAMPLE: 5 > reading readiness

Note: Search CD450 assumes that terms separated by a space are adjacent, but you can type ADJ between terms if you like.
EXAMPLE: 5 > reading adj readiness

SEARCHING TECHNIQUES

Combine Terms with Boolean Operators

Operator	Function
ADJ	Finds records with the phrase entered in the query
AND	Finds records containing all of the terms in the query
NOT	Finds records that do not contain a specified term
OR	Finds records that contain any of the terms in the query

Notes: Type a space before and after an operator. Queries cannot begin or end with an operator. Use parentheses if more than one operator is used in a query.

EXAMPLES: video cassette recorder television and (advertising or commercials) television not (commercials or adverts*) advertising or advertisements or commercials

Find Works by a Specific AUTHOR

- Search only the AUTHOR field of the records in the database. Type the author's last name, a colon (:), and the abbreviation au, then press the return key to start searching.
EXAMPLE: burke:au
- If you know the author's first name, include it in the search. Type the author's last name, a colon (:), the abbreviation au, a space, and the first name. Press the return key to start searching.
EXAMPLE: burke:au alfred

Find a Specific TITLE

- Search only the TITLE field of records in the database. This is an easy way to locate records that deal with a specific topic.
 - 1 Type a significant word from the title (i.e. not an article or preposition), a colon (:), and the abbreviation ti.
 - 2 Press the return key to start searching.
EXAMPLE: evolution:ti

DEVELOPING PRACTICE DESCRIPTIONS FOR ERIC

Did you know that ERIC contains practice-oriented materials that can help you solve your educational programming problems? In fact, over 44,000 ERIC documents of varying length, style, and purpose have been identified as "practice-oriented." These materials include:

- * promising practices
- * learning activities
- * resource materials
- * fact sheets
- * curriculum guides
- * lesson plans
- * games/puzzles
- * worksheets
- * units of study

Perhaps you are in the process of developing and implementing an exciting new program or practice. Descriptions of your work could help others. We encourage you to document your work and submit it to ERIC.

Why Should I Document My Practices?

- o You've designed an educational program that works. Your students seem to be getting a lot out of it--but that's as far as it goes.
- o You want to make a professional contribution to teaching, but you don't have the time, funds, or the inclination for research.
- o You want to obtain credibility, either as an individual, as a program, or as a school. Perhaps you want other schools to use and validate your program.

Whatever your need, your work should be represented in ERIC. ERIC can take your educational program design around the world, to practitioners with students and needs just like yours. Your professional contribution will be recognized within the education community, because ERIC is the world's largest database of education literature. You'll be recognized among your peers as an expert on your topic.

How Should I Document My Practices?

Promising practices that are entered into the ERIC database are carefully documented and written so they will be useful to other practitioners. They provide concrete descriptions and some suggestions for adaptation so that other practitioners can replicate the program.

If you are just starting to implement a new practice, you might keep a log of changes in student behaviors. If you started the practice a year or more ago, you will probably have to rely on your memory and class records. Try to present evidence that your practice works.

Although ERIC welcomes and carefully considers all submissions, admission to the database is selective. Descriptions will be screened for content and physical characteristics. Content should be timely, original, and helpful to others.

As to physical characteristics, your description should be at least two pages long. (Although there is no maximum length, it is good to remember that practitioners are busy people and appreciate brevity.) It should be either typed or prepared on a word processor, with dark and clear type to allow ERIC to make a good photocopy. We suggest that you refer to the attached format sheet when writing your paper.

After you have written a description, have others read it, preferably someone familiar with your practice and someone who is not. When you are satisfied that your paper accurately reflects the practice, send it to an ERIC clearinghouse, or to the ERIC Processing & Reference Facility at ORI, Inc., Information Systems, 4833 Rugby Avenue, Suite 301, Bethesda, Maryland, 20814.

Please include a completed copy of the reproduction release attached to this packet. This release merely gives ERIC permission to reproduce your paper and does not affect your copyright status. You will retain full rights to your practice or program description.

This information packet was developed by the ERIC Clearinghouse on Adult, Career, and Vocational Education (ERIC/ACVE) with funding from the Office of Educational Research and Improvement, U.S. Department of Education under contract number NIE 400-84-0011. The opinions expressed in this brochure do not necessarily reflect the position or policies of OERI or the Department of Education. Additional copies may be obtained from ERIC/ACVE at the National Center for Research in Vocational Education, The Ohio State University, 1960 Kenny Road, Columbus, Ohio 43210-1090; or contact any ERIC clearinghouse.

FORMAT

What do your peers need to know to replicate your promising practice or program? The following elements provide a suggested framework for your written description:

- (1) Statement of Problem. Describe the situation that made you realize that you needed to develop your practice. This should appear early in the paper, since readers want to know if your problem is comparable to theirs.
- (2) Environment Description. Tell about your educational program: size of enrollment, location, demographics. Do not go into detail--ask yourself, "How is this important to my solving the problem?"
- (3) Objectives. State the objective(s) of your practice.
- (4) Practice Description. Describe your promising practice, from concept to implementation. Include cost and staffing information.
- (5) Evaluation. Tell what process you used to determine that the practice works. Did you fulfill your objective(s)? Include statistics if available.
- (6) Criticism. Discuss weaknesses of your promising practice. What will you do differently next time?
- (7) Suggestions for Adaptation. (Optional but very helpful.)
- (8) Future Plans. Tell what you will do with your practice in the future. Contact information would be helpful.

The above points are only a suggested framework for your paper. There may be extra issues you need to address, such as the legal aspects of your problem, or a special background you have. Some of the suggested categories may be irrelevant to your situation. The key is to ask, "What do my peers need to know to replicate my promising practice?"

ALA Yearbook 1987

ERIC

The Educational Resources Information Center marked 20 years of service to education in 1986, when over 1,000 documents were announced in each issue of Resources in Education, the monthly index of documents entered in the ERIC database. The 12,474 documents processed during the year brought the total number of documents announced in RIE since the first issue was published in November 1966--with 45 document entries--to 265,600 at the end of 1986. There were more than 2,000 subscribers to RIE in 1986.

Ninety-eight percent of the documents announced in RIE in 1986 are available in full text through the ERIC microfiche collection or through the ERIC Document Reproduction Service. EDRS can fill individual orders for any of the documents in the microfiche collection with microfiche copies or, for most of these documents, with paper copy. Full text copies of the remaining 2 percent of the documents are available only from the sources stated in RIE for each document. From January through October 1986, EDRS had distributed 10,416.493 microfiche to their 762 standing order customers, while orders from individual customers totaled 17,957 microfiche and 25,389 titles in paper copy.

A total of 17,766 journal articles were annotated and indexed for Current Index to Journals in Education, the monthly index of the journal literature from ERIC, an average of some 1,480 each month. The number of journal articles announced in CIJE since this service was implemented in 1969 totaled 340,802 at the end of 1986. A study by the CONSER Abstracting and Indexing Project

-2-

at the Library of Congress found that, of 767 journals covered by CIJE in 1986, 82 percent were published in the United States, 15 percent in foreign countries, and 3 percent in Canada. The study also found that 297 of these titles overlapped with coverage by Education Index, 222 with Psychological Abstracts, 187 with Sociological Abstracts, and 35 each with Library and Information Science Abstracts and Library Literature.

Journals covered by CIJE are available through many libraries, and reprints of individual indexed articles are available from University Microfilms International for about 75 percent of the journals covered. There were some 1,700 subscribers to CIJE in 1986.

The 30,240 documents and articles processed by the ERIC system in 1986 brought the total number of citations in the database to 606,402 at the end of the year.

The Directory of ERIC Service Providers, published by the ERIC Processing and Reference Facility in 1986, lists 891 organizations that provide computerized searches of the database, have sizeable collections of the ERIC microfiche (all current subscribers and those having a collection that covers two years or more), and that subscribe to and collect the various ERIC publications, including RIE, CIJE, and the Thesaurus of ERIC Descriptors. These organizations include 86 government agencies at the federal, state, and local levels; . . . non-profit organizations, e.g., higher education institutions, public libraries, and ERIC clearinghouses; 12 for-profit organizations; one individual; nine organizations in outlying U.S. territories;

110 foreign organizations (both governmental and non-governmental); and one international organization.

Database Activities. The 11th edition of The Thesaurus of ERIC Descriptors was published by Oryx Press late in 1986 to update the 10th edition published in 1984. The new edition contains some 224 new terms for a total of 5,296 descriptors, i.e., indexable or main terms, and 4,163 nonindexable "use for" terms and invalid terms.

The ERIC Digest File Online (EDO), developed and maintained by the ERIC Clearinghouse on Elementary and Early Childhood Education, was up and running on Edline (The Source) during 1986. The digests, which are two-page summaries of information on cutting edge topics in education, are prepared by each of the 16 clearinghouses, and are also available in paper copy and in the microfiche collection.

The development of a new ERIC file on statistical and numeric databases in education was begun in 1986 by the ERIC Processing and Reference Facility. The file will contain descriptions of approximately 50 education-related databases, beginning with the National Center for Education Statistics. This file will be incorporated in the ERIC database.

The ERIC microfiche, which were originally produced on silver halide film (still a special option for standing order customers), were changed from vesicular film to the less expensive and more durable diazo during 1986. These microfiche are shipped without envelopes to save storage space.

During 1986, ERIC was made available on compact disks by

SilverPlatter. It is a self-contained, fixed-cost system for local use without connect or communications costs, and provides for searching with Boolean logic and printing out search results.

Current Status. The ERIC system is now funded through the newly established Office of Educational Resources and Improvement in the U.S. Department of Education rather than through its predecessor, the National Institute of Education. Each of the 16 clearinghouses in the decentralized network collects and processes information on particular areas and aspects of education for inclusion in the database and announcement in RIE, and annotates articles from professional journals in its scope area for CIJE. The contents of these two indexes make up the ERIC database, which is available for online searching. Emphasis is on the ephemeral literature of education--e.g., research reports, project descriptions, conference papers, curriculum guides, and program descriptions. Materials useful to practitioners and policymakers are particularly sought after.

In addition to actively soliciting documents and processing them for the database, individual clearinghouses publish literature reviews and resource guides, digests, minibibliographies, and other materials on topics of current interest in their scope areas, and provide reference services for ERIC users.

LIST OF ATTACHMENTS

9

The ERIC Administrative Bulletin (EAB) is prepared by the ERIC Processing and Reference Facility on the basis of material submitted by all components of the ERIC system. EAB articles are reviewed and approved by Central ERIC before publication.

The EAB is intended to be the "journal" of the ERIC system and a major means for the decentralized components of ERIC to communicate and interact with one another. The EAB is also a permanent record reflecting most of the major events in the life of the ERIC system (such as personnel changes, Standing Order Customer changes, etc.) and providing in printed form essential documents (such as ERIC policy and priority statements, Clearinghouse scope statement modifications, ERIC Processing Manual revisions, etc.) Submissions to the EAB are to be sent (using the standard form) to your respective monitor. The deadline for input to each monthly issue is the 10th of the month.

ACTION ITEMS

Processing Advisory - Publisher Addresses for "One-Shot Journals"

Journals that are regularly covered by CIJE do not need to carry any availability information with the citations developed from them because their availability is regularly noted in the Source Journal Index authority list at the front of each issue of CIJE.

Journals that appear in CIJE as "one-shots" (i.e., that are only occasionally or irregularly processed for articles, and then very selectively) can sometimes be obscure enough that the cataloger feels constrained to provide the user with publisher address information.

Under present processing arrangements, the CIJE "Availability" field is reserved for information about reprints. When "UMI" is entered in this field, the Oryx software generates the phrase "(Reprint: UMI)" and adds it to the citation. The original idea was that any additional reprint series that decided to provide CIJE journals systematically could be handled in the same way. So far, however, UMI is the only systematic provider of CIJE journal reprints.

What all this means is that the AVAILABILITY field has been pre-empted and cannot be used for complex publisher address information. This necessarily relegates publisher address information for one-shot journals to the NOTE field. Most of you have been doing this, but a few have attempted to combine this information with the UMI data and have forced Oryx to edit them apart.

Please remember, however, that publisher address information (a highly changeable element) should never be included for regularly covered journals and should only be included for one-shots when the journal is genuinely obscure, rare, and difficult to identify.

...CERIC

Acquisitions Advisory -- American Educational Research Association (AERA) -- Acquiring Conference Papers for 1985 and 1986

Further solicitation efforts for specific 1985 & 1986 AERA papers not yet acquired by the TM Clearinghouse should be done directly by the appropriate Clearinghouses. Over 3,400 papers have been requested from 1987 AERA presenters. Papers from the 1987 meeting are beginning to arrive at TM and we will transfer them to the appropriate Clearinghouses as soon as we can. If you are interested in acquiring specific papers from the 1987 AERA meeting, please check with TM first to see if we have received them. This will avoid unnecessary duplication of effort on our part and confusion on the part of the presenter.

...Betsy Smith (TM)

RECOMMENDATION ITEM

Standard Response to Requests to Reproduce ERIC Bibliographic Records (or the Documents Represented by These Records)

The ERIC Facility receives a significant number of inquiries relating to reproducing ERIC records or documents. In order to avoid constantly re-writing the same response (with perhaps small variations) we have developed a "standard" response (see Attachment 1) that covers the subject fairly comprehensively. ERIC Clearing-houses are invited to make use of these forms in their own reference work.

...Joanna Eustace (ERIC Facility)

NETWORK NEWS

COED "Bylaws"

The Council of ERIC Directors (COED) has a set of "Guidelines" (Bylaws) that govern its operation, the election of officers, and the formation of committees. Since COED meets only once a year, these guidelines can be difficult to find when you need them. To alleviate this situation, the latest revision of the COED guidelines, dated January 1986, is provided herewith as Attachment 2.

...Garry Walz (CG)

Pubtype Statistics (Through 1986)

Attachment 3 is a chart summarizing the use of the Publication Type field for the twelve year period September 1974 - December 1986.

The total accessions considered during this period number 182,289. A total of 242,877 Publication Type assignments were made by indexers during this period, for an average of 1.3 Pubtypes per accession.

The top three types are: "Research/Technical Reports" at 31.4%, "Conference Papers" at 22.5%, and "Project/Program Descriptions" at 13%.

Between 1984 and 1986, there were very few changes in rank. "Information Analyses" moved from 10th to 8th (4.1% to 4.5%). "Books" fell from 8th to 10th (4.5% to 4.1%). "Multilingual/Bilingual Materials", a late starter, moved from 33rd to 31st (.07% to .1%). "Practicum Papers" moved from 32nd to 30th (.07% to .1%). Largely in reaction to these two increases, "Audiovisual Materials" fell from 31st to 33rd, but stayed at essentially the same percentage (.1%). Similarly, "Creative Works" moved from 30th to 32nd, but stayed at the same percentage (.1%). "Computer Programs", another late starter, overtook the lowly "Geographic Materials" (i.e., maps) and moved from 36th to 35th (.003% to .02%).

The largest percentage changes during this period were: "Guides (General)" down 1.1%; "Opinion Papers" up .9%; "Conference Papers" (up .9%); "Project/Program Descriptions" up .8%. In other words, the Pubtype percentages shown in this table are essentially stable and can be quoted with a great deal of conviction (unless the acquisition ground rules change).

Since summarizing the data across the entire twelve year period has the effect of muting the percentage changes, it can be somewhat helpful to look at data by individual years. If the data for 1985 and 1986 are compared, the largest changes (in absolute numbers of documents) are the following:

"Information Analyses" (down 199); "Teaching Guides" (down 181); "Evaluative/Feasibility Reports" (down 178); "Conference Papers" (up 97); "Guides (Non-Classroom)" down 90; "Legal/Legislative/Regulatory Materials" down 90; "Research/Technical Reports" up 79; "Opinion Papers" up 64; "Bibliographies" down 50; "ERIC IAP's" down 50.

We hope this information is of some interest to you.

...Ted Brandhorst/Joanna Eustace
ERIC Facility

"Research in Brief"

OERI/IS is continuing to issue a series of "targeted products" called, generically, "Research in Brief". These single-page flyers each deal with a specific topic. The following flyers have been issued to date:

- 5 Ways to Manage a Classroom
- 10 Ways to Improve Writing Skills
- Trouble Spots in Higher Education
- How to Become a Nation of Readers
- Selecting Principals
- College Test Scores Declining
- Problems in Math and Science Education
- NAEP Findings at Your Fingertips
- Designing Effective Teacher Evaluation Plans
- Public Supports Tougher School Standards
- Ideas For Involving Parents in School
- RICE: A Computer Resource for Teachers

- Our Literacy Report Card
- Eight Pointers on Teaching Children to Think

The Facility has received copies of these flyers and has been routing them to Clearinghouses on the basis of their subject matter.

OERI/IS has now informed us that they would like to see these items entered individually into the ERIC database. Clearinghouses are so informed and should act accordingly both with respect to "Research in Brief" items currently in hand and any received in the future.

In cataloging these items, please treat "Research in Brief" as a series title. The Institution code should be EDD00036 (OERI).

...Joanna Eustace (ERIC Facility)

ERIC Digests -- Title List

ERIC Digests are becoming numerous. The Facility has attempted to collect a complete set, but has been only partially successful. Attachment 4 is a list of the 165 Digests on ED-LINE as of February 1987. The list, courtesy of PS, is in two sequences: (1) alphabetic by title; (2) by Clearinghouse. With Digests constantly being added to and deleted from this file, obviously this list is a "snapshot" and far from complete. Perhaps sometime in the future, we will be able to provide a complete list.

...Joanna Eustace (ERIC Facility)

SilverPlatter Expands ERIC "Current" Discs

In response to competition from DIALOG, SilverPlatter has decided to expand the "Current" ERIC disc to include data beginning with January 1981. This adds two year's worth of bibliographic data to the disc, which will now contain six plus years worth of data.

The new "Current" disc will be created beginning with the update disc extending through December 1986. The "Current" disc will now overlap with the archival disc for the period 1981-1982.

...Pat Brown (ERIC Facility)

SilverPlatter Announces New Low ERIC Price for ERIC on CD-ROM

In response to OCLC's pre-publication announcement of its prices for ERIC on CD-ROM, SilverPlatter has announced a drastic price reduction for its ERIC on CD-ROM product. The new annual subscription price of \$650 is designed to keep SilverPlatter as the lowest priced offeror of the ERIC database. Attachment 5 is the SilverPlatter News Release that announced the price reductions.

...Pat Brown (ERIC Facility)

DIALOG OnDisc ERIC -- Chronolog Announcement (February 1987)

Attachment 6 is the announcement in DIALOG's Chronolog newsletter of the "DIALOG On Disc ERIC" product. Word has it that the DIALOG subscription price has recently been lowered to be competitive with the SilverPlatter and OCLC prices.

...Pat Brown (ERIC Facility)

DIALOG Salutes ERIC 20th Anniversary

The November 1986 issue of DIALOG's Chronolog contained a nice "Salute" to ERIC on the occasion of its 20th anniversary. This one-page "birthday card" is shown as Attachment 7.

...Ted Brandhorst (ERIC Facility)

Search Aids for Use With DIALOG Databases (1987) -- ERIC Section

Annually, DIALOG produces a list of "Search Aids" for each of its online databases. In the 1987 list, 26 separate products are listed as ERIC "Search Aids". The Facility helped DIALOG to compile this list. For your convenience, the list is repeated here as Attachment 8.

...Jim Houston (ERIC Facility)

PERSONNEL

Ely (IR) Acts as Consultant to Indonesia on National Scientific/Technical Information

Donald P. Ely, Professor of Instructional Design, Development, and Evaluation and Director of the ERIC Clearinghouse on Information Resources, served as a consultant on information systems development with a team from the U.S. National Academy of Sciences in Jakarta, Indonesia, January 13-15, 1987. The U.S. team worked with Indonesian counterparts from the National Research Council to develop a plan for an Indonesian national science and technology information system.

...Barbara Minor (IR)

Erratum -- Personnel Changes at CS (not RC)

In the November/December issue of the EAB, we mistakenly attributed several personnel changes to RC when they actually occurred at "RCS". To help rectify our error, we are repeating the news item with "CS" appearing where RC appeared in the original:

Personne Changes at ERIC/CS

Deborah Fox, who was the Information Specialist at ERIC/CS, has accepted a position at the National Council of Teachers of English (NCTE) as Administrative Assistant to Jack Maxwell, Executive Director of NCTE. Sylvia Taber is CS's new Information Specialist and the two new research assistants (abstractors/writers) are Jacqueline Dorney and Julie Kosarin.

PROCESSING AND REFERENCE FACILITY
4350 EAST-WEST HIGHWAY, SUITE 1100, BETHESDA, MARYLAND 20814-4475
(301) 656-9723

OPERATED FOR THE U.S. DEPARTMENT OF EDUCATION by ORI, Inc., Information Systems

Your recent inquiry requesting permission to reproduce ERIC bibliographic records (or the documents represented by those records) or to download ERIC bibliographic records, has been received and is answered below. The large number of such requests that are received by ERIC necessitates a form letter response where feasible.

**Response to Request for Permission to
Reproduce Bibliographic Records in ERIC Database**

Your request seeks permission to reproduce ERIC bibliographic records. The items referred to are specifically identified on the back of this form by their accession number, if appropriate.

The ERIC database is a federally-funded U.S. Government database in the "public domain" and the bibliographic records it contains may be reproduced without restriction. Its dissemination to and use by the educational community and the public in general is encouraged.

We request that ERIC records utilized in this way be properly attributed to ERIC (as their source) and that care be taken to include the ERIC accession number for each record (e.g., ED-123 456 or EJ-987 654). The accession number links the item to the ERIC system and provides a ready means for ordering a copy of the item in microfiche or reproduced paper copy.

**Response to Request For Permission to
Reproduce Documents or Journal Articles Represented in
the ERIC Database**

Your request seeks permission to reproduce one or more of the original documents or journal articles described by bibliographic records in the ERIC database. The items referred to are specifically identified on the back of this form by their accession number, if appropriate.

The documents and journal articles accessioned into and announced by the ERIC database generally do not belong to ERIC. They belong to their personal authors or source organizations/publishers.

ERIC regularly seeks permission from document owners and copyright holders to reproduce materials within the framework of the ERIC system. When the permission is obtained, however, it does not grant ERIC the privilege of extending permission to others for the use of the owned or copyrighted material.

Items in the public domain (e.g., Government documents, government-funded contractor reports) may, of course, be reproduced or quoted at length without restriction. Items carrying a copyright notice or published after January 1, 1978 (the date of the latest copyright law), require contact with the document owner or copyright holder (e.g., personal author, organizational source, etc.) to obtain such permission. Articles from professional journals and other periodicals generally fall into this category. In all cases, appropriate attribution statements should accompany any copied material.

**Response to Request For Permission to
Download Bibliographic Records
From the ERIC Database**

Your request seeks permission to download ERIC bibliographic records. The items referred to are identified on the back of this form, if appropriate.

The ERIC database is a federally-funded U.S. Government database in the "public domain." Its dissemination to and use by the educational community and the public in general is encouraged.

The downloading of selected ERIC records as a result of a particular computer search would be a part of this public use and there are no objections to it. The only restriction that ERIC imposes is on the wholesale downloading of the entire database (or large segments of it) for redistribution. This is not permitted. Since the backfile records are dynamic and open to change, it is believed that, in order to avoid confusion, there should be only one authoritative source for the entire database. In other words, selective use is encouraged, but large-scale duplication for redistribution is not.

Identification of Material

- ED accession numbers, announced in *Resources in Education* (RIE)

- EJ accession numbers, announced in *Current Index to Journals in Education* (CIJE)

- Other identification

Status of Material

- In the Public Domain

- Copyrighted, or published after January 1, 1978, or reproduction restricted. Permission to reproduce should be obtained from the personal author or organizational source/publisher.

- Not determined

Sincerely yours,

User Services Specialist
ERIC Processing and Reference Facility

3822

Revised January 1986

COUNCIL OF ERIC DIRECTORS (COED)
GUIDELINES

1. The Directors, Assistant/Associate Directors of ERIC Clearinghouses, and Directors of ERIC support contractors shall constitute a body called the "Council of ERIC Directors (COED)." The Council shall meet at least annually to discuss matters related to management and functioning of the ERIC system. Each Clearinghouse shall have two (2) votes on all matters voted upon by COED.
2. The Council shall elect a steering committee to be called the "Executive Committee."
3. The COED Executive Committee shall be made up of six (6) members elected by the Council as a whole, with at least three (3) members being ERIC Clearinghouse Directors. The Chair of the ERIC Technical Steering Committee shall be an ex-officio member of the COED Executive Committee and shall have voting rights.
4. The term of office for an elected member of the COED Executive Committee shall be three (3) years. After being off the Executive Committee for one year, a COED member is eligible for re-election. No ERIC component (Clearinghouse or support contractor) may have more than one (1) member on the COED Executive Committee.
5. Nominations for election to the COED Executive Committee shall be made to the Chair of the Executive Committee either at an ERIC Directors' meeting or by mail, at any time. Prior to any given election, the Chair will report on nominations received that pertain thereto.
6. The Chair and the Deputy Chair of the COED Executive Committee shall be selected by the members of the Executive Committee. The term of office for the Chair and Deputy Chair shall be for one (1) year.
7. The Chair of the COED Executive Committee is the liaison between the Council and Central ERIC (or any other Federal Agency or project.)
8. The Council shall be responsible for establishing committees to be made up of Directors and other ERIC staff members, to respond to the concerns of the ERIC Directors and Associate/Assistant Directors.
9. All meetings of COED and the COED Executive Committee shall be open to all members of COED.

SILVERPLATTER ANNOUNCES NEW PRICES FOR ERIC ON CD-ROM

SilverPlatter Information, Inc., a pioneer in publishing CD-ROM databases for the library reference desk having shipped products since August 1986, has announced new prices for the ERIC database. These new prices are effective January 26, 1987.

A subscription to the current ERIC disc which contains both the RIE and CIJE files from 1981 to present is available for \$650 per year with quarterly updates or for \$390 per year updated annually at subscription renewal. The subscription price includes the CD-ROM disc, retrieval software developed by SilverPlatter, documentation, and hotline support.

In addition, a two disc retrospective set for ERIC containing both RIE and CIJE from 1966 to 1982 is available for the purchase price of \$900. If ordered at the same time as a subscription to the current disc, a special price of \$1,200 is available. This includes a subscription to the current disc with quarterly updates and the purchase of the two ERIC retrospective discs.

The ERIC database from SilverPlatter is available for immediate shipment. For further information contact:

ANNOUNCEMENTS

DIALOG OnDisc™ ERIC – Information for Everyone

Announcing a new line of CDROM-based information products from DIALOG! We are pleased to introduce ERIC as the first of a series of databases to be offered on CDROM (Compact Disc Read-Only Memory). We plan to introduce more databases on CDROM in 1987 in a variety of disciplines.

According to Dr. Roger Summit, President of DIALOG, "Our overall mission has always been to provide increasingly effective means for accessing, presenting, and disseminating recorded information through computer technology. With the market starting to accept CDROM technology, application of this technology to DIALOG OnDisc products is a natural evolution for us." CDROM technology offers libraries, academic institutions, corporations, and other institutions the ability to provide unlimited searching locally to their entire user community at a fixed cost.

DIALOG's entry into the CDROM market

has been preceded by many discussions with database providers and by various market research activities. The product was used and tested by major academic institutions last summer.

DIALOG OnDisc ERIC.

DIALOG OnDisc ERIC provides immediate access to abstracts of articles published in over 700 educational journals, and thousands of research reports, evaluation studies, curriculum guides, and lesson plans collected by the U.S. Department of Education. The ERIC database corresponds to

two printed indexes: *Resources in Education* (RIE), which covers significant educational documents, and *Current Index to Journals in Education* (CIJE), an index to more than 700 periodicals of interest to every segment of the education community. DIALOG OnDisc ERIC contains a wide variety of information covering:

- Adult and vocational education

(continued on page 87-2) ▶

ANNOUNCEMENTS

DIALOG OnDisc ERIC (cont'd)

- Teacher education
- Reading and communication skills
- Handicapped and gifted children
- Tests, measurement, and evaluation
- Higher education
- Information resources.

The Best of Both Worlds. DIALOG OnDisc products include DIALOGLINK communications software so that you can take advantage of the full power of DIALOG OnDisc ERIC when teamed with DIALOG online. If you want to access more current ERIC information between quarterly updates, you simply save your CDROM search strategy and switch to DIALOG online for the most up-to-date information available (at current online rates). You can also take advantage of many DIALOG databases such as EXCEPTIONAL CHILD EDUCATION RESOURCES, PSYCHINFO, and MAGAZINE INDEX™ that complement ERIC.

Unlimited Searching for a Wider Audience. DIALOG OnDisc ERIC can be searched the same way you search DIALOG online, but the information is retrieved locally via your personal computer from a CDROM disc in a CDROM reader. Using personal computer workstations in libraries, students, faculty members, and the community can search DIALOG OnDisc ERIC for themselves. The DIALOG OnDisc™ Manager software offers two searching options, the DIALOG command language and Easy Menu Search, making it fast and easy for both experienced DIALOG searchers and complete novices to find the information they need. The retrieval speed and power are comparable to DIALOG online services.

According to a librarian at one of our test sites, "Word spreads fast. As we continue this service, I think we'll be booked up constantly. Searching this way is highly addictive."

We have received dozens of comments from students who have used DIALOG OnDisc ERIC, such as:

"It makes journal searches a pleasure instead of a burden and a bore, and truly brings technology to the service of scholarship."

"An incredibly valuable tool for the researcher. Wish I'd known about it sooner and saved all that time going through the abstract catalogs. This is just what we in graduate programs need."

DIALOG OnDisc ERIC - Current Only or Complete File. DIALOG offers two different DIALOG OnDisc ERIC subscriptions: you can license just the current ERIC information (from 1981 to the present) on one disc, or the complete ERIC file (1966 to the present) on three discs. Each subscription option includes the ERIC disc(s), quarterly updates to the current disc, the DIALOG OnDisc Manager™ retrieval software, the complete DIALOGLINK package for telecommunications ability, complete documenta-

tion, and searching assistance via our DIALOG toll-free 800 telephone number.

A yearly prepaid license fee covers the unlimited use of the DIALOG OnDisc ERIC:

	Yearly Prepaid License Fee
• Current ERIC file only (1981-present, 1 disc)	\$1950
• Complete ERIC file (1966-present, 3 discs)	\$3450

Required Equipment. You may already own some of the equipment needed for DIALOG OnDisc ERIC. The following equipment is required:

- IBM PC or compatible personal computer and IBM PC DOS Version 2.0 or higher.
- 384K RAM required (640K RAM recommended).
- Hard storage disk with at least one megabyte of free space.
- Philips CM-100 CDROM reader and CM-155 controller card or a Hitachi CDR-1502S reader and CD-1F13 controller card, both industry standard brands.
- A Hayes-compatible modem or certain other models are necessary to take advantage of online searching.

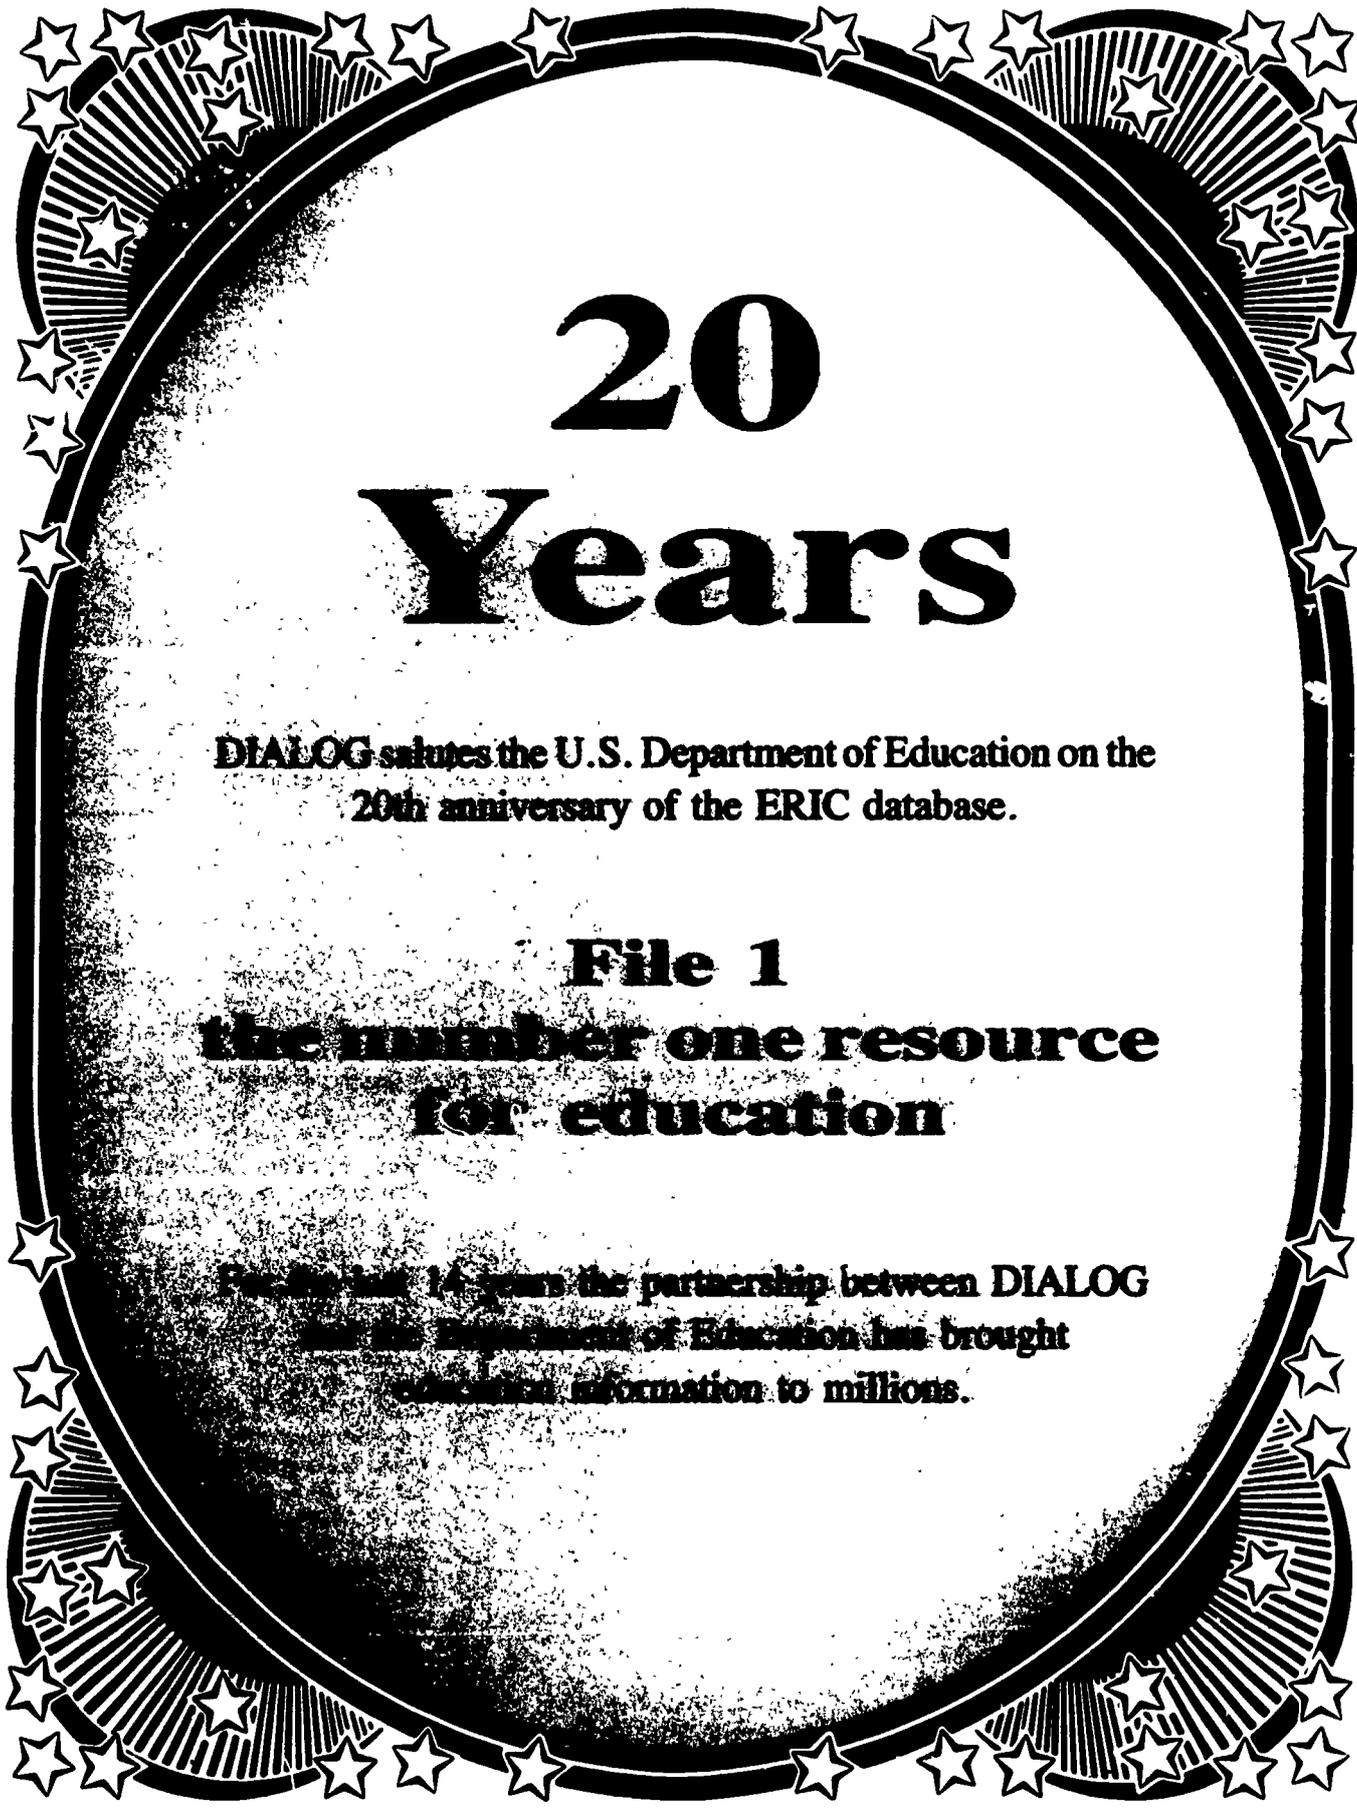

If you don't have a CDROM reader, you can purchase a Philips CDROM reader through a special DIALOG/Philips arrangement. Or, you can lease the entire personal computer workstation with CDROM reader through special arrangements DIALOG has made with equipment vendors. These vendors offer assistance with workstation installation and on-going equipment maintenance. Contact DIALOG Marketing for more information on options for leasing and/or purchasing equipment.

Demonstration of DIALOG OnDisc ERIC. Brief overview presentations/demonstrations of DIALOG OnDisc are regularly scheduled at all of our DIALOG offices in the U.S. Please call the nearest office to register for one of these sessions.

- Boston, MA 617/491-0001 (Cambridge)
- New York, NY 212/681-4630
- Philadelphia, PA 215/977-8161
- Washington, DC 703/553-8455 (Arlington)
- Chicago, IL 312/726-9206
- Houston, TX 713/789-9810
- Los Angeles, CA 213/827-0055 (Marina del Rey)
- Palo Alto, CA 800/334-2564

Contact the DIALOG Marketing department for more information or for a complete ordering package for DIALOG OnDisc ERIC at: 800-3-DIALOG or 415-858-3785. DIALOG Information Services, Inc. 3460 Hillview Ave, Palo Alto, CA 94304. □

ERIC (File 1)

Accessing ERIC with Your Microcomputer - ERIC Digest, by Jane A. Klausmeier. April 1986. ERIC Clearinghouse on Information Resources, 030 Huntington Hall, Syracuse University, Syracuse, NY 13210. Free. Describes software, hardware, and telephone line components necessary to access online vendors. (Also available as ED-270 100 from the ERIC Document Reproduction Service.)

A Bibliography of Publications about the Educational Resources Information Center. 1978. (ED-169 955--Microfiche \$0.78, Papercopy \$1.85.) 1979-1984 Supplement (ED-262 784 -- Microfiche \$0.78, Papercopy \$3.70.) Available from: ERIC Document Reproduction Service, 3900 Wheeler Avenue, Alexandria, VA 22304.

CIJE Author Index, 1969-1984. August 1985. \$120.00. The Oryx Press, 2214 North Central at Encanto, Phoenix, AZ 85004-1. Telephone: 602/254-6156. This index lists alphabetically each author of every article cited in *Current Index to Journals in Education* from 1969 through 1984, providing the information needed to find the full citation. (Oryx Press offers several other ERIC products and tools, call for details.)

CIJE Master List. University Microfilms International, Serials Development and Operations, 300 North Zeeb Road, Ann Arbor, MI 48106. Free. This list contains 1,000 journal titles covered (now or in the past) by *Current Index to Journals in Education*. (For the approximately 780 journal titles currently covered, see the *Source Journal Index* in any issue of *CIJE*--monthly or semiannual. This index includes such additional information as publishers' addresses, periodicities, subscription rates, whether journals are new to the index, and whether all or selected articles are cataloged.)

Current Index to Journals in Education. Monthly; semiannual cumulations. The Oryx Press, 2214 N. Central at Encanto, Phoenix, AZ 85004. Telephone: 602/254-6156. Monthly subscription, \$175.00; semiannual cumulations, \$175.00; monthly subscription with semiannual cumulations, \$325.00. (Oryx Press offers several ERIC products and tools; call for details.)

Directory of ERIC Information Service Providers. First edition, June 1986. ERIC Processing and Reference Facility, 4833 Rugby Avenue, Suite 301, Bethesda, MD 20814. Telephone: 301/656-9723. Free. A combined, revised reissue of the *Directory of ERIC Microfiche Collections* and the *Directory of ERIC Search Services*. It includes organizations that provide computerized searches of the ERIC database, that have sizable collections of ERIC microfiche, and that subscribe to and collect the various ERIC publications. Many of these organizations are open to the general public.

ERIC Clearinghouse Publications. Annual. Latest editions: 1985 (ED-271 125 -- Microfiche, \$0.78, Papercopy, \$5.55); 1984 (ED-261 711 -- Microfiche, \$0.78, Papercopy, \$5.55.) Available from the ERIC Document Reproduction Service, 3900 Wheeler Avenue, Alexandria, VA 22304. Annual bibliography of publications by the ERIC Clearinghouses, including research reviews, interpretive studies, and other documents designed to meet the information needs of ERIC users.

ERIC Contract/Grant Number Index, Cumulative. Irregular (last edition, December 1985). ERIC Processing and Reference Facility, 4833 Rugby Avenue, Suite 301, Bethesda, MD 20814. Telephone: 301/656-9723. \$15.00 (U.S.) and \$20.00 (non-U.S.).

ERIC; DIALOG Information Services, Inc. (File 1). Revised edition. April 1981. DIALOG Information Services, Inc., 3460 Hillview Avenue, Palo Alto, CA 94304. \$6.00 (North America), \$7.00 (Elsewhere). Includes field-by-field description of DIALOG system search capabilities.

ERIC Identifier Authority List. Annual. ERIC Processing and Reference Facility, 4833 Rugby Avenue, Suite 301,

Bethesda, MD 20814. Telephone: 301/656-9723. *Alphabetical Display* (\$20.00, U.S./\$30.00 non-U.S.)--alphabetical list of the approximately 36,000 preferred identifier forms and the postings of each term. *Category Display* (\$20.00, U.S./\$30.00 non-U.S.) --companion volume to the main display, listing identifiers alphabetically within 20 broad categories.

ERIC Processing Manual. ERIC Processing and Reference Facility, 4833 Rugby Avenue, Suite 301, Bethesda, MD 20814. Telephone: 301/656-9723 \$40.00 (U.S.), \$60.00 (non-U.S.). Subdivided by section, with two appendices. Sections and appendices available individually at \$3.75 each. Sections include: 1) Introduction (an overview of the ERIC system); 2) Acquisitions; 3) Selection; 4) Handling and Shipping; 5) Cataloging (includes description of each field); 6) Abstracting, Annotating; 7) Indexing; 8) Vocabulary Development and Maintenance - Part 1, Descriptors and Part 2, Identifiers (\$3.75 each part); 9) Data Entry (not presently available); 10) Data Base Changes (Post Publication). Also includes: Appendix A, ERIC Clearinghouse Scope of Interest Guide; Appendix B, Glossary of Terms. (Also appears as ED-219 082 in the ERIC Microfiche Collection and is available from the ERIC Document Reproduction Service.)

ERIC Ready References (Numbers 1-8). ERIC Processing and Reference Facility, 4833 Rugby Avenue, Suite 301, Bethesda, MD 20814. Telephone: 301/656-9723. Free. Ready reference sheets to be posted near computer terminals used for searching ERIC. No. 1 provides a year-by-year list of ERIC accession numbers for *Resources in Education* (RIE) and the *Current Index to Journals in Education* (CIJE). No. 2 provides a complete display of ERIC Publication Types and their codes. No. 3 displays a sample RIE record. No. 4 gives instructions on using the *Thesaurus of ERIC Descriptors*. No. 5 lists ERIC price codes. No. 6 gives a listing of ERIC clearinghouses, together with full addresses, telephone numbers, and brief scope notes describing the areas they cover. No. 7 is the "ERIC Fact Sheet," which lists some basic statistics pertaining to the ERIC system. No. 8 highlights ERIC's Target Audience data elements, listing the audiences covered and describing how to access them online.

ERIC Report Number Index, Cumulative. Irregular (last edition, December 1985). ERIC Processing and Reference Facility, 4833 Rugby Avenue, Suite 301, Bethesda, MD 20814. Telephone: 301/656-9723. \$30.00 (U.S.) and \$35.00 (non-U.S.).

ERIC/RIE Indexes on Microfiche. ERIC Document Reproduction Service, 3900 Wheeler Avenue, Alexandria, VA 22304. Telephone: 703/823-0500. *RIE Title Index 1966-85*: 36mf., \$6.50. *RIE Author Index 1966-85*: 43mf., \$7.00. *RIE Institution Index 1966-85*: 43mf., \$7.50. *RIE Subject Index 1966-85*: 195mf., \$30.00. *RIE Description Report 1966-85*: 30mf., \$6.00. *RIE Identifier Usage Report 1966-85*: 19mf., \$5.50. (Additional microfiche collections are available: call for details.)

ERIC/RIE Title Index. ERIC Processing and Reference Facility, 4833 Rugby Avenue, Suite 301, Bethesda, MD 20814. Telephone: 301/656-9723. 1966-76 cumulation: out-of-print. 1977-83 cumulation: \$30.00 (U.S.) and \$50.00 (non-U.S.); limited quantity available. 1984-86 cumulation: \$30.00 (U.S.) and \$50.00 (non-U.S.). 1987 quarterly supplements: \$30.00 (U.S.) and \$40.00 (non-U.S.). 1984-86 cumulation with 1987 quarterly supplements: \$45.00 (U.S.) and \$60.00 (non-U.S.).

ERIC: What It Is, How to Use It. Revised, 1982. National Audiovisual Center, Order Section PN, Washington, DC 20409. Reference Order No. A07869. \$110.00. This kit contains 146 slides, 3 audiocassettes, and accompanying print materials. Gives an introductory overview of the ERIC system, explains how to make an elementary search, and provides information and working materials for an in-depth search of ERIC. A Coordinator's Manual accompanies the kit.

How to Prepare for a Computer Search of ERIC - A Nontechnical Approach. (Revised and Updated) by Marilyn R. Laubacher. May 1983. (ED-237 100 -- Microfiche \$0.78, Papercopy \$5.55). Available from ERIC Document Reproduction Service, 3900 Wheeler Avenue, Alexandria, VA 22304. (The original 1975 edition (ED-110 096) was by Judith Yarborough.)

How to Start an ERIC Collection, by Lynn Smarte. 1979. ERIC Processing and Reference Facility, 4833 Rugby Avenue, Suite 301, Bethesda, MD 20814. Telephone: 301/656-9723. Free. Describes the components necessary for minimal, intermediate, and complete ERIC collections. (Estimates of expenses involved are based on mid-1979 prices.)

Institutional Source Directory. ERIC Processing and Reference Facility, 4833 Rugby Avenue, Suite 301, Bethesda,

MD 20814. Telephone: 301/656-9723. Alphabetical list of organizational and institutional names by which document citations in ERIC have been indexed in the Institution and Sponsoring Agency fields, together with the corresponding alphanumeric source codes that accompany the names. *Complete Edition*: September 1981 (latest), \$30.00 (U.S.) and \$40.00 (non-U.S.). A cumulative archival edition containing all names/codes established from 1966 to September 1981. *Truncated Edition*: current, semiannual, \$25.00 (U.S.) and \$35.00 (non-U.S.). Covers names/codes established or used for indexing during the immediately preceding 5-year period.

Interchange Newsletter. Irregular. ERIC Processing and Reference Facility, 4833 Rugby Avenue, Suite 301, Bethesda, MD 20814. Telephone: 301/656-9723. Free. The newsletter used by the ERIC Processing and Reference Facility to communicate with ERIC users.

A Pocket Guide to ERIC. ERIC Processing and Reference Facility, 4833 Rugby Avenue, Suite 301, Bethesda, MD 20814. Telephone: 301/656-9723. Free. A comprehensive summary of ERIC products and services.

Resources in Education. Monthly, semiannual indexes. Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, D.C. 20402. Annual subscription: \$56.00 (U.S.) and \$70.00 (non-U.S.). Semiannual indexes: \$20.00 (U.S.) and \$25.00 (non-U.S.).

RIE Annual Cumulations. \$287.00. Hardback. The Oryx Press, 2214 N. Central at Encanto, Phoenix, AZ 85004. Telephone: 602/254-6156. Each in three volumes, two of cumulated main entries (abstracts) and one of cumulated indexes.

Searching the ERIC and ECER Databases and Eliminating Duplication. Revised, November 1983. CEC Information Services, 1920 Association Drive, Reston, VA 22091. Free.

Submitting Documents to ERIC. ERIC Processing and Reference Facility, 4833 Rugby Avenue, Suite 301, Bethesda, MD 20814. Telephone: 301/656-9723. Free. Brochure describing the ERIC system, the advantages of having documents in the ERIC database, the selection criteria employed by ERIC, and the addresses of the ERIC components to whom documents may be submitted.

Thesaurus of ERIC Descriptors. 11th edition, 1986. The Oryx Press, 2214 North Central at Encanto, Phoenix, AZ 85004. Telephone: 602/254-6156. \$65.00 (U.S.), if payment accompanies order. Hardback. A list of 9,459 vocabulary terms, including 224 new descriptors and 190 new Use references, used by the ERIC system and its publications. (Oryx Press offers several ERIC products and tools; call for details.)

The ERIC Administrative Bulletin (EAB) is prepared by the ERIC Processing and Reference Facility on the basis of material submitted by all components of the ERIC system. EAB articles are reviewed and approved by Central ERIC before publication.

The EAB is intended to be the "journal" of the ERIC system and a major means for the decentralized components of ERIC to communicate and interact with one another. The EAB is also a permanent record reflecting most of the major events in the life of the ERIC system (such as personnel changes, Standing Order Customer changes, etc.) and providing in printed form essential documents (such as ERIC policy and priority statements, Clearinghouse scope statement modifications, ERIC Processing Manual revisions, etc.) Submissions to the EAB are to be sent (using the standard form) to your respective monitor. The deadline for input to each monthly issue is the 10th of the month.

ACTION ITEM

ERIC National Technical Meeting, May 27-29, 1987 -- Revised Agenda

Technical staff throughout the system should be gearing up for an exciting 20th anniversary National Technical Meeting, our first in two years. National Tech Meetings are traditionally held in the Washington, D.C. area; this one will take place at the Bethesda Ramada, 8400 Wisconsin Avenue, Bethesda, Maryland. It will begin promptly at 9:00 a.m. on May 27th and will conclude on the 29th with a half-day joint session with the Council of ERIC Directors (COED).

Aside from the joint meeting with COED, this year's meeting offers other features: a 20th anniversary Talent Show and related ERIC contests, a "mini-mall" of ERIC exhibits, lots of show-and-tell ideas, a thought-provoking evening session on ERIC's image and credibility, and a near-downtown location that is walking distance to many different restaurants and shops.

This year's tech meeting is intended to stimulate thinking and encourage total group participation. Unlike previous meetings, there are no concurrent sessions. Emphasis will be on sessions that will discuss each topic in sufficient detail to be able to recommend improvements in procedures, forms, etc. Designed by the ERIC Technical Steering Committee, the meeting agenda incorporates suggestions from throughout the system. (See Attachment 1 for the agenda.)

...Lynn Barnett (Chair, Technical Steering Committee)

NCESS Bulletins -- Theme Issue Processing

Clearinghouses will soon be receiving a newsletter published by the National Center on Effective Secondary Schools. Since each newsletter appears to have a distinct theme, different Clearinghouses will be processing different issues of this newsletter, as appropriate. For consistency across the network, cataloging should be done as follows:

TITLE_ [Title of the theme issue. Do NOT enter the newsletter name here.]

JNL_ NCESS Resource Bulletin; n1 Fall 1986

GR_ OERI-G-86-0007

LEVEL_ 1

INST_BBB24601=National Center on Effective Secondary Schools, Madison, WI.

SPON_EDD00036=Office of Educational Research and Improvement (ED), Washington, DC.

PUBTYPE_022; 055

AUD_Practitioners

...Carolyn Weller (ERIC Facility)

ERIC Clearinghouse Publications

Clearinghouses are reminded that the ERIC Facility is required to maintain an archival collection of all ERIC Clearinghouse information analysis products, newsletters, ERIC Digests, etc. Clearinghouses are requested to be certain that the Facility is on distribution to receive one copy of all Clearinghouse publications. This copy is in addition to the one each Clearinghouse processes for RIE.

By the time you read this EAB, you will have received our annual request (see Attachment 2) to review your Clearinghouse's publications that are slated to appear in the 1986 ERIC Clearinghouse Publications bibliography. After we receive your input, we will check the publications on this list against your Clearinghouse's publications currently in the ERIC archives collection and will request from you any publications that are on the list but missing from the collection. We appreciate your help in making the collection complete.

...Carolyn Weller (ERIC Facility)

OERI Seeks Research Fellows for 1987-1988 Period

OERI is seeking candidates for its Research Fellows program. Three to five Fellows will be selected. The application deadline is May 29, 1988. The letter from Bruno Manno (OERI, Chief of Staff) announcing the program and listing the Fellows appointed to date appears as Attachment 3.

...Pat Coulter (CERIC)

NETWORK NEWS

OERI/IS and ERIC Management Changes

On April 29, 1987, Sharon Horn, Director, Education Library Division, announced that Edwin S. Darrell will be replacing Jim Bencivenga as Director of Information Services (IS) and that Pat Coulter will serve as Acting Director of ERIC until a national recruitment for that position is completed. The announcements appear as Attachment 4.

...Pat Coulter (CERIC)

3847

ERIC Document Reproduction Service (EDRS) Now Accepting Credit Card Orders

The ERIC Document Reproduction Service (EDRS) announced in March 1981 that, effective immediately, it will permit on-demand orders for ERIC documents in microfiche or reproduced paper copy to be charged to Visa or Mastercard credit cards. Credit card orders will be accepted in any form; telephone, mail, or online via the major commercial bibliographic database suppliers (DIALOG, ORBIT, BRS). The convenience of being able to order by telephone, without prepayment, and without a deposit account, is something that EDRS customers have long requested and that constitutes a significant improvement in ERIC's document delivery arrangements.

EDRS is in the process of re-designing the EDRS Order Form to accommodate the new option.

...Vic Fortin (EDRS)

EDRS Evaluating Possibility of Offering Vesicular Fiche (in Addition to Diazo and Silver)

EDRS, responding to requests for ERIC documents on vesicular fiche, has stated that they will offer vesicular as an option if enough standing order customers requested it. The offer was sent to all SOC's (see Attachment 5).

...Cindy Lacey (ERIC Facility)

ERIC Technical Steering Committee -- Latest Recommendations

The most recent recommendations from the ERIC Technical Steering Committee and the corresponding responses from Central ERIC are as follows:

87-1 **RECOMMENDATION:** In-house Editing of CIJE (By Facility). Include in the new RFP for the ERIC Processing and Reference Facility a requirement to edit CIJE as well as RIE input.

CERIC ACTION: Disapproved for now, but it's still being considered "For the last year and a half, we have been investigating ways of trying to make this happen...We will continue to try to get funding to do this."

87-2 **RECOMMENDATION:** Systematic and Up-to-Date Announcement of All ERIC Clearinghouse Products. Include in the RFP for ACCESS ERIC a requirement for a regular, cumulative and up-to-date announcement of all ERIC Clearinghouse products. This could be in the form of a systemwide publications list as well as press releases.

CERIC ACTION: Approved. "Excellent idea. We will try to incorporate it in the new RFP for ACCESS ERIC."

...Lynn Barnett (HE)

ERIC Database of Statistical/Numeric Files -- Seeking Non-CES Files

The project to begin an ERIC database dealing with education-related statistical files is slowly gathering speed. Five Clearinghouses (CE, CG, RC, SE, SO) have sent the Facility documentation on candidate files. Meanwhile, the Facility has moved beyond the Center for Education Statistics (CES) and is attempting to identify Non-CES Files that would be of interest. A major file of The American Council on Education (ACE) on "American Freshmen" has been identified (see Attachment 6A for a record representing this file). Contact has been established with the Inter-University Consortium on Political and Social Research (ICPSR) at the University of Michigan (see Attachment 6B). ICPSR is a major archive of social and political data and is quite interested in the ERIC initiative. They have asked ERIC to brief them at their next annual meeting (the IASSIST meeting, May 19-22). The Machine-Readable Records Branch of the National Archives has responded positively to our contacts (see Attachment 6C) and we will be visiting them. Clearinghouses are urged to find at least one file they can suggest to the Facility before the date of the National Technical Meeting (May 26-30).

...Ted Brandhorst (ERIC Facility)

Canadian Education Thesaurus (CET)

In September 1986, the Council of Ministers of Education, Canada, approved the creation of a bilingual Canadian Education Thesaurus (CET). Plans call for a large number of CET terms to be derived from the Thesaurus of ERIC Descriptors. The ERIC Facility's Lexicographer, Jim Houston, has been invited to be on the project's "Consultative Committee". Attachments 7A and 7B both pertain to this project.

...Jim Houston (ERIC Facility)

UMI Article Clearinghouse Reduces Price of Journal Articles Indexed in CIJE

The UMI Article Clearinghouse has announced (March 30, 1987) that per article costs for articles announced in CIJE have dropped from \$12.00 to \$9.50 (if prepaid). The letter informing ERIC of this fact is reproduced as Attachment 8.

...Joanna Eustace (ERIC Facility)

OERI Electronic Bulletin Board

OERI has initiated a 24 hour Bulletin Board. A brief flyer has been issued to announce it to OERI staff (see Attachment 9). The contact person is Tom Litkowski (202) 357-6524.

...Pat Brown (ERIC Facility)

3849

ERIC on SilverPlatter CD-ROM -- Most Recent Prices (April 1987)

SilverPlatter has issued a new Price List dated April 1987, citing the complete array of ERIC prices (including the "Complete ERIC Starter Set"). The material (Attachment 10) also lists the latest disc drive prices and the addresses for distributors abroad.

...Pat Brown (ERIC Facility)

DIALOG OnDisc ERIC -- New Prices Announced

As a result of the "price war" initiated by OCLC, DIALOG has been forced to lower its prices for the ERIC database on CD-ROM. The details are contained in Attachment 11. The three vendors' prices for an annual subscription to ERIC on disc are as follows: SilverPlatter=\$650./Yr; OCLC=\$675/yr; DIALOG=\$750/yr.

...Pat Brown (ERIC Facility)

DIALOG ERIC Blue Sheet (Revised February 1987)

The famous DIALOG "Blue Sheet" for ERIC, describing ERIC online via DIALOG, has received its first major revision in years. The February 1987 revision appears as Attachment 12A. As a novelty, and on the off chance that it may prove useful, we are also providing a version of the revised ERIC Blue Sheet in Japanese (done by the Kinokuniya Book Store) (See Attachment 12B).

...Jim Houston (ERIC Facility)

Infosearch Scholastic Database Inc. Offers ERIC

A new online vendor is on the scene. Infosearch Inc., is offering Grolier's Academic American Encyclopedia, Webster's New World Dictionary, and ERIC, with additional databases planned. Their goal is a simplified retrieval system capable of being used directly by students (down to the elementary level) without intervention. A copy of the initial Infosearch flyer is reproduced as Attachment 13.

...Jim Prevel (CERIC)

NEA Almanac of Higher Education Cites ASHE-ERIC Reports Extensively

The 1987 NEA Almanac of Higher Education section on "Higher Education Books: A Selected Bibliography," lists all the 1984, 1985, and 1986 ASHE-ERIC Higher Education Reports, complete with ordering information. These publications comprise about 25% of all the entries listed in this section of the bibliography.

...Lynn Barnett (HE)

President's Library Uses ERIC

HE was contacted in December 1986 by Phyllis Levine at the Library of the Executive Office of the President (i.e. White House). She asked to borrow an ERIC document on microfiche. SP helped out by offering the use of a fiche reader-printer, which the courier ultimately decided to use instead of simply borrowing the fiche. The document in question, ED 221 078, concerned student financial aid.

...Lynn Barnett (HE)

U.S./European Higher Education Scholars Seek Greater Interaction

Jon Fife met with Dr. Leland C. Barrows of the UNESCO European Centre for Higher Education (CEPES), Stuart Tinsman of the U.S. Department of Education, and William Toombs of Penn State University to discuss how to stimulate greater interaction between U.S. and European scholars of higher education.

...Lynn Barnett (HE)

NTIS Privatization Issues Near Resolution

The Administration's push to "privatize" NTIS is in the final stages of its public comment period. A short article in Science (Vol. 236, p.140) summarizes the issues (see Attachment 14). Because NTIS does document delivery for the report literature of science, just as EDRS does it for the report literature of education, the debate may be of interest to the ERIC network.

...Ted Brandhorst (ERIC Facility)

ERIC PUBLICATIONS

HE Student Financial Aid and Women: Equity Dilemma? ASHE-ERIC Higher Education Report No. 4, 1986, by Mary Moran, 135 p.

Examines whether present financial aid policies and regulations are unfairly skewed against women. Documents the minute determinants for awarding financial aid that effectively prefer men over women in loans, grants, work study, and assistantships/fellowships. (\$10.00 from the Association for the Study of Higher Education, Dept. E, One Dupont Circle, Suite 630, Washington, DC 20036; 10% discount for 15 or more; 20% discount to distributors and bookstores).

HE The Master's Degree: Tradition, Diversity, Innovation. ASHE-ERIC Higher Education Report No. 6, 1986, by Judith S. Glazer, 120 p.

Comprehensive compilation of facts on the master's degree showing it to have changed in response to increased demands for work force specialization and expertise. Identifies master's degrees awarded in 30 disciplines and in more than 200 areas of specialization; discusses quality control factors. REVISED AGENDA 4/20/87

ERIC 20TH ANNIVERSARY NATIONAL TECHNICAL MEETING

**Washington, D. C.
Bethesda Ramada
Ambassador Room
May 27-29, 1987**

TUESDAY, MAY 26

8:00 p. m. Steering Committee Reception (room of Anita Colby)

An informal get-together in the Steering Committee suite. Newcomers can meet oldtimers and everyone can mingle informally before we get down to work on Wednesday. Registration packets will be available.

WEDNESDAY, MAY 27

7:00-8:00 a.m. Exhibit set-up in main meeting room

8:30 a.m. Coffee and danish with exhibits

Time to pick up registration packets if you didn't get them Tuesday night, study the ERIC Memorabilia Board, and admire each other's table-top exhibits

9:00 a.m. Keynote address: "ERIC as a National Resource"
Sharon Horn, OERI, will help us set the stage with an upbeat look at ERIC's potential and an assessment of where it fits in.

9:45 a.m. What Goes In Comes Out Somehow: The Processing/
User Services Connection (Anita Colby/Margaret Mann)

This is designed as a general session with working breakout sessions to see how our abstracting/indexing actually works in real life. Discussions and hands-on activities will prompt processing and user services people to problem-solve together. The not-so-hidden objective is quality control and information access. This will be a fun, informal, nitty-gritty, hammer-it-out session.

--Break at 10:30--

3856

WEDNESDAY (CONT.)

11:30 a.m. Panel: News from Outside

- Indexing in Sociological Abstracts (Anita Colby, Soc. Abstracts consultant)
- Database of audiovisual materials (Leeland Szklennik, InfoMedia)
- Online searching in high schools (Erica Lodish, Montgomery Blair High School, Silver Spring, MD)

This session will focus on how other people handle similar products/services.

12:30 p.m. Group Lunch (Embassy III room in the hotel)

Guest speaker: Anne Caputo, Manager, DIALOG Classroom Instruction Project

Find out how ERIC stacks up against other databases and what's new in training, as well as a DIALOG package that has been submitted to OERI.

2:00 p.m. News from Inside

- EDRS: Some Examples of Hard to Microfiche Documents (Vic Fortin and David Jahnes)
- CD-ROM: SilverPlatter, DIALOG, OCLC demonstration and observations (Pam McLaughlin)

--Break at 3:00--

- ERIC Digests Online (Dianne Rothenberg)
- Statistical Data Files (Ted Brandhorst)
- Steering Committee report, including ERIC Search Saves & Sample Search Strategies: A File for Online Users (JC Special Project) (Lynn Barnett)

These reports focus on special activities that have direct bearing on Clearinghouse work and services. Handouts will supplement the brief verbal presentations.

WEDNESDAY, CONT.

4:00 p.m. ERIC as a Reference Desk (Amita Hill)

This session will first discuss what reference questions are reasonable in a bibliographic database, then examine user services required by bibliographic versus general inquiries. Breakout groups will brainstorm how to answer questions, handle personnel implications, and compare tools and products used in question answering. Non-ERIC information sources will also be identified.

5:00 Dinner on your own

7:30 "Image, Status, and Credibility"
Speaker: Betsy Ashburn, OERI

SP's former director will pep us up with the why, what, and how of improving ERIC's overall visibility, as well as the public image of individual units. Don't miss this stimulating session!

9:00 Wine and cheese (Steering Committee suite)
Kick off your shoes and compare notes on the day.

3858

THURSDAY, MAY 28, 1987

8:30 a.m. Coffee/exhibits

9:00 a.m. Workshop on Workshops (Lynn Smarte (?)/Marilyn Shorr/Margaret Mann)

Not just for the usual user services folks, this session will design a variety of workshops that meet the needs of targeted users (students, faculty, SOCs, etc.), suggest ways to train people to search, and will construct some model workshop packet materials. (Ad hoc follow-up at 4:00)

-- Break at 10:15 --

11:30 a.m. The Big Picture: ERIC's Internal Highway (Dorcas Rohn/Jane Henson/Nellie Quezada-Aragon)

This session will review Clearinghouse procedures that can increase efficiency in the overall document/processing flow and also minimize problems at the Facility stage. (Ad hoc follow-up with Facility editors--bring your LIDS questions--at 4:00).

12:00 p.m. Ride or take a scenic 15-minute walk to the ERIC Processing and Reference Facility

-- Complimentary group buffet lunch provided by ORI Inc.
-- Tour of the new offices

2:00 p.m. Painless Acquisitions: Possibilities (Joanna Eustace)

This session will be a new approach to the age-old scope overlap issue as well as a sharing of ideas for Clearinghouse/Facility acquisitions procedures. Break-out groups will find solve problems related to acquisitioning conference papers, form letters, the reproduction release form, etc. A panel of the breakout group leaders will report back to the group

and to COED. A pre-prepared "Forms for ERIC Acquisitions" packet will be distributed. (Ad hoc follow up at 4:00).

-- Break at 3:15 --

- 4:00 p.m. Ad Hoc Group Meetings
--Facility editors/Clearinghouse processing staff
--Acquisitions
--Workshop forms design
- 5:00 p.m. Dinner on your own
- 8:30 p.m. 20th Anniversary Talent Show (Courtyard pool area)
Make Your Own Sundae Ice Cream Bar
ERIC's own at their best

3860

FRIDAY, MAY 29, 1987: JOINT MEETING WITH ERIC DIRECTORS (COED)

(Meeting at the Ramada, Ambassador Room; Luncheon at Holiday Inn)

8:30 a.m. Coffee/muffins/exhibits

9:00 a.m. System Reports

- COED Executive Committee
- Technical Steering Committee
- CERIC
- Facility
- EDRS
- Oryx
- Clearinghouse Special Projects

10:15 a.m. Break

10:30 a.m. "ERIC's Image and ACCESS ERIC"
Group discussion of various systemwide issues
(Items to be further identified)

12:30 p.m. Group lunch - Bethesda Holiday Inn (Montgomery Room)
(one block north of Ramada on
Wisconsin Ave.)
Guest Speaker: Hon. Major Owens (D-NY)

2:00 p.m. Tour of EDRS (Sign up ahead of time)

Take down exhibits at Ramada

3861

CLEARINGHOUSE PUBLICATIONS

Covering the period January 1986 - December 1986

Bibliographies of ERIC Clearinghouse publications have become an annual ERIC Facility product. The last cumulation covered the period January-December 1985. It listed 176 items.

The ERIC Facility has been requested by Central ERIC to begin preparation of the next edition of this publication, to cover material produced during the period January-December 1986.

The purpose of this communication is to ask Clearinghouses to indicate all publications they feel should appear in such a bibliography. The general selection criterion is to be that the materials listed must be of sufficient quality to have been announced in Resources in Education (RIE) and to have an ED number. A computer search has been done on the ED portion of the ERIC database and all documents bearing the Publication Type 071 (ERIC publications) have been identified. This search covers input beginning with the January 1986 issue of RIE and extending through the December 1986 issue. Copies of 1986 ERIC "Digests", "Fact Sheets", and "Short Reports" that have not been individually accessioned into RIE should be sent in with your report so that we may prepare a brief title listing for the back of the bibliography (as was done last year).

Enclosed are the resumes of all documents on the ERIC file identified as being ERIC Clearinghouse publications from your particular Clearinghouse. Please mark with a check (✓) those items that you wish to have included in the annual bibliography and strike out any that you do not wish to have included. Should you have an item produced before 1986 which is a likely candidate (and that has an ED number), but which may have been omitted from earlier compilations, please send a Xerox of the record from RIE when you return your resumes. (Items appearing in RIE after December 1986 will appear in the edition covering 1987).

It is urged that care be taken in responding to this request, in order to ensure that your Clearinghouse is fully and accurately represented in this bibliography. No items returned to us and checked will be omitted without either your concurrence or the decision of Central ERIC. As in the past, each ERIC monitor will review the items submitted by his or her Clearinghouses.

Because Central ERIC regards it as extremely important to produce this bibliography while the Clearinghouse publications are still timely, we are asking that you respond to this request within two (2) weeks (i.e., by May 15,) at the latest.

Please return the marked up search results (both inclusions and omissions), along with the search cover sheet, to:

UNITED STATES DEPARTMENT OF EDUCATION

OFFICE OF THE ASSISTANT SECRETARY
FOR EDUCATIONAL RESEARCH AND IMPROVEMENT

Dear Colleague:

During the past year, seven research fellows at the Office of Educational Research and Improvement (OERI) studied education topics ranging from student financial aid to school productivity. This was the first time in almost a decade that a formal program of this type had been sponsored by the research and statistics arm of the Department of Education. We are currently making plans for the selection of three to five fellows for 1987-1988. We would like your help in identifying prospective candidates for this program.

The purpose of the fellows program is to provide opportunities for those interested in education--teachers, administrators, analysts, researchers, librarians, statisticians, practitioners, editors, writers--to conduct independent research in the field of education. Any individual who has training and experience and who shows the potential to conduct a systematic program of inquiry is eligible to apply for a fellowship.

As background, I have enclosed an overview of the 1986-87 fellows, their projects and activities. As you will see, this program provides individuals with time and resources to develop their areas of interest and expertise related to education. The fellows program also provides an attractive means to accomplish two of OERI's chief goals--to make information and research resources more accessible to those who can benefit from them, and to create an opportunity for the Department of Education to benefit from the ideas and perspectives of outside scholars and practitioners.

The application deadline is May 29, 1987. If you can suggest names of individuals who might be interested in hearing more about this opportunity, please contact Shannon Weatherly at (202) 357-6050. We look forward to hearing from you.

Sincerely,

A handwritten signature in black ink, appearing to read "Bruno V. Manno".

Bruno V. Manno
Chief of Staff, OERI

Enclosure

3866

Activities of OERI Fellows
1986-1987

Dr. Joseph Notterman started work on a new book entitled "Educational Psychology for the Prospective Secondary School Teacher: A Liberal Arts Approach." During his first 5 months in residence he met with several members of the OR and PIP staff in an effort to identify issues and resources relating to secondary schools and the reforms underway in secondary education. Dr. Notterman also served as a resource to several members of the OR staff.

Dr. Robert Ruskin has completed an outline of a new publication entitled "How It Works." Using the Department publication What Works as a starting point, Dr. Ruskin is investigating the psychological theories and principles that underlie successful and exemplary educational practices. By the end of May, 1987, Dr. Ruskin expects to have a manuscript encompassing most of the issues associated with the present outline.

Dr. Carol Weiss completed her 5 months of residency in January. Working on a research policy monograph on how policymakers use research and statistics in the formulation of national education policy, Dr. Weiss conducted more than 50 interviews with Congressional staff, lobbyists and legislative specialists in ED and other Federal agencies.

Dr. John Convey continues earlier investigations on the development of values among high school students. He is particularly interested in how the school affects the development of values and what school structures facilitate this development for what kinds of students. He has a special interest in the contrasts between public and private schools.

Dr. Gordon McAndrew. During his 9 months of residency, Dr. McAndrew has been studying ways to improve the productivity and performance of schools, paying particular attention to the role of school principals. Thus far, he has completed a brier paper on the structure of schools dealing with issues associated with high school dropouts and job preparation. The paper was published by Youth Policy this winter.

Dr. Robert Fenske. During his 6 month period of residency, Dr. Fenske has concentrated on gathering information and advice relating to a forthcoming book on the impact of student aid financing. This research is an extension of earlier work conducted at Arizona State University, the Illinois Board of Higher Education and the University of Wisconsin.

Dr. Valerie Lee. Dr. Lee will arrive at OERI in May 1987 for a 4 month residency. She will be making use of longitudinal data bases in examining the effects of curriculum tracking.

IDENTICAL LETTER WAS SENT TO ATTACHED LIST OF ALL ERIC CLEARINGHOUSE DIRECTORS, FACILITY, EDRS AND ORYX PRESS

Dear

I know that we can all agree that despite some uncertainties this has been a year of many worthwhile accomplishments for the entire ERIC system as well as a period of promising and creative planning for the future of ERIC.

During the year, we have experienced many changes in key clearinghouse staff and OERI administrators. Let me give you a quick update on the new Federal administrators responsible for the ERIC system.

As you know, Jim Bencivenga will be leaving shortly to return to the Christian Science Monitor. In early April, Checker E. Finn, Jr. appointed Edwin S. Darrell to assume Jim's position as Director of Information Services. (See attached Press Release). Alan Moorehead has been reassigned to the Center for Statistics. Alan has been of immeasurable assistance to me and will continue to be involved in ERIC related issues. We plan a national recruitment for a Director of ERIC seeking a top educator/information scientist to lead the system. Until this person joins us, Pat Coulter will serve as Acting Director of ERIC. I will work closely with Pat to ensure the continued smooth functioning of the ERIC program.

In the coming months we will keep you informed of developments in ERIC and OERI. Please feel free to contact Pat (202) 357-6286 or me (202) 357-6050 if you wish to discuss your hopes and concerns about the ERIC system.

I welcome your suggestions and recommendations.

Sincerely,

Sharon Horn
Director, Education Library Division

UNITED STATES
DEPARTMENT OF EDUCATION

NEWS

FOR RELEASE
Thursday, April 9, 1987

Jane Glickman -- (202) 732-4576

DARRELL NAMED DIRECTOR OF OERI INFORMATION SERVICES

Edwin S. Darrell has been appointed director of information services for the Education Department's Office of Educational Research and Improvement (OERI), Chester E. Finn, Jr., OERI's assistant secretary announced today.

In his new position, Darrell, 33, will supervise the writing and editing of OERI publications and will direct the Educational Resources Information Center (ERIC) system. He will also oversee the Department's quick-response service, a toll-free hotline which provides educators and the public with education statistics and specific information, and work on special projects for the Department.

"Darrell is a top-notch communicator and editor with a keen sense of the education issues confronting the nation today," Finn said. "His vigor and expertise will be great assets in guiding projects that bring useful information to the public's attention."

Finn also noted that Jim Bencivenga, the outgoing director of information services, "has done a superb job of improving outreach and ensuring that important education information reaches parents, educators and policymakers."

Bencivenga will assume a new position at the Christian Science Monitor in May.

-MORE-

3869

-2-

Information services is one of five program components within OERI, which also includes the center for education statistics, the office of research, library programs, and programs for the improvement of practice.

From December 1985 through January of this year, Darrell served as director of public affairs for the President's Commission on Americans Outdoors. Chaired by Lamar Alexander, former governor of Tennessee, the Commission was charged with examining, improving and protecting recreation opportunities throughout the nation.

From 1976 to 1985, Darrell served in several capacities for Senator Orrin G. Hatch, both in Washington and Utah. He was the Senator's press secretary, chief speech writer and Utah communications director. When Hatch became chairman of the Senate Labor and Human Resources Committee, which oversees education, Darrell was appointed majority press secretary to the committee.

Darrell received a bachelor of science degree in mass communications from the University of Utah in 1975. He will receive a law degree from the George Washington University in May of 1987 with a specialty in environmental law.

DOCUMENT REPRODUCTION SERVICE

3800 WHEELER AVE. ALEXANDRIA, VA 22304-5110 1-800-227-3742

OPERATED BY

COMPUTER MICROFILM CORP.

703-623-0800

April 10, 198

Dear Standing Order Subscriber:

It has been a year since we began furnishing the ERIC monthly RIE microfiche on a diazo film base, and without envelopes. This change has been accepted by ERIC subscribers. It has resulted in significant savings in storage space and kept the per microfiche cost at the 1980 unit price.

Some libraries, however, have expressed a preference for a silver halide or vesicular film base and for paper envelopes for storing the microfiche. To satisfy this requirement subscribers to the ERIC Collection may purchase the monthly issue on a silver halide base at a cost of \$0.168 per microfiche or \$235.20, plus shipping for a monthly issue of 1,400 microfiche. The individual microfiche come in acid free envelopes that exceed the specifications set forth by the American National Standards Institute, Standard PH 1.53-1984, and have a PH level of 8.4 to 9.3 PH.

The furnishing of the monthly ERIC RIE microfiche on a vesicular film base is entirely dependent on the interest shown by the standing order subscribers. Furnishing microfiche on a vesicular film base is not required by our contract with the U.S. Department of Education, however, should a sufficient number of standing order subscribers indicate an interest, we would proceed with a cost analysis and, if economically feasible, offer it to those interested. A preliminary estimate is that the per unit price would be between \$0.12 and \$0.14 per microfiche. The cost of a monthly issue of 1,400 microfiche could range from \$168.00 to \$196.00 plus shipping. These microfiche, because of the film base, would be furnished without envelopes. Those standing order subscribers interested in having the monthly ERIC microfiche furnished on a vesicular film base should let us know, so that we can evaluate the total requirement. Attached are two sample microfiche produced on a vesicular film base with a black header stripe.

Subscribers having a requirement for envelopes may purchase them from EDRS in case lots of 5,000 (the equivalent of three months of ERIC issues) at a cost of \$75.00 plus shipping. Two types of envelopes are available, with or without the ERIC logo, see the samples attached. When ordering, please specify the type of envelope required. These envelopes meet or exceed ANSI Standard PH 1.53-1984 for film enclosures.

If more information is needed concerning the above alternatives, please call toll free 1-800-227-3742 and our customer service representatives will be happy to answer your questions.

Yours truly,

Victor G. Fortin
Director

SUM_ Summary Data

CODES_ State Code; ACE Region; Institutional Stratification Code

NOTE_ Each year, four tape files are developed from the SIF; (1) an institutional summary file containing institutional identification numbers and an institutional summary of the responses for men and women; (2) a file containing individual responses and a student identification number, but no names and addresses; (3) a name-and-address file containing a second, independent student identification number; and (4) a "link" file containing only the two independent identification numbers. This last file is maintained under an elaborate system developed to ensure strict confidentiality of individual student data and to protect against misuse of the name-and-address file.

ABST_ The Cooperative Institutional Research Program (CIRP) is a continuing longitudinal study of the American higher educational system. CIRP annually conducts a survey of students entering college as first-time, full-time freshmen. The freshmen surveys began in 1966; the 1984 survey is the nineteenth in the series. All institutions responding to the U.S. Department of Education's Higher Education General Information Survey (HEGIS) (and having more than 25 incoming students) are invited to participate. The survey is conducted via a Student Information Form (SIF) designed for proctored self-administration during the first two weeks of school. Approximately 20% of the invited institutions participate; this captures data on approximately 20% of the total number of freshmen. The 1984 data contains data from 526 institutions on 71,647 students. The data contain a wide range of biographic and demographic information (as indicated in the list of variables). Some of the more substantive SIF variables are: high school background and activities; career plans and goals, educational aspirations, current attitudes, reasons for attending college, parents' education and occupation, parents' and student's religious preference, parents' income, political attitudes; social values; sources of financial support. In addition to data returned directly by the participating institutions, a wide variety of institutional data are obtained from the College Entrance Examination Board and are used in conjunction with the data obtained annually. Data obtained from the College Board include total freshmen by sex, SAT and ACT composite score quartiles, and full-time/part-time status; percentages of students from in state, that commute, and that are in campus housing; tuition costs, fees, room and board costs, cost of books and supplies, transportation costs; total scholarship /grant dollars expended; student loan dollars provided; jobs offered and obtained for students.

WHAT ARE THE ICPSR DATABASES?

The Inter-university Consortium for Political and Social Research (ICPSR) has developed four full-text searchable databases using SPIRES (Stanford Public Information Retrieval System) database management software. They are designed to give social science researchers, instructors, and students on-line access to detailed information about ICPSR resources. The ICPSR databases are dynamic since new information is added to each of them continuously. The four databases are ICPSR GUIDE-ON-LINE, ICPSR VARIABLES, ICPSR ROLLCALLS and SMIS (Survey Methodology Information System). All of the statistical data collections described in the GUIDE, VARIABLES and ROLLCALLS databases can be ordered from ICPSR for research or instructional purposes.

ICPSR Guide-on-Line: Contains complete descriptions of all data collections available from the ICPSR Archive. Included are all holdings listed in the annual **Guide to Resources and Services** as well as additions and updates announced in the **ICPSR Bulletin** and via the ICPSR "Hotline". This database contains the full study title, names of principal investigators, a complete textual description of the collections as found in the published **Guide**, related publications, and size and technical parameters of the collections. Over 1,300 different data collections representing over 20,000 machine-readable files are described in this database.

ICPSR Variables: Contains the complete question text employed in selected surveys in the ICPSR holdings. The response categories and frequencies assist the researcher in evaluating the data and their relevance to a particular application. Included are **American National Election Studies, 1948-1984, Euro-Barometers 3-21, CBS News/ New York Times Polls, ABC News/Washington Post Polls, General Social Surveys**, and selected aging and health-related studies. This database contains collection and variable names and numbers, dates of the data collection,

question texts, and the codes with their frequencies. Approximately 50,000 variables for over 120 collections are described in this database.

ICPSR Rollicalls: Contains descriptions of roll call votes taken in the last twenty years of the United States Congress. The database contains the date of the roll call vote, the yea and nay totals for each vote, the name of the initiator, the relevant bill or resolution number, and a textual description of the issue. Over 18,000 roll calls are contained in the database.

SMIS: Contains bibliographic citations from the SMIS (Survey Methodology Information System) database that was originally developed by the Bureau of the Census. Included are journals, Bureau of the Census publications and documents, and research reports and conference papers all of which deal with the methodological aspects of the design and conduct of surveys. The database contains author, title, publication, and subject information for over 7,000 articles, books, reports, and conference papers written primarily between 1972 and 1980.

HOW TO ACCESS ICPSR DATABASES

The databases can be accessed remotely via one of the commercial public data networks and searched using the University of Michigan computer system. This service is available to users at both member and non-member institutions. All users must make arrangements to establish accounts by contacting the ICPSR Member Services staff at (313) 763-5010. Non-members should also contact the staff for information about access procedures and fees.

The databases can be implemented locally by member institutions. However, this requires local access to the appropriate software. Interested users should contact the ICPSR Member Services at the above telephone number for more information about local implementation.

WHAT IS ICPSR?

ICPSR is a membership-based academic organization comprised of over 300 academic institutions in the United States and abroad. Among the services offered are

Data Archive - The world's largest repository of computer-based research data for the social sciences. There are over 20,000 machine-readable files documenting such areas of research interest as:

- political attitudes and behavior patterns
- state and national voting records
- social indicators and quality of life
- macroeconomic time series
- roll call voting in the United States Congress

-Census data for the United States from 1790-1980, including Current Population Surveys and collections such as Survey of Income Program Participation (SIPP)

- surveys of political and social attitudes in numerous countries of the world
- aging and the life cycle, including health-related subjects
- crime and criminal justice

Training - A Summer Training Program in quantitative methods of social research is offered annually. Special workshops in the 1986 Training Program include

- Logit and Log-linear Models
- LISREL Models
- Time Series
- Game Theory and Rational Choice Modeling
- Survey of Income and Program Participation (SIPP)
- Methods of Population Projection
- Event History Analysis
- Management of Machine-Readable Files

Computing Assistance - Aid for social scientists in the selection and use of computing resources either locally or via a public data network.

National Archives

April 7, 1987

Washington, DC 20408

Mr. Ted Brandhorst, Director
ERIC Processing and Reference Facility
4350 East-West Highway, 11th floor, Suite 1100
Bethesda, MD 20814

Dear Mr. Brandhorst:

Shortly after receiving your letter of March 16, 1987, I received a similar inquiry by phone from Charles Missar, who indicated that he was working with you on the project that was the subject of your letter. For that reason, I have delayed responding directly to you. However, since it has been about a week or so since I last spoke with Mr. Missar, I have decided to contact you directly.

Since the holdings of the Machine-readable Branch of the National Archives include a significant number of datasets related to education, it is not practical to send you documentation from all of them. Were we to do so, our charge is \$.35 per page, and your request would need to be prepaid. We are talking about hundreds of pages of documentation.

Mr. Missar and I discussed the possibility of his coming to the Branch and personally reviewing documentation which he would select from perusing our title list of holdings, and then perhaps ordering copies of some of the documentation. If this procedure is acceptable to you, I believe this would be an appropriate way to respond to your request.

We share your interest in creating resources that help inform the research community about the availability of machine-readable files and are interested in cooperating with you to the best of our ability. Please feel free to call me with any questions.

Yours sincerely,

Margaret O. Adams
Archives Specialist
Machine-Readable Branch - NNSR

• THE SAURUS

NOTES ON THE CANADIAN EDUCATION THESAURUS

Number 1, March 1987

INTRODUCING ... THE CANADIAN EDUCATION THESAURUS

In September 1986, the Council of Ministers of Education, Canada approved the creation of a bilingual Canadian Education Thesaurus (CET). The Thesaurus will cover all areas in the field of education: philosophy, psychology, technology, personnel, methods, etc. Once completed, the thesaurus should serve as a primary tool for indexing and retrieval of Canadian educational literature. A large number of descriptors will be derived from the Thesaurus of ERIC Descriptors. The rest of the descriptors will represent Canadian concepts such as minority/heritage language teaching, Native education, etc.

Terms will be selected from four major sources: the Canadian educational literature; existing thesauri and controlled lists of terms; contributions from a group of field experts acting as consultative committee; and suggestions from any interested party.

The CET is developed in consultation with the Canadian Education Association (CEA).

INDEXING PROJECT

In order to identify the current terminology of education in Canada, an extensive indexing project has been set up. Most serials received by the CEA and currently represented in the Canadian Education Index are scanned by the Thesaurus Editor for representative terms, phrases and identifiers.

Terms are recorded in the language of the original document and, if possible, one or more equivalents in the other official language are immediately established.

PROGRESS REPORT

As of March 15, 100 different serials in education have been sent by the CEA. The term bank contains about 800 terms, two-thirds of which appear in the ERIC Thesaurus either as descriptors or as lead-in terms.

This relatively small number of terms after four months of work is a result of our decision to use only the current literature as a source of terms for the time being; the current interests of Canadian educators obviously focus on a restricted number of topics. However, the term bank will grow quickly when terms selected in pre-arranged sources such as thesauri and dictionaries are added.

All terms in the term bank will soon be transferred to a database file to facilitate comparison, sorting, display, and printing. The CMEC is a licensed user of CDS/ISIS (mini-micro version) and will use it to create the Canadian Education Thesaurus.

AND NEXT ...

We hope to hear from you. Questions, comments, terminological contributions are welcome at any time.

3884

THÉSAURUS

NOTES SUR LE THÉSAURUS CANADIEN DE L'ÉDUCATION

numéro 1, mars 1987

LE THÉSAURUS CANADIEN DE L'ÉDUCATION

En septembre 1986, le Conseil des ministres de l'éducation (Canada) a approuvé la création d'un Thésaurus canadien de l'éducation (TCE). Ce thésaurus bilingue couvrira tous les aspects de l'éducation: philosophie, technologie, personnel, méthodes, etc. Une fois établi, il devrait être utile comme outil d'indexation et de repérage des publications canadiennes sur l'éducation. Une grande partie des descripteurs sera tirée du Thesaurus of ERIC Descriptors. Les autres descripteurs représenteront des réalités canadiennes comme l'enseignement dans la langue de la minorité, l'enseignement aux autochtones, etc.

Quatre sources principales seront utilisées pour la collecte des termes: les publications canadiennes sur l'éducation, les listes systématiques de termes et les thésaurus qui existent déjà, l'apport d'un groupe d'experts formé en comité consultatif et les suggestions venant de tout particulier ou groupe intéressé.

Le TCE est établi en consultation avec l'Association canadienne d'éducation (ACE).

LE PROJET D'INDEXATION

Pour dresser un état de la terminologie courante de l'éducation au Canada, il a fallu entreprendre un projet intensif d'indexation. La rédactrice du thésaurus parcourt ainsi la plupart des périodiques reçus par l'ACE et recensés dans le Répertoire canadien sur l'éducation pour relever les termes, expressions et identificateurs représentatifs.

Ces termes sont enregistrés dans la langue du document original et on établit immédiatement, si possible, un ou plusieurs équivalents dans l'autre langue officielle.

RAPPORT D'ÉTAPE

Au 15 mars, l'ACE a envoyé 100 titres de périodiques différents. La liste de base contient à peu près 800 termes, dont les deux-tiers paraissent dans le Thésaurus ERIC comme descripteurs ou comme non-descripteurs.

Si cette liste reste relativement courte après quatre mois de travail, c'est parce que nous n'utilisons pour l'instant comme source de termes que les publications courantes; il semble que les travaux de recherche des éducateurs canadiens portent actuellement sur quelques sujets bien précis. La liste va cependant s'allonger rapidement dès que s'y ajouteront les termes tirés de sources préorganisées comme les thésaurus et les dictionnaires.

La liste de base sera bientôt constituée en base de données, ce qui facilitera les comparaisons, les tris, l'affichage et l'impression sur papier. Le CMEC est un utilisateur autorisé de CDS/ISIS (version pour mini/micro ordinateur) qu'il emploiera pour développer le Thésaurus canadien de l'éducation.

ET MAINTENANT ...

Nous attendons vos réactions. Les contributions terminologiques, les questions et les commentaires sont toujours les bienvenus.

**UMI Article
Clearinghouse**

300 North Zeeb Road
Ann Arbor, Michigan 48106
313/761-4700
800/732-0616

March 30, 1987

Dear ERIC Clearinghouse:

You may be aware that information on UMI Article Clearinghouse appears in the introduction to the monthly CIJE issues. Our document delivery service offers quality photocopies of most of the articles indexed in CIJE.

I'm pleased to let you know that article copy prices for prepaid orders have been lowered from \$12.00 to \$9.50, effective this year. Enclosed are a few copies of our current mail order form and Title List. We'll be glad to supply you with additional copies of both on request. Please discard any copies of the old "CIJE Article Copy Order Form" that you might have in stock.

We'll be happy to provide you with additional information or literature on request. Call toll-free 800/732-0616, or 313/761-4700.

Sincerely,

Sue Kennedy
Marketing Manager,
UMI Article Clearinghouse

3886

Mail Order Form

UMI Article Clearinghouse, a service of University Microfilms International (UMI), supplies quality photocopies of periodical articles and full issues from 10,000 publications. Copyright clearance is guaranteed, as copies are sold under direct publisher agreements.

Orders for articles published from 1983 to the present are filled within 48 hours and shipped by first-class mail (airmail outside the U.S. and Canada). Pre-1983 articles are shipped in 3-5 days; full issues require four to five weeks. All copies are non-returnable.

Before ordering, please check availability in the UMI Article Clearinghouse Catalog or the UMI Serials in Microform Catalog, or by contacting Clearinghouse User Services. Then complete this order form, enclose payment or reference your Clearinghouse deposit account number, and send the order to:

UMI Article Clearinghouse
Order Department
300 North Zeeb Road
Ann Arbor, MI 48106

Orders may be prepaid by check or money order to University Microfilms International, or charged to an American Express, MasterCard, or VISA account.

Significant discounts are available to customers who establish a Clearinghouse deposit account (minimum deposit \$200.00). Call or write for details.

For more information call toll-free 1-800-732-0616. From Alaska, Hawaii, and Michigan call collect (313) 761-4700. From Canada, call 1-800-343-5299. Telex 314597.

Prices for Prepaid Orders

A. Article Copies \$9.50

For shipment outside the U.S., Mexico, and Canada, add \$2.25.
For additional copies of an article, add \$2.25 per copy.

(Inquire for special discounts on multiple-copy orders of 50 or more, and for rush shipping and handling charges.)

B. Full-Issue Copies \$35.00*

(Price includes soft-cover binding)
*Add .25 per page for issues over 200 pages.

Optional hard-cover (library) binding \$5.00 additional charge.
Please specify "do not bind" if you prefer loose pages.

The following shipping and handling charges apply to orders for full-issue copies:

U.S. and Canada

Fourth Class or Surface Mail	\$2.25 first issue	\$0.75 each additional issue
Airmail	\$4.00 first issue	\$2.00 each additional issue

Latin America/Caribbean

Surface Mail (4-6 weeks delivery)	\$3.50 first issue	\$1.00 each additional issue
Airmail	\$7.00 first issue	\$4.00 each additional issue

UK/Western Europe

Airmail	\$4.20 first issue	\$3.60 each additional issue
---------	--------------------	------------------------------

Africa, Asia, Australia, Middle East

Surface Mail (8-10 weeks delivery)	\$1.70 first issue	\$0.70 each additional issue
Airmail	\$8.00 first issue	\$7.00 each additional issue

Please Note: All shipping and handling charges are subject to change without notice.

The OERI Electronic Bulletin Board operates 24 hours a day and can be accessed by telephone using a modem and almost any type of microcomputer with communications software. More enhanced utilization of the bulletin board's capabilities requires an IBM or IBM compatible microcomputer, XMODEM transfer protocol, and Lotus 123.

The bulletin board can be used to obtain current tables of education data, bulletins, and announcements of data tapes and reports. Users can make their own data available to others via the bulletin board, and can send messages and electronic mail to other users.

For more information, call Tom Litkowski at (202) 357-6524.

The toll-free number of the bulletin board is

(800) 222-4922
626-9853 (in metro Washington, DC)

- NO COST TO USERS-TOLL-FREE 800 NUMBER
- ELECTRONIC MAIL AND MESSAGE SYSTEM

SilverPlatter
INFORMATION SERVICES

April 20, 1987

Dear Colleague:

Enclosed is a copy of the most recent pricing information from SilverPlatter Information, Inc.

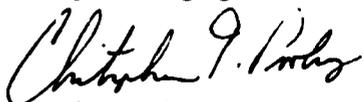

As you can see, the family of SilverPlatter CD-ROM databases continues to expand. New titles include; NTIS, Ca-CD, CHEMBANK, and COMPU-INFO which will be released in the next several months. All of the other databases are currently available.

In addition to these titles, SilverPlatter plans to publish several years of the Medline database. Medline will join PsycLIT, Ca-CD, and EMBASE as SilverPlatter's family of CD-ROM databases in Medicire. Shipment of Medline on a SilverPlatter is scheduled for the July/August timeframe.

All SilverPlatter CD-ROM products can be accessed with the same search software developed by SilverPlatter for CD-ROM. Hardware requirements include an IBM personal computer or compatible with a minimum 512KB of memory, one floppy disk drive, DOS 2.1 or higher, and a parallel printer. CD-ROM disc drives supported include drives from Philips, Hitachi, and Sony.

Please contact me if you have any questions regarding CD-ROM products published by SilverPlatter. Thank you for your continued interest in SilverPlatter.

Very truly yours,

Christopher G. Pooley
Sales Manager-USA

SilverPlatter

INFORMATION SERVICES

SilverPlatter CD-ROM Order Information

WHAT YOU GET WITH YOUR SILVERPLATTER SUBSCRIPTION

- Powerful, user-friendly, SilverPlatter information retrieval software on a floppy diskette.
- Compact Disc (CD-ROM) with all the necessary information for the selected database.
- On-line help screens for both the retrieval software and the database to be searched.
- Comprehensive documentation for the first-time user as well as the experienced searcher.
- Toll-free telephone support in the United States.
- New releases and updates of the retrieval software.

WHAT YOU NEED

- An IBM PC with 512K memory (or IBM compatible) or a Vaxmate from Digital Equipment Corporation. And, use an existing printer to output hardcopy of database information.
- A Compact Disc Drive (Philips, Hitachi, or Sony)

SilverPlatter CD-ROM Pricing Information

ERIC

Bibliographic database sponsored by the U.S. Department of Education, consisting of Resources in Education (RIE) file and the Current Index to Journals in Education (CIJE) file as prepared by the Information Systems Unit of ORI.

- ERIC Current Disc Annual Subscription (RIE & CIJE)
Quarterly Update (1981 to present) \$ 650
or
Annual Update (1981 to present) \$ 390
- ERIC Archival (Purchase only) \$ 900
RIE and CIJE 2 discs (1966-1982)
- ERIC COMPLETE STARTER SET \$1,200
Includes ERIC Quarterly Subscription
and Archival set (2 discs).
Second year subscription at \$650.

PsycLIT

Journal citations on psychology and behavioral sciences from the PsycINFO department of the American Psychological Association. Current disc is updated quarterly. All prices discounted 10% for subscribers to Psychological Abstracts (PA).

LIST PA DISCOUNT

- PsycLIT Current Disc (1981-present) \$3,500 \$3,150
- PsycLIT Archival Disc (1974-1982)
First year of subscription \$1,495 \$1,345
Second & subsequent years \$1,195 \$1,075
- PsycLIT (1974-present) 2 discs
First year of subscription \$4,995 \$4,495
Second & subsequent years \$4,695 \$4,225

A-V ONLINE

Database of audiovisual materials from the National Information Center for Educational Media (NICEM). Covers the complete database through June 1986. Updated annually.

- A-V ONLINE Annual Subscription \$ 795

LISA

Abstracts of the world's literature in librarianship, information science, and related disciplines as compiled by the Library Association Publishing Ltd. Covers the complete database from 1967. Updated annually.

- LISA Annual Subscription \$ 995

AGRICOLA

CD-ROM version of the AGRICOLA bibliographic database with citations of publications relating to all aspects of agriculture as compiled by the National Agriculture Library

- AGRICOLA Current Disc Annual Subscription \$1,750
Quarterly Update (1983-present)
- AGRICOLA Archival (Purchase only) 1979-82 \$1,000

SOCIOFILE

Repository of the contents of the world's journals in sociology as compiled by Sociological Abstracts. Contains abstracts of journal articles published in Sociological Abstracts since 1974 and the enhanced bibliographic citations for dissertations in sociology and related disciplines that have been added to the database since 1986. Updated semi-annually.

- sociofile Annual Subscription \$1,750
Pre-publication offer valid until 5/31/87.
Thereafter the price will be \$1,950 per year.

CORPORATE & INDUSTRY RESEARCH REPORTS (CIRR)

A cumulative index with abstracts to over 70,000 corporate and industry reports written by securities and investment banking firms from 1979-1986. Updated annually.

- CIRR Annual Subscription \$1,250
First year of subscription
Pre-publication offer valid through 5/31/87.
Thereafter the price will be \$1,750 for the initial year.
- Second & subsequent years \$1,500

OSH-ROM

Occupational Health and Safety Information. Containing three complete databases from NIOSH (USA), HSELINE (UK), and CISDOC (UN). Updated semi-annually.

- OSH-ROM Annual Subscription \$ 900

EMBASE

Summaries of the world's literature in biomedicine and related disciplines produced by Elsevier Scientific Publishers. Pricing and update frequency to be announced.

NTIS

Bibliographic database from the National Technical Information Service. Pricing to be announced. Product available June 1987.

Ca-CD

References, abstracts and commentaries of the world's literature in cancer and related subjects from the National Cancer Institute, Elsevier Science Publishers and Yearbook Medical Publishers. Current disc is updated quarterly. Available in May 1987.

- Ca-CD Current Disc (1984-present) \$2,500

COMPU-INFO

Contains reference information about 12,000 computer product listings from 1,500 companies worldwide. Compu-info allows access by 300 specific categories as well as by name and model.

- COMPU-INFO One Time Purchase \$ 950
- COMPU-INFO Annual Subscription with updates \$1,450
Pre-publication offer valid until 7/15/87.
Thereafter the price will be \$1,250 and \$1,950 respectively.

CHEMBANK

A collection of databanks of potentially hazardous chemicals containing, initially, three major databanks: RTECS from NIOSH, OHMTADS from the EPA, and CHRIS from the U.S. Coast Guard. Available in June 1987.

- CHEMBANK Annual Subscription \$1,350
Quarterly Update

NOTE:

- Effective April, 1987
- Prices subject to change.
- A \$250 per year software license fee will be charged for all purchases of retrospective files which do not include a subscription to the current disc.
- Additional copies of documentation - \$50 (subscribers only).

COMPACT DISC DRIVES

Philips

CM-100/CM155 CD-ROM disc drive with locking device.

PAYMENT IN ADVANCE:

- 90 day warranty \$ 760
- 1 year warranty \$ 860

PURCHASE ORDER:

- 90 day warranty \$ 830
- 1 year warranty \$ 930

2 YEAR LEASE/PURCHASE:

- Prepaid or purchase order, 1 year warranty \$ 500/yr

Hitachi

CDR 1502S CD-ROM disc drive.

PAYMENT IN ADVANCE:

- 90 day warranty \$ 780
- 1 year warranty \$ 880

PURCHASE ORDER:

- 90 day warranty \$ 850
- 1 year warranty \$ 950

2 YEAR LEASE/PURCHASE:

- Prepaid or purchase order, 1 year warranty \$ 500/yr

A postage/handling charge of \$25 per drive will be added to all orders for CD-ROM disc drives in the continental United States, \$50 in Canada.

New Subscription Prices for DIALOG OnDisc™ ERIC

Announcing new introductory and list prices for DIALOG OnDisc ERIC subscriptions! Originally announced in the February CHRONOLOG, DIALOG OnDisc ERIC is the first of a series of databases to be offered on CDROM (Compact Disc Read-Only Memory).

We're offering the Current DIALOG OnDisc ERIC subscription, which contains information from 1981 to the present and quarterly updates, for a special introductory price of \$750 per year. The Complete DIALOG OnDisc ERIC subscription containing information from 1966 to the present and quarterly updates is available for a special introductory price of \$1,450 per year. These special introductory prices are effective through June 30, 1987. At that time, the following list prices will be in effect: the Current DIALOG OnDisc ERIC subscription will be available for \$950 per year and the Complete DIALOG OnDisc ERIC subscription will be \$1,650 per year.

Each subscription includes disc(s), quarterly CDROM updates, DIALOG OnDisc™ Manager, DIALOGLINK communications software and all enhancements, complete documentation, and our toll-free search as-

	List Price	Introductory Price*
Current ERIC subscription (1981-present, 1 disc with quarterly updates)	\$ 950	\$ 750
Complete ERIC subscription (1966-present, 3 discs with quarterly updates)	\$1,650	\$1,450

*Introductory prices effective through June 30, 1987
assistance hotline.

DIALOG OnDisc ERIC provides immediate access to abstracts of articles published in over 700 educational journals, thousands of research reports, evaluation studies, curriculum guides, and lesson plans collected by the U.S. Department of Education. ERIC corresponds to two printed indexes: *Resources in Education* (RIE), and *Current Index to Journals in Education* (CIJE).

You may already own some of the equipment needed for DIALOG OnDisc ERIC. It requires:

- IBM PC or compatible personal computer and IBM PC DOS version 2.0 or higher
- 384K RAM (minimum required, 640K RAM recommended)
- Fixed (hard storage) disk with at least one megabyte of free space

- CDROM reader
 - Philips CM-100 and Philips controller card
 - Digital Equipment Corporation RRD-50, A Reader (includes controller card)
 - Any Hitachi reader that uses a CD-1F13 or CD-1F25A2 controller card
- A Hayes-compatible (or certain other models) modem, which is necessary to take advantage of online searching.

These new subscription prices make searching DIALOG OnDisc ERIC even more affordable for your organization!

For more information on DIALOG OnDisc products or a demonstration, please call DIALOG Marketing at 800-3-DIALOG, or 415/858-3785 ☐

ANNOUNCEMENTS

Use of DIALOG OnDisc Products with Multiple PCs and Multiple Readers

Many customers interested in DIALOG OnDisc ERIC and our CDROM product line are asking for information regarding the use of the products in a variety of configurations that involve multiple PCs accessing the same CDROM, or multiple CDROM readers attached to the same PC or network of PCs. The following information responds to the main questions we are receiving.

1. Can I use DIALOG OnDisc products on a local area network?

The first release of the DIALOG OnDisc Manager software does not support local area network, multiple reader, or multiple PC configurations. Because of interest by customers, we are actively exploring these configurations. When our products have been enhanced to support these configurations in the future, we will provide a software upgrade, a site license agreement, and special site prices.

2. Will DIALOG OnDisc products run on "MultiPlatter" or "Opti-Net"?

Some early products, such as MultiPlatter from SilverPlatter and the Opti-Net from Online Computer Systems, advertise support for multiple users and multiple CDROM readers. DIALOG has not tested operation of DIALOG OnDisc products on these hardware systems and cannot support use of DIALOG OnDisc products on them.

3. What is the impact of standardization on networked CDROMs?

CDROM technology is still undergoing standardization and the "High Sierra Proposal" incorporated in NISO Z39 60-198X, if accepted by the American National Standards Institute as a national standard and implemented in Microsoft's MS DOS and PC DOS, will provide the necessary level of support for networked CDROM drives. Until this standard is officially adopted and implemented (which is expected to occur during 1987), all networked use of CDROM technology can be achieved only through non-standard, single-vendor configurations that run the risk of being made obsolete by the NISO standard. Implementation of the standard, by contrast, will, in principle, permit all conforming retrieval software and CDROM discs to be used on the same hardware configurations.

4. How many users could be supported by one CDROM?

CDROM readers are not as well-suited for use as file servers on a local area network as are high-speed hard disk drives. The slower average access time means that if even two users are contending for the same CDROM, retrieval time will suffer markedly. Using multiple readers to serve multiple users is more realistic, where each user accesses one CDROM reader.

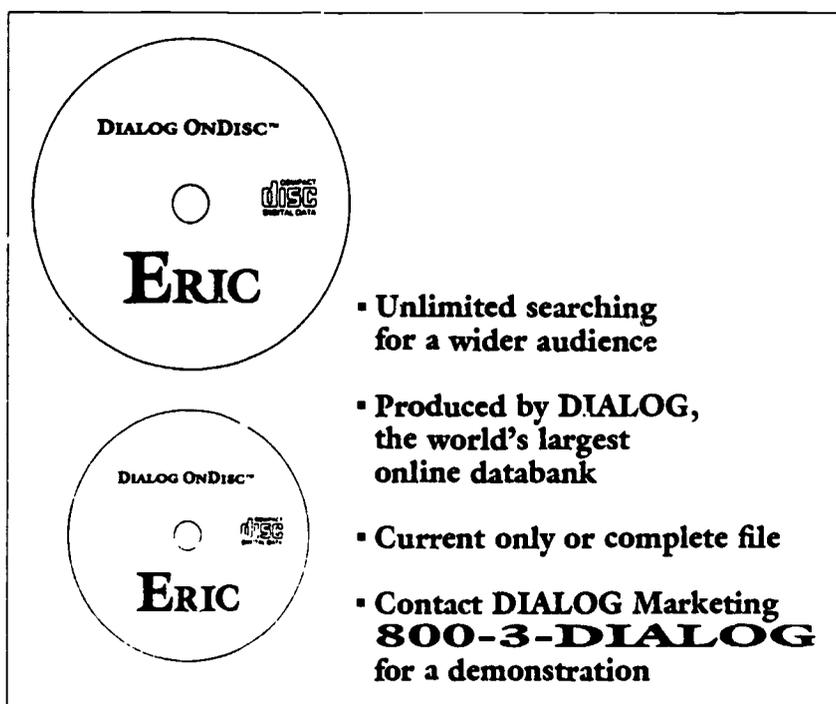

5. How can I support multiple users now?

A single DIALOG OnDisc product may be licensed for a group and shared among all users who want access to it. Since a CDROM is used on only one computer at a time, this use is consistent with DIALOG's license agreement. DIALOG also offers quantity discounts for DIALOG OnDisc database subscriptions when a single database cannot provide adequate access to your organization's users.

6. How can I get more information?

When DIALOG supports multiple PC and/or multiple reader configurations, it will be announced through the CHRONOLOG and other means.

For more information on DIALOG OnDisc products or a demonstration, please call DIALOG Marketing at 800-3-DIALOG or 415/858-3785. □

ERIC

Information Retrieval Service

FILE DESCRIPTION

ERIC is the database of educational materials collected by the Educational Resources Information Center of the U.S. Dept. of Education. ERIC consists of two subfiles: (1) *Resources in Education* (RIE), covering documents, and (2) *Current Index to Journals in Education* (CIJE), covering approximately 750 journals and serial publications. All records in ERIC contain informative abstracts.

ERIC is available from DIALOG for searching online and in compact-disc format, with DIALOG ONDISC™ ERIC; see the DIALOG File Data section below.

SUBJECT COVERAGE

The ERIC database is organized by the following sixteen broad subject areas, each one of which is the responsibility of a separate ERIC Clearinghouse:

- Adult, Career, and Vocational Education
- Counseling and Personnel Services
- Elementary and Early Childhood Education
- Educational Management
- Handicapped and Gifted Children
- Higher Education
- Information Resources
- Junior Colleges
- Languages and Linguistics
- Reading and Communication Skills
- Rural Education and Small Schools
- Science, Mathematics, and Environmental Education
- Social Studies/Social Science Education
- Teacher Education
- Tests, Measurement, and Evaluation
- Urban Education

SOURCES

The RIE subfile includes records of many different types of documents: research/technical reports, conference papers, conference proceedings, program descriptions, opinion papers, bibliographies, state-of-the-art reviews, legal/legislative/regulatory materials, dissertations, classification schemes, teaching guides, curriculum materials, lesson plans, course descriptions, pamphlets, guides, and many other "fugitive" materials.

The CIJE subfile includes records of journal articles and other items contained in copyrighted serial publications. CIJE covers approximately 750 professional journals that are either education-related or that regularly contain education-related articles.

DIALOG FILE DATA

	ERIC online	ERIC OnDisc (Archival)		ERIC OnDisc (Current)
		Disc 3	Disc 2	Disc 1
Inclusive Dates.	RIE (1966 forward) CIJE (1969 forward)	1966-1974	1975-1980	1981- (first release through December 1986)
Update Frequency	Monthly (about 2,600 records/month) (RIE about 1,100 records/month) (CIJE about 1,500 records/month)	Closed	Closed	Quarterly (about 7,800 records/update)
File Size.	606,402 records as of January 1987	180,000 records	205,000 records	185,000 records as of December 1986

DOCUMENT DELIVERY

About 98% of the items in the RIE file can be purchased in paper copy and/or microfiche from the ERIC Document Reproduction Service (EDRS). These items may be ordered online via DIALORDER™ using ORDER ERIC Refer to the ERIC YellowSheet for details. Articles in the CIJE file can be consulted in the original journals or they can be purchased from journal article reprint services (e.g., UMI Article Clearinghouse)

ORIGIN

ERIC is sponsored by:

U.S. Dept. of Education
Office of Educational Research and Improvement (OERI)
Educational Resources Information Center (ERIC)

This paper reports the findings of an investigation of the effects of school organization and ability grouping on students' academic achievements in Great Britain. Data for the study came from the National Child Development Study (NCDS) conducted by the National Children's Bureau (NCB) of London. The NCDS surveyed virtually every child born in England, Scotland, and Wales during the week of March 3-9, 1958, and the present study included data from follow-up studies conducted when the cohort was 7, 11, and 16 years old. Types of schools attended by the cohort were: (1) comprehensive; (2) grammar; (3) secondary modern schools in the state sector, and (4) private schools. Some, but not all, of the schools practiced ability grouping. Measures included as control variables were social background, parent influences, and school influences. Results of the study showed that separation of students into ability groups had an effect on achievement test performance in both reading and mathematics. The four types of schools received students whose average earlier test performance varied systematically in ways that were consistent with the social definitions of the schools. The several types of ability groups included students whose earlier performance suggested they had the designated levels of ability. (LMO) /AB

ファイル解説

ERICは米国教育省のEducational Resources Information Centerが収集している教育資料に関するデータベースです。ERICは、1) 雑誌以外の図書・資料を収載するResources in Education (RIE)と2) 約750誌の雑誌と逐次刊行物を収載するCurrent Index to Journals in Education (CIJE)の二つのサブファイルで構成されています。ERICのすべてのレコードには詳細抄録があります。

ERICは、DIALOGを通してオンラインで検索することも、コンパクト・ディスク形式のDIALOG OnDisc*ERICによっても検索できます。下記の「DIALOG ファイルに関するデータ」の欄をご参照ください。

主題の収録範囲

ERIC データベースは、下記の16の広範な主題分野に整理されており、各主題分野は個別のERIC情報センターが担当しています：

- 成人教育と職業教育
- カウンセリングと人事
- 幼児教育
- 学校経営
- 障害児と才能児
- 高等教育
- 情報資料
- 短期大学
- 言語と言語学
- 読書と伝達技能
- 僻地教育と小規模学校
- 科学、数学と環境教育
- 社会科/社会科学教育
- 教員教育
- 試験、採点法と評定
- 都市教育

情報源

RIE サブファイルは、研究/技術報告書、会議発表論文、会議録、プログラム解説、世論調査報告書、書誌目録、技術水準評価、法律/立法/規制資料、学位論文、分類体系、教育ガイド、カリキュラム資料、教科計画、講座解説、ハンドブック、カイトとその他多くの小資料など、多数の異なる種類の文献のレコードを収録しています。

CIJE サブファイルは、雑誌記事や著作権の主張されている逐次刊行物に掲載された記事に対するレコードを収録しています。CIJEは教育に関連した約750誌の専門誌および教育関連の記事を定期的に掲載している他の雑誌を収録しています。

Infosearch Scholastic Database

At Last The Classroom On-Line Database

Only \$8.00 An Hour

WHAT'S AVAILABLE:

ERIC

The most expansive and complete database of educational information covering bibliographies of educational books and papers, conference proceedings and information on the latest educational programs, practices and curriculum materials. The Infosearch ERIC Database is different from any other database of ERIC information. Unlike the other databases where searches are limited to following the cumbersome ERIC search descriptions, Infosearch ERIC is fully key word searchable using any word or groups of words that may appear anywhere in the text of the information. The Infosearch ERIC Database is a breakthrough for today's educators allowing any teacher with access to a computer and the Infosearch system to do their own complex ERIC searches.

GROLIER'S ACADEMIC AMERICAN ENCYCLOPEDIA ON LINE

All twenty one volumes of the respected Grolier's Encyclopedia are available on the Infosearch Scholastic Database. Every word on each page is searched by the Infosearch system in less than three seconds. For instance, you could type in the words Civil + War and in less than three seconds every article in all twenty one volumes wherever the word Civil and War appears will be retrieved on the computer; a research task that would take months of intensive reading to achieve manually. The Grolier's Encyclopedia on the Infosearch system is updated every quarter, therefore it is never out of date. It is easily used by students and teachers alike in the classroom or in the school library.

WEBSTER'S NEW WORLD™ CONCISE DICTIONARY

The most respected name in the world of Dictionaries is now available as a database of the English language. Webster's New World Concise Dictionary on-line is the world's first on-line database of this highly respected lexicographic work. Explore the richness of the language, delve into the innermost secrets of this expansive linguistic reservoir, unleash a powerful and dynamic word force that will provide you with an unparalleled mastery of the English language. The Webster's New World Concise Dictionary on-line is not only the most advanced lexicographic tool of today, but is as well a remarkable source of factual information.

Also Available . . .

WORDMASTER - the artificial intelligent word system that can even solve crossword puzzles.

THE ELECTRONIC SCHOOL - is continually being developed. It is a computer based education system that allows students to cover whole years of school subject areas over their computer. A tremendous resource for both teachers and students.

EDUCATIONAL FORUMS - are discussions over the computer covering just about any subject to do with today's education.

COMMUNICATION NETWORK - through the INFOSEARCH network you can hold computer based conferences with schools from across the country.

PRICE: Standard Annual Registration \$49.95

Will NTIS Go Private?

A Reagan Administration push to have a contractor operate the National Technical Information Service (NTIS), a self-supporting federal agency, is encountering resistance on Capitol Hill. Critics of the plan claim that a private contractor cannot distribute information more cheaply than the 42-year-old organization currently can. Instead, they say that the proposal will drive up prices and reduce public access to U.S. and foreign technical documents.

The idea of converting NTIS to a private enterprise has been mentioned since 1981 when Joseph Wright, deputy director of the Office of Management and Budget (OMB), was deputy secretary of the Department of Commerce. The Administration, however, did not pursue the matter until December 1985, when OMB asked Commerce to study the potential options for transforming NTIS into a privately run operation.

The department now appears to have narrowed its choices to two approaches—having a contractor operate the facility, or having the service administered by an employee-owned company. Under either of these options, the government would retain the right to set mission goals for NTIS. But librarians and researchers are skeptical about the proposal, as are some members of Congress.

Representative Doug Walgren (D-PA), chairman of the House subcommittee on science, research and technology, has drafted language in the Commerce Department's fiscal year 1988 authorization bill that would establish NTIS as an independent government corporation. This proposal is in line with a recommendation made by the National Academy of Public Administration. The Senate Commerce, Science, and Transportation Committee is expected to take similar action. This legal status would allow the NTIS to operate as it does now, but also would give it the freedom to meet staffing and capital equipment needs.

The organization was first created under President Truman to distribute to American industry and research institutions the scientific and technical data captured from Germany. Originally called the Publications Board, the organization was later renamed the Clearinghouse for Federal Scientific and Technical Information. In 1970 it became known as NTIS, and it is now regarded as the single most important source of technical and scientific literature in the United States.

Since 1950, NTIS has priced its services just high enough to cover operating costs. The agency runs a small surplus or deficit in any given year, depending on product demand and pricing decisions. In 1986, NTIS sold 452,000 copies of paper documents and another 1.9 million documents on microfiche. Gross revenues were just \$22.4 million. Commerce's proposals almost certainly would require NTIS to raise prices on its 1.7 million holdings, contends James F. Wyatt of the Association of Research Libraries. This would occur because companies such as Burroughs Corporation, which has expressed interest in the NTIS contract, would seek to wring substantial profits from the operation.

Reduced access to certain scientific and technical literature for which there is low demand is another worry cited by opponents of privatization. Officials of the American Library Association, for example, have in recent congressional testimony expressed fear that a privately operated NTIS would not maintain the breadth of material that the agency now does. There is also a question about whether a private entity could impose copyright claims over information it provides, even though much NTIS information originates from other federal departments.

Access to foreign scientific and technical data could be crimped, too. Japan and West Germany have indicated they may cease providing NTIS with technical information if a contractor takes over the operation. These countries are more comfortable with government-to-government exchanges, rather than dealing with a private party, NTIS officials say.

While upholding Commerce's position on privatization, agency officials say there is no clear economic rationale to support it. In fact, OMB has yet to respond to an NTIS staff request for a justification that can be used in testimony before Congress. OMB also was unable to provide *Science* with an economic case to back claims that a privately run NTIS would be more efficient. Agency officials simply say that moving NTIS is consistent with the Administration's policy of having the private sector take over federal activities whenever possible. ■ MARK CRAWFORD

Attachment 10: IE Input, by Clearinghouse (RIE November and December 1986 - Revised 6/12/87)

Attachment 11: CIJE Monthly Report (May-June 1987)

The ERIC Administrative Bulletin (EAB) is prepared by the ERIC Processing and Reference Facility on the basis of material submitted by all components of the ERIC system. EAB articles are reviewed and approved by Central ERIC before publication.

The EAB is intended to be the "journal" of the ERIC system and a major means for the decentralized components of ERIC to communicate and interact with one another. The EAB is also a permanent record reflecting most of the major events in the life of the ERIC system (such as personnel changes, Standing Order Customer changes, etc.) and providing in printed form essential documents (such as ERIC policy and priority statements, Clearinghouse scope statement modifications, ERIC Processing Manual revisions, etc.) Submissions to the EAB are to be sent (using the standard form) to your respective monitor. The deadline for input to each monthly issue is the 10th of the month.

3921

ACTION ITEMS

Processing Reminders

Based on feedback from the Facility, and our desire to maintain the high quality of bibliographic data entering the system, it is essential to keep the following guidelines in mind when processing documents.

1. Don't put issues of serials/journals/newsletters in RIE unless: (1) The issue is a theme issue devoted to a single topic and can therefore be handled as if it were a monograph or that topic; or (2) You are putting in a significant "run" of the journal (i.e., all that is then available) for archival purposes. We must avoid a proliferation of look-alike resumes in RIE.
2. Don't overindex in any of the index fields. Index to the significant topics and don't include trivial ones. The user/searcher will thank you for not misleading them.
3. Keep the document as is for filming, unless there is a strong reason to delete pages/material. Don't delete low-information content pages arbitrarily. Let the user/reader see what the document's author intended them to see.
4. Make sure the document is complete before sending it to the Facility. Missing pages, missing sections, missing appendixes, missing volumes, or things out of sequence create costly and time consuming problems.
5. Use author abstracts when they are reasonably adequate. It saves time and money, and the author gets to communicate more directly with the user (there's value in that). Many Clearinghouses are not using author abstracts that are adequate.
6. Don't be afraid to mix indicative information into an informative abstract. It's vital to communicate the important aspects of the document to the user/reader. Don't leave important information out for the sake of a theoretically "pure" abstract.
7. Make sure all abstracts written by Clearinghouse personnel are accurate, read well, and make sense. Abstracts should not raise more questions than they answer. Having a subject expert writing abstracts is not as critical as having abstracts that are clearly written and that communicate well the contents of a document.

...CERIC

ERIC Clearinghouse Scope of Interest Areas -- The Importance of Staying Within Your Official, Contractually-Defined Scope of Interest

Each Clearinghouse has an official, contractually-defined scope of interest area that has been made part of its contract. These scope statements are assembled and repeated in the internal system document entitled ERIC Clearinghouse Scope of Interest Guide, where they are indexed and elaborated on as an aid to the Facility in the assignment of documents to Clearinghouses and to help the Clearinghouses in transferring out-of-scope-documents to appropriate Clearinghouses.

It is essential that Clearinghouses operate within their defined scope areas. Resources in Education (RIE) and Current Index to Journals in Education (CIJE) are arranged by Clearinghouse in order to facilitate browsing. Microfiche are sold by Clearinghouse prefix to customers interested in narrow segments of the literature. Online searchers are advised by all three major online systems to use the Clearinghouse prefix as a way of restricting output and increasing relevance when outputs are large.

When a Clearinghouse accessions documents outside its scope, this small but critical action begins to undermine the whole elaborate apparatus of subdividing the field by sixteen Clearinghouses. ERIC needs to support its Clearinghouse structure and to lend credibility to it, not to cast doubt upon it.

Despite the obvious importance of observing scope areas, Clearinghouses occasionally accession documents that cannot be justified under their respective scopes and that should have been transferred elsewhere. Whether this is due to a shortage of documents (and consequent pressure to accession) or simple oversight, probably varies from one situation to another. There are Clearinghouses whose statistics show that they regularly transfer documents elsewhere and there are other Clearinghouses whose statistics show that they seldom, if ever, transfer a document elsewhere.

The ground rules are simple. To be accessioned by a given Clearinghouse, a document must be justifiable under the subject scope statement of that Clearinghouse. No other justification is adequate. If a document emanates from one of a Clearinghouse's acquisitions arrangements, that is not sufficient. If a document emanates from a host organization, that is not sufficient. If a document is sent to the Clearinghouse by the ERIC Facility, that is not sufficient.

It is true that there are some documents that straddle the scopes of two Clearinghouses. We are not worried about such situations. These can usually be worked out by the respective Clearinghouse management personnel. In such cases, the users would be able to understand whichever way the decision went. What is of concern are the flagrant cases, the clearly unjustified cases, the cases where the accessioning Clearinghouse is obviously in the wrong.

It is time for all Clearinghouses to assign a higher priority to this aspect of selection and to commit themselves to functioning as a team on this matter rather than for narrow self-interest. The Clearinghouses need to begin to police themselves on scope violations and to pressure offenders at Technical Meetings, Directors' Meetings, or other ERIC forums. In turn, the ERIC Facility will step up its vigilance and will try to return documents that seem flagrantly out of the scope of the submitting Clearinghouse.

If everybody does their selection job diligently and in good faith, this problem (which has such internally disruptive potential) will go away. Please help support the internal integrity of the ERIC System.

...Pat Coulter (CERIC)

OERI Interests, Targets of Opportunity, and Priorities for Educational Research

The list below was recently prepared and issued by the Office of the Assistant Secretary for Educational Research and Improvement:

OERI Interests and Targets of Opportunity
for Educational Research

A. Future Research Areas of Particular Interest to OERI:

- o assessment (at all educational levels)
- o content
- o tracking, documenting, appraising reform efforts
- o heterodox approaches to education organization and governance
- o choice plans
- o equitable treatment of public and private sectors
- o timeliness
- o radical improvements in the dissemination of education information of all sorts
- o appraisal of education professionals
- o productivity (including libraries)
- o a new generation of finance studies that emphasize productivity, outcomes, and utilizations
- o measuring the administrative costs of school districts
- o helping parents to be more effective education partners
- o character formation

B. Targets of Opportunity for Educational Research During the Next Five Years (Ten Issues on the Research Horizon):

- o assessing student achievement
- o learning in the content areas
- o teacher effectiveness
- o higher order thinking skills
- o economic competitiveness and school learning

- o computers in classrooms
- o education productivity
- o applying findings to practice
- o extending school hours
- o parent involvement

...OERI

ERIC Digests Should be Announced in RIE

During the preparation of the 1986 edition of the ERIC Clearinghouse Publications annual bibliography, it came to our attention that twelve of the Clearinghouses are announcing their Digests in RIE and four are not. The policy of routinely announcing Digests in RIE was established by Central ERIC in mid-1985. The four Clearinghouses that are not following this policy are being contacted by their monitor. This notice is intended to reiterate this policy so that in 1987 there will be no unannounced stragglers.

...Pat Coulter (CERIC)

ERIC Clearinghouse Contract Deliverables

The OERI Grants and Contracts Service has advised us that all deliverables, that is, reports (Annual Site Visit, Semi-Annual), IAP's, ERIC Digests, and other products that are required by clearinghouse contracts, must be received by the CERIC monitor by the end of the current contract's period of operation. New contracts are to be awarded via the upcoming RFP competition and all of the current contracts will be closed out before the new ones begin.

NETWORK NEWS

New EDRS Order Form

EDRS has designed a completely new Order Form that incorporates their new credit card ordering procedure. A copy of the new form appears as Attachment 1.

...Vic Fortin, EDRS

EDRS Credit Card Orders -- DIALOG Chronolog Notice (June 1987)

The following notice on EDRS's new ordering option appeared in DIALOG's Chronolog for June 1987 (p. 87-151).

ERIC Document Reproduction Service (EDRS) Now Accepting Credit Card Orders

ERIC Document Reproduction Service (EDRS) is now accepting credit card orders through DIALORDER. EDRS (DIALORDER acronym = ERIC) supplies the ED numbered items from the ERIC (File 1) database in microfiche or reproduced paper copy. VISA or MasterCard is acceptable, and all orders must include the credit card number and expiration date. The cardholder's name should also be included if the cardholder is someone other than the person or organization holding the DIALOG account.

For details on the ERIC document delivery service, refer to the ERIC Yellow Sheet in the *Guide to DIALOG Searching*. □

...Vic Fortin (EDRS)

Report of the COED Task Force on Lab/Center Collaboration

The COED Task Force that was asked to look at ways of facilitating collaboration between ERIC and the OERI Labs and Centers presented their final report in January 1987 and this report was distributed at the May 1987 COED Meeting. A copy is reproduced as Attachment 2.

...Gary Walz (CG)

Standing Order Customers That Order Microfiche for Only Specific Clearinghouse

It is not well-known that certain EDRS customers order microfiche for only the output of specific Clearinghouses. There are 41 such customers and they are listed (as of 5/27/87) in Attachment 3. Interestingly, the Clearinghouse with the most orders of this type is JC. There are 14 subscribers who order just the JC microfiche.

...Vic Fortin, EDRS

ERIC Ready Reference #9: "ERIC Digests"

A new ERIC Ready Reference on "ERIC Digests" has been developed by the ERIC Facility, collaborating closely with the ERIC Digests project staff at ERIC/PS. The new Ready Reference is reproduced as Attachment 4. Stock copies have been sent to all ERIC components.

...Jim Houston (ERIC Facility)

CE Downloads From DIALOG to Prepare "Update" Publications

To create "UPDATES", ERIC/ACVE's prepackaged searches, we do searches on DIALOG that are ordered as offline prints and then also downloaded. When the printed searches arrive from DIALOG, they are screened by a subject specialist who selects approximately 100 citations (both EDs and EJs) to be included in the final product. The downloaded search results are then edited to delete the rejected records and to delete several fields, e.g., Clearinghouse Number, RIE/CIJE Issue, etc., in the selected records. If the Identifier field is deemed expendable (i.e., name of state or organization), it, too, is deleted. The idea is to reduce the length of the final records (and hence the cost of printing them), while retaining essential information

Once the searches are edited and formatted, they are printed on a letter-quality printer, duplicated, and bound for sale.

In the future, we will probably also lay out the bibliographic information on the page in a more compact way so as to reduce the overall length of the citations.

While the first "Update" took a bit of time -- the first one always does -- once we got rolling it went smoothly! It's a lot easier and much better looking than the cut-and-paste method we had previously used!

...Judy Wagner (CE)

Canadian Education Thesaurus (CET) -- Status Report

The project to create a Canadian Education Thesaurus is proceeding apace. The latest status report is reproduced as Attachment 5. We plan to continue to keep you abreast of this project by including these status reports in the EAB.

...Jim Houston (ERIC Facility)

Acquisitions Data Report to Go Online

The ERIC Facility is hoping to get the go-ahead soon from the OERI Grants and Contracts Service to convert the Acquisitions Data Report (ADR) to an online file. The goal is to have the ADR mounted on a dedicated microcomputer to which the Clearinghouses would have constant access.

3927

The prospects of increasing the level of automation of this file have led us to examine some of the current problems occasionally experienced with data input to the ADR:

o Clearinghouse Accession Numbers

Mis-keyings of Clearinghouse Accession Numbers can often be detected by a human editor better than they can by a computer. For example, in the sequence:

AA524719
AA524720
AA524221
AA524722

A human editor can be relatively certain that 524221 should have been 524721, but a computer would accept the error without a qualm (probably thereby allowing a duplicate CH# into the system). Please proof so as to avoid CH# mis-keyings.

o Leading Punctuation

The rules state that leading punctuation (such as quotation marks) should be avoided because it causes the title to mis-file. Not all Clearinghouses are currently observing this rule.

o Publication Dates (Format)

Publication dates are supposed to be entered in the standard RII format "22May87". Some Clearinghouses are incorrectly entering the entire four-character year, "1987". Please observe this convention.

o Brackets

Heretofore, brackets have been requested when publication dates were guessed at. The brackets are causing Clearinghouses too many problems and we have decided a preliminary file of the ADR's nature needn't get involved in such niceties. Please discontinue the use of brackets immediately.

o Abbreviations

Don't abbreviate the words in a title. Record titles exactly as on the document. Somebody else entering the same title would in all likelihood not choose the same abbreviations as you, thus preventing a match.

...Pat Brown (ERIC Facility)

ACCESS: The Information Clearinghouse About Public Schools

ERIC isn't the only organization that can employ the acronym "ACCESS" and with "ACCESS ERIC" about to be floated, it behooves us to be aware of similarly-named operations. The National Committee for Citizens in Education runs an "information Clearinghouse" on public schools that they call ACCESS. The potential for some user confusion is obvious. The brochure describing NCCE's ACCESS is reproduced as Attachment 6.

...Ted Brandhorst (ERIC Facility)

UMI Article Clearinghouse -- Correct Telephone Number

The UMI Article Clearinghouse has informed us that many telephone orders for EJ Articles are being received at the dissertations desk at UMI rather than at the Article Clearinghouse desk. This may have led to occasional failure on UMI's part to recognize EJ numbers or to otherwise process the order correctly.

The wrong number, to which CIJE users should not be referred, is: 800-521-3042 (UMI dissertations).

The correct number, to which users should be referred, is: 800-732-0616 (UMI Article Clearinghouse).

"Current Brochures" -- An IR Special Project

The aim of ERIC/IR's "Current Brochure" project is to make available the findings of recent educational research in easily understandable, useful terms. Funded by USDE, the one-year pilot effort will provide 12 summaries of research findings on topics of high public interest.

Topics for the 12 brochures were selected from those proposed by ERIC Clearinghouses, who also nominated writers for the series. The topics range from "How Do I Help My Child Say "No" to Drugs?" to "When Should a Gifted Child Be Accelerated?" to "Is Repeating a Grade a Sign of Failure?" to "How Can I help Develop My Child's Language Skills?". Public interest in topics selected was confirmed by the 1986 Gallup Poll of Public Attitudes Toward Public Schools.

The brochures' primary audience is parents, but educators are likely to find them useful as a means of identifying sources of recent research on particular topics. The first group of brochures in the series, (See Attachment 7) will be disseminated and evaluated before distribution to a national network of educators, public officials, and mass media.

ERIC MICROSearch to Add Abstracts -- an IR Special Project

The ERIC Clearinghouse on Information Resources will further develop the MICROSearch program to include abstracts and to create database disks in additional subject areas. The project will include the following four steps:

1. The conversion of the ERIC MICROSearch software to include abstracts,
2. The selection of topics,
3. The evaluation of user responses to the inclusion of abstracts and the significance of indexing single words in the abstracts, and
4. The development of a plan to disseminate the program to end users.

The original ERIC MICROSearch citation contains the accession number, title, author, journal citation (if appropriate), Descriptor, and Identifier fields. Without abstracts, approximately 300-350 citations will fit on one Apple disk and approximately 475-525 on an IBM disk. Including the abstract will decrease the number of citations for the Apple to 100 and for the IBM to approximately 250. The purpose of the project is three-fold: (1) to provide ERIC MICROSearch in a new, "abstracts included" format; (2) to study the usefulness of including the abstracts with respect to end users satisfaction and the appropriateness with regard to a microcomputer based system; and (3) to assess users responses to different topic areas.

ERIC/IR will be requesting the assistance of other Clearinghouses in regard to topic selection and possibly field testing.

...Don Ely (IR)

SilverPlatter Announces Discount for Multiple Subscriptions to ERIC Database on CD-ROM

In response to competitive pressures, SilverPlatter Inc. has announced that an organization subscribing to ERIC on SilverPlatter CD-ROM can get second and subsequent subscriptions at \$250 each (discounted from the baseprice of \$650). The only restrictions are that all orders must have the same "ship to" and "bill to" address and the files must be used at the same location (this would include two or more libraries on the same campus). The SilverPlatter Press Release and announcement letter are reproduced as Attachment 8.

...Ted Brandhorst (ERIC Facility)

Dr. Patricia Blosser Elected to NARST National Office

Dr. Patricia Blosser of ERIC/SE was recently elected to President/Elect of the National Association for Research in Science Education (NARST). NARST is the major national organization for research related to science education. Dr. Blosser will serve as President-elect this year (1987-88) and will be responsible for the 1988 NARST Conference. She will serve as President in 1988-1989.

Dr. Blosser is also a Professor of Science Education and currently serves as Coordinator for Science Education at Ohio State University.

...Robert W. Howe (SE)

Dr. Helgeson Receives NARST Award

Dr. Stanley Helgeson of ERIC/SE recently received an award from the National Association for Research in Science Teaching (NARST) for his paper on Science Education Research Interests of Elementary Teachers. The award was for "Practical Applications of Research".

...Robert W. Howe (SE)

PERSONNEL

New Personnel at CS

Nola Aiey began work on January 26, 1987 as a research assistant (writer/abstractor). She replaces Julie Kosarin who left in December. In addition, a half-time position as research assistant was filled by Amy Wallace in March. Hilary Taylor Holbrook took a nine-week maternity leave, but is back with us half-time as a writer and editor.

... Sylvia Read Taber (CS)

Staff Changes at UD

We are pleased to announce the following appointments and promotions at the Clearinghouse on Urban Education: Mr. Anane Olatunji has been promoted to Assistant Director; Ms. Cheryl S. Norton has been promoted to Assistant to the Director; Ms. Robin R. Johnson has been appointed as Information Specialist; Dr. Michael B. Webb, Associate Director, is currently on leave.

...Wendy Schwartz (UD)

Three Staff Changes at CS.

Michael Spooner is now the Assistant Director/Project Manager; Fran Lehr has been promoted to Assistant Director; beginning Monday, June 15, 1987, Sue Ann Kendall Crane replaced Sylvia Read Taber, who is going to work for NCTE.

...Fran Biederman, CS

Staff Changes at FL

Laura Wenzel, User Services Coordinator at FL since June 1984, left the Clearinghouse on March 31, 1987, to spend several months in Spain before returning to the States to pursue graduate studies in anthropology and education. Bill Code, former Acquisitions Coordinator, moved into the User Services slot, and the Acquisitions position was taken over by Ms. Sharon Schwinabart, a recent graduate of West Virginia University. Sharon holds M.A. and B.A. degrees in French from West Virginia and taught French there for two years as a graduate student. We are delighted to have her on the staff.

A temporary addition to our staff is Ms. Pamela Buckles, who is filling in part-time for James Mitchell, Administrative Assistant, who is on extended leave for health reasons.

...Jeannie Rennie (FL)

Dr. Juliet Miller Leaves CE

Speaking for the entire ERIC family, we at CERIC want to send Juliet Miller our best wishes for her future activities as she leaves ERIC/CE. Through the years, her persistence, expertise, and devotion to the cause of the ERIC system have gained for her our respect and affection. We are sorry to see her leave and wish her farewell.

...CERIC

ERIC Facility Personnel Changes

Deborah Hottel resigned in May as Senior Secretary to follow opportunities in Montgomery County real estate. She has been replaced by Sharon Hooper who comes to us from the West Virginia University, Department of Geology and Geography.

Kathleen Leahy resigned in July as Secretary to accept a position as a Legal Secretary in Annapolis, where she and her new husband (as of August 29) will be making their home.

Somewhat belatedly we welcome Tonya Richardson as Document Control Clerk (Assisting Cindy Lacey in our Mail Room) and Evette Joyner as our new Receptionist.

The newest member of our staff is RIE Editor Mary McGeehan, who comes to us from the "Regulatory Information Service" (A now discontinued project of the Congressional Information Service (CIS)).

ERIC PUBLICATIONS

CS

TRIP (Theory and Research into Practice) Booklet: Explorations, Introductory Activities, for Literature and Composition, 7-12, 1987, by Peter Smagorinsky, Tom McCann, and Stephen Kern (CS 210 296).

Provides exercises rooted in schema theory, allowing students to relate the fundamental concepts in any assignment to their own experiences and perceptions. Authors examine relevant theory and present exercises for reading comprehension and for writing. Available from National Council of Teachers of English, \$7.50 nonmembers, \$5.75 members.

Recommended English Language Arts Curriculum Guides, K-12, 1986, compiled by the ERIC/RCS Staff and the NCTE Committee to Evaluate Curriculum Guides and Competency Requirements, Adele Stern, Chair (CS 210 080, ED 274 984).

Presents an annotated list of recommended guides and criteria for planning and evaluating English language arts curriculum guides. Available from the National Council of Teachers of English (\$2.00 members, \$2.50 nonmembers).

TRIP: Theory and Research into Practice-- Creative Approaches to Sentence Combining, 1986, by William Strong (CS 210 082, ED 274 985).

Summarizes research on sentence combining and outlines ways to use sentence combining in the writing class. Available from the National Council of Teachers of English (\$5.25 members, \$7.00 nonmembers).

The Dynamics of Language Learning, 1987, edited by James R. Squire (CS 210 396).

Presents papers on: (1) integrating reading and writing processes; (2) teaching comprehension and composition; (3) oral language; (4) classroom practice, interaction, and instructional materials; (5) computers in language and literature education; and (6) evaluation reading and writing processes. Available from the National Council of Teachers of English (\$20.00 members, \$25.00 nonmembers).

Civic Writing in the Classroom, 1987, by Sandra Stotsky (SO 018 148).

Presents a rationale for teaching civic writing skills through the curriculum in social studies, reading, and English language arts. Provides guidelines to classroom practice through discussion of exemplary lessons that have been used successfully in elementary and secondary classrooms. Includes tips for teachers on how to write letters to public officials. Available from ERIC/SO (\$8.00 plus \$1.50 postage and handling).

WORKSHOPS/CONFERENCES/MEETINGS

<u>CH</u>	<u>DATE</u>	<u>LOCATION</u>	<u>STAFF</u>	<u>COMMENTS</u>
CS	Feb. 24-28, 1987	Atlanta, GA	Charles Suhor	Attended the Association for Educational Communications and Technology Annual Conference. Charles Suhor presented a paper, "The Voice-Activated Word Processor -- Future Technology in Composition."
CS	March 19-21, 1987	Atlanta, GA	Charles Suhor Karl Koenke	Attended the Conference on College Composition and Communication. ERIC/CS sponsored a panel on which Karl Koenke presented a paper, "Keyboarding: Research and Instruction." Charles Suhor also gave a paper, "From Voice to Screen--Potential of Voice-Activated Systems."
CS	March 22-24, 1987	New Orleans, LA	Charles Suhor	Attended the Association for Supervision and Curriculum Development conference. Charles Suhor spoke at a session on "Jazz and Language."
CS	March 26-28, 1987	Louisville, KY	Karl Koenke Michael Spooner	Attended the National Council of Teachers of English Spring Conference. ERIC/CS sponsored a session on "Innovative Tests in Reading: Applying Current Theory." chaired by Karl Koenke. Michael Spooner chaired a panel on "The Relationship between Oral Language Proficiency and Writing Behavior in Second Language Learners." Displayed ERIC/CS products and conducted free computer searches from a booth in the exhibit hall.
CS	April 8-11, 1987	St. Louis, MO	Michael Spooner Sylvia Read Taber	Attended the Southern/Central States Speech Associations Joint Conference. Michael Spooner spoke on "ERIC's Future in the Speech Communication Discipline" at a panel on "ERIC and the Speech Communication Discipline." Displayed ERIC/CS products at the exhibit booth.
CS	May 3-7, 1987	Anaheim, CA	Charles Suhor Karl Koenke Jane McClellan Michael Spooner	Attended the International Reading Association convention. Sponsored a session on "Language Diversity and Writing Instruction" with presenters Marcia Farr and Harvey Daniels, authors of <u>Language Diversity and Writing Instruction</u> , an ERIC/CS and NCTE co-publication. Displayed CS products and conducted free computer searches at the ERIC exhibit booth.

GENERAL INFORMATION

1. PRICE LIST

The prices set forth herein may be changed without notice; however, any price change is subject to the approval of the Contracting Officer/USED/Office of Educational Research & Improvement/Contracts and Grants Management Division.

2. PAYMENT

The prices set forth herein do not include any sales, use, excise, or similar taxes that may apply to the sale of microfiche or paper copy to the Customer. The cost of such taxes, if any shall be borne by the Customer.

Payment shall be made net thirty (30) days from date of invoice. Payment shall be without expense to CMC.

3. REPRODUCTION

Express permission to reproduce a copyrighted document provided hereunder must be obtained from the copyright holder noted on the title page of such copyrighted document.

4. CONTINGENCIES

CMC shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure or delay (a) is due to events beyond the control of CMC including, but not limited to, fire, storm, flood, earthquakes, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortage, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments; (b) is due to failures of performances of subcontractors beyond CMC's control and without negligence on the part of CMC; or (c) is due to erroneous or incomplete information furnished by Customer.

5. LIABILITY

CMC's liability, if any, arising hereunder shall not exceed restitution of charges.

In no event shall CMC be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

6. WARRANTY

CMC MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER, INCLUDING ANY WARRANTY OR MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

7. QUALITY

CMC will replace products returned because of reproduction defects or incompleteness. The quality of the input document is not the responsibility of CMC. Best available copy will be supplied.

8. CHANGES

No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of CMC

9. DEFAULT AND WAIVER

- a. If Customer fails with respect to this or any other agreement with CMC to pay any invoice when due or to accept any shipment as ordered, CMC, may without prejudice to other remedies, defer any further shipments until the default is corrected, or may cancel the order.
- b. No course of conduct nor any delay of CMC in exercising any right hereunder shall waive any rights of CMC or modify this Agreement.

10. GOVERNING LAW

This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.

11. DEPOSIT ACCOUNTS

Customers who have a continuing need for ERIC documents may open a Deposit account by depositing a minimum of \$250.00. Once a deposit account is opened, ERIC documents will be sent upon request, and the account charged for the actual cost and postage. A monthly statement of the account will be furnished.

12. PAPER COPY (PC)

A paper copy (PC) is a xerographic reproduction, on paper, of the original document. Each paper copy has a Vellum Bristol cover to identify and protect the document.

13. FOREIGN POSTAGE

Postage for all countries other than the United States is based on the International Postage Rates in effect at the time the order is shipped. To determine postage allow 160 microfiche or 75 (PC) pages per pound. Customers must specify the exact classification of mail desired, and include the postage for that classification with their order. Payment must be in United States funds.

STANDING ORDERS SUBSCRIPTION ACCOUNTS

Subscription orders for documents in the monthly issue of Resources in Education (RIE) are available on microfiche from EDRS. The microfiche are furnished on a diazo film base and without envelopes at \$0.08 per microfiche. If you prefer a silver halide film base the cost is \$0.168 per microfiche and each microfiche is inserted into a protective envelope. SHIPPING CHARGES ARE EXTRA. A Standing Order Account may be opened by depositing \$1,600.00 or submitting an executed purchase order. The cost of each issue and shipping will be charged against the account. A monthly statement of the account will be furnished.

BACK COLLECTIONS

Back collections of documents in all issues of Resources in Education (RIE) since 1966 are available on microfiche at a unit price of \$0.078 per microfiche. The collections from 1966 through 1985 are furnished on a vesicular film base and without envelopes. Since 1986 collections are furnished on a diazo film base without envelopes. SHIPPING CHARGES ARE EXTRA. For pricing information write or call Toll Free 1-800-227-3742.

SPECIAL COLLECTIONS

Special collections of early (1966 to 1988) Office of Education Reports are also available from EDRS. These are: Office of Education Research Reports 1966-65; Pacesetters in Innovation, Fiscal Year 1988; Pacesetters in Innovation, Fiscal Year 1987; Pacesetters in Innovation, Fiscal Year 1986; Selected Documents on the Disadvantaged; Selected Documents on Higher Education; Manpower Research, Inventory for Fiscal Year 1986 and 1987; Manpower Research, Inventory for Fiscal Year 1988. Please write or call for prices and shipping charges.

AIM/ARM MICROFICHE COLLECTIONS

Please write or call for prices and shipping charges.

ERIC CLEARINGHOUSE COLLECTIONS

Back collections of, or standing order subscriptions for current collections of, microfiche of individual ERIC Clearinghouses are available. Please write or call for prices and shipping charges.

ERIC CLEARINGHOUSE PUBLICATIONS

The ERIC Clearinghouses analyze and synthesize the literature of education into research reviews, bibliographies, state-of-the-art studies, interpretive studies on topics of high current interest and many similar documents designed to meet the information needs of ERIC users. Prices include shipping (except for foreign shipment).

1975 - 1977	\$130.00	1980	\$ 45.00	1983	\$ 30.00

MEMORANDUM

To: Garry R. Walls, Chair, COED Executive Committee

From: Lab/Center Collaboration Task Force
Jeanne Bleuer, Chair
Susan Imel

Subject: Survey Report

Date: January 26, 1987

Attached is a summary of the results of the survey that was distributed at the September ERIC Directors meeting. We have also included our analysis of the results, our interpretations of the implications, and our recommendations for using the results to facilitate improved ERIC/Lab/Center collaboration as quickly as possible.

LAB, CENTER AND ERIC CLEARINGHOUSE COLLABORATION

SUMMARY OF RESPONSES TO SURVEY

1 = Very much worth further development
 2 = Probably worth further development
 3 = Probably not worth further development
 Total Score = Sum of (Frequency x Weight)
 (Lowest Total Scores = Most favored strategies)

	Frequency			Total Score
	<u>1</u>	<u>2</u>	<u>3</u>	
1. Ask Centers and Labs to regularly update Clearinghouses on major activities and projects for potential Clearinghouse acquisition purposes.	17	1	0	19
2. Prepare a directory of all ERIC, Lab, and Center staff responsible for dissemination activities. (The current directory is a step in this direction, but it is not clear in all cases who is in charge of dissemination.)	7	9	2	31
3. Provide Labs and Centers with a monthly update of the "hot issues" and emerging ads as reflected in document acquisitions, user queries and professional foci.	4	4	10	42
4. Share information about dissemination activities through an information bulletin that would be distributed to all ERIC and Lab/Center dissemination personnel.	3	11	3	34
5. Develop a steering committee of Lab, Center, ERIC, and NDN staff to suggest ways interaction could be enhanced.	6	7	5	35
6. Ask OERI to sponsor an annual or biannual electronic conference wherein ERIC contractors report to OERI personnel what Clearinghouse processing revealed about state of the art on given priority or emerging areas.	2	5	11	45
7. Develop regional dissemination conferences planned jointly by ERIC Clearinghouses and Regional Labs to provide training for information providers in SOCs and SEAs.	9	6	4	33
8. Ask Labs and Centers to send product development and/or research news to the appropriate Clearinghouse for inclusion in Clearinghouse newsletters as special features or as part of a regular Lab/Center column or report.	13	5	0	23
9. Arrange a meeting of personnel from Labs, Centers and Clearinghouses at AERA.	5	5	8	39

3940

	Frequency			<u>Total Score</u>
	<u>1</u>	<u>2</u>	<u>3</u>	
10. Encourage Labs and Centers to consult appropriate ERIC Clearinghouses when dealing with problems or products related to subject areas.	10	7	1	27
11. Encourage Labs, Centers and Clearinghouses to regularly use one another's staff for workshop and conference presentations as well as refer to the work of one another in professional presentations.	7	6	5	34
12. Arrange a meeting of personnel from Labs, Centers and Clearinghouses at ASIS.	1	5	12	47
13. Work with Labs to identify programs that are developing good practitioner-oriented materials. This strategy could help in building the Practice File section of the database.	5	8	5	36
14. Provide advance announcements of the products emanating from Labs and Centers through flyers and newsletters as well as developing digests and synthesis pieces on major Lab and Center project reports.	6	6	6	36
15. Urge implementation of a workable mechanism in OERI to ensure that Lab and Center materials get into ERIC.	17	0	1	20
16. Use Labs as a vehicle for promoting the Practice File portion of the database.	3	12	3	36
17. Develop arrangements with Labs and Centers to authorize IAP's for Clearinghouse publications building upon their research and development activities. In turn, Lab and Center staff could serve on a regular basis as reviewers of Clearinghouse IAP's.	10	4	4	30
18. Utilize the networks of the Labs, Centers and Clearinghouses for dissemination of information about OERI priorities and encourage dialogue between OERI components and the general public.	5	12	1	32
19. Work with Labs and Centers to develop a needs sensing network.	4	7	7	39
20. Share proposed digest and major product information on the electronic mail to reduce duplication and perhaps enhance publication possibilities.	2	10	6	40

	Frequency			Total Score
	<u>1</u>	<u>2</u>	<u>3</u>	
21. Mandate that representatives of Labs, Centers and Clearinghouses serve on one another's Advisory Committees. Additionally, Lab and Center personnel could receive Clearinghouse written annual reports and be invited to attend the relevant annual review sessions in Washington, D.C.	4	2	12	44
22. Consider using research developed by Centers as the basis for ERIC publications, i.e., major publications or digests.	11	5	2	27
23. Share downsizing alternatives and prioritizing scenarios.	1	5	10	41
24. Provide for greater Lab, Center and Clearinghouse networking through the use of a variety of forms of electronic communication.	5	9	4	35

Analysis and Discussion

The following strategies received the greatest number of "1" (very much worth further development) ratings:

1. Ask Centers and Labs to regularly update Clearinghouses on major activities and projects for potential Clearinghouse acquisition purposes. (17 votes)
15. Urge implementation of a workable mechanism in OERI to ensure that Lab and Center materials get into ERIC. (17 votes)
8. Ask Labs and Centers to send product development and/or research news to the appropriate Clearinghouse for inclusion in Clearinghouse newsletters as special features or as part of a regular Lab/Center column or report. (13 votes)
22. Consider using research developed by Centers as the basis for ERIC publications, i.e., major publications or digests. (11 votes)
10. Encourage Labs and Centers to consult appropriate ERIC Clearinghouses when dealing with problems or products related to subject areas. (10 votes)
17. Develop arrangements with Labs and Centers to author IAP's for Clearinghouse publications building upon their research and development activities. In turn, Lab and Center staff could serve on a regular basis as reviewers of Clearinghouse IAP's. (10 votes)
7. Develop regional dissemination conferences planned jointly by ERIC clearinghouses and Regional Labs to provide training for information providers in SOCs and SEAs.

When Total Scores were calculated for each strategy, Numbers 1, 15, 8, 22, 10 and 17 again emerged as the top six "very much worth further development," but Numbers 2 and 18 obtained lower scores than Number 7.

2. Prepare a directory of all ERIC, Lab, and Center staff responsible for dissemination activities. (The current directory is a step in this direction, but it is not clear in all cases who is in charge of dissemination.)
18. Utilize the networks of the Labs, Centers, and Clearinghouses for dissemination of information about OERI priorities and encourage dialogue between OERI components and the general public.

Of the top seven strategies receiving the most "1" ratings, four (numbers 1, 8, 10, and 15) focus more on efforts to be made by others (OERI, Labs and Centers) than on our own efforts. This may be due partly to the wording of the options; but, considering the context in which the survey was conducted (i.e., straight-line budgeting and the threat/stress associated with the ERIC Redesign Study), it is certainly understandable that ERIC directors and staff would favor strategies that require very little additional effort on the part of Clearinghouse personnel. This is not intended as a criticism -- the limitations of our energies and resources are real. However, the need to collaborate is also real; and, since we can't "will" others to collaborate with us, our action plan should be based primarily on what steps we can take to promote collaboration, not what we would like others to do.

We feel that an effective action plan will consist of a few highly focused strategies that:

1. promote a collaborative atmosphere;
2. demonstrate the desire and ability of ERIC clearinghouses to provide valuable services to Labs and Centers;
3. specify the steps that we can take to initiate and establish policies and procedures for on-going collaborative arrangements; and
4. prescribe immediate actions.

In order to develop this type of action plan, it was necessary to go beyond the simple summarization of the survey results and to analyze the strategies receiving the most "1" ratings to identify: 1) the basic concepts suggested; and 2) the specific steps that Clearinghouse personnel would need to take in order to implement each strategy. We also felt that it would be useful to analyze the "not-so-popular" strategies to identify: 1) potential problems in wording that may have detracted from the basic concept being suggested; and 2) activities with the potential for a "high return on our investment" (i.e., a low cost/high benefit ratio).

In regard to the most favored strategies, i.e., those identified on the previous page, we offer the following observations and suggestions:

1. Numbers 1 and 15 are essentially the same in terms of their focus on acquisition of Lab/Center materials, with Number 15 being the more comprehensive statement of the concept. Perhaps the two could be combined into a more proactive statement such as, "Assist in the development of a standardized workable mechanism within OERI to ensure that all relevant Lab and Center products are submitted to ERIC on a regular basis." To avoid confusion and duplication of efforts, the mechanism should be centralized rather

than based on individual clearinghouse initiatives. (A mechanism of this sort may already be in place; but, if so, it must not be working or there wouldn't be this much concern expressed by Clearinghouse personnel.)

2. Numbers 7, 8, 17, and 22 could be combined into a comprehensive strategy that focuses on what ERIC can do to assist the Labs and Centers in disseminating the results of their research. For example, ERIC's initiative might be: "Assist Labs and Centers in the dissemination of their research results by: a) soliciting and featuring Lab/Center research news in Clearinghouse newsletters; b) developing IAPs and Digests based on Lab/Center research; c) contracting with Lab/Center staff members to author Clearinghouse IAPs and Digests; and d) planning and conducting joint regional dissemination conferences with Labs and Centers."
3. Number 10 seems to focus on what ERIC can do to assist Labs and Centers in their research and development functions (as opposed to their dissemination function). Again, however, the strategy could be more powerful/effective if it suggested that each ERIC Clearinghouse take the initiative to identify current Lab/Center projects that are relevant to its scope and to offer concrete services and products, e.g., existing Digests, IAPs, and bibliographies; professional consultation; database searches, etc.
4. Number 2 appears to be an "enabling objective" that would provide a very valuable tool for facilitating the implementation of the other strategies.
5. Number 18 appears to be a highly desirable long range goal that could eventually grow out of a more established set of collaborative arrangements. It doesn't appear to be a strategy that could be implemented in the near future without a fair amount of time and effort. It also appears to be a procedure that would require central coordination by OERI.

Based on our analysis of the "not-so-popular" strategies, we feel that the following strategies fit the "low investment/high return" criteria and merit further consideration:

1. Re Number 3 ("Provide Labs and Centers with a monthly update of the 'hot issues' and emerging needs as reflected in document acquisitions, user queries and professional foci."): Written comments on the survey forms indicate that the problem with this strategy was primarily the frequency suggested. By changing "monthly" to "semi-annually" the strategy would probably be more acceptable. Also, by linking the strategy with the preparation of Clearinghouse semi-annual reports, there would be very little additional clearinghouse effort required. For example, Section F (Current "Cutting Edge" Topics) of the semi-annual report could be a standardized, stand-alone, one-page form that identifies the Clearinghouse, the time period, and a listing of topics. A copy of this page could then be mailed to each Lab and Center at the

same time the entire report is submitted to CERIC.

2. Re Numbers 5, 9, and 12 (Lab/Center/NDN/ERIC steering committee; AERA meeting; ASIS meeting): These approaches differ from the strategies discussed above in that they all focus specifically on face-to-face, personal interaction among personnel from the various OERI units. Based on our experience in coordinating efforts within the ERIC system, we should be well aware of the value of this type of interaction in facilitating and enhancing collaboration. Therefore, it would seem well worth our effort to undertake at least one of these strategies. Of the three, the "steering committee" strategy was the most favored. However, this would require a great deal of central coordination as well as additional staff meeting time and travel expenses. (An alternative, of course, would be computer conferencing; but this would not provide the personal, face-to-face dimension that we are seeking.) Of the two conventions suggested, it is much more likely that Lab and Center personnel would attend AERA than ASIS. It would also be very desirable for more Clearinghouses to be represented at AERA. Therefore, arranging a meeting during the AERA convention (it could even be an informal ERIC-hosted reception) seems like a strategy that should be pursued.

3946

28

Recommendations

To summarize the previous discussion, the Lab/Center Collaboration Task Force recommends that ERIC pursue the following strategies as a means for initiating and establishing collaboration with other OERI units:

1. Work with CERIC and OERI to develop standardized, automatic procedures to ensure that all Lab and Center products are submitted to ERIC and forwarded to the appropriate Clearinghouses for RIE input.
2. Assist Labs and Centers in the dissemination of their research results by: a) soliciting and featuring Lab/Center research news in Clearinghouse newsletters; b) developing IAP's and Digests based on Lab/Center research; c) contracting with Lab/Center staff members to author Clearinghouse IAP's and Digests; and d) planning and conducting joint regional dissemination conferences with Labs and Centers.
3. Assist Labs and Centers in their research and development functions by offering services and products (existing Digests, IAP's, and bibliographies; professional consultation; database searches) that are relevant to current Lab/Center projects.
4. Provide Labs and Centers with Section F (Current "Cutting Edge" Topics) of Clearinghouse Semi-Annual Reports.
5. Host a meeting/reception for ERIC, Lab, Center, and NDN personnel during the AERA meeting (April 20-24, 1987, Washington, DC).

If these recommendations are approved by the COED Executive Council during its January meeting, we suggest the following plan of action:

1. The COED Executive Council assigns responsibility for following through on the clarification and implementation of Lab/Center acquisition strategies to the Technical Steering Committee, with action and reporting to be completed as soon as possible.
2. The COED Executive Council describes the strategies for providing assistance in research, development, and dissemination (Numbers 2 and 3 above) to all Clearinghouses via both Multilink and a special mailing, with the request that each Clearinghouse implement at least one of the suggested strategies and be prepared to report the outcomes at the next Directors meeting in May. (Such reporting could also be a required part of Clearinghouse Semi-Annual Reports.)

3. The Lab/Center Collaboration Task Force prepares the directory of ERIC, Lab, and Center staff indicated in Survey Item Number 2 by March 1, 1987.
4. CERIC instructs Clearinghouses to disseminate cutting edge topics (as indicated in Number 4 above) beginning with all Semi-Annual Reports due after March 1, 1987.
5. The COED Executive Council identifies a Clearinghouse or committee to take responsibility for arranging a meeting at AERA (Number 5 above).

ERIC Digests

ERIC Digests are:

- short reports (1000- 1500 words on one or two pages) on topics of prime current interest in education
- targeted specifically for teachers, administrators, policymakers, and other practitioners, but generally useful to the broad educational community
- designed to provide an overview of information on a given topic, plus references to items providing more detailed information
- produced by the 16 subject-specialized ERIC Clearinghouse, and reviewed by experts and content specialists in the field
- funded by the Office of Educational Research and Improvement (OERI), of the U.S. Department of Education
- available in original printed form directly from the producing Clearinghouses (ask to be placed on their mailing lists — ERIC Ready Reference #6 lists the Clearinghouses, together with full addresses, telephone numbers, and brief scope notes describing the areas they cover)

ERIC Digests Online (EDO) is:

- a *full-text* database containing the complete text of recent ERIC Digests
- a fast, accurate, and dependable source of directly usable and practical information for the educational community, including teachers, administrators, counselors, policymakers, and parents
- available on ED-LINE (an online news, information, and electronic mail system for educators and others interested in education) via THE SOURCE online information network
- accessed on THE SOURCE by entering "EDLINE ERIC," or, alternatively, via ED-LINE's main menu
- searchable either by general topical categories (menu items) or key words (ERIC Descriptors)
- an online bulletin board (via a "user notespace"), allowing users to comment on the Digests or to read others' comments
- updated monthly, with at least 10 new Digests added each month
- approximately 190 Digests in size as of June 1987

How to Get Connected to EDO:

- Hardware/Software Needed
 - a terminal used to communicate with online services
 - OR
 - a microcomputer, telephone line, modem, and communications software (directions on how to use specific hardware/software for online access can be found in the manufacturers' manuals)
- Subscription to ED-LINE

For information on subscribing to ED-LINE, including membership in THE SOURCE, contact ED-LINE at the address or telephone listed on the verso. An ED-LINE subscription includes *The Source Manual* and a unique ID number and password to THE SOURCE. THE SOURCE gives ED-LINE subscribers a reduced hourly connect charge.

Searching EDO On-Line

- Sign on to THE SOURCE (see "Sign On" in *The Source Manual*)
- THE SOURCE menu appears
- At first prompt (:), type "Q"
- At "command level" prompt (->),
 - a. Type "EDLINE," which takes you to ED-LINE's main menu; Select EDO from the menuOR
 - b. Type "EDLINE ERIC" and go directly to EDO
- EDO main menu appears, as follows:
 - 1 Using ERIC Digests Online (EDO)
 - 2 Search for Digests by Menu Categories
 - 3 Search for Digests by Key Words
 - 4 New ERIC Digests
 - 5 User Notespace
 - 6 ERIC Information

Any item selected from the EDO main menu will guide you through a series of sub-menus to the information you need. Digests can be searched for by using ERIC Descriptors (main menu item 3) or by using topical categories (main menu item 2). The "New Digests" option (main menu item 4) lists just the new Digests added that month — about 10. The "User Notespace" (main menu item 5) provides a means for users to make comments on EDO, suggestions for new Digest topics, or comments on specific Digests; users can read the remarks in the notespace and/or add to them. The sub-menu of the "User Notespace" has an item labeled "Learn How to Use EDO User Notespace," which, when selected, prints out or displays a complete list, by Clearinghouse, of the ERIC Digests currently on the EDO file. Users not yet signed up with ED-LINE and THE SOURCE can obtain this list by contacting EDO at the address/telephone number provided below.

At any menu (numbered group of categories), a category is chosen by entering its number at the prompt (:). At any prompt, typing ".P" returns you to the previous menu; ".M" returns you to EDO's main menu; ".Q" leaves EDO and returns you to ED-LINE's main menu. Pressing the Return key at any prompt displays the particular list of options available at that prompt.

Typing "Q" at the prompt following ED-LINE's main menu returns you to a "command level" prompt (->), at which time you can proceed with a session on THE SOURCE or enter "OFF" to disconnect. Or, you can enter the appropriate number from the ED-LINE menu that will disconnect you from both ED-LINE and THE SOURCE.

For information on how to subscribe to ED-LINE, contact:

ED-LINE

THESAURUS

NOTES ON THE CANADIAN EDUCATION THESAURUS

Number 2, June 1987

THE OTHER THESAURI...

Once completed, the Canadian Education Thesaurus (CET) will become one of four independent but compatible thesauri of education descriptors. The other thesauri are:

. the Thesaurus of ERIC Descriptors, well known among the Canadian and the international education communities. Now in its 11th edition and with its 9500 terms, it serves as a model and as a basis for the development of the Australian, British and Canadian Education Thesauri;

. the Australian Thesaurus of Education Descriptors, used since February 1984 in the production of the Australian Education Index database and its printed sections. The Australian Educational Research Council is currently preparing the second edition of this thesaurus which reproduces materials found in the ERIC Thesaurus with modifications at the conceptual and at the lexical levels when necessary;

. the British ERIC, under development at the University of Southampton, and which should be available in its preliminary version in a few months. The British Thesaurus will be used for indexing and searching the British Education Index, currently produced by the University of Leeds, and soon to become available on DIALOG.

STRUCTURE OF THE CET

The CET proposed structure is fully compatible with that of the ERIC Thesaurus. It follows closely the International Organization for Standardization (ISO)

Guidelines for the construction of Thesauri (ISO 2788).

The CET thus includes: Descriptors or terms used for indexing; and Lead-in terms or synonyms not used for indexing.

Thesaurus terms are interrelated by way of standard semantic relationships: preferential relationships link descriptors (USED FOR) and lead-in terms (USE); hierarchical relationships link generic concepts or classes (BROAD TERMS) and their specific types or parts (NARROW TERMS); associative relationships link descriptors whose meanings are otherwise closely related (RELATED TERMS).

THE VOCABULARY REVIEW COMMITTEE

The Vocabulary Review Committee has been formed. Its 23 members will advise the Thesaurus Editor on specific terminological and structural problems. The committee includes at least one representative from each Canadian province as well as representatives from several national organizations interested in educational matters. Mr. Jim Houston, Editor of the ERIC Thesaurus, Mrs. Elizabeth Oley from the Australian Council of Educational Research, and Mrs. Joan Marder, Editor of the British Thesaurus have also agreed to share their expertise with us.

PROGRESS REPORT

As of June 1, the term bank contains 1200 terms selected in the recent literature. Work will soon begin on the grouping of these terms into broad categories and on the establishment of the obvious semantic relationships.

New Publications from the ACCESS Clearinghouse!!

NCCE draws on its extensive computerized database to produce three new ACCESS Printouts which can provide you with up-to-date information on publications, programs and organizations.

Involving Parents in School-Centered Suicide Prevention Programs

Annotations on research and descriptions of local school-based programs as well as the names of organizations, books, articles, files and other helpful materials.
*NC806CP.

Single Parents and the Schools

Research, studies, publications, parents rights, and suggestions for action to improve the involvement of single parents and working mothers in the education of their children.
*NC807CP.

Effective Schools Through School-Based Improvement

Review of the literature and research on key factors for effective schools; summarizes recent studies and reports on the concept of school-based management as a strategy for achieving effective schools; and provides lists of resources, organizations, model programs, and strategies for action.
*NC808CP.

Information on Colleges and Universities with Special Programs for Students with Learning Disabilities

In conjunction with the ACCESS Printout on College Opportunities for Learning Disabled Students, #NC805CP, NCCE is offering regional lists of the colleges and universities offering services to students with learning disabilities.

Entries include name, address, phone number and contact person if available.

Each regional printout costs \$10.00.

Regions and the states included are listed below, with the number of colleges and universities in each Printout.

Region Number		Number of Colleges
I.	New England (ME, NH, VT, MA, RI, CT)	51
II.	Mid-Atlantic (NJ, NY, PA)	77
III.	South Atlantic (MD, DC, VA, WV, DE, NC, SC, FL, GA)	139
IV.	East North Central (OH, MI, IL, IN, WI)	138
V.	East South Central (AL, KY, MS, TN)	31
VI.	West North Central (IA, KS, MN, MO, NE)	70
VII.	West South Central (AR, LA, OK, TX)	53
VIII.	Mountain (AZ, CO, ID, MT, ND, NM, NV, SD, UT, WY)	51
IX.	Pacific (WA, OR, CA, HI, AK)	164

College and Career Guidance Information Service

Now Available Through ACCESS!!

A NEW SERVICE To assist guidance counselors, parents, and students to gather complete and detailed information on career and college opportunities.

The up-to-date database includes:

College Information File

Detailed descriptions of

- 1,755 four-year colleges and universities
- 1,780 two-year community colleges, junior colleges, and technical institutions

Occupational Information File

- 1,025 occupational fields
- 2,500 job listings

Financial Aid Information File

- List of 700 national scholarships, including criteria for eligibility and deadlines for applying

A personalized search can be conducted to assist in gathering information on career and college opportunities.

Call 800/NET-WORK (638-9675) to find out the details and cost of a search of this file.

Involvement Affects Achievement

Recent educational research has demonstrated what parents and teachers already knew: parents' involvement in their children's education improves the children's performance.

Parent involvement improves children's academic achievement, school attendance, and behavior, and generates community support for schools. Parents' active participation takes many forms, including the following:

INDIRECT INVOLVEMENT

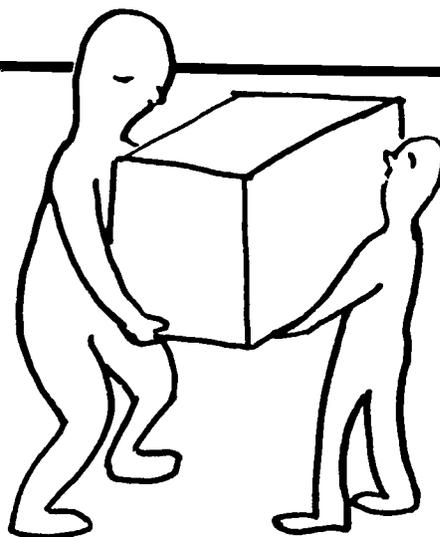

• **Reading** Parents deeply influence children's interest in reading by reading to them often from an early age. Demonstrate the importance of reading by reading and writing yourself, and by providing books and magazines for children.

• **Work and Study Attitudes** Parents can foster attitudes of responsibility and respect for hard work. Nurture children's ability to listen at home, and they'll be able to listen effectively in the classroom. Monitor and limit children's television-viewing.

• **Love and Well-being** Make sure that children receive plenty of love, as well as the rest, exercise, and nutrition needed for optimal performance.

DIRECT INVOLVEMENT

• **Support the Value of Education** Children are sensitive to their parents' values. If parents value education—admire and respect people who teach and people who learn—then their children will, also.

• **Build a Parent/Teacher Relationship** Parents can attend regularly scheduled parent/teacher conferences, but also should initiate contact with the teacher when a question or problem arises, or a favorable event occurs. Communicate your pleasure when children succeed, as well as your concern when they don't. Visit your child's school and classroom.

• **Volunteer** Parents can chaperone a field trip, join school advisory groups, participate in special fund-raising activities, become room parents, discuss hobbies, or aid in classroom learning activities.

• **Homework** Parents need to provide children with a quiet place to study, and to set specific times for homework. Provide assistance with homework, math drill, and reading practice, when needed. Stay informed of what children are learning in school.

• **Attendance** Parents can establish firm policies that motivate students to attend school.

• **Performance** Parents should be aware of children's problems and successes on a regular basis, in order to provide help or seek assistance for the child. Reward children not only for high achievement, but for trying hard.

What should the school principal and administration do to aid parent involvement?

Schools should provide written communications to parents such as a handbook of school policies, newsletters discussing school events and activities, and report cards which specify areas in which parents and teachers can work together to improve students' achievement.

Schools need a coordinator of volunteers, a teaching staff committed to parent volunteers, and a program to train volunteers and match them with appropriate tasks. Volunteers should be told the purpose of their activity, and its time commitment. Volunteers deserve to be thanked! School administrators should make sure that teachers are trained in school/family relations.

What can parents expect teachers to do to aid parental involvement?

Effective teachers provide opportunities for parents to be involved in meaningful ways with their children and encourage communication with parents beyond yearly parent/teacher conferences. Classroom visits by parents are welcomed. Teachers send home activities on which parents and children can work together. And, effective teachers should send home good news as well as bad, commending children's achievement, behavior, and attendance. Teachers can inform parents about their children's progress toward learning goals.

How Can I Help Develop My Child's Language Skills?

Written by
Fran Lehr

Page 1 of 2

Talking in the Home is Critical

One of the most important ways to help children develop language skills is simply to talk with them. Yet recent studies indicate the most parents spend less than half an hour a day talking to their children. Making time for such talk during children's infancy and throughout childhood helps children learn the structure and uses of language, and provides a foundation for reading and writing.

Children begin to develop language skills when they are very young. In fact, many experts believe the process of language development begins at birth. Even the earliest sounds children make reflect the structure of the language they hear.

The amount of time parents spend talking to children, and the environment in which their exchanges take place, may dramatically affect children's vocabulary development and abilities to recognize and comprehend words.

Children learn grammar by imitation and intuition. When they say "runned" instead of "ran," or "foots" instead of "feet," they are exploring language, making new words from those they already know. These efforts should not be considered "mistakes"—they are stages in language development, in which children form and test ideas about how language works. Being too critical of their early pronunciations, or calling them "wrong," does not help children learn—and may create negative feelings about language. Parents who praise children's attempts to explore language, and help them discover standard forms of usage, assist them in learning to communicate clearly.

Language learning is most likely to occur in an environment where:

- parents and others interact with children and allow them to experiment with words.
- errors in speaking are not emphasized or punished — but pleasantly corrected.
- activities are provided that let children develop language skills in a pleasant setting.

Giving children chances to hear language used for a variety of purposes will encourage them to play creatively with language. From that play, an understanding of language's structure and adaptability can grow.

What should parents talk about with their children?

Children like to talk about the world around them. Parents can encourage their curiosity by readily answering children's questions and, especially, by posing new ones, questions that extend and follow up the ones that children ask — about the trees they see at the park about family news, or about the foods they see at the supermarket. Reading aloud to children is a

wonderful way to stimulate discussions. Even television shows can provide chances for families to talk and ask questions. Building activities around everyday events helps children test and build language skills.

But don't most parents do these things already?

Surprisingly, many do not. Researchers found that most mothers spend less than 30 minutes of an average day talking or reading to their children, and fathers spend only about fifteen minutes a day. Merely by turning off the car radio, or limiting television-viewing, most parents can provide additional time for talk. Household chores provide excellent times for chatting, too.

How can children improve, if parents don't correct their language?

Any corrections parents make should be done pleasantly and casually. Children develop language skills at different rates, and the development of one child shouldn't be measured against that of another. If parents think a child has special problems in language development, they should consult a speech professional.

Parents can help children communicate with others outside the home by encouraging use of the correct names of objects, places, and people. Insisting on standard, formal grammar, however, can inhibit children's learning; afraid of making mistakes, they may limit their communications to "safe" sentences, instead of experimenting with words.

Page 1 of 2

Information Alone Is Not Enough

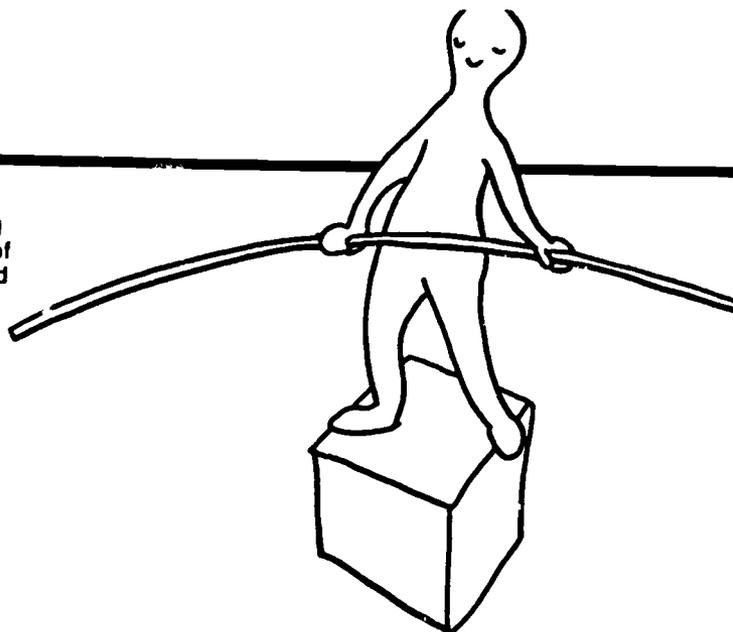

What do children need to stop them from using drugs? Clearly, information about the dangers of drugs has not been enough. Despite widespread drug information education efforts in America since the early 1970s, drug abuse by children and teenagers continues.

The reasons for drug abuse are varied. Children may abuse drugs to satisfy their curiosity, conform to peer pressure, relieve anxiety, or have adventures. But, whatever excuse tempts them, they need the ability to say "no" to drugs.

Much recent educational research has focused on the role of "affective education" in preventing drug abuse. Affective education emphasizes children's emotional/interpersonal development. Parents are the prime nurturers of this development. Children need to develop high self-esteem, ethical values, responsibility for themselves and others, adequate coping skills, and the ability to make conscientious decisions.

How can parents encourage this development in their children? The following activities have proven to be helpful:

- Start as early as you can, in infancy if possible, to praise children's accomplishments and to direct them into activities where they will be successful. High self-esteem helps children resist peer pressure to abuse drugs.
- Ethical values and responsibility are taught primarily through what social scientists call "modeling," or setting good examples for children to follow. Parents who have responsible habits themselves regarding drug and alcohol use send a healthy message to their children. Parents who use drugs and alcohol unwisely themselves are signalling their children that drug abuse is "okay."

- Adequate coping skills enable a child to deal effectively with the pressures of growing up—including the temptation to experiment with drugs. Parents can give children opportunities to practice decision-making and to weigh the outcomes of their decisions.

- Finally, parents should first inform themselves, then make sure that their children are knowledgeable about the dangers of drug abuse by providing them with clear, factual information. In this way, children can be empowered to say "no" to drugs and "yes" to health.

I want my children to have good values and feel good about themselves, but sometimes it seems like a losing battle. Where can I get help?

Schools play a major role in children's development. Expect and encourage your schools to foster healthy emotional growth as well as intellectual development. Schools should have a firm anti-drug policy supported by appropriate action.

I realize drugs are widely available, but how can we keep them out of schools?

A movement to promote drug-free schools is gaining attention. Parents can affect their local schools through organized efforts; see if parent or community groups are exerting anti-drug efforts at your local schools.

I have some general ideas about the dangers of drug abuse but I really do not know specifics. Where can I get this information?

Drug information is available at public libraries, from community health agencies, and community groups that focus on this problem. Often schools may provide drug information education for parents. Ask your school. Read your newspapers for local information. National organizations/agencies providing help to parents include:

Is Repeating A Grade A Sign of Failure?

Written by
Susan Hubbard
Project Editor
ERIC Clearinghouse
on Information Resources

3977

3978

Parents' Attitudes Can Make the Difference

Each year, an estimated one million children are retained in their school grade—that is, they are not promoted to the next higher school grade level. Many of these children, and their parents, view grade retention as a form of failure. They may blame themselves, each other, or the teacher, until they realize that the issues involved are complex.

Sometimes called "grade repetition" or "non-promotion," retention is an experience that few children or parents greet happily. Often, retained children feel that they have "failed"—academically and socially. Their feelings of failure may last long after the retention is over.

Research indicates that parents' and teachers' attitudes can make a significant difference in a child's progress. By working together, they can help eliminate the need for retention—or, if deemed unavoidable, make the experience a positive one.

Many school districts notify parents when children are considered for retention. Parents may be able to work with the school in helping children make the progress necessary to avoid retention.

Usually, the teacher or principal makes the recommendation to retain a child. Unacceptable levels of academic achievement or social maturity are the most commonly given reasons. Some research indicates that other factors—such as the child's age, physical and emotional growth levels, and parents' attitudes—also are reflected in the retention recommendation.

If the decision to retain is made, the attitudes of parents, teachers, and classmates influence the child's future progress. A recent two-year

study found that children whose parents accepted and supported the grade retention were more "successful" than those whose parents did not. The study defined "success" in terms of academic gain, levels of emotional development, improvement of social skills, and overall progress as assessed by teachers and parents.

Other research has found that teachers who systematically assess the retained child's academic and social progress, and who encourage the child's interactions with classmates, can make a positive difference in the child's development.

Overall, many researchers recommend a more humane approach to retention—one that emphasizes the positive aspects of both the student and the retention itself.

How can I help a child adjust to being retained in a grade?

At home, parents can help by maintaining strong, positive interest in the child's work and progress. *Reminding the child that everyone grows and learns at a different rate may help remove any feeling of failure.*

By working with the teacher, and with the child at home, parents can ease a child's adjustment. Conferences between teachers and parents should be scheduled *long before*, during, and after the time of decision.

Is merely repeating a grade enough help for a child performing below grade level?

Probably not. *The key is to provide the child with a different kind of learning experience—preferably without grade retention.* But if the child is retained, then individualized instruction is important to make the retention successful. Studies show that students have fewer difficulties attaining grade-level skills when they are both retained and promptly offered remedial help.

Does retention work for children with learning disabilities?

Retention alone does not address the special problems of children with learning disabilities. Individually tailored help is necessary in order for those students to attain grade-level skills. *A parent or teacher who suspects the existence of a learning disability should contact one another immediately.* The school's special education unit should be consulted to make sure that the child is properly diagnosed and appropriately helped.

SilverPlatter
INFORMATION SERVICES

June 18, 1987

Dear SilverPlatter Library Network:

This letter and the enclosed Press Release have been sent to SilverPlatter distributors prior to our general distribution of the Press Release to inform you of our new pricing policy for multiple subscriptions to the ERIC database.

For the first subscription to the ERIC current disc with quarterly updates, it will cost the library \$650 less the discount offered by your library network. Any additional subscriptions will cost \$250 per subscription less the network discount. For these orders, SilverPlatter will invoice the library network at \$490 for the first subscription and \$190 for each additional subscription to ERIC.

This new price for multiple subscriptions is for the ERIC database only. Multiple subscriptions to other SilverPlatter CD-ROM databases are available at a 25% discount for the second and any additional subscriptions ordered. All prices are effective immediately and do not apply to multiple subscription orders placed prior to this announcement.

For all multiple subscription orders which include a discount for the multiple copies, the subscriber must use the same ship to and bill to address. The databases must be used at the same campus location which can include two or more libraries on the same campus.

The enclosed press release is being sent out on June 22nd. I expect that this announcement will increase the interest in ERIC on a SilverPlatter by large universities. Please contact me if you have any questions about the new multiple subscription prices for ERIC.

During the past few weeks there have been numerous inquiries from the library networks regarding subscription orders for databases other than ERIC and A-V ONLINE. Many of the networks wanted to offer their members a discount on these products as an incentive for ordering through the network.

SilverPlatter Information, Inc., 37 Walnut Street, Wellesley Hills, Massachusetts 02181 / 617-239-0306
SilverPlatter Development, Ltd., 10 Barley Mow Passage, Chiswick, London W4 4PH, England / 01-994-6477

June 18, 1987
Page 2

Since SilverPlatter has a different contractual relationship with each Information Provider, I had to discuss this policy with many different organizations. They have all agreed that the networks should be able to discount these products to their members.

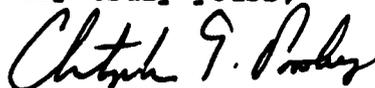

Effective immediately, each network can offer discounts on other SilverPlatter products. This discount cannot exceed the 7% commission paid to the network by SilverPlatter.

Please bear in mind that for orders to the PsycLIT database, APA will invoice the network for the full cost of the product. Following monthly account reconciliation with APA, SilverPlatter will issue a check to the network for the 7% commission on orders for PsycLIT.

At the ALA Conference SilverPlatter will be demonstrating the current year of MEDLINE. Following approval from NLM on this disc, the archival discs will be mastered and should be ready for shipment in August. In addition, we will be showing a prototype of a new windowing feature which will make the tutorial screens in our software much easier to use and more context sensitive. The windowing feature will be released for all SilverPlatter products as an enhancement later this year.

I look forward to seeing you at the ALA Conference.

Very truly yours,

Christopher G. Pooley
National Sales Manager

NEWS RELEASE

June 22, 1987

**SILVERPLATTER ANNOUNCES MULTIPLE SUBSCRIPTION PRICES FOR
ERIC DATABASE ON CD-ROM**

SilverPlatter Information, Inc., of Wellesley, Massachusetts, the first company to publish and distribute the complete ERIC database on CD-ROM, has announced a new discount policy for multiple subscriptions to the ERIC database.

For libraries who would like multiple subscriptions to ERIC on a SilverPlatter, the initial subscription with quarterly updates will cost \$650 per year. The second and any additional subscriptions will cost \$250 per subscription including quarterly updates.

All multiple subscription orders to the ERIC database must have the same ship to and bill to address. The databases must be used at the same campus location which can include two or more libraries on the same campus.

The ERIC Administrative Bulletin (EAB) is prepared by the ERIC Processing and Reference Facility on the basis of material submitted by all components of the ERIC system. EAB articles are reviewed and approved by Central ERIC before publication.

The EAB is intended to be the "journal" of the ERIC system and a major means for the decentralized components of ERIC to communicate and interact with one another. The EAB is also a permanent record reflecting most of the major events in the life of the ERIC system (such as personnel changes, Standing Order Customer changes, etc.) and providing in printed form essential documents (such as ERIC policy and priority statements, Clearinghouse scope statement modifications, ERIC Processing Manual revisions, etc.) Submissions to the EAB are to be sent (using the standard form) to your respective monitor. The deadline for input to each monthly issue is the 10th of the month.

3995

ACTION ITEMS

ERIC Clearinghouse Competition (Including ACCESS ERIC, Adjunct Clearinghouses, ERIC Partners)

The 1987-1988 competition for the ERIC Clearinghouse contracts was announced in the Commerce Business Daily (CBD) of July 24, 1987. On August 6, 1987, Edwin S. Darrell, Director, Information Services, sent a letter (see Attachment 1) announcing the Clearinghouse competition (RFP-88-005) and the projected competition for ACCESS ERIC and Adjunct Clearinghouses, together with the formulation of the ERIC Partners group. Clearinghouses will want to take action to ensure that they receive their RFP's. Potential bidders may also want to make contact concerning the ACCESS ERIC and Adjunct Clearinghouse RFP's.

...Pat Coulter (CERIC)

OERI Logo Not to Appear on ERIC Publications

On July 8, 1987, the following message was put on the ERIC electronic mail system by Central ERIC:

"Effective immediately, please eliminate the OERI Logo from all ERIC publications. Our Publications Office has informed us of this policy change in the use of the OERI Logo.

"The use of the text lines...'Office of Educational Research and Improvement' and 'U.S. Department of Education' should remain."

Publications that are in the final stages of production need not be pulled to have the logo deleted, but all new publications should follow the new policy and should not carry the OERI Logo.

...Pat Coulter (CERIC)

Leadership for Educational Administrators Development (LEAD)

The Department of Education grant program known as LEAD (Leadership for Educational Administrators Development) has awarded grants to organizations in all 50 states. Central ERIC has asked the Clearinghouses to place the LEAD awardees on their distribution lists, or at least those projects in the Clearinghouse's respective Standing Order Customer region. The list of all LEAD awardees (together with contact point and telephone number) is provided in Attachment 2.

...Pat Coulter (CERIC)

Contributions to the EAB Needed

Contributions to the EAB have been falling off, with some Clearinghouses sending in very few items. The result is both a lack of material for regular issues and an imbalance in representation.

Please review your arrangements for sending items to the EAB and make sure that you are contributing on a regular basis. We need material in all areas: action items, network news, personnel, ERIC publications, etc.

...Kevin Arundel (CERIC)

NETWORK NEWS

ERIC Redesign Papers Entered into ERIC Database (ED-278-429)

At the request of Central ERIC, the various ERIC Redesign papers issued by OERI for public comment were compiled by the Facility into a single package and entered into the ERIC database (as ED-278 429). The RIE announcement for this package appears below:

ED 278 429 IR 051 933

Bencivenga, James J. And Others

ERIC Redesign. Papers Issued for Public Comment. 1986-1987.

Educational Resources Information Center (ED), Washington, DC.; Office of Educational Research and Improvement (ED), Washington, DC.

Pub Date—Apr 87

Note—60p.

Pub Type— Reports - Evaluative (142)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Information Dissemination, *Information Needs, Information Networks, Information Services, Information Systems, Information Utilization, *Needs Assessment, Position Papers, Systems Analysis

Identifiers—*ERIC

This compilation consists of various letters and documents issued for public comment during 1986-1987 by the Office of Educational Research and Improvement (OERI) of the U.S. Department of Education, during its examination of the Educational Resources Information Center (ERIC) system to determine any needed changes and improvements. This compilation includes only the material that was distributed for public comment. It does not include the minutes of meetings of advisory groups formed during 1986 to study ERIC, the background papers that were prepared to stimulate internal discussion, or the many letter reactions that were received from the field in response to these public announcements. The components of this package are: (1) "ERIC in Its Third Decade" (a statement of principles); (2) "Domains or Scope Areas to Be Included in the ERIC System"; and (3) "Summary of the Educational Resources Information Center (ERIC) Redesign" (an implementation paper). Appended to the third component are two position papers: (1) "Access ERIC" (including "ERIC Partners"), by John Collins; and (2) "Adjunct Clearinghouses," by Elizabeth Payer. Except insofar as they may be modified by further public comment or congressional action, it is OERI's intent to proceed to modify ERIC along the lines described in these documents. These changes involve: (1) Merging the Clearinghouses on Teacher Education and Counseling and Personnel Services into a "School Professionals" Clearinghouse; (2) Changing the names of seven Clearinghouses; (3) adding a Clearinghouse on "Education Statistics," to be located within the Center for Education Statistics (CES); (4) Initiating a new ERIC system component called "ACCESS ERIC" to concentrate on marketing, promotion, advertising, public relations, training, system-wide information analysis products, and liaison with other information systems; (5) Initiating a formal users' group to be called "ERIC Partners"; (6) Initiating a new kind of "Adjunct Clearinghouse" that will, at no cost to ERIC, acquire and process for ERIC the educational literature in the distinctive areas (e.g., art) in which their host organizations may have a special interest. (AA)

...Ted Brandhorst (ERIC Facility)

ERIC Digests -- Complete List (432 through July 1987)

In the few years that the brief, practitioner-oriented digest format has been an ERIC priority, over 400 have been prepared by the Clearinghouses. Their topics are a mosaic of major issues in education.

Because Digests were not initially entered into the ERIC database, bibliographic control over them has suffered. In an attempt to rectify this, the Facility, using a wide variety of sources, has attempted a complete list of Digests from the beginning through July 1987 (see Attachment 3).

Please note that Pat Coulter has requested that Clearinghouses should record on each Digest the month and year of first printing and, if revised, the month and year of revision as well. Future reference lists of Digests will incorporate this essential information.

...Ted Brandhorst (ERIC Facility)

National Technical Meeting -- Final Report

The final report of the 1987 ERIC National Technical Meeting was completed by the Chair of the ERIC Technical Steering Committee and mailed to all system components on June 30, 1987. While the entire report is too large to be reproduced in the EAB, the session-by-session summaries and the recommendations that emerged from the meeting are being reproduced here (see Attachment 4).

...Ted Brandhorst (ERIC Facility)

Bowker Annual (Covering 1986) Article on ERIC

As in each of the past three years, the Bowker Annual of Library and Book Trade Information invited the ERIC Facility Director to write its annual article on ERIC (covering 1986). The article, which originally appeared some months ago, is reproduced here as Attachment 5.

...Ted Brandhorst (ERIC Facility)

EDRS Brochure Announcing Seven Special Microfiche Products

In July 1987, EDRS brought out a new brochure describing and giving the price of its various special microfiche products, e.g. RIE Title Index, RIE Author Index, RIE Subject Index, RIE Institution Index, etc. All the EDRS special projects have been updated through 1986. The new brochure has the advantage over previous brochures of having been passed through Central ERIC and the Facility for proofing and review before it was finalized. One hundred copies of this new brochure have been provided by EDRS to each ERIC Clearinghouse.

...Vic Fortin (EDRS)

UMI Article Clearinghouse -- New Brochure

The UMI Article Clearinghouse is the equivalent of EDRS for CIJE journal articles. It can provide users with full size reproduced copies of 80% of the articles announced in CIJE. No other document delivery vendor can make as good a claim. A copy of UMI's latest 1987 brochure on the Article Clearinghouse appears as Attachment 7.

...J. Eustace (ERIC Facility)

SilverPlatter Continues to Enhance Its Retrieval Software -- Provides Online Help via "Windows"

In a press release dated July 10, 1987 (see Attachment 8), SilverPlatter announced that it was making its Help screens more sophisticated by providing them as "Windows" displayed simultaneously with the search in progress.

The new software will be released to all existing customers as well as future customers.

...Pat Brown (ERIC Facility)

ERIC on SilverPlatter CD-ROM (Article in CD-ROM Review)

Attachment 9 is a product review of ERIC on SilverPlatter CD-ROM that appeared in CD-ROM Review (v2, n2, May/June 1987). Reprints of the article were distributed to thousands of attendees at the recent ALA meeting in San Francisco. More descriptive than critical, the article provides some nice public relations for both ERIC and SilverPlatter.

...Pam McLaughlin (IR)

SMERC Update on Educational Reform

The educational reform movement is necessarily of great interest to ERIC. It generates considerable literature and it results in many user inquiries. In June 1987, SMERC prepared a useful "Update on Educational Reform" in its familiar one-sheet format, complete with references. This item is reproduced here as Attachment 10 for the information of the Clearinghouses.

...J. Eustace (ERIC Facility)

3999

Joint Committee on Printing (JCP) Rules May Change

The June 19, 1987 issue of the Washington Post contained an article (Attachment 11) describing how various Federal agencies are planning to divorce themselves from long-standing JCP printing regulations. While this matter has not yet been resolved, it will be of interest to the ERIC Clearinghouses whose printing and publishing activities could be affected by whatever "rules" are ultimately in force.

...Pat Brown (ERIC Facility)

DIALOG -- ERIC/HE at Ramapo College of New Jersey

As part of HE's special project (the "DIALOG-ERIC/HE Classroom Instruction Project") to train non-library school faculty to do online searching, Lynn Barnett and Anne Caputo of DIALOG's Washington office, conducted a full-day workshop at Ramapo College of New Jersey on June 23. The state college has a strong interdisciplinary program, with faculty in all schools enthusiastic about the potential uses of online databases. The workshop included faculty in history, accounting, biology, social sciences, and journalism, as well as representatives from the library and the administration. The ground rules of the special project require that the faculty in the workshop, once they are proficient in online searching, will train other faculty and students. Preliminary results indicate a high interest in forming an on-campus online user group. The president of the college, Dr. Robert Scott, is a member of HE's Advisory Board and a strong supporter of ERIC.

Other Clearinghouses interested in similar cooperative ventures should contact Anne Caputo.

...Lynn Barnett (HE)

IFLA Helps ERIC Information on "Distance Education" to Circulate Internationally

Recent literature searches on "Distance Education," done by HE's Laura Casal at the request of National Advisory Board Member Elizabeth Stone, were circulated in the newsletter of the Continuing Professional Education Round Table of the International Federation of Library Associations and Institutions (IFLA). Dr. Stone comments, "I have happily been getting requests for what you sent before (it is interesting to note that it is usually the best informed leaders that write and request new information)... What a satisfaction to have ERIC to supply us with needed and important information on topics on our concern!"

...Lynn Barnett (HE)

"Higher Education Media Scan Reference System" Cites ASHE-ERIC
Higher Education Report Series

The Higher Education Media Scan Reference System, a small organization that is developing a national media scanning service to be used with strategic planning and futures research on higher education, has distributed a promotional brochure that features seven publications that it considers most valuable for this type of scanning. One of the seven, cited prominently in its brochure, is the ASHE-ERIC Higher Education Report series. This is a good example of how ERIC is being used successfully by practitioners.

...Lynn Barnett (HE)

PERSONNEL

Juliet Miller's Goodbye Letter to ERIC

Last month we announced that Juliet Miller was going to leave ERIC/CE to pursue a new career direction. Her subsequent letter (dated July 28, 1987), explaining what she is planning to do and turning over the reins to Dr. Susan Imel, will be interesting to all Clearinghouses. It is reproduced here as Attachment 12.

...Ted Brandhorst (ERIC Facility)

Amy Wells Joins UD as Acquisitions Coordinator

Amy Wells is joining UD as its new Acquisitions Coordinator, replacing Janice Walker who has taken a position in the Health Services field. We will miss Janice but extend a warm welcome to Amy, who has previously worked for the New York Times as a freelance writer. Please note this change of staff in your ERIC Directory.

...Anane Olatunji (UD)

Hail and Farewell to Laura Casal at HE User Services

After nearly 8 years as User Services Coordinator at HE, Laura Casal has left to pursue a career in writing. She leaves quite a gap in the personality of the Clearinghouse, and we wish her the best. Vi Walker will be HE's new User Services Staffer and we hope you will all welcome her into the system and add her to your ERIC Directory.

...Lynn Barnett (HE)

4001

Dr. Suydam on Leave from SE as Distinguished Visiting Professor at Miami University (Oxford, OH)

Marilyn Suydam, Associate Director for Mathematics Education at ERIC/SE, will be on leave next year as she serves as Distinguished Visiting Professor at Miami University in Oxford, Ohio. Beginning in mid-August through May 1988, she will work primarily with a State Challenge Grant project on improving mathematics instruction in the primary grades. Helping to put research into practice is a major goal of the project and has been the focus of Dr. Suydam's interest for years, even before she came to work for ERIC/SE in 1972.

...Dr. Robert W. Howe (SE)

Nancy Krekeler Joins CERIC

We, at Central ERIC would like to welcome Nancy Krekeler to our staff. She has been working at OERI as Personnel Coordinator for the past year. With a degree in Higher Education from Indiana University, Nancy has decided to become more involved in program work. Her first order of business at ERIC will be to implement an ED document acquisitions system. She will also be helping out with the Clearinghouse competitions. If you have any suggestions on setting up the acquisitions system, please feel free to give Nancy a call. Or, if you would like to just say "Hello" and introduce yourself, she can be reached at 357-6089.

...Kevin Arundel (CERIC)

UNITED STATES DEPARTMENT OF EDUCATION

OFFICE OF THE ASSISTANT SECRETARY
FOR EDUCATIONAL RESEARCH AND IMPROVEMENT

AUG 6 1987

Dear Colleague:

The Educational Resources Information Center (ERIC) is a national education information system responsible for developing, maintaining and providing access to the world's largest education database. Since its creation in 1966, the federal government has contributed to the support of the ERIC system.

As a result of an extensive redesign study conducted by the Office of Educational Research and Improvement, we are proposing to establish sixteen clearinghouses and three new components: ACCESS ERIC, Adjunct clearinghouses, and ERIC Partners. ACCESS ERIC will provide systemwide coordination, training, materials development, and outreach and awareness activities designed to make ERIC services and products accessible and useful to a greatly expanded audience. Adjunct clearinghouses will be established to enhance ERIC coverage and dissemination of documents and materials on topics not adequately treated under the current configuration, such as art and music, private education, and education policy. ERIC Partners will be organizations and institutions that will actively and widely distribute and advertise ERIC materials or services.

We have just announced the competition for the 16 clearinghouse contracts (See attached Commerce Business Daily announcement) and would like to invite you to compete for one or more contracts. If you are interested in receiving more information, please contact the following office: U.S. Department of Education, Grants and Contracts Services, Management Support Branch, Room 3633, Mail Stop 1603, GSA Building, 7th and D Streets, S.W., Washington, D.C. 20202, ATTN: Kathy Poole or call (202) 732-2498.

In the near future, competitions for ACCESS ERIC and the Adjunct Clearinghouses will also be announced in the Commerce Business Daily.

Sincerely,

A handwritten signature in cursive script that reads "Ed Darrell".

Edwin S. Darrell
Director, Information Services

ERIC CLEARINGHOUSE COMPETITION RFP-88-005. Closes 10-10-87. Contact: Kathy Poole, 202/732-2498. The Office of Educational Research and Development, is competing the 16 ERIC Clearinghouses, which are: ERIC Clearinghouse on Adult, Career and Vocational Ed. ERIC Clearinghouse on Counseling and Personnel Ser. ERIC Clearinghouse on Educational Management. ERIC Clearinghouse on Elementary & Early Childhood Ed. ERIC Clearinghouse on Handicapped & Gifted Children. ERIC Clearinghouse on Higher Education. ERIC Clearinghouse on Information Resources. ERIC Clearinghouse on Junior Colleges. ERIC Clearinghouse on Languages and Linguistics. ERIC Clearinghouse on Reading and Communication Skills. ERIC Clearinghouse on Rural Education and Small Schools. ERIC Clearinghouse on Science, Mathematics, and Environmental. ERIC Clearinghouse on Social Studies/Social Science Ed. ERIC Clearinghouse on Teacher Education. ERIC Clearinghouse on Teacher Education. ERIC Clearinghouse on Test, Measurement and Evaluation. ERIC Clearinghouse on Urban Education. The ERIC Clearinghouses are a part of the ERIC system, which consists of the central ERIC management staff within OERI, access ERIC, adjunct clearinghouses and ERIC partners; the ERIC document reproduction service; the ERIC processing and reference facility; and public and private publishers and vendors of online and CD-ROM computer info retrieval services. The ERIC system produces and maintains a comprehensive computerized info system that makes English-language education literature easily successible to the education community, the media and the public. Prospective offers can be made acquainted with the system by requesting the RFP, which will contain on microfiche, a number of major ERIC system documents; or looking at copies which will also be available for review at the ED/OERI Library and at each education regional office. The ERIC clearinghouses have the following responsibilities: They acquire significant education literature within their particular scope areas. They process the collected items for entry into the database. They understand the critical issues in their filed and prepare materials for researchers, paractitioners, and policymakers that summarize the literature and identify state-of-the-art practices. They provide users with products and services. The establish and carry out dissemination programs. All responsible sources may submit a proposal which will be considered. The antidipated issue date is 8-10-87 and the closing date 10-10-87. Request for copies may be made by telephone, mail, telegram or in person. All request shall reference RFP number and title. Telephone request may only be placed on 202/732-2498. Mail or telegram request must be sent to the above address. (202)

ERIC CLEARINGHOUSE FACT SHEET
JUNE 1987

The Educational Resources Information Center (ERIC) is a comprehensive education information system that makes English-language education literature easily accessible to teachers, administrators, scholars, parents, students and other interested people. ERIC is used almost 3 million times a year.

ERIC is federally funded and administered by the Department of Education's Office of Educational Research and Improvement (OERI). It includes a nationwide network of 16 subject-oriented clearinghouses which collect, synthesize, and widely disseminate education documents and publications. Support services for the ERIC system are provided by the ERIC Document Reproduction Service (EDRS) and the ERIC Processing and Reference Facility. Clearinghouses, EDRS and the ERIC Facility are contracted through a competitive bidding process. The total annual expenditure for the development, distribution and use of ERIC resources in the U.S. is \$136 million. Only 4.1% of that is provided by the Federal government.

The ERIC database contains over 600,000 entries including research studies, program descriptions and evaluations, conference proceedings, bibliographies, curriculum guides, state-of-the-art-papers, journal articles and other education materials. Information stored in ERIC is available at more than 3,000 locations worldwide, mostly in public and school libraries, colleges, universities and educational organizations. Typically, information searchers use ERIC indexes in print or in online computer formats to find relevant documents. Documents may be copied at many locations from microfiche files or EDRS will duplicate the documents and mail them for a small fee.

This year OERI will hold a nationwide competition to find contractors to support an expanded ERIC system. The upcoming competition will reflect the results of a year-long study and public discussion (over 125 persons submitted comments and recommendations to OERI on its proposed redesign for the ERIC system).

The "new" ERIC will include ACCESS ERIC, adjunct clearinghouses, and ERIC partners, as well as the network of 16 clearinghouses and direct support activities such as the ERIC Processing and Reference Facility.

ACCESS ERIC: Designed to make ERIC more accessible to educators and policymakers who do not now use the system, this addition to ERIC will conduct efforts throughout ERIC to increase awareness and use of ERIC information. ACCESS ERIC activities may include dissemination, training of searchers and the development of synthesis documents on education topics of current interest.

Page 2

Adjunct Clearinghouses: These new "clearinghouses" will acquire documents and journal articles for the ERIC database in areas not adequately covered by the current network of clearinghouses and will disseminate this information in various formats. In fiscal year 1988, OERI plans to provide seed money to establish three or more adjunct clearinghouses in areas such as education policy, art and music, private education, secondary education, education reform, education in the humanities, students at risk and education professionalism.

ERIC Partners: These will be organizations or institutions with particular interests either in the ERIC system or in specific disciplines included in the ERIC system. ERIC partners will actively disseminate ERIC-developed materials to their constituents or members and will help identify documents or materials to be considered for the ERIC database.

ERIC partners will not receive direct Federal funding, although they may receive training to effectively use the ERIC system.

16 Clearinghouses: The names of the clearinghouses will remain as in the current configuration (listed below). The system of 16 clearinghouses will have the same functions and scope of work as before. Clearinghouse products and services will reach a wider, more diverse audience.

ERIC CLEARINGHOUSES

ERIC Clearinghouse on Adult, Career, and Vocational Education
ERIC Clearinghouse on Counseling and Personnel
ERIC Clearinghouse on Educational Management
ERIC Clearinghouse on Elementary and Early Childhood Education
ERIC Clearinghouse on Handicapped and Gifted Children
ERIC Clearinghouse on Higher Education
ERIC Clearinghouse on Information Resources
ERIC Clearinghouse for Junior Colleges
ERIC Clearinghouse on Languages and Linguistics
ERIC Clearinghouse on Reading and Communications Skills
ERIC Clearinghouse on Rural Education and Small Schools
ERIC Clearinghouse for Science, Mathematics and Environmental
Education
ERIC Clearinghouse for Social Studies/Social Science Education
ERIC Clearinghouse on Teacher Education
ERIC Clearinghouse on Tests, Measurement, and Evaluation
ERIC Clearinghouse on Urban Education

The ERIC Processing and Reference Facility: The Facility coordinates the technical aspects of ERIC, processes documents for entry in the ERIC database, and maintains quality control standards for the ERIC system.

4010

Page 3

The Education Statistics Reference Center: The Reference Center, to be housed in OERI, will identify important education-related datatapes and databases and will provide referral services for clients seeking access to education data. Information about datatapes that meet technical standards developed by the Center for Education Statistics will be entered into the ERIC system by the clearinghouses and the Processing and Reference Facility.

COMPETITION SCHEDULE

Competitions for the new components of ERIC and the clearinghouses will begin in the summer of 1987. OERI anticipates awarding new five-year contracts for ERIC clearinghouses by January 1, 1988. Awards for ACCESS ERIC, adjunct clearinghouses and the ERIC Facility will follow.

Leadership for Educational Administrators Development (LEAD) -- List of Awardees

SUMMARY

The 1987 National Technical Meeting was designed to encourage as much interaction as possible, with three main objectives: information sharing, skill development, and organizational bonding. An underlying theme was ERIC's place within OERI and the Department of Education's information community.

The 2 1/2 day meeting incorporated several new features: general sessions with small working groups rather than concurrent sessions; an exhibit hall; professional development sessions on workshops and image, including one evening session; an acquisitions handbook prepared prior to but for the meeting; ad hoc small group meetings; a 20th anniversary memorabilia display; a tour of the new ERIC Facility offices and optional tour of EDRS; a demonstration of ERIC on DIALOG, OCLC, and SilverPlatter CD-ROM; and a systemwide talent show, to which ex-ERIC staffers were invited. From the Steering Committee's perspective, the most important innovation was a half-day joint session with the Council of ERIC Directors. Overall evaluations were generally positive.

Session-by-session summaries and recommendations follow, accompanied by handouts, a list of participants, and the evaluation comments.

ERIC NATIONAL TECHNICAL MEETING
Session-by-session Summaries

A. Keynote Address: "ERIC as a National Resource" (Sharon Horn, OERI)

Issues related to the ERIC redesign were outlined, including new ERIC audiences, revenue generation, cutting edge technology, Clearinghouse visibility, and the roles of ACCESS ERIC, adjunct clearinghouses, and ERIC partners. Plans were announced for a network and national meeting of NDN, labs, centers, and ERIC Clearinghouses are being written into the RFPs.

B. What Goes In Comes Out Somehow: The Processing/User Services Connection (Anita Colby/JC and Margaret Mann/SP)

The first part of the session was a panel made up of two document processing and 2 user services Clearinghouse staff people. Norma Howard (PS) represented the experienced user services coordinators; Joan Dirksen (SP), the experienced document processors. Bill Code (FL) represented the inexperienced user services coordinators; Wendy Schwartz (UD), new document processors. Each panelists spoke about his or her role in education, both in the Clearinghouse and in ERIC as a whole.

The second half of the session was an indexing exercise in which the participants read an ERIC Digest and indexed it in small groups. A lively discussion followed when there was some disagreement about indexing. In general, the session highlighted the relationship of ERIC indexing and searching procedures and was found to be very useful.

C. Panel: News from Outside

This informational session included briefings on non-ERIC activities in the areas of database building, online searching, and thesaurus construction.

Laeland Szklennik of InfoMedia reported his development of a database of audiovisual materials, based originally on Department of Defense films and tapes.

Erica Lodish, online librarian at Montgomery Blair High School in Silver Spring, Maryland, reported on the use of online databases by high school students, end-user search training, and the use of ERIC by high school teachers through their professional library.

Anita Colby reported on the development of the thesaurus for Sociological Abstracts, based largely on the structure of the ERIC thesaurus.

4033

National Tech Meeting - 2

D. Luncheon Speaker (Anne Caputo, DIALOG Information Services)

ERIC was compared very favorably with other online databases, and highly praised for its quality in terms of content and data input. The DIALOG Classroom Instruction Project was described, in which school and college faculty can apply to learn online searching at reduced rates in exchange for teaching their students and colleagues. ERIC usage in CIP is extremely high, and the January-April 1987 figures on ERIC usage are 35% higher than figures for the same period in 1986.

DIALOG's proposal to OERI was announced in which, for a set price to OERI (based on 1985 usage figures--a period in which only half of the Clearinghouses searched ERIC via DIALOG), all ERIC components would receive the following: unlimited free search time, including telecommunications charges; unlimited use of DIALMAIL, the electronic mail system with the capacity for such things as co-authored manuscripts; DIALOGLINK software; training sessions; and CD-ROM subscriptions. There was an enthusiastic response from the Clearinghouse personnel, followed by an announcement from Central ERIC that the proposal was being considered within OERI.

E. News from Inside

1. EDRS -- Vic Fortin and David Jahnes reported on new marketing efforts at EDRS, including new acceptance of phone orders on the 800 telephone number and acceptance of VISA and MasterCard charges. They brought samples of hard to microfiche documents (originals, fiche copies, and blow backs), and set up a microfiche reader for hands-on use.

2. CD-ROM -- Pam McLaughlin (IR) demonstrated ERIC on the SilverPlatter, OCLC, and DIALOG versions of CD-ROM, and passed out a new IR ERIC Digest, "New Access Points to ERIC - CD-ROM Versions." See attachment 1.

3. ERIC Digests Online -- Mima Spencer (PS) reported on the status of the EDO file as it enters the third continuation year. An ERIC Ready Reference is being developed, and the project is looking into acquiring digests from non-ERIC sources. See attachment 2 for an abbreviated version of the substantial handout.

4. Statistical Data Files -- Charlie Missar, (Facility, for Ted Brandhorst) described the current documentation on and sources for machine readable data files (numeric databases). Examples of input to this "statistical database" include Center for Education Statistics (CES) publications describing computer tapes in an "ERIC-like manner." Preliminary cataloging, abstracting, and indexing of 35 data files has been completed using modified ERIC processing guidelines. Although the project is dependent upon CES, publication of a catalog of data files is anticipated within about 1 year.

National Tech Meeting -3

5. ERIC Technical Steering Committee -- Lynn Barnett (HE) reported on the purpose and composition of the Steering Committee and briefed the group on the status of the JC special project, "Search Saves and Sample Search Strategies: A File for Online Users" (the "search strategy file project), which will be distributed to Clearinghouses shortly. A reminder was given to the group to keep in mind technical issues that may have policy implications to be brought to the attention of the directors at the COED joint session.

F. ERIC as a Reference Desk (Amelita Hill/RC)

Types of typical reference questions at Clearinghouses were discussed, including when it is inappropriate for ERIC staff to answer questions (e.g., we are not funded to do research for people). Suggestions were made for developing a checklist letter that could be used in conjunction with a referral organization list. The PS "Descriptor Memo" technique was mentioned as a way to help users do their own searches, as was the HF matrix (developed in October 1984 and not up-to-date now) on education-related databases.

G. Image, Status, and Credibility (Betsy Ashburn, OERI)

The former director of SP started this evening session by having the audience give feedback on her appearance (she was wearing jeans and a sweatshirt). Those who knew her reacted differently and more positively than those who had never met her before. Image was then defined: appearance to others, impression, effect you create, how others peg you, representation, perceived message, and how you feel about your presence in context. After a tour of the ERIC Clearinghouse exhibits in another room, the audience was then led through an analysis of what concrete things make up the image of the conference displays. The characteristics identified were: visually consistent, color, light, photos of people, simplicity and lack of clutter, easy to read across the room, contrast, crispness, good quality printing and graphics, and large size. The messages conveyed by these concrete items were summarized as professionalism, accessibility, being on top of the subject, knowledgeability, seduction (i.e., making you want to learn more). There was some suspicion that you can tell a book by its cover. The session ended with the audience answering three questions about a product from their own Clearinghouses: (1) Is your product memorable? Why or why not? (2) What messages does it send? (3) What would you change?

H. Workshop on Workshops (Marilyn Shorr/HE and Margaret Mann/SF)

See Attachments 3 and 4.

4035

National Tech Meeting - 4

I. The Big Picture: ERIC's Internal Highway (Dorcas Rohn/CS,
Jane Henson/SO, and Nellie Quezada-Aragon/RC)

Current Clearinghouse processing were reviewed. A summary report will be distributed to all Clearinghouses.

J. Technical Policy Issues (Lynn Barnett/HE)

Various technical issues that have systemwide or policy implications were identified by the group. They included: funding effects on staffing, especially in user services; the need for training at all levels--initial and continuing education; the impact of technical assistance by Clearinghouse staff to ACCESS ERIC, adjunct clearinghouses, and ERIC partners; problems associated with CIJE editing separate from RIE editing; exhibit and product development in terms of image ("memorable messages"); knowing where to draw the line in question answering in terms of both staff time and online costs; possible privatization of RIF; desirability of getting complimentary copies of CIJE cumulatives from Oryx; and general technical impact of the redesign.

K. Painless Acquisitions: Possibilities (Joanna Eustace/Facility)

This session included full group discussion and concluded with distribution of the Forms for ERIC Acquisitions notebook, which includes a compilation of sample Clearinghouse letters and forms for various acquisitions, to each Clearinghouse. See Attachment 5 for summary report.

L. Ad Hoc Group Meetings

The following topics were addressed in small groups for which participants signed up: (1) RIE editing (Carolyn Weller and Facility editors); (2) Acquisitions (Joanna Eustace/Facility); (3) Workshops (Margaret Mann/SP); (4) User services (Judy Wagner/CE); (5) Vocabulary development (Jim Houston/Facility); (6) Adjunct clearinghouses (Sue Klein/CERIC).

M. Joint Meeting with COED (Lynn Barnett/HE, Don Ely/IR)

After welcoming remarks, the following people made presentations: Pat Coulter (CERIC), Sharon Horn (OERI), and Edwin Darrell (OERI). Lynn Barnett presented the policy-related technical issues that were identified earlier in the tech meeting. Brief reports were given by the COED Executive Committee, Mima Spencer (PS) on behalf of ERIC Digests Online, and Michael Eisenberg (IR) on the impact of new technology on ERIC. Adjunct clearinghouses and lab/center cooperation were addressed by OERI personnel. Status reports were given by the ERIC Facility (Ted

National Tech Meeting - 5

Brandhorst), EDRS (Vic Fortin, Jose Retterer) and Oryx Press (Phyllis Steckler).

It was generally felt that there was not sufficient time allotted to thorough discussion of many important topics. In spite of that, most participants seemed to think it was an important first joint meeting and one that could be built upon in the future.

N. Group luncheon (Lee Burchinal, speaker)

4037

National Tech Meeting - 6

RECOMMENDATIONS

Based on overall evaluation of the 1987 National Technical Meeting, the following recommendations are offered for the 1988 meeting:

1. Plan the agenda and timing of the joint session more carefully to allow time for real interaction between the technical personnel and directors.
2. Incorporate "warm-up" techniques to get members of the group comfortable with each other from the beginning.
3. Be sure that all participants, including Central ERIC and other OERI staff, are individually introduced, and that all non-Clearinghouse personnel especially have name tags.
4. Allow for leisure time.
5. Start the meeting with Clearinghouse personnel only, saving system announcements and presentations from OERI, etc. for a second or third day.
6. Make clear the need for and identify session recorders at the outset. Collect those minutes at the end of each day.
7. Incorporate a professional development session into the agenda, perhaps at the beginning. Examples could be time management, public relations, graphic design, press release writing, etc.
8. Insist that all information presentations be accompanied by written handouts, and keep the presentations to 5-10 minutes.
9. Require that everyone pay for group meals prior to the meeting in order to have accurate meal counts and avoid paying for meals not eaten.
10. Plan a systemwide social event such as another talent show at a time when everyone would be there and would plan to participate.
11. Include more hands-on activities.

Educational Resources Information Center

Ted Brandhorst

ERIC Processing and Reference Facility,
4833 Rugby Ave., Suite 301, Bethesda, MD 20814
301-656-9723

In November 1985, the National Institute of Education (NIE), the parent agency of the Educational Resources Information Center (ERIC), changed its name to the Office of Educational Research and Improvement (OERI). The new organization remains a unit of the U.S. Department of Education.

The year 1986 marked the twentieth anniversary of the ERIC system. The first issue of *Resources in Education (RIE)*—then *Research in Education*—was published in November 1966. Since that time, ERIC has cataloged, indexed, and abstracted/annotated 606,402 bibliographic entities (265,600 documents and 340,802 journal articles), has produced more than 4,500 information analysis products synthesizing this vast literature, and has distributed more than 250 million microfiche around the world containing the full text of the documents processed. Access to the ERIC database is provided online by all of the major online vendors, and ERIC has remained for several years the fourth most searched database in the United States and the most searched database in the area of the social sciences/humanities. ERIC has a well-earned reputation as the U.S. national bibliographic database for the field of education. In 1986, *Resources in Education* announced 12,474 document accessions; *Current Index to Journals in Education (CIJE)* announced 17,776 journal article accessions.

New Products/Publications

Directory of ERIC Information Service Providers

The *Directory of ERIC Information Service Providers* was issued in June 1986. It is a comprehensive list of 891 organizations (780 in the United States, 111 in 22 other countries) that offer some level of ERIC service. Each entry states (among other things) whether the organization subscribes to the ERIC abstract journals and the ERIC microfiche, collects ERIC Clearinghouse information analysis products, does computer searches of the ERIC database, or provides users with access to the *Thesaurus of ERIC Descriptors*. Full address, contact point, and telephone information is provided. The *Directory* is free.

ERIC Thesaurus

The eleventh edition of the *ERIC Thesaurus*, published by Oryx Press in November 1986, contains 9,459 index terms (of which 5,296 are main entry descriptors and 4,163 are synonyms or other unused terms). New to this edition are 224 descriptors, 190 synonyms, and several hundred scope note and cross-reference modifications. It is available from Oryx Press for \$65.

ERIC Digests

ERIC Digests are short (1-2-page) write-ups on topics of high interest to practitioner-level educators. They are designed specifically to provide the busy teacher, administra-

tor, counselor, or other practitioner with synthesized information of direct and immediate relevance, together with pointers to other sources for more details. Since 1985, the ERIC Clearinghouses have made the production of ERIC Digests a priority activity. An "ERIC Digests Online" (EDO) full-text file is already up on ED-Line via The Source and may be mounted elsewhere during 1987.

ERIC on Compact Laser Disc (CD-ROM)

In August 1986, ORI and SilverPlatter, working in partnership, shipped the first ERIC CD-ROM product. A disc containing both *RIE* and *CIJE* data from January 1983 to the present was sent to a group of charter subscribers. The disc is updated quarterly. The retrieval software is provided on an accompanying floppy disc. Subscribers only need an IBM-PC (or equivalent) with 512K of internal memory together with a CD-ROM data disc drive to operate the system. The backfile (1966-1982) is available on two discs for a one-time purchase price of \$2,000.

In November 1986, DIALOG also announced an ERIC CD-ROM product. It offers a current disc, containing data from 1981, to be updated quarterly on subscription for \$1,950. The backfile (1966-1980) and the current file are available together for a \$3,450 recurring annual license fee. The DIALOG CD-ROM attempts to emulate the DIALOG 2 capabilities insofar as is possible and requires an IBM-PC with at least a 10-megabyte hard disc and a CD-ROM data disc drive.

The CD-ROM systems provide users with the advantages of a fixed-cost self-contained system not dependent on connect time, telecommunications charges, and output volume.

Changes to Existing Products

RIE Subscription Price

Following price reevaluation by the Government Printing Office (GPO), *Resources in Education* benefited from a subscription rate reduction. Effective February 1985, the price was lowered from \$95 to \$56 per year, for 12 monthly issues, making it one of the information bargains of the year.

ERIC Microfiche Price

Effective October 20, 1986, the ERIC Document Reproduction Service (EDRS) was granted a modest price increase for ERIC microfiche. For microfiche provided by subscription, the increase was \$0.002 (two mils) per fiche (from \$0.078 per fiche to \$0.080 per fiche). For microfiche provided on-demand, the increase was \$0.03 per title from \$0.75 per title [up to five fiche] to \$0.78 per title). Even so, with the price reductions of the past few years, the cost of a year's subscription to ERIC microfiche is down to approximately \$1,300 per year (from a previous high of approximately \$2,000 per year).

ERIC Microfiche Film Base

Several years ago, the ERIC microfiche were changed from a diazo film base to a vesicular film base because vesicular offered a considerable price advantage. Now that diazo film has become cost competitive, and because of the various other advantages offered

by diazo film (for example, it is more durable and rugged, more easily reproduced fiche-to-fiche), EDRS changed back to diazo distribution fiche effective March 1986.

ERIC Clearinghouse Changes

The ERIC Clearinghouse for Social Studies/Social Science Education (SO), which was located at the Social Science Education Consortium in Boulder, Colorado, moved to the Social Science Development Center at Indiana University in Bloomington, Indiana. The new Clearinghouse began operations in January 1986.

Future Directions

Education Statistics

ERIC has conceived two projects to make education statistics more accessible to its users. One project involves creating a directory file that will list existing bodies of statistical data pertaining to education. Each entry will fully describe and index a data file and will inform the user as to the file's availability and any publications that summarize its content. The files of the Center for Education Statistics, CES (formerly the National Center for Education Statistics, NCES), will be the first files cataloged and indexed. This project is underway. The other project involves the actual mounting of selected statistical files online and providing users with direct access to them for searching, answering questions, and data manipulation to arrive at new graphs, tables, totals, and configurations of the data. This project is in the planning stage.

InterEd: An International ERIC-like File

During 1986, meetings and discussions were held among representatives of the *Australian Education Index (AEI)*, the *British Education Index (BEI)*, the *Canadian Education Index (CEI)*, and ERIC. The objective was to explore possible coordination of activities and collaborative projects that would eliminate or reduce any duplication or overlap among the four groups, that would lead to convergence of practice and authority lists, and that might result in an integrated "family" of databases covering the total English-language literature of education. (The group of representatives is tentatively called InterEd; the non-U.S. files as a group are called ERIC International.) These exploratory discussions were undertaken without any specific funding, but all participants are optimistic that some concrete progress toward the goals will be made in 1987.

ERIC Redesign Study Panel

In 1986, OERI formed an 18-person ERIC Redesign Study Panel to examine ways in which ERIC could be strengthened and improved. Two meetings were held and several discussion papers were issued. Although no final report was prepared, the minutes of the meetings contained several suggestions for improvement. For example, in the subject coverage area, better coverage of the arts and humanities and of secondary education was recommended. Additional efforts were recommended to train members of the educational community in the use of ERIC. Practitioners and their needs should continue

to be a high priority for ERIC, both in terms of the kinds of materials acquired and in the kinds of products offered. No specific recommendations were made by the panel for the restructuring of the ERIC Clearinghouse network.

On December 8, 1986, OERI, pursuing the redesign effort, issued a document entitled "ERIC in its Third Decade," and public comment was solicited. This document is described as a "statement of principles," to be followed later by an "implementation" paper. OERI found ERIC's major shortcomings to be (1) lack of an institutional policy to guide the system, (2) failure to reach all potential ERIC users, (3) not stressing the practitioner strongly enough in acquisitions and dissemination efforts, (4) little systematic attention to marketing and dissemination efforts, and (5) inadequate integration with other information systems (including those within OERI).

Some of the new emphases planned by OERI for ERIC are (1) extending the user community, (2) stressing the dissemination and information marketing function, (3) linking ERIC with OERI's regional laboratories and research centers, (4) using National Diffusion Network (NDN) state facilitators as "ERIC agents," (5) forming "adjunct" ERIC Clearinghouses that will contribute to the ERIC system but on a voluntary nongovernment-funding basis, (6) offering toll-free telephone numbers in each ERIC Clearinghouse, (7) using the latest technology, (8) engaging in international cooperation with counterpart organizations abroad, (9) stressing cost sharing in contract solicitations, (10) giving a balanced treatment to the various kinds of educational literature, and (11) supporting the OERI priority on education statistics.

Regarding the structure of ERIC Clearinghouses, where major changes have been rumored, OERI's paper states: "Changes in American education dictate some new combinations of 'hybrid' configurations. We plan to organize the domains of future ERIC Clearinghouses around major functional categories of American education that are now and will be salient during the next decade."

Annual RIE

EDRS offers annual cumulations of RIE on microfiche for each year 1966 through the last full year. Produced via computer-output-microfilm techniques from the ERIC tapes, this product includes: resumes, subject index, author index, and institution index.

YEAR	PRICE	YEAR	PRICE
1966	\$1.00	1976	\$7.00
1967	1.50	1977	6.25
1968	4.00	1978	6.75
1969	4.25	1979	7.25
1970	4.25	1980	6.75
1971	5.00	1981	6.50
1972	5.00	1982	8.00
1973	5.75	1983	8.00
1974	6.00	1984	8.00
1975	6.25	1985	9.00
		1986	9.00

Also Available on Microfiche the Monthly RIE

The current issue of Resources In Education on microfiche is now included in the monthly shipment to standing order customers. These provide immediate access to the new fiche without waiting for the paper copy of RIE to arrive.

Additional sets of the monthly RIE on microfiche may be purchased for placement in different locations to aid users in using the ERIC database. Available at \$2.00 per monthly set.

EDUCATION

Current Special Products Available on Microfiche

(All indexes are cumulative from the beginning of ERIC (1966) through the last full year and cover Resources in Education (RIE) only.)

RIE Title Index (Cumulative).

The RIE Cumulative Title Index is an alphabetical listing of all ERIC document titles. Each entry includes title, level of availability, publication date, ED number, number of pages, number of microfiche.

RIE Author Index (Cumulative).

The RIE Cumulative Author Index provides access by author name. Each entry includes author, title, level of availability, ED number, number of pages, number of microfiche.

RIE Subject Index (Cumulative).

The RIE Subject Index lists the titles of documents under the major subject terms that have been assigned to characterize their contents. The subjects conform to those in the Thesaurus of ERIC Descriptors and the Identifier Authority List.

RIE Institution Index (Cumulative).

The RIE Institution Index lists the titles of the ERIC documents under the name of the institution responsible for their development or sponsorship.

RIE Descriptor Usage Report (Cumulative).

The RIE Descriptor Usage Report is a cumulative index of both the major and minor Descriptors (index terms from the Thesaurus) used in RIE.

Each term is followed by ED accession number to which it applies. Major usages are indicated by an asterisk.

RIE Identifier Usage Report (Cumulative).

The RIE Identifier Usage Report is a cumulative index of both the major and minor Identifiers (additional indexing terms) used in RIE.

Each term is followed by the ED accession number to which it applies. Major usages are indicated by an asterisk.

Clearinghouse

The Document Delivery Specialists

U·M·I

4047

Make the connection to over 10,000 periodicals.

- Computer Science
- Current Events
- Earth Sciences
- Economics
- Education
- Engineering
- International Affairs
- Law
- Life Sciences
- Mathematics
- Medicine & Nursing
- Physics
- Psychology
- Social Sciences

We also offer most of the titles indexed in such major databases and indexes as:

- ABI/INFORM
- Abridged Index Medicus
- Applied Science and Technology Index
- Biological and Agricultural Index
- Current Index to Journals in Education
- Readers' Guide to Periodical Literature

—and an ever-increasing number of titles from BIOSIS, the Cumulative Index to Nursing and Allied Health Literature, INSPEC, Sociological Abstracts, and WESTLAW, among others.

UMI's unparalleled archival microfilm collection allows us to offer retrospective coverage of many of our titles: some journals are available from the very first issue.

If this sounds comprehensive to you, you're right: in fact, the Clearinghouse has the broadest copyright-cleared coverage of any commercial document delivery service

Access

Now you know that we can supply the titles you need. But what about ordering methods? Are they convenient, easy to use? Is the range of options broad enough to suit your needs? Are they cost-effective, timely?

At the Clearinghouse, expanding your access is one of our primary concerns. That's why we've been increasing our ordering options as rapidly as we have our title coverage. There are no less than 15 different options available; one is right for you.

UMInet is our own menu-driven, user-friendly electronic messaging system. UMInet allows you to place orders and send as well as receive messages. Order transmission—as

Since 1983, the UMI Article Clearinghouse has provided fast, convenient document delivery services to librarians and other professionals. With a steadily growing list of over 10,000 copyright-cleared titles, and 15 easy ways to order, it's no wonder information professionals now think of us first when purchasing article photocopies. We can help you with your document delivery needs, too: read on and see how.

Coverage

There are more than 10,000 titles in our catalog, comprising scholarly and technical journals, popular magazines, conference proceedings and transactions, newspapers, and government documents. And UMI's licensing agreements with more than 4,000 publishers guarantee copyright clearance.

Subject areas are as diverse as the information needs of our customers, and include:

- Arts & Humanities
- Business & Management
- Chemistry
- Communications

with all our electronic options—is virtually instantaneous.

Many ordering systems combine the searching function, too, affording the user maximum convenience. Clearinghouse holdings can be searched and ordered over:

- ALANET
- BRS
- Dialcom
- OCLC ILL Subsystem
- Utlas

We also offer these methods of order placement:

- DIALOG Dialorder
- EasyNet
- IEEE FINDING YOUR WAY
- INTERACT
- OnTyme
- Pro-Cite and Pro-Search
- Telex/TWX
- Facsimile
- Mail

Phone ordering is a plus that many of our customers have requested. So we developed **Articall**, a convenient and quick alternative to our standard methods. Your call to our toll-free number puts you in touch with Clearinghouse professionals who will take your order while you wait at no additional charge!

Price & Delivery

Our price range for articles is \$5.50-7.50 for deposit-account customers. There is *never* a per-page charge for the purchase of journal articles; 10 pages or 100, you pay the same

base rate. Discounts are available to high-volume users.

Prepayment by check, money order, or credit card (American Express, MasterCard, or VISA) is also available at \$9.50 per article. (Organizations may also choose to be invoiced.)

Your account representative will help you work out an account plan tailored to your specific needs and projected usage.

Every article published within the last five years is covered by a no-charge turnaround guarantee. We process and ship these orders by 1st class mail within 48 hours, or you don't pay. (Note: this guarantee does not apply to pre-1983 material, which is shipped within four days.)

Rush Delivery Services

Artifax is an innovative delivery option which takes advantage of digital telefacsimile technology. When requested, articles will be transmitted to you via Group III digital fax, the same day if ordered before 1:30 p.m. EST, or overnight. (Order placement may be via any available method.)

Our standard Rush-Overnight option via overnight carrier is also available upon request.

We also offer rush processing combined with 1st class mail, which gets your articles processed and shipped within 24 hours. Additional charges are levied for all levels of expedited service, and all options carry the same turnaround guarantee.

We'd like to tell you more about our service and answer any questions you may have. Simply send in the postage-paid reply card at the right. Or, if you prefer, call us at one of the following numbers; we'll be happy to describe our service in more detail.

Call toll-free **800/732-0616**.

In Alaska and Michigan, call collect **313/761-4700**. From Canada, call toll-free **800/343-5299**.

SilverPlatter
INFORMATION SERVICES

NEWS RELEASE

JULY 10, 1987

SILVERPLATTER® OPENS WINDOWS ON HELP FOR USERS

SilverPlatter Information, Inc., a pioneer of CD-ROM database technology, is continuing to enhance its search and retrieval software by providing more sophisticated on-line help for the experienced as well as inexperienced user. The new help software promises to be a major improvement in accessing SilverPlatter's on-line help not only for first-time users, but for users who need a quick reminder of the mechanics of searching, who want a list of fields particular to the database in use, an explanation of terminology used, and much more.

A single keystroke displays the help menu - a list of all topics on which help is available. A user simply tabs to the topic of choice, and presses the RETURN key to activate a window. This window can contain subtopics or actual help text. If the window contains subtopics, the user again uses the TAB key to select a more specific topic, and RETURN to activate a window of information. If a SilverPlatter command function is in use at the time the help menu is accessed, the system displays the help menu and automatically opens the window for the function in use. If the user wants to access help on another topic, the backspace key is used to back up to the help menu so another topic can be selected. The user can also choose to have context sensitive help messages display in response to system messages. These messages provide supplemental information, explaining the reason for the message, and appropriate action to take, if any.

After undergoing field testing, the new help software will be released to all existing customers, and will be included with all new subscription orders for CD-ROM databases provided by SilverPlatter: ERIC, OSH-ROM, Ca-CD, AGRICOLA, CIRR, LISA, sociofile, A-V ONLINE, CHEM-BANK, PsycLIT, COMPU-INFO, NTIS, and MEDLINE.

ERIC Educational Resources Information Center

by Margaret Morabito

ERIC and software require an IBM PC or compatible with 512K of memory and PCMS DOS 2.1 or higher, and a Philips, Hitachi or Sony CD-ROM drive. For more information on ERIC and other products mentioned in this feature, write: SilverPlatter Information Inc., 37 Walnut St., Wellesley, Hills, MA 02181, (617) 239-0306. Circle 73 on Reader Service Card

HAVE YOU EVER WONDERED what it would be like to have everything given to you on a silver platter? The kind of platter I'm talking about, though, is not sterling silver; it is CD-ROM disc silver, produced by SilverPlatter Information Services.

The firm produces an entire line of information databases on CD-ROM. One is ERIC, the definitive source of educational materials in print, collected by the Educational Resources Information Center of the National Institute of Education (US Dept. of Education).

ERIC includes references to materials from more than 700 periodicals, plus references to thousands of published and unpublished lesson plans, course descriptions, research reports, surveys, and curriculum and teaching guides. Each record citation in ERIC contains a descriptive abstract, plus up to 29 other data fields. Any or all of these fields can be printed for each record.

Figure 1 is a printout of two citations from a SilverPlatter ERIC search for sources about dyslexia and learning disabilities. I found 121 citations during the search. The printouts show the default field selections built into the SilverPlatter retrieval software.

What You Need

SilverPlatter provides a current disc of ERIC citations from 1983 to the present, as well as two archival discs covering 1966 to 1982. I reviewed the current disc, using a Philips CD-ROM drive and a Wyse PC-compatible with 640K of memory. The system included a monochrome monitor, two floppy diskette drives, and an Epson MX-80 dot-matrix printer.

The retrieval software supports Philips, Hi-

tachi, or Sony CD-ROM drives. You can use any IBM PC or true compatible having 512K of memory and PCMS DOS version 2.1 or higher. The software allows for a wide variety of computer configurations, including a single floppy or a hard drive setup. You can also use it with color and graphics monitors.

Retrieval Software

SilverPlatter's retrieval software works the same way with all of its CD-ROM databases. Extensive help screens make it easy for new users to learn the search procedure, and help on any command can be obtained at any time by pressing a function key.

Twelve built-in commands control ERIC. Ten are accessed through the function keys, while the other two are activated by pressing an escape key combination. Using two simple commands, "find" and "show", the software lets you search for any word or phrase in the entire database, and then shows the records in which the search word or phrase was found.

Search Ranges

To start a search, simply type in the general topic or the author's name. This will usually result in a very large number of citations, too large to be useful.

For a more productive search, use the variety of options provided in the software. These will let you use certain operators should you wish to limit or broaden the search.

To narrow a search, you can use five connectors, or "operators": and, not, with, near, in. "And" will find records containing two or more search terms, "not" excludes any records containing a particular term, and "with" will find terms that appear in the same field. By

using the operator "near," you can specify exactly how close together you want the search terms to be. Use the operator "in" for a term within a specified field.

For further limiting, you can use indexed "limit fields." Each record in ERIC is classified in up to 29 limit fields, including ERIC accession number, clearinghouse, title, sponsoring institution, publication year, journal citation, abstract, price code for ordering copies, target audience, descriptors and identifiers.

You can also limit a search by using such numeric operators as less than, greater than, less than or equal to, greater than or equal to, and the hyphen (to establish a range of dates).

To broaden a search, use the connector "or" to combine search requests. "Or" will retrieve all documents that include either of two search terms.

The software also lets you use root words with an asterisk to search for all words beginning with the same group of letters. This feature can be used to begin a search or for broadening a search already underway.

ERIC has a comprehensive online index. It is always available and lists related terms and synonyms for use with search requests.

Show and Print

After completing a search for citations, you will want to view them on screen or print them out. The command "show" will display all the records with their fields. If you wish, you can specify only certain fields for display. From the view mode, I found it easy to move back to the search mode, or move into the other help and information modes.

All records found during a search are displayed in sequence. You can move ahead or

back with a single keypress, and get a printout of any or all records.

A default setting for printouts gives the major citation fields, which include the accession number, author, title, publication year, descriptive note, and price code for ordering copies of the document. You can change the default and get a printout of any or all fields cited in the particular record.

SilverPlatter includes an extensive online handbook, which provides information about ERIC and how best to utilize it. The guide shows how to order documents, and includes information about field names and abbreviations. Combined with the help screens, the handbook makes it easy to learn how to search the database.

Once you become familiar with the function key tasks, searching is easy. Learning is minimal. This is just what is needed in a busy library setting where many people will be accessing the database during the course of a day.

As for speed, searches of single terms are finished in a flash. You will notice a wait, though, even if only a matter of seconds, when you enter multiterm and operational searches. The software, however, keeps you apprised of the status of these more complex searches, displaying the percentage of search time completed.

Documentation

If the onscreen help is not enough, SilverPlatter includes a variety of printed materials to get you started. First, a starter manual holds a tutorial that brings you through the basics of an ERIC search procedure. It provides several sample searches.

In addition to the tutorial, the manual holds details about the "show" and "print" commands, a command summary, a reference guide, plus information about setting up your workstation and the special functions of the keyboard when using the retrieval software.

Continued on Page 60

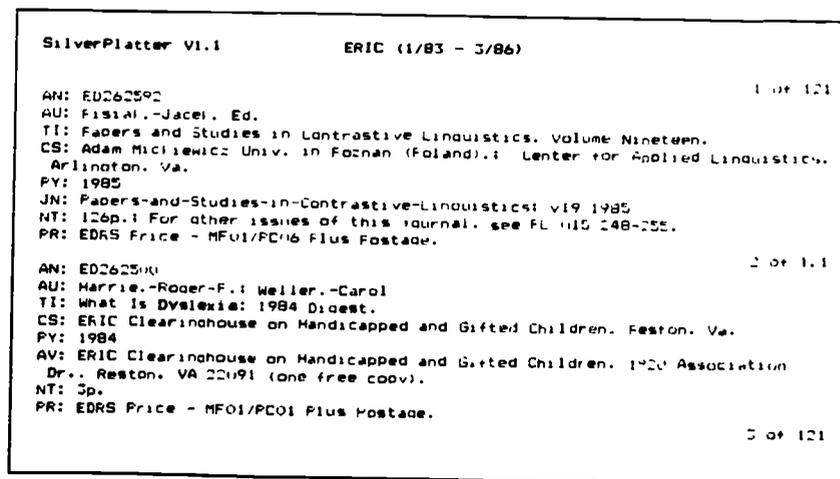

Figure 1. Printout of two citations from a search for sources about dyslexia and learning disabilities.

Continued from Page 59

An installation guide is provided to help set up your system. This 22-page manual is a step-by-step guide to creating the system diskette from the SilverPlatter setup diskette. The procedure involves copying DOS files and several SilverPlatter setup files to a work diskette. For the most part, the procedure is automatic; you need only answer a few questions about your computer system and insert your DOS diskette at the appropriate time.

The installation guide shows how to set up the diskette for particular printers. It explains how to set the DIP switches on your printer, if necessary. (I did not have to make any changes to use an Epson MX-80 printer.)

The guide also goes through a testing procedure to ensure that the software and printer work properly. A troubleshooting section will help detect the cause of problems. There is also a toll-free SilverPlatter Customer Support Hotline telephone number.

In addition, if you change computer setups, a reconfiguration procedure is included within the guide that will ease the changeover.

SilverPlatter has done a good job with its documentation. It is not too cumbersome and complicated, but rather is just long enough to be useful and makes it easy to find important information.

Subscription and Costs

SilverPlatter offers ERIC information dating back to 1966. You can purchase a subscription to the current disc, which contains RIE (Resources In Education) and CIJE (Current Index to Journals in Education) from 1983 to the present. This subscription, with quarterly updates, costs \$650 per year.

TOOLS FOR THE REFERENCE DESK

SILVERPLATTER INFORMATION SERVICES, WITH OFFICES IN ENGLAND and the US, has been in the CD-ROM business for three years. "The company's focus," says US Sales Manager Christopher Pooley, "is to build database products on CD-ROM for the library reference desk."

SilverPlatter publishes a variety of CD-ROM databases for libraries. While the current focus is on academic libraries, SilverPlatter's database products are also going into specialized and corporate libraries. The company markets its products through direct mail and by personal contact with librarians at trade shows and conferences.

Currently well-positioned in the social sciences and humanities, SilverPlatter publishes several CD-ROM databases in addition to ERIC. Its PsychLit database holds references on psychology and the behavioral sciences from the PsychoInfo department of the American Psychological Association. The A-V Online database holds references to audiovisual materials from the National Information Center for Educational Media. PAIS (Public Affairs Information Service, Inc.) is a primary reference database for the public policy aspects of the social sciences, business, law and economics.

SilverPlatter also publishes OSH-ROM (Occupational Safety and Health) which contains three complete databases from NIOSH, HSELINE, and CISDOC. The Agricola database, compiled by the National Agriculture Library, holds citations of publications relating to all aspects of agriculture.

The Embase database, produced by Elsevier Science Publishers, holds summaries of the world's literature on biomedicine and related disciplines. Another product is Lisa, compiled by Library Association Publishing Ltd., which contains abstracts from the world's literature on library science, information science, and related disciplines.

New Products

A recent addition to SilverPlatter's product line is the Corporate and Industry Research Reports (CIRR) database, a cumulative index of more than 70,000 company and industry reports from 1979 to 1986 produced by 68 securities and investment banking firms. Another new product soon to be released is SocioFile. It holds the contents of the world's journals on sociology, as compiled by Sociological Abstracts.

The company continues to build its product line, with future expansion planned into the science and engineering areas. SilverPlatter plans to introduce the National Technical Information Service index and other technology products, and is also working on the National Library of Medicine's MedLine database, which will offer a family of medical products.

SilverPlatter, however, is not limiting its products to information databases. It produces MultiPlatter, a multiuser CD-ROM system for libraries offering CD-ROM databases to their patrons. This device addresses the control and operational needs of the library reference desk.

MultiPlatter resides behind the desk and holds clusters of four CD-ROM drives. The unit has four ports for connecting four personal computers (keyboards and monitors) up to 160 feet away. The unit also has additional ports for connecting a modem, making it possible for anyone with a PC to dial in from a remote work station and access the CD-ROM information at the library. MultiPlatter alleviates disc and software handling by library patrons.

Why CD-ROM?

Though SilverPlatter has always been in the CD-ROM business, the company decided early on there was a need for CD-ROM products in the library marketplace. The benefits of CD-ROM are significant to libraries that have had to rely upon printed indexes or online searching for bibliographic materials.

In the past, says Pooley, "the patrons of the library had been, in general, excluded from online searching unless they wanted to pay for it, and were forced to use just the printed subscription."

This situation was motivated by economic concerns. For a library to provide online search capabilities to its patrons, it had to incur varying expenses, including the training of everyone who needed to perform a search, and enough time for the patrons to search online.

As an example, the cost to access ERIC online runs about \$15-\$20 per hour, depending upon the service and time of day. To search that database for just one hour per week during a year will cost a library from \$800 to \$1,000. Yet, by using the CD-ROM version, a library could allow unlimited access to ERIC over the course of a year for \$1,200. This would allow for teaching time, and would encourage patrons to learn about the new technology while they benefited from its speed.

SilverPlatter is seeing an increase in orders for its CD-ROM products, and in response to this demand, is extending its line of products while simultaneously dropping prices. While the last few years have been spent educating the marketplace about CD-ROM technology and its applications, the future will be a time of proliferation of CD-ROM databases.

SilverPlatter plans on being in the forefront of this growth.

—Margaret Morabito

You can also purchase the ERIC archival set of two discs, from 1966 to 1982, for \$900. Each disc is self-contained and comes with its own index.

An ERIC Starter Kit costs \$1,200 and includes the current disc with quarterly updates plus the archival set. For subsequent yearly updates, you pay \$650 per year.

SilverPlatter provides much more than just the CD-ROM disc and retrieval software. Subscribers get all of the manuals and guides mentioned above, a four-page explanation of the company's customer support procedures (including the 800-number telephone hotline), plus keyboard help keys.

The company even sells or leases CD-ROM drives to subscribers. You can purchase a Philips drive from SilverPlatter for about \$800, and an Hitachi for about \$700. Both come with 90-day warranties. One-year warranties are also available at additional cost. A two-year lease with option to buy is \$500 per year. ●

Margaret Morabito writes extensively about computers and education. She is a regular contributor to publications such as RUN, Link-Up, inCider, and Online Today, and is the director of an online tutoring center on QuantumLink. She can be reached online through CompuServe (70616,704) and QuantumLink (MARG M).

INFORMATION FOR PROFESSIONAL EXCELLENCE

June 1987

UPDATE ON EDUCATIONAL REFORM

1983 to the Present

The educational reform movement didn't really begin with the publication of *A Nation at Risk* in 1983. Key features of the movement—greater accountability, tighter state control, and higher academic standards—can be traced well back into the 1970s.¹ But 1983 was The Year of the Reform Reports, when media attention focused on the schools and set in motion any number of task forces, state commissions, and legislative efforts.

This reform movement came on education from the outside, its leaders being mainly state governors and legislators, who received very strong federal encouragement, if little federal money. Like California with SB 813, every state in the union has, in the past four years, legislatively revised substantial aspects of its public education system. To cite only one area, 45 states and the District of Columbia have altered their high school graduation requirements since 1980, chiefly by raising the number of required courses. Forty-two states have changed mathematics requirements, 34 science requirements, 18 language arts, and 26 social studies.²

Improvement of the condition of teachers has been another major reform theme. Some 25-30 states have taken action on teacher career ladders and only one state has not increased salaries since 1983.³ In Tennessee, a leading state in the career ladder movement, more than two-thirds of the eligible teachers have opted for extended summer contracts—at state expense.⁴

Polls show that the public overwhelmingly supports higher salaries for teachers (also such improvements as limited class sizes and testing for certification) and academic rigor for students, in the form of high school graduation and junior high promotion tests. (Ninety-five percent of a survey sample agreed with the testing concept, which the author describes as "... a level of consensus normally reserved for issues of Motherhood and Apple Pie.")⁵

Current Status and Problems

Despite their support for academic rigor, the public does not want to sacrifice extracurricular activities or the multifaceted goals of secondary education.⁶ The "no pass/no play" standard for athletes (AB 2813 in California) has caused hard feelings in some communities and some Texas principals claim that it has increased the dropout rate and damaged student morale.⁷ Florida implemented what amounts to a seven-subject day and found that students were having difficulty scheduling advanced courses at community colleges or holding down part-time jobs.⁸

We have little data yet that directly links higher student achievement to the reform movement's drive for academic rigor, but we do know that California's CAP scores have improved in the past few years⁹ and that, according to the Department of Education, test scores are up in 35 states, graduation rates are up in 39, and SAT scores rose between 1982 and 1985.¹⁰

The pace of reform seems to be slowing, as implementation problems surface and funding again tightens. For example, some performance-based pay schemes for teachers are facing cutbacks or revisions. Teacher evaluation methods have generated the stickiest problems here, but the expense of a centralized, statewide program can be obstacle enough, particularly in states with troubled economies.¹¹ Recently, Secretary of Education William Bennett and other leaders have charged that educators are "backsliding" on reform with their demands for more money—to which educators have replied that insufficient funding is "the primary threat to the drive to improve education..."¹² The argument is unlikely to end soon.

The Next Agenda

Few would say that the first wave of reform is over, that we've absolutely achieved academic rigor in the high school, accountability, and the improvement of teaching. William Chance, author of a recent analysis of the reform movement, "... *the best of educations*" (published by the Education Commission of the States), suggests that so far we've concentrated on familiar symptoms, rather than on underlying causes.¹⁴ If we've, as yet, made only cheap and easy changes, coming reforms may be taxing indeed!

SMERC Alert is a review of the literature on a current educational topic. It is intended as an unbiased summary and does not necessarily reflect positions or opinions of the San Mateo County Office of Education or its staff.

San Mateo County Office of Education • Instructional Services Division
SMERC Information Center • 333 Main Street, Redwood City CA 94063 • (415) 363-5450

Authors such as Henry Levin¹⁵, William Chance¹⁶, and Chester E. Finn¹⁷ suggest that these areas will be washed by the second wave of educational reform:

- preschool/early education;
- equity, particularly service to "at risk" students and the school's role in solving expanding social problems, such as poverty;
- home-school liaison and parent choice;
- the effective schools agenda;
- curricular content: selection of the knowledge and values to be taught;
- teaching methods and classroom processes;
- assessment techniques;
- restructuring of the teaching profession, with particular attention to the Carnegie recommendations and the Holmes Group's alterations in preservice education; and
- leadership development for school administrators.

Much of the attention and activity of the 1983 reform movement focused on improving the schools as they are. But some voices of 1983, notably Ernest Boyer, John Goodlad, Theodore Sizer, and Mortimer Adler, called for schools of fundamentally new design. Such radical change is difficult, but progress is being made toward these visions; for example, the Coalition of Essential Schools is endeavoring to flesh out Theodore Sizer's blueprint for a new form of secondary education.¹⁸ John Goodlad is directing a network of school-university partnerships.¹⁹

Money and enthusiasm are the keys to continuing educational reform. This cheers some observers and depresses others. On the optimistic side, Pipher asserts that states are still "bullish" on education in 1987, that the new governors and legislators, now replacing the original reform leaders, are just as enthusiastic about education and family issues.²⁰ Educators, too, favor beneficial change, as shown by a 1985 PACE survey of California teachers, which concluded that teachers are "not wedded to the status quo" and that they endorse many of the reform proposals, including professional career ladders, a preservice test of basic skills, more decision making authority, and improved collegial relations.²¹

We seem to have somewhat less hoopla now than in 1983, but reform reports are still being written, for example the National Governors' Association's *Time for Results*.²² *A Nation at Risk* is to be updated next year. Perhaps in another four years we will be looking back again.

Hill Pressed To Ease Grip Over Printing

Agencies Challenging 92-Year 'Dictatorship'

By Bill McAllister
Washington Post Staff Writer

The Reagan administration is attempting to loosen Congress' historic grip over the government's printing business, currently running at a rate of more than \$600 million a year.

The action has infuriated members of the Joint Committee on Printing, which for 92 years virtually has dictated the rules on government printing, and troubled supporters of the Government Printing Office, which serves as the bureaucracy's central printing agency.

"We could be going back to the way things were 150 years ago," grouched David C. Sharman, staff director of the House Administration Committee. "Everybody will go back to their favorite printer, for political or whatever reasons, and the biggies will squeeze out the little printers."

Under rules set to take effect July 1, three major agencies—Defense, General Services Administration and National Aeronautics and Space Administration—propose to divorce themselves from longstanding printing regulations that have buttressed both the joint committee's and GPO's controls.

The proposed rules would let the individual agencies make many of the decisions the committee and GPO now make. If the three agencies are allowed to bypass the committee and GPO, the other agencies are likely to follow, congressional officials said yesterday.

The government's longstanding rules give the joint committee power to determine everything from

the type of printing paper the government buys to the wages of printers at the GPO, one of Washington's largest industries. Currently, all government printing requests must be channeled through the GPO, which can determine what printing can be contracted to private printers and which jobs can be handled by a government agency.

Members of the joint committee, in a bipartisan letter signed by eight, earlier this month demanded that the three agencies drop their plans for new printing rules. But the agencies notified the panel Wednesday that they were proceeding and questioned both the committee's and GPO's ability to stop them.

Administration officials contend that is not likely to be the case and note that the Office of Management and Budget, which has trimmed the government's overall printing bills sharply under Reagan, would continue to exercise control over what the government prints.

But the Defense Department has argued in the memo given to the joint committee that a 1983 Supreme Court ruling striking down legislative vetoes makes clear that Congress cannot use its legislative powers to control administrative functions such as printing.

Staff members at the joint committee and OMB Watch, a citizen's group that monitors OMB actions, agreed yesterday that the federal law empowering the committee needs revision in light of recent court rulings. That isn't cause, they said, however, to strike down an established system of controlling government printing.

"Without some kind of congressional oversight mechanism, OMB's supervision of executive branch information activities will lead to less information for Congress as well as the public," OMB Watch said.

In a memo this spring, the Congressional Research Service noted that Congress insisted on direct control over printing in 1846 because it believed that was the way to end scandals over printing contracts. Committee powers were broadened in 1895 and have gone without major challenge until the 1983 court ruling.

Mr. Ted Brandhorst
ERIC Processing & Reference Facility
ORI, Inc., Information Systems
4350 East-West Highway, Suite 1100
Bethesda, MD 20814-4475

Dear Ted:

It is with very mixed feelings that I am announcing my resignation as Director of the ERIC Clearinghouse on Adult, Career and Vocational Education effective July 31, 1987. ERIC has been important to me and I will miss the many friends I have throughout the system. However, I am excited about my new career direction. After considerable thought, I have decided to make a major career change. My plans include completing postdoctoral work in psychology and establishing a counseling and consultation practice in Columbus, Ohio.

Dr. Susan Imel will assume the position of Director of the Clearinghouse on August 1, 1987. As you know, she has been the Associate Director for the past six years. She holds a Ph.D. in adult education from the University of Michigan and is very active with various national adult education associations, particularly the American Association for Adult and Continuing Education. I know she will continue to make major contributions to the ERIC system in her new position.

I want to extend my best wishes to you for continued success of the ERIC system in the future.

Sincerely yours,

Juliet V. Miller
Director
ERIC Clearinghouse on Adult, Career
and Vocational Education

The ERIC Administrative Bulletin (EAB) is prepared by the ERIC Processing and Reference Facility on the basis of material submitted by all components of the ERIC system. EAB articles are reviewed and approved by Central ERIC before publication.

The EAB is intended to be the "journal" of the ERIC system and a major means for the decentralized components of ERIC to communicate and interact with one another. The EAB is also a permanent record reflecting most of the major events in the life of the ERIC system (such as personnel changes, Standing Order Customer changes, etc.) and providing in printed form essential documents (such as ERIC policy and priority statements, Clearinghouse scope statement modifications, ERIC Processing Manual revisions, etc.) Submissions to the EAB are to be sent (using the standard form) to your respective monitor. The deadline for input to each monthly issue is the 10th of the month.

4062

ACTION ITEMS

Listing Things in RIE Abstracts

Lately we are getting lists appearing in RIE abstracts in several different formats and with inconsistent punctuation. This can be confusing to the user/reader.

When listing a series of items in an RIE abstract, please follow the EPM guidelines (p. VI-16, repeated below). They call for an initial colon followed by numbered phrases separated by semicolons. The numbers indicating each item should be in parentheses (to distinguish them from any numbers that might appear in the text itself) and a period should end the entire list.

(7) Lists

When it is necessary to list a series of items in the abstract, use the following format:

"The following conclusions were drawn:
(1) xxxxx; (2) xxxxx; and (3) xxxxx."

Parallel phraseology or sentence structure is recommended to facilitate comprehension.

...Carolyn Weller (ERIC Facility)

FCC Proposes Rate Increase for Online Communications Networks

On July 17, 1987, the FCC proposed some rate increases for telec communications networks that would, in all likelihood, increase the online cost of access to ERIC by \$5-6 per connect hour. NFAIS has compiled a package of materials pertaining to this increase and this package is being obtained for the ERIC Clearinghouses. You are encouraged to read this material and make your views known to the FCC. The NFAIS analysis of the situation is attached (see Attachment 1).

...Don Ely (IR)

RIE Master Schedule (1987-1988)

While the RIE Master Schedule for 1987 was much earlier placed on the electronic mail, the Facility has been remiss in not distributing it in other forms.

Therefore, RIE Master Schedule for both 1987 and 1988, in simple tabular form, are attached (Attachments 2A and 2B). We hope they prove useful.

...Pat Brown (ERIC Facility)

NETWORK NEWS

Technical Steering Committee Adds Two New Members

CERIC recently approved two new members of the ERIC Technical Steering Committee.

Manuela (Nellie) Quezada-Aragon, ERIC Clearinghouse on Rural Education and Small Schools, has been invited to serve as the Western representative. Jane Henson, ERIC Clearinghouse for Social Studies/Social Science, has been invited to serve as the Midwestern representative. As of 9/11/87, the committee membership consists of:

<u>Region</u>	<u>Representative</u>	<u>Appointed</u>	<u>Expiration date</u>
Eastern	Margaret Mann	5/86	5/89
Facility	Jim Houston	5/86	open
Midwest	Jane Henson	5/87	5/91
West	Manuela Quezada-Aragon	9/87	5/89
	(Replaces Jim Palmer)		
Chair	Lynn Barnett	5/85	5/88

... Pat Coulter (CERIC)

"ERIC Starter Kit" Offered by EDRS

The EDRS Marketing Coordinator, Josh Retterer, has come up with an idea for an "ERIC Starter Kit." For \$389, EDRS will provide users with a microfiche reader and a full set of EDRS's cumulative microfiche resumes and indexes for RIE. Full details are described in the EDRS flyer reproduced as Attachment 3.

...Jim Prevel (CERIC)

ERIC "Trends and Issues in Education, 1986" Document Published

The long-awaited first system-wide "Trends and Issues" document (covering 1986) was published in early 1987. It has been processed for the October issue of RIE, as ED-281 897 (see Attachment 4 for resume).

Containing 16 chapters, each written by Clearinghouse management staff, and encompassing 319 pages, this document was an experiment in collaboration and took somewhat longer to produce than originally projected. Future system-wide projects should be able to build on this experience.

...Kevin Arundel (CERIC)

Age Group Searching in ERIC

Virginia Seiser of the University of New Mexico has written an article entitled "ERIC Through the Ages: Searching for Information about Specific Age Groups in the ERIC Database" that appeared in the August 1987 issue of Database magazine (see Attachment 5).

This is an excellent article. Ms. Seiser has done her homework roughly and to an extent rare in authors writing about a database relatively complex as ERIC. Despite the complexities she elucidates, Ms. Seiser is very complimentary concerning ERIC.

Clearinghouse indexers should read this article and take it to heart. Here is a searcher relying heavily on ERIC indexers to apply age group and academic level index terms in the way promised in the ERIC Processing Manual. If we don't index according to our own rules then articles like this have the rug pulled out from under them.

...Jim Houston (ERIC Facility)

ERICSTAT Project Status Report

The ERICSTAT Project has been a source of some confusion within ERIC. The concept of cataloging data files instead of documents seems to present some problems. On the one hand, some people persist in thinking in terms of cataloging the printed documentation that sometimes (hopefully) accompanies data files. On the other hand, others imagine that ERIC intends to offer online access to the contents of the data file itself. The truth of the matter is in between these two extremes.

Since the confusion existed within OERI as well, two short papers were recently prepared to help communicate the concept of a file wherein the entries would represent machine-readable data files. A background paper is reproduced here as Attachment 6A, followed by a briefing paper as Attachment 6B.

In late July, the Facility sent to the Clearinghouses a draft of a set of ERICSTAT cataloging guidelines. Only a few Clearinghouses chose to comment, with RC providing the most extensive feedback. As a result of this feedback (and our own continuing experience in actually cataloging files), the guidelines have been simplified and revised. A revised version will be circulated shortly. RC has also put forward one of the major non-CES data files identified to date: the Migrant Student Record Transfer System (MSRTS) file. The MSRTS file has been cataloged and the resultant resume is reproduced as Attachment 6C. It may be of some use to Clearinghouses as an example of the kind of resume that may be requested of Clearinghouses in the future in small numbers (e.g. 3-4 per year).

...Ted Brandhorst (ERIC Facility)

UMI Article Clearinghouse -- Latest Communication to the ERIC Clearinghouses

The latest communication from UMI (see Attachment 7) was sent to the ERIC Clearinghouses in August, 1987. It transmitted a copy of their complete catalog, including a list of those journals covered by CIJE and offered by UMI. If you did not receive a copy of this catalog, please contact Sue Kennedy of UMI on 800-732-0616 or 313-761-4700.

Please note that the communication makes the point that they require a "full bibliographic citation" in order to fill an order. ERIC's EJ accession number is regarded as desirable, but not sufficient.

...Joanna Eustace (ERIC Facility)

John Disinger Elected to Board of Directors of the American Nature Study Society

Dr. John Disinger, Associate Director for Environmental Education at ERIC/SE and Professor of Environmental Education at Ohio State University, has been elected to the Board of Directors of the American Nature Study Society. John will serve a two-year term.

...Robert Howe (SE)

PERSONNEL

Personnel Changes at FL

There have been a number of changes in the ERIC/CLL staff over the past few months. Bill Code, former Acquisitions Coordinator, moved into the User Services position vacated by Laura Wenzel in March. Sharon Schwinabart joined the staff as our new Acquisitions Coordinator. James Mitchell, Administrative Assistant, is on indefinite leave of absence for health reasons, and has been succeeded by Denise Koptcho. Denise joined ERIC/CLL on June 1. Maggy McFerren, who has coordinated our ERIC Digests and Q&A fact sheets for the past year, left ERIC/CLL at the end of June for a new position at American University. Her duties have been taken over by Tarey Reilly, who also serves as Processing Coordinator for RIE and CIJE. To all those who have left us, we wish the very best. To all our new staff members, we extend a warm and sincere welcome.

...Jeannie Rennie (FL)

FCC PROPOSES RATE INCREASES FOR ONLINE COMMUNICATIONS NETWORKS

On July 17, 1987, the Federation Communications Commission (FCC) issued a "Notice of Proposed Rule Making," adopted by the Commission in June. The proposed regulation withdraws the exemption originally granted to telecommunications networks from certain access charges designed to compensate "local exchange carriers" (LECs) -- the local telephone companies -- for costs associated with origination and termination of interstate calls. Were the proposed regulations to go into effect, telecommunications networks such as Tymnet and Telenet would have to charge between \$4.00 and \$5.00 per hour in additional fees for accessing online services.

The FCC originally exempted telecommunications networks (termed enhanced service providers in the notice) from these access charges in 1983, because the commissioners believed that the sudden imposition of these charges would cause "rate shock" and disrupt service to the public. The FCC, however, removed a similar exemption for MTS/WATS-type services in 1986 and now proposes removal of the exemption for telecommunications networks.

In its notice, the FCC announced the proposed change; it also requested comments and replies to comments, addressing reactions to the changes and commenting on implementation of the new rates. Comments are to be submitted to the FCC by September 24; replies to the comments by October 26.

The proposal has excited considerable reaction from the information industry. Telecommunications networks would pass most or all of the charges on to the vendor,

who will pass them on to the user; this higher cost to the user could result in a drop in online use, which would affect the entire marketplace. According to an FCC representative, by August 13, 37 parties had filed a motion for an extension of the comment and reply periods. (The original deadlines were one month earlier.) The representative remarked that a more normal number was five or so for a "less controversial" rulemaking.

A representative of GTE Telenet termed the change "misguided" and asserted that the new charge was too small to enhance LEC income to any extent, while still large enough to affect the marketplace drastically. Telenet maintains that enhanced service providers are a class of end users and should be charged no differently than any other user of a business telephone. They believe that increased rates will drastically curtail innovative online products and services, particularly those targeted to less affluent segments of the user community.

All NFAIS Bulletin readers are encouraged to comment on the proposed rate change. Copies of the notice may be obtained from the FCC, 202/632-4047. Ask for Docket No. 87-215. (Questions to the FCC are being handled by Rose Milkman at the same number.) Copies of comments and replies submitted may be ordered from the International Transcription Services, 202/857-3800.

NFAIS has compiled a package of materials containing the notice, comments about it, and how to respond to the FCC (obtained by Nancy Vaupel, Industrial Technology Institute, from the CompuServe Broadcast Professionals Bulletin Board). Bulletin readers may request a copy of the package for a processing fee of \$5.00 from NFAIS, 215/563-2406.

Re: Opening ERIC Database

We here at EDRS have repeatedly been asked to come up with an effective method whereby all educational schools could gain entry into the ERIC Database- whether they are large, medium, or small. We are pleased to announce the development of a program that will ensure this goal that all schools, even those with limited funds, have access to this dynamic database.

This program is called the ERIC STARTER KIT. It will provide you with everything you need to access ERIC.

- * All RIE Indexes on microfiche 1966-1986
- * Complete collection of all RIE Document Resume Pages on microfiche 1966-1986
- * Rapid access to the ERIC Database - Full Text
- * Yearly updates of all RIE Indexes and Document Resumes
- * Low profile Microfiche Viewer for detail viewing

We will provide rapid access to the actual database by making it just a free phone call away. First, with this program, any topic in ERIC can be quickly and inexpensively researched just by viewing the Title, Author, Subject, or Institution Indexes. In addition, a cross reference structure is provided by the RIE Descriptors and Identifiers.

Once a topic has been identified through the indexes, the Document Resume is referenced to summarize the contents of the document. In this way, the pertinence of the document can be determined.

This is only the first part of the ERIC STARTER KIT. After choosing the documents needed, we will provide two different options for rapid viewing of these documents.

- * FIRST- We will include, with the ERIC STARTER KIT, a list of all institutions in your area which house an ERIC Database collection. It will provide you with the name, address, and telephone number for each one. In addition, this list will state which years of the ERIC Database are housed there and if all 16 clearinghouses are received or only individual clearinghouse data. In this way, you can quickly determine if any of these institutions have the documents needed.
- * SECOND- We will personally process your requests for ERIC Documents immediately. For this rapid processing, we have installed a TOLL FREE NUMBER: 1-800-227-3742. We also have the capability to accept Visa or MasterCard. Requests received, whether by mail or over the phone, will be immediately processed to ensure prompt delivery.

DOCUMENT REPRODUCTION SERVICE

3900 WHEELER AVE. ALEXANDRIA, VA 22304-5110 1-800-227-3742

OPERATED BY

COMPUTER MICROFILM CORP
703-623-0500

In addition, the ERIC STARTER KIT comes with a light weight, durable microfiche reader for sharp detail viewing. This viewer is made of a light weight, space age plastic and provides full screen viewing capability. This is a complete, low cost ERIC package developed to quickly place the ERIC Database at your fingertips. We have noted time and time again, that institutions like your own need to effectively balance cost with assistance. The ERIC STARTER KIT has specifically been designed to solve this problem.

We feel that this plan is an excellent method for starting your ERIC collection. It is our hope that later you will install the ERIC Database in your library and become a full text ERIC center for your community. Until that time, we believe this plan provides a true, inexpensive, and workable approach for accessing ERIC. If I can be of further assistance - please do not hesitate to call or drop me a note.

Yours Truly,

Josh Retterer
Marketing Coordinator of EDRS

OUTLINE & COST FOR THE ERIC STARTER KIT

*** ALL ERIC INDEXES: 1966 - 1986 ***

- * RIE Cumulative AUTHOR Index
- * RIE Cumulative SUBJECT Index
- * RIE Cumulative INSTITUTION Index
- * RIE Cumulative TITLE Index
- * RIE Cumulative Descriptor Usage Report
- * RIE Cumulative Identifier Usage

*** Complete Set of all RIE Document Resumes 1966-1986 ***

** Detailed List of ERIC Database Collections In Your Area **

PLUS

*** New Micro Design Reader #425 ***

- * 1 year warranty
- * color: earth tone brown and tan
- * weight: 12 lbs.
- * blue, green or gray non-glare screen

Total Cost \$389.00 1966-1986

YEARLY UPDATES

Each year we will completely update the ERIC Starter Kit with this option. Through it an institution will be able to incorporate each new year's collection. All six of the indexing sets will be completely replaced. This will ensure that the just completed year's data is correctly categorized within each index set.

The document resume file set will not be replaced but updated. This set's information is filed chronologically by E.O. #. Therefore only the microfiche copies of the just completed year's data will be sent out - to be inserted at the end of the previous year's data. An example for this would be that the 1987 document resume releases should be filed directly after the 1986 releases.

By replacing all six of the indexing sets and annually updating the document resumes file - A complete, low cost method is now provided for, in staying up to date with the growing ERIC Database. Please note shipping charges are included in this program

Yearly cost - \$35.00

IMPORTANT INSTRUCTIONS FOR ORDERING ERIC STARTER KIT

Payment may be made using any of the following methods:

- enclose check or money order payable to EDRS
- by MasterCard or Visa using EDRS toll free number: 1-800-227-3742
- U.S. customers may issue an authorized original purchase order
- please note that shipping charges are included in purchase price

EDRS - RAPID ACCESS TO ERIC

- Quick access to ERIC's full text Database with our toll free number: 1-800-227-3742
- Entire ERIC Database available in microfiche or paper format
- EDRS accepts MasterCard and Visa over the phone
- Or written requests with check or money order payable to EDRS
- Processing done immediately upon receipt of order and payment

ERIC: a Brief Description

The Educational Resources Information Center (ERIC) is a decentralized nationwide network, sponsored by the National Institute of Education (NIE), and designed to collect educational documents and to make them available to teachers, administrators, researchers, students, and other interested persons. ERIC publishes a monthly abstract journal, *Resources in Education (RIE)*, which announces all documents that are acquired by ERIC and that pass its selection criteria. ERIC attempts comprehensive coverage of recently completed significant documents dealing with education.

- Manuals
- Handbooks
- Curriculum Materials
- Conference Papers

Your Keys to the ERIC Data Base

Resources in Education Cumulative Institution Index

This index lists the title of the ERIC documents under the institution responsible for their development. An alphabetical listing by the name of the university, institution, agency, association, etc., is also provided.

RIE Cumulative Descriptor Usage Report

Descriptor Usage Report is a concise cumulative index of the descriptors (index terms from the Thesaurus) used in *Resources in Education*.

RIE Cumulative Identifier Usage Report

RIE Identifier Usage Report is a concise cumulative index of the identifiers (additional identifying terms) used in *Resources in Education*.

These Usage Reports contain all the terms used and list the ED numbers for the documents to which they were assigned. Major descriptors or identifiers are indicated by an asterisk. The fiche also provide the only printed access to minor identifiers.

RIE Cumulative Title Index

Resources in Education Cumulative Title Index is a single alphabetical listing of all ERIC document titles from the beginning of the ERIC system.

Each citation includes level of availability, publication date, ED number, number of pages and/or number of microfiche.

RIE Cumulative Author Index

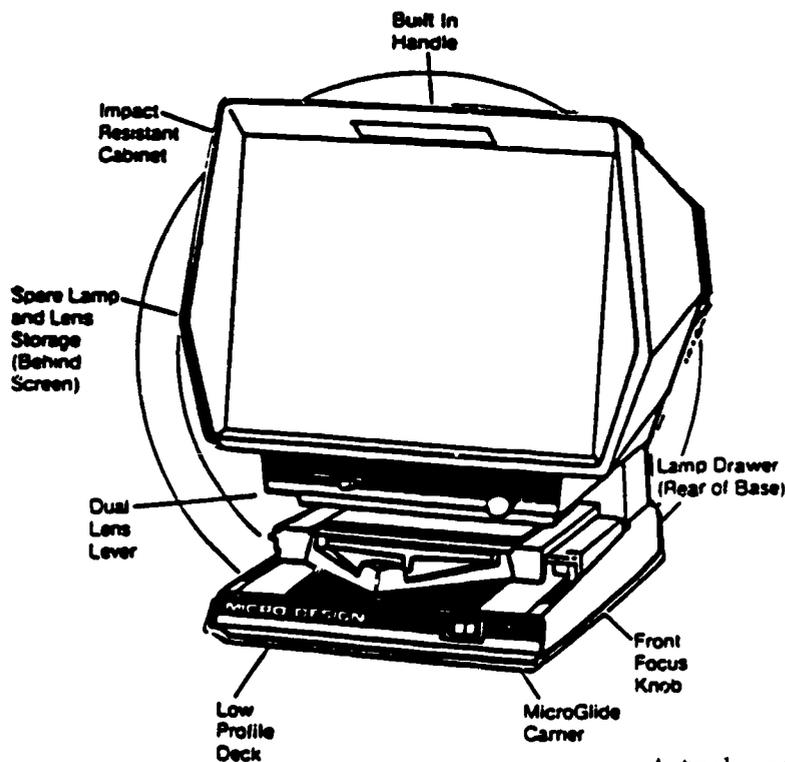

Resources in Education Cumulative Author Index provides access by author, including secondary authors when noted. If there are three or more authors, only the first is listed by name. For each author, title, the level of availability, the ED number, number of pages and/or microfiche are cited.

The cumulative author and title indices, when used in conjunction with one another, are invaluable ERIC search aids.

Resources in Education Cumulative Subject Index

This index lists the titles of documents under the major subject terms that have been assigned to characterize their contents. The subjects which conform to those in the Thesaurus of ERIC Descriptors, are in alphabetical order and cumulative.

ABSTRACT

For a number of years, the 16 ERIC Clearinghouses have tracked educational issues and trends in their respective special areas of concern. This is the first unified collection of papers resulting from the tracking effort. Each paper contains an analysis of research, practice, and policy in the scope area covered by the authoring Clearinghouse. The chapters also recommend possible actions for achieving improvement and change. The preface by A. Harry Passow is entitled "Issues and Trends in Education: Some Observations and Reflections." The 16 chapters, written by Clearinghouse management staff, are as follows (in order by Clearinghouse prefix): (1) CE--"Some Current Issues in Adult, Career, and Vocational Education" by Juliet V. Miller and Susan Imel; (2) CG--"Current Issues and Trends in Guidance and Counseling" by Garry R. Walz; (3) CS--"Two Problems in the Teaching of English" by Charles Suhor; (4) EA--"Improving School Effectiveness through Reform of Teacher Selection Practices and Collegial Observation of Classroom Performance" by Thomas I. Ellis, Mary Cihak Jensen, Philip K. Piele, and Stuart C. Smith; (5) EC--"Current Issues and Future Directions in Special Education" by June B. Jordan and Donald K. Erickson; (6) FL--"Developments in Language Education" by John L.D. Clark; (7) HE--"Emerging Trends in Higher Education" by Judy Diane Grace and Jonathan D. Fife; (8) IR--"Education and Information Technology: What Are the Questions?" by Donald P. Ely; (9) JC--"Contemporary Issues in Community Colleges: A Synopsis" by Arthur M. Cohen; (10) PS--"Current Issues in Early Childhood Education" by Lilian G. Katz; (11) RC--"Issues in American Indian Education, Mexican American Education, Migrant Education, Outdoor Education, Rural Education, and Small Schools" by Elaine Roanhorse Benally, Jack T. Cole, and Manuela Quezada-Aragon; (12) SE--"Persistent Problems in Precollege Mathematics, Science and Environmental Education: Issues, Trends, and Recommendations" by Robert W. Howe, Patricia E. Blosser, Marilyn N. Suydam, Stanley L. Halgeson, and John F. Disinger; (13) SO--"Core Content, Critical Thinking, and Civil Values: Issues on Education in the Social Studies" by John J. Patrick; (14) SP--"Three Crucial Issues Concerning the Preparation of Teachers for Our Classrooms: Definition, Development, and Determination of Competence" by Elizabeth A. Ashburn; (15) TM--"Current Issues in Testing, Measurement, and Evaluation" by S. Donald Melville, Jacob G. Beard, C. Philip Kearney, Rodney Roth, and Jason Millman; (16) UD--"Issues in Improving Urban Schools: Dropout Prevention, Hispanic Secondary Education, and Urban Teaching Careers" by Erwin Flaxman and Carolyn Riehl. 4045

nology goes, relatively precise. There are 5,296 usable subject headings, called "descriptors," in the 1987 *Thesaurus* (11th ed.). A significant number of descriptors are supplied with "Scope Notes," brief statements of intended usage. The relevancy of existing terminology, and the need for new terms are continuously being reviewed, as part of "a regular interactive process for vocabulary maintenance" (*Thesaurus*). Furthermore, descriptors are used liberally. Documents receive an average of eleven descriptors each, according to the *ERIC Processing Manual* (Sept. 1981). The introductory section of the *Thesaurus* outlines the broad principles; the *Processing Manual* provides ERIC staffers with detailed instructions for executing those principles. The *Processing Manual*, originally issued in 1980 in looseleaf form, is continuously updated. The edition cited here is available on ERIC microfiche ED219-082.

The structure of the *Thesaurus* has been used as a model by other databases. Each entry in the alphabetical listing of descriptors includes broader terms (BT), narrower terms (NT), and related terms (RT), where appropriate. There are abundant references from unused terms to usable descriptors. The *Thesaurus* also includes a hierarchically arranged listing of descriptors, and a permuted list, called the "Rotated Descriptor Display."

1980 RELOAD AND REVISION

In its eleventh year of operation, ERIC launched a complete revision of its controlled vocabulary. The result, the 1980 *Thesaurus of ERIC Descriptors—Completely Revised* (8th edition) reflected sweeping changes. New descriptors were added for needed concepts not previously represented in the controlled vocabulary. Existing concepts were renamed to reflect modern usage. For example, the old term *SENIOR CITIZENS* was replaced by the descriptor *OLDER ADULTS*. Near synonyms were combined into one descriptor. For example, the old terms *TEENAGERS* and *ADOLESCENCE* were replaced by a single descriptor, *ADOLESCENTS*. Terms like *SENIOR CITIZENS* and *TEENAGERS*, which were retained as concepts, but given new names, are called "Transferred Descriptors." They continue to appear in the *Thesaurus*, linked with USE and used for (UF) references to the appropriate new descriptor, the preferred term. Misleading terms were dropped from use at this time. For example the old term *WELFARE* had been used for two different concepts, "well-being" and "social services." Such terms were declared "Invalid Descriptors" and ceased to be used. Invalid terms are noted in the *Thesaurus*, with a brief summary of their history.

76 DATABASE August 1987

The ERIC tapes were reloaded in 1980 to incorporate the vocabulary changes. It is important to remember that the renaming of concepts continues, but the tapes have not been completely updated since 1980.

The ERIC tapes were reloaded in 1980 to incorporate the vocabulary changes. A searcher can search on the descriptor *OLDER ADULTS*, for example, and automatically pick up all the pre-1980 citations originally indexed under the term *SENIOR CITIZENS*. It is important to remember that the renaming of concepts continues, but the tapes have not been completely updated since 1980. For example, the descriptor *WHEEL CHAIRS* was replaced by *WHEELCHAIRS* in 1981. The searcher choosing to use controlled vocabulary to search for this concept should enter both descriptors, unless the intention is to limit the search to recent years. Fortunately, the *Thesaurus* provides the date each descriptor entered the vocabulary, supplemented with notes about previous usage.

CHANGES IN 1987 ERIC THESAURUS

Changes introduced in the 1987 edition of the *Thesaurus* (11th ed.) are minor. Most of the changes had been reported already in the monthly issues of the print versions of the two ERIC subfiles, *Current Index to Journals in Education (CIJE)* and *Resources in Education (RIE)*. Briefly, the changes between the 10th and 11th editions of the *Thesaurus* are: (1) Two hundred twenty-four new descriptors have been added. One new descriptor, *TODDLERS*, was added to the list of optional Age Level Descriptors, to be discussed below. (2) Several hundred cross-references and Scope Notes were added or revised. (3) One term, "Computer Programs," was added to the list of Publication/Document Types. It was assigned PUBTYPE Code 101. (4) "Target Audience" is now a searchable field in CIJE as well as RIE. (5) The availability of full-text searching was announced. It is limited to a tiny subfile, ERIC Digests Online (EDO), which came up on the Source ED-Line in April, 1986. (6) A new feature has been included in the introduction: A chart comparing the old labels used by the three online services, BRS, DIALOG, and ORBIT, for ERIC data elements.

4077

AGE LEVEL DESCRIPTORS AND ERIC INDEXING PRACTICE

Starting in 1980, ERIC indexers were required to assign Age Level Descriptors to all relevant documents. That policy was rescinded in mid-1982. There were eight mandatory descriptors in use during that two-and-a-half year period:

CHILDREN

YOUNG CHILDREN

INFANTS

PRESCHOOL CHILDREN

ADOLESCENTS

ADULTS

MIDDLE AGED ADULTS

OLDER ADULTS

While not mandatory before 1980, all of these descriptors can be searched online back to 1966. In mid-1982 the use of these Age Level Descriptors became optional. The 1984 *Thesaurus* (10th ed.) added two more terms to the optional list. An established descriptor dating back to 1966, *YOUNG ADULTS*, and a new descriptor, *PREADOLESCENTS*, were added to the controlled vocabulary in 1982. The newly issued 1987 *Thesaurus* adds one more term to the optional Age Level Descriptor list: *TODDLERS*, a new term created in 1984.

Chart 1 displays the Age Level Descriptors, in relation to the portion of the life span each is defined to cover. One observation to be made about Chart 1 is that the ERIC vocabulary is relatively richer in terms related to the early years of life. Recognizing this, the scale of the chart has been compressed for the years beyond twenty-two.

There are three overarching terms: *CHILDREN*, *ADOLESCENTS*, and *ADULTS*. There are additional narrower terms within two of these categories, *CHILDREN* and *ADULTS*. While not recognized on the official list of optional Age Level Descriptors, another descriptor, *YOUTH*, covers roughly the same span of years as the third category, *ADOLESCENTS*. In fact, there are at least two possible ERIC descriptors for every span of life on the chart except one, the years from 31 to 44 years of age. Only the broad term *ADULTS* covers that cohort. ERIC has yet to provide a special term for the baby boomers, making it difficult to narrow a search specifically to this group.

Chart 1 illustrates that some of the Age Level Descriptors are narrower terms than others.

ERIC has yet to provide a special term for the baby boomers, making it difficult to narrow a search specifically to this group.

However, they are not "indexed up." The two fundamental rules of ERIC indexing are "Index only what is in the document," and "Index at the level of specificity of the document" (*Thesaurus*). Accordingly, a document dealing specifically with youngsters aged one to three years would be indexed under the descriptor *TODDLERS*, and would not be indexed under the broader descriptor *YOUNG CHILDREN*. A searcher wishing to retrieve everything about youngsters aged birth to eight years should include the descriptors *INFANTS*, *TODDLERS*, and *PRESCHOOL CHILDREN* in the search strategy, in addition to the broader term *YOUNG CHILDREN*.

When are optional Age Level Descriptors used? The introduction to the *Thesaurus* provides the following guidance: "... one or more [Age Level Descriptors] are used when a document or journal article is concerned strictly with age-level groups or populations. It should be noted that the use of specific other terms such as *ADOPTED CHILDREN* and *ADULT DROPOUTS* would eliminate the need also to index such generic terms as *CHILDREN* and *ADULTS*" (*Thesaurus*).

ADDITIONAL AGE LEVEL DESCRIPTORS

Unfortunately, the *Thesaurus* does not go on to list what those "specific other terms" are. A study of the narrower and related terms listed in the Alphabetical Descriptor Display for the eleven optional Age Level Descriptors suggests the following descriptors as terms that might be used to increase recall for appropriate age groups:

NEONATES PREMATURE INFANTS

ADOPTED CHILDREN
FOSTER CHILDREN
GRANDCHILDREN
HOSPITALIZED CHILDREN
KINDERGARTEN CHILDREN
LATCHKEY CHILDREN
MIGRANT CHILDREN
MINORITY GROUP CHILDREN
PRESCHOOL CHILDREN

**PROBLEM CHILDREN
TRANSIENT CHILDREN**

**AFFLUENT YOUTH
BLACK YOUTH
DISADVANTAGED YOUTH
MIGRANT YOUTH
OUT OF SCHOOL YOUTH
RURAL YOUTH
SUBURBAN YOUTH
URBAN YOUTH
YOUTH**

**ADULT DROPOUTS
ADULT STUDENTS**

Scope Notes for a few of these descriptors, such as *NEONATES*, indicate a specific age range; most do not. One descriptor, *YOUTH*, is particularly problematical. The Scope Note defines *YOUTH* as "Individuals or time of life between childhood and maturity. . ." and adds the warning "(note: use a more specific term if possible and an age or educational level descriptor)." Presumably, the appropriate Age Level Descriptor would be the near synonym *ADOLESCENTS*.

The practice of using narrower terms, where applicable, in preference to Age Level Descriptors is derived from the basic rule: Index at the level of specificity of the document. Very general descriptors, such as *EDUCATION*, are not used unless that subject is treated extremely broadly. The Scope Note for this Descriptor warns the searcher to use a more specific term if possible. A multiword Descriptor, if provided, is preferred in indexing over the use of two separate broad concepts, even though logically, the two might appear to describe the topic equally well. For example, the *Thesaurus* provides the descriptor *ADOPTED CHILDREN*. Therefore, the indexer would assign that term, rather than the two terms, *ADOPTION* and *CHILDREN*, even though they are both valid descriptors. "Precoordinated (i.e., multiple-word) descriptors are used whenever possible" (*Thesaurus*).

USE AGE LEVEL DESCRIPTORS WITH CAUTION

Two final words of warning about the use of Age Level Descriptors: First, Age Level Descriptors are usually minor descriptors, unless the age level is the *subject* of the document. An article about preadolescence as a significant phase in the moral development of children might be indexed under *FREDOLESCENTS* as a major descriptor. A study of moral development in children which used subjects who happened to fall into the preadolescent age range, 9 to 12 years of age, would probably be

indexed under *PREDOLESCENTS* as a minor descriptor. The guidelines provided in the *Processing Manual* for determining whether a descriptor should be major or minor, leave considerable room for individual judgment on

For the searcher using age-related terms as part of the search strategy, it is safest not to limit those descriptors to major or minor.

the part of the indexer. For the searcher using age-related terms as part of the search strategy, it is safest not to limit those descriptors to major or minor. This consideration makes online searching the preferred search method even for simple age-related questions, because minor descriptors are not indexed in the hardcopy version of the ERIC.

The second warning is that ". . . Educational Level Descriptors always have precedence over the Age Level terms" (*Thesaurus*). This means that a document about moral development of children that consists of a study of classroom cheating by 10 year olds will probably be assigned the Educational Level Descriptor *INTERMEDIATE GRADES* rather than the Age Level Descriptor *PREDOLESCENTS*. If an Educational Level Descriptor is appropriate to a document, an Age Level Descriptor would not also be assigned *unless* "a part of the subject population is not adequately conveyed by the activities and experiences with which. . . education is normally concerned" (*Processing Manual*).

A searcher using only Age Level Descriptors will miss potentially relevant documents. Since many search questions about human populations, in which age is a variable, span both classroom and non-classroom contexts, Educational Level Descriptors merit attention.

EDUCATIONAL LEVEL DESCRIPTORS

Since 1975, it has been mandatory that every article in the ERIC database be assigned an Educational Level Descriptor, if appropriate "One or more of these special descriptors must always be used to index educational level when the document deals with such levels" (*Processing Manual*). The only allowable exceptions are documents in which educational level is incidental and/or not specifically treated, or documents which apply to all educational levels equally, as would an article about "the role of education in society" (*Thesaurus*).

Mandatory Educational Level Descriptors are not applied to the concept of lifelong learning or adult education (with the exception of *ADULT BASIC EDUCATION*), because the concept is understood to apply to all levels of education (elementary, secondary and post-secondary) equally. The non-mandatory descriptors *ADULT EDUCATION* and *LIFELONG LEARNING* are used to index the concept.

Chart 2 illustrates the grade levels covered by each of the level terms. There are three broad terms. *EARLY CHILDHOOD EDUCATION*, *ELEMENTARY SECONDARY EDUCATION*, and *POSTSECONDARY EDUCATION*. The remaining eleven Educational Level Descriptors are narrower terms under one of the first three.

The indexer assigns the most specific Educational Level Descriptor appropriate to the document in hand, taken as a whole.

The indexer assigns the most specific Educational Level Descriptor appropriate to the document in hand, taken as a whole. Usually only one Educational Level Descriptor is assigned per document. However, some documents do require multiple Educational Level Descriptors when a single term does not cover the span under consideration, as for example, an article discussing cooperation between *HIGH SCHOOLS* and *TWO YEAR COLLEGES*.

As with all other ERIC Descriptors, mandatory Education Level Descriptors are not "indexed up." Searchers should include the narrower terms in their strategies whenever a comprehensive search of a broad educational level is desired. For example, a search on *SECONDARY EDUCATION* will miss relevant documents unless the terms *JUNIOR HIGH SCHOOLS*, *HIGH SCHOOLS*, and *HIGH SCHOOL EQUIVALENCY PROGRAMS* are included in the strategy.

The division between some of the Educational Level Descriptors is not clearly defined. For example, *ELEMENTARY EDUCATION* includes Grade K or 1 through 6, 7, or 8, and *SECONDARY EDUCATION* includes Grades 7, 8, or 9 through 12. ERIC indexers follow a basic axiom: "Usage determines meaning" (*Thesaurus*) That axiom results in some ambiguity in the definitions supplied for Descriptors. For example, the Scope Note for the mandatory Education Level Descriptor *JUNIOR*

HIGH SCHOOLS reads "Providing formal education in grades 7, 8, and 9—less commonly 7 and 8, or 8 and 9. . ." (*Thesaurus*). Some of the nations school systems place Grade 7 in a junior high school, some do not. The *Processing Manual* provides the helpful note: "Although overlapping between the general concepts of *ELEMENTARY EDUCATION* and *SECONDARY EDUCATION, GRADE 7* (also *GRADE 8*) would normally be used with *JUNIOR HIGH SCHOOLS*, unless such indexing would mislead users." This indexing policy may mislead the searcher who isn't interested in junior high schools, *per se*, but does want to locate information on how twelve-year-olds behave, in or out of the classroom.

GRADE LEVEL DESCRIPTORS

There are several strategies that can increase precision. One is the use of grade level descriptors. One or more grade level descriptors are often assigned to a document, in addition to the mandatory Educational Level Descriptor, when the range of grades discussed in the document is narrower than the narrowest available Educational Level Descriptor.

Within the United States, it is usually safe to assume that *KINDERGARTEN* is equivalent to age 5, *GRADE 1* is equivalent to age 6 and so forth through *GRADE 12* and age 17. There are important exceptions, such as gifted or handicapped populations. The proposed correlation between age and grade level does not hold for *ADULT BASIC EDUCATION* or *HIGH SCHOOL EQUIVALENCY PROGRAMS*, either. The *Processing Manual* does provide a "Chronological Age to Education Level Cross-Reference Table."

STUDENT LEVEL DESCRIPTORS

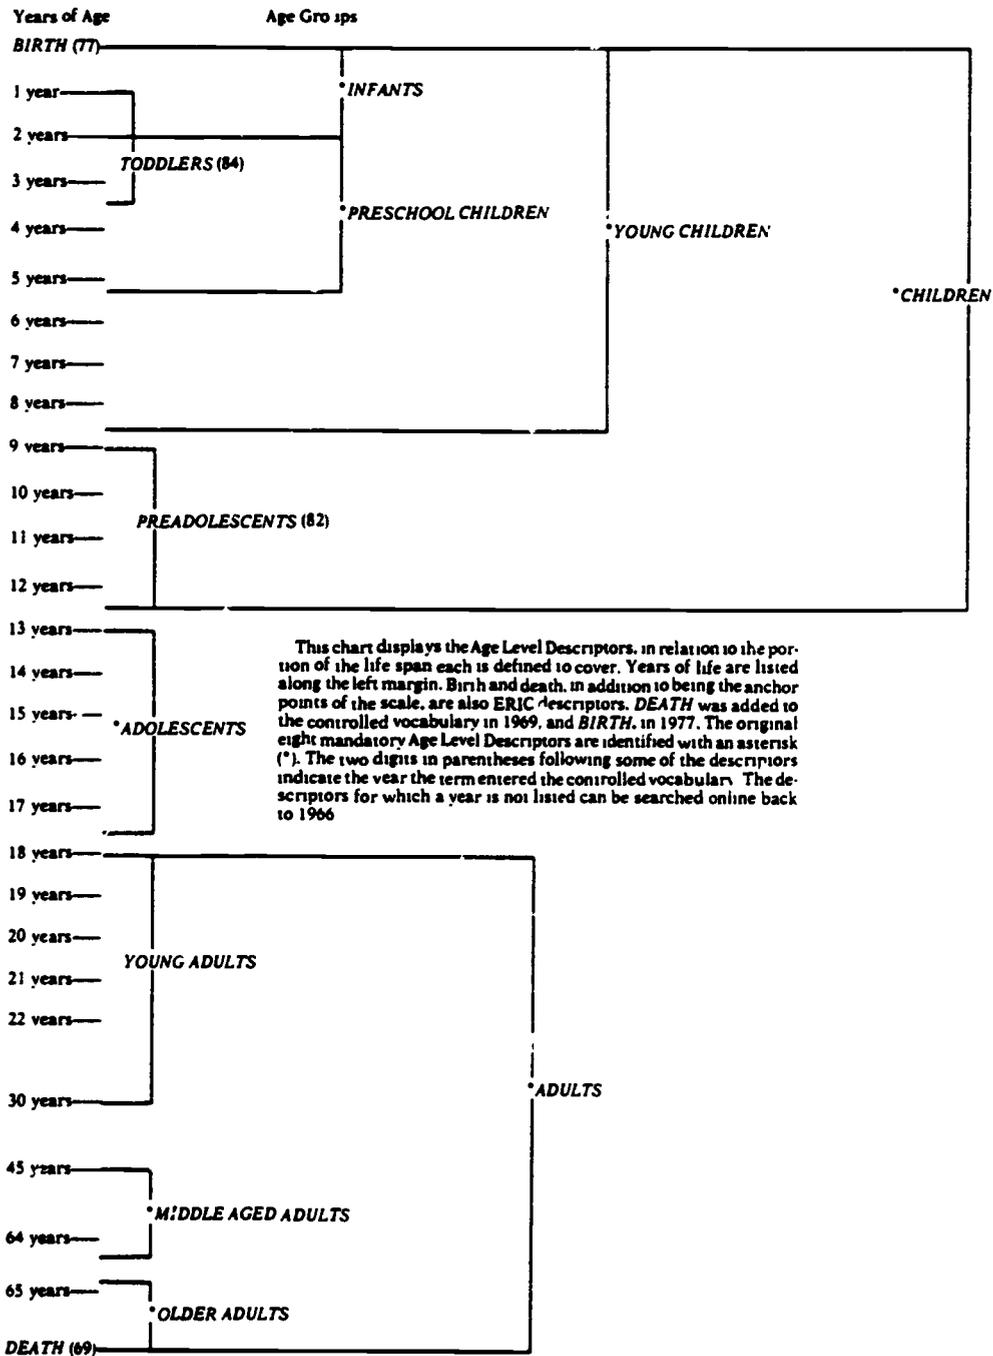

A second strategy to improve precision is the use of student level descriptors. One of the difficulties in using Educational Level Descriptors is that they are used to index all aspects of education. A document to which the Educational Level Descriptor *HIGH SCHOOLS* has been assigned could be about high school students, but it is equally possible that it is about high school administration, or high school construction, or high school curriculum, topics not immediately of interest to a searcher looking for information about seventeen-year-olds. One alternative is to use the Descriptor *HIGH SCHOOL SENIORS*. Appropriate student level descriptors are often assigned to documents in addition to the mandatory Educational Level Descriptor. Chart 3 lists a number of suggested student level descriptors, and illustrates the approximate grade range covered by each. The year the term entered the controlled vocabulary

ulary is indicated in parentheses following those descriptors which cannot be searched online as far back as 1966. (There are many more ERIC descriptors containing the word "students" than appear on this chart. For a complete listing, see the "Rotated Display of

Descriptors" in the *Thesaurus*.

Student level descriptors and grade level descriptors may be assigned major descriptor status, if this population variable is considered to be central to the document being indexed. If the variable is considered to be a minor as-

CHART 1. ERIC AGE LEVEL DESCRIPTORS

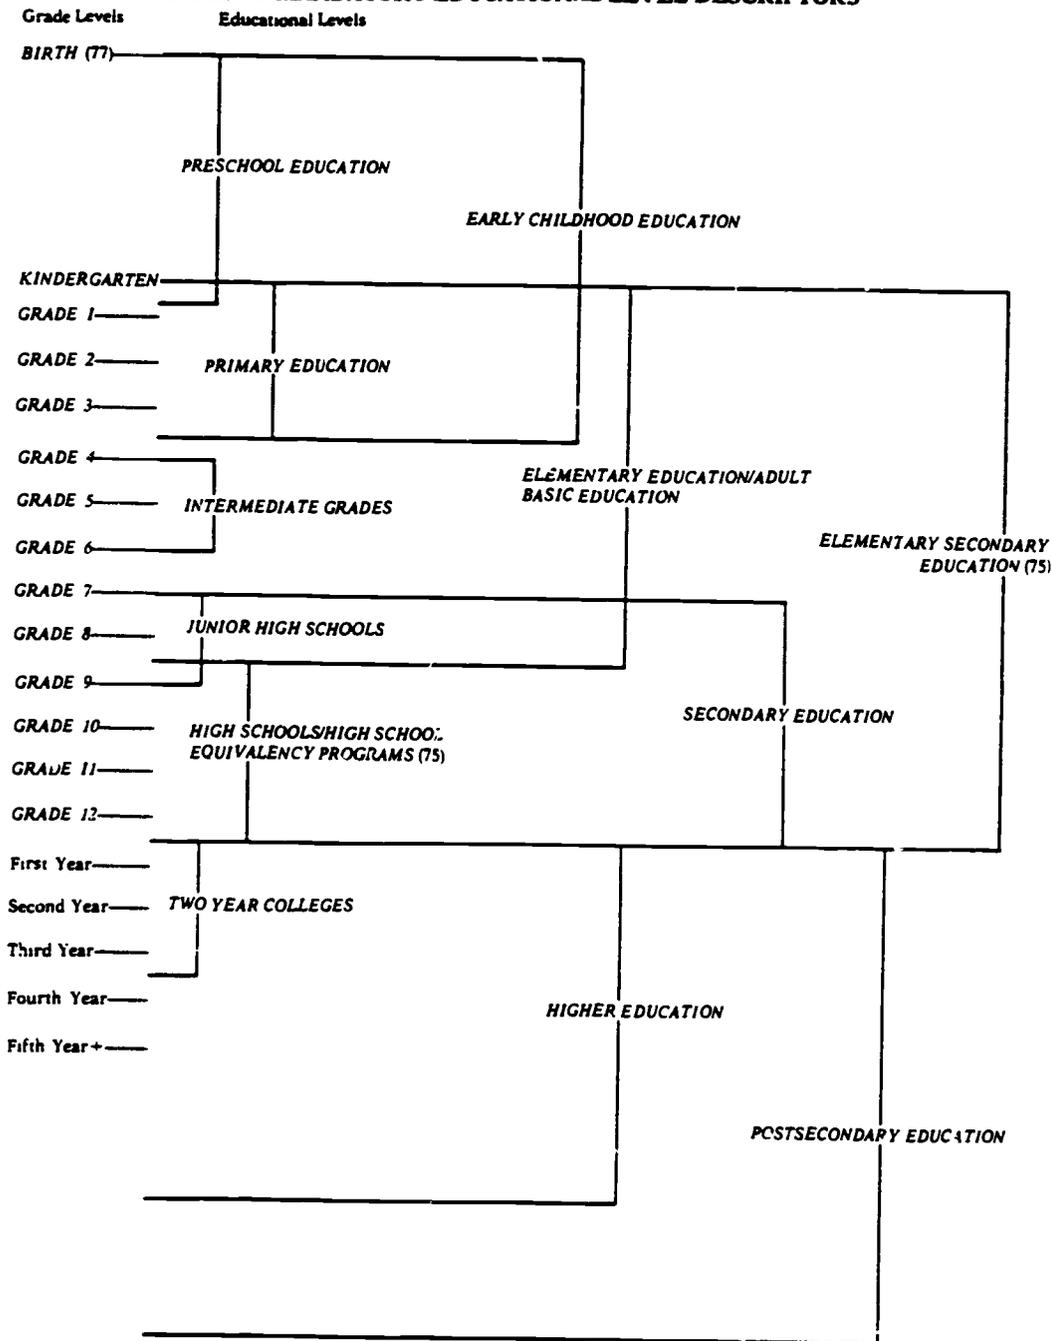

80 DATABASE August 1987

4081

pect of the topic under discussion, it will be a minor descriptor. Mandatory Educational Level Descriptors are always minor descriptors, unless the educational level itself is the subject of the document. The mandatory Educational Level Descriptor *HIGHER EDUCA-*

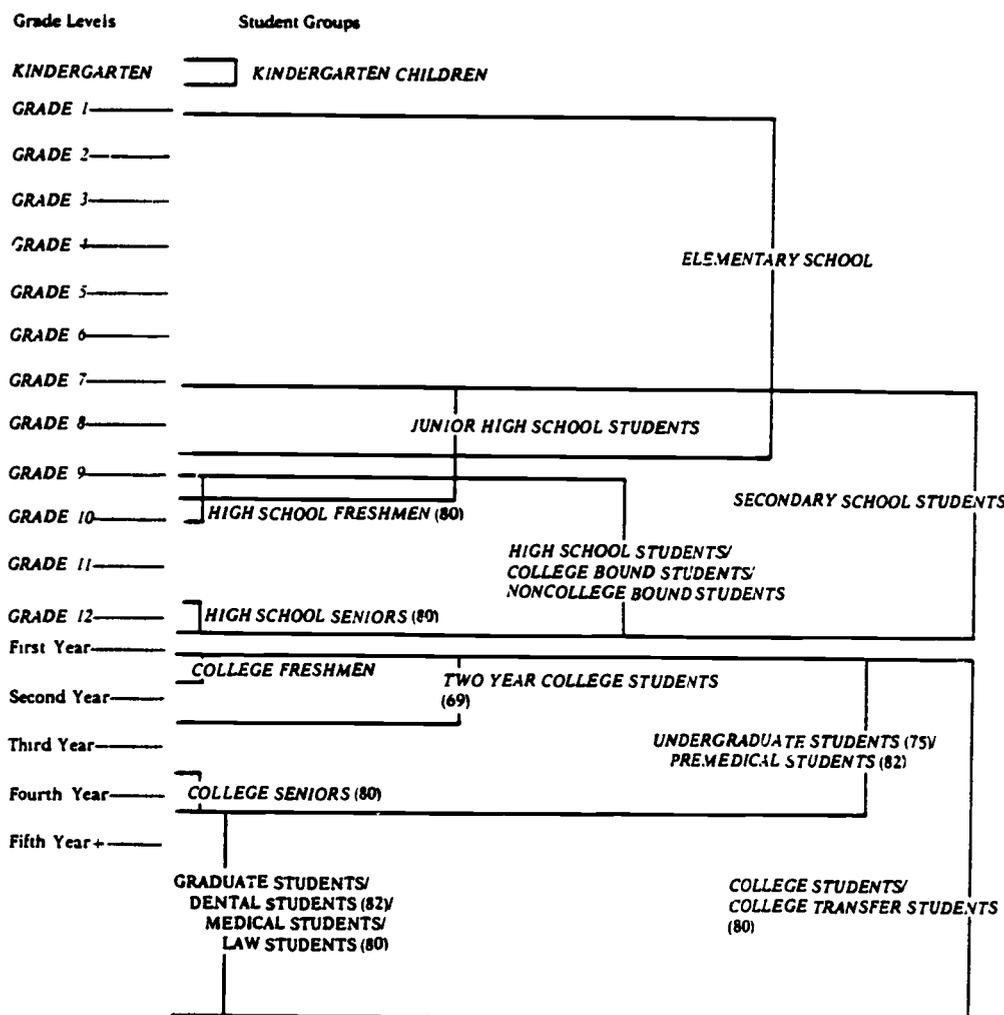

TION might be used as a major descriptor when assigned to a document with a title like "Government and Academe," for example. Searchers should take these points into consideration before deciding whether to limit to major descriptors.

BACKGROUND PAPER

ERICSTAT:

An ERIC Referral Database in Which the Records Represent Education-Related Statistical/Numeric Data Files

I. Background

When the National Institute of Education (NIE) was changed in 1985 to the Office of Educational Research and Improvement (OERI), the new agency administration attached the highest priority to refurbishing its statistical arm; the National Center for Education Statistics (NCES). NCES was re-named the Center for Statistics (CS) and later re-named again the Center for Education Statistics (CES). Most of the agency's new money was devoted to redesign and improvement of CES.

The waves created by this high priority objective have had effects elsewhere in the agency and one of these places is ERIC. The question has been asked: "How can the veteran ERIC program contribute to this emphasis on the statistical area?"

There were lots of suggested answers to this question, but two obvious answers stand out: (1) ERIC could improve its coverage of documents and journal articles dealing with education-related statistics; (2) ERIC could use its expertise (developed in the bibliographic area) to create a referral database dealing with statistical files. It is this second suggestion that I want to talk about today.

II. Project Definition

In 1956, ERIC initiated that part of its database dealing with documents as educational resources. In 1969, ERIC initiated a second file, dealing with journal articles relevant to educators.

The file being discussed today, in which the entities described are machine-readable files, is the first new venture towards coverage of a new kind of educational resource that ERIC has made since 1969.

Just as with the bibliographic files, the concept here is to develop a surrogate record (consisting of cataloging information, indexing information, abstract information, and availability information) that would permit a user to search for data files having specific characteristics and once having found them to be able to determine where to go to actually obtain them. ERIC would not attempt to acquire the files themselves, but only to lead users to the particular archive in which they resided. The resultant database would deal with machine-readable files only. Any documentation associated with these files would continue to be handled by ERIC's bibliographic arm, where they would be microfilmed, announced, the etc., in the usual way.

III. Type of Surrogate Record Being Developed

One of the first steps in the project was to interview the CES staff to see what kind of a record would be most useful to them. This was a lengthy process involving several individuals.

It became clear early on that the emphasis was to be on a record that provided good retrieval potential as to the subject content of the file and as to the variables measured. There was far less interest in the physical aspects (e.g., how many tapes, density, record length, block size, etc.). There were two reasons for this: (1) the physical aspects were very changeable, they didn't stay static; (2) Any user really interested in actually getting the file was going to have to get into the equivalent of the "data file user's manual" for the particular file, where the physical aspects were described in full detail.

For these reasons, the description format we have developed concentrates on subject content, variables, and availability. It is not a librarian's description of a specific physical thing on a shelf, but rather a rich characterization of the file as to what one can find there. It is designed to be accessed by modern online retrieval systems providing full Boolean capability, proximity searching, and specification as to the field in which a search term appears.

A list of the data elements (or fields) we have settled on for our description is available for anyone who might be interested.

IV. Sources of Data Files Explored to Date

We started by describing the files we could identify at CES. Arbitrarily establishing a time period cutoff at around 1978, we identified approximately 50 major CES files. We sat down and began applying our cataloging protocol to them. This helped to refine our list of fields and also told us whether the scheme "worked" in a practical sense.

After cataloging about 35 of the CES files, we were directed to see what we could find outside CES. At that point we begin to explore the larger data archive world: e.g. the National Archives, ICPSR, the Center for Lives at Radcliffe, ect. We are currently in the process of identifying the education-related files within each of these major data archives and in obtaining the related documentation that will permit us to fully catalog and otherwise describe these files.

4085

At each location we have contacted we have been impressed by the cooperativeness of the data archive librarians. They want us to publicize the subset of files in which we are interested. They are hoping that our work will lead to greater awareness of the existence of the files and greater use of them by researchers. Unlike bibliographic collections, the preservation of data files is apparently facilitated by their regular use. They don't wear out; rather they get re-written and "improved".

In addition to the major data archives, we have begun to bring the ERIC Clearinghouses on board in this project. We haven't asked them to do much because they haven't been funded to do anything in this area, but if ERIC continues with this effort and if "ERICSTAT" becomes a regular operational ERIC file, then the ERIC Clearinghouses will in the future be identifying, processing, and forwarding to the central database descriptions of data files in the same way that they now process bibliographic data.

V. Future Plans

ERICSTAT is a "pilot project". It is funded at a very low level and is exploratory in nature. The ground work is being laid for a possible routine operation. Whether it becomes a routine operation will depend on priorities and on funding within OERI as a whole.

We have hopes that ERICSTAT will become a new ERIC file, regularly added to by input from the ERIC Clearinghouses and regularly maintained by the ERIC Facility. We would like to see a publication (with indexes) result after we have assembled the first 200-250 files. Eventually we would like to see ERICSTAT available for searching online in the same way that the ERIC document and journal article files are now searchable online.

BRIEFING PAPER

The ERICSTAT Project
(A Briefing Paper)

Background

Since its inception, ERIC has been a bibliographic database, collecting documents and journal articles related to education. Among this material has always been a considerable amount of numerical, statistical, and quantitative data in printed form. In 1974, when (to aid in the retrieval process) ERIC began tagging its bibliographic input by document type, one of the early codes developed was code 110, representing documents containing significant amounts of "Numerical/Quantitative Data". In the 13 years since that tagging scheme began, approximately 2.7% of the documents entering the ERIC database have been indexed by this code. Through 1986, that equates to 5,009 documents.

All ERIC Clearinghouses collect this kind of material. Analysis reveals, however, that the Clearinghouses concerned with Higher Education, Junior Colleges, and Information Resources have, historically, input the highest percentage of numerical/quantitative data in printed forms.

The Problem

Behind the documents providing large amounts of statistical data, there are usually data files from which the data have been extracted. Researchers interested in checking the accuracy of the printed reports, or in manipulating the data into new patterns, must often acquire copies of these data files (and the documentation describing them). This is currently a very difficult information access problem. It is hard to find whether given files still exist, where they may be stored, whether they can be obtained, and whether the necessary documentation exists to make use of them. While libraries traditionally provide access to bibliographic entities, very few libraries have collected data files. The infrastructure for accessing data files has simply not been developed to the extent that it has for books, documents, and articles. For example, the famous "Coleman Report" that studied the effect of separate schools for white and black and whose data supported the busing option, was originally announced in ERIC in 1967 (ED-019 387). The Coleman Report tapes have been gathering dust at the National Archives all

4087

these years, but this fact is not well known and the location of the file would be difficult for an interested education researcher to determine.

ERIC's Role

In 1986, ERIC decided that education-related data files constituted a neglected educational resource and mounted a pilot project to:

- o Identify and estimate the quantity of education-related data files.
- o Collect documentation on identified files (but not the file itself). Acquire sufficient documentation on each file to permit a comprehensive description to be developed.
- o Develop ERIC-compatible file formats and guidelines for describing (i.e. cataloging, indexing, abstracting) data files. Such guidelines were to be designed with the idea that the file descriptions would eventually be subject to online retrieval (just like ERIC's bibliographic descriptions). These formats and guidelines were to be developed in conjunction with relevant CES personnel.
- o Actually process a small number of files, starting with those of the Center for Education Statistics (CES), but also including some non-CES files (e.g. ACE, NAEP). Use these records as the nucleus of a possible new ERIC machine-readable file, that could best be described as a union list of education-related machine-readable data files.
- o Initiate the ERIC Clearinghouses into looking for education-related data files in the same way that they now look for education-related documents and journals. Introduce and familiarize the Clearinghouses with the data file processing guidelines.

The ERICSTAT Project is being conducted on a very modest budget by the ERIC Processing and Reference Facility. The ERIC Clearinghouses have been introduced to the project, but have not been asked to do a lot of work in connection with it because they have not been funded to do so.

Progress to Date

To date, the Eric Facility has:

- o Identified approximately 104 education-related statistical data files in machine-readable form that are located at three major data archives: CES, ICPSR, Radcliffe (Center for the Study of Lives). (Additional files at NARS and NAEP have not yet been separately identified and listed).
- o Developed a record format (approved by (CES) and cataloging guidelines for describing data files. These guidelines are compatible with the existing ERIC Processing Manual, but also take into account AACR-2, AECT, and DOJ standards for describing data files.
- o Cataloged, indexed, and abstracted 35 CES data files.
- o Introduced the ERICSTAT project to the ERIC Clearinghouses, asked them to suggest candidate files, and circulated the processing guidelines for their review and comment.

Future Actions (Coming Year)

The ERIC Facility will:

- o Key the descriptions of the CES files and load these descriptions to magnetic tape (approximately 35-50 descriptions).
- o Catalog approximately 50 non-CES data files identified at locations such as ICPSR, Radcliffe, NAEP, NARS, etc.
- o Finalize the processing guidelines. The processing function for data files could be assumed by the ERIC Clearinghouses as part of their regular acquisition/processing activities. It should be noted, however, that while the number of such files is few, they are hard to find, and they take much more time (and hence cost) to describe than do documents.

Discussion

The end result of the activities now in progress will be a new ERIC database of approximately 100 fully cataloged education-related statistical data files that are publicly available in machine-readable form. What should be done with this file? It could serve as the basis for a new, continuously updated ERIC file. Indications are, however, that the size of this file would, for the foreseeable future, be relatively small and would not justify a new online file on the part of the commercial online vendors (e.g. DIALOG).

Perhaps the best interim solution, until the file grows, would be to produce an annual "Directory of Education-Related Data Files", complete with extensive indexes.

The ERICSTAT Project fits with OERI's initiative to refurbish the nation's education-related statistical database. It also fits with ERIC's mission to make educational resources available to users. The data file archivists welcome ERIC's involvement. They want publicity and they want increased usage. ERIC can help provide them with both and they are being fully cooperative.

Samples of some completed data file descriptions are attached.

ABST_ The Migrant Student Record Transfer System (MSRTS) file is
a collection of education and health data on more than
750,000 migrant children in grades K-12 in the United
States (except Hawaii), the District of Columbia, and the
outlying territories of Puerto Rico and the Mariana and
Marshall Islands. The active file contains approximately
425,000 records as of 1987; the remaining 325,000 records
are contained in an historical file. The system was
started in 1970 and continuously collects data on migrant
students through a nationwide network of cooperating public
schools, medical facilities, migrant service organizations,
migrant office coordinators in each state education agency,
and a central office at the Arkansas State Department of
Education (Little Rock), where the master MSRTS file is
updated and maintained. As migrant students relocate with
their parents, the education and health communities in the
areas being moved into can obtain via MSRTS essential
educational and health data on the students received. This
permits them to concentrate on meeting the student's needs
and providing continuity of services rather than on testing
and determining what those needs are. When MSRTS receives
notification from an enrolling school, the student's
complete record to date is forwarded to that school. The
enrolling school will then add to that record during the
student's tenure with that school. By definition, a
migratory child is the child of a migratory agricultural
worker or a migratory fisherman whose family moves across
school district boundaries or from one state to another for
the purpose of finding temporary or seasonal employment.
Once this determination is first made and certified, a
certificate of eligibility is prepared and signed by the
parent/guardian, records clerk, and local superintendent.
This data is transferred by computer terminal to the MSRTS
data center in Arkansas, where the child is assigned a
unique 8-digit numeric code and a record is initiated. In

4093

the course of time, two classes of records are generated: educational data and health data. The educational data includes such fields as: educational skills, graduation requirements, recommended courses, most recent class schedule, secondary school credits, language for instruction, school history data, secondary school credits accrued, secondary schools attended, special education programs taken, talents, test data, etc. The medical and health data includes such fields as: immunization data, medical test results, health problems (acute and chronic), family medical history, allergies, prior health providers, etc.

Dear CIJE Coordinator:

As you may know, UMI Article Clearinghouse offers photocopies of articles from most of the periodicals indexed in CIJE. Details on our document delivery service are included in the Introduction to each CIJE issue.

In addition, we try to keep the individual ERIC Clearinghouses up-to-date on our service. With that in mind we are enclosing a copy of our current catalog and several copies of our mail order form for requesting articles. Please note that a list of the journals we make available matched against those indexed in CIJE begins on page 293 of the catalog. This list is updated annually. (In previous years we had published a handout of these journals that was available on request. Please note that the list incorporated in our '87 catalog supersedes all earlier lists.) Full bibliographic records for each periodical are given in the alphabetical list beginning on page 75. The Clearinghouse catalog may be a useful reference in your indexing activities.

The mail order forms may be supplied to your users who inquire about requesting article copies. This form has been designed to provide us with the information we need to fill orders. We require a full bibliographic citation to fill an order, the EJ number alone is not sufficient.

We'll be happy to provide you with more information or literature on request. Call toll-free 800/732-0616, or 313/761-4700.

Sincerely,

Sue Kennedy
Marketing Manager,
UMI Article Clearinghouse

MEETINGS, CONFERENCES 15

The ERIC Administrative Bulletin (EAB) is prepared by the ERIC Processing and Reference Facility on the basis of material submitted by all components of the ERIC system. EAB articles are reviewed and approved by Central ERIC before publication.

The EAB is intended to be the "journal" of the ERIC system and a major means for the decentralized components of ERIC to communicate and interact with one another. The EAB is also a permanent record reflecting most of the major events in the life of the ERIC system (such as personnel changes, Standing Order Customer changes, etc.) and providing in printed form essential documents (such as ERIC policy and priority statements, Clearinghouse scope statement modifications, ERIC Processing Manual revisions, etc.) Submissions to the EAB are to be sent (using the standard form) to your respective monitor. The deadline for input to each monthly issue is the 10th of the month.

ACTION ITEMS

ERIC Digests--Central ERIC Approves Technical Steering Committee Recommendations Concerning ERIC Digests

On September 10, the ERIC Technical Steering Committee presented Central ERIC with four suggestions concerning ERIC Digests. Central ERIC has reviewed those suggestions, finds them sound and valid and hereby approves them. The recommendations are listed below:

1. All very brief 1-2 page digest-type products should be formally labeled "ERIC Digest" on their front page. Any longer versions or variant formats of the same text should be labeled something else by the producing Clearinghouse. Needless to say, all ERIC Digests should carry the official ERIC logo.
2. All ERIC Digests should be processed for announcement in RIE and should also be transmitted to the "ERIC Digests Online" project (wherever it may be located) for entry into the EDO full-text online file.
3. When processed for RIE, all ERIC Digests should be assigned the existing Publication Type Code 071 (= ERIC Clearinghouse Publication).
4. In order to facilitate retrieval and referencing and to avoid the user confusion that would result from redundant numberings, all ERIC Digests should be given a unique report number consisting of: (1) the alpha prefix "EDO", (2) the two-character prefix for the publishing Clearinghouse, e.g. "HE", followed by (3) the year of publication (two digits only), followed by (4) the internal digest number. The resultant number will have the following form: EDO-HE-87-1. If the Digest is simply reprinted without change, it should carry its original number. If a Digest is revised substantially and then reprinted, it should carry a new number appropriate to the year in which it is reissued.

Since the above suggestions concern primarily the production of Digests and not their subsequent processing, the only recommendation that will be added to the ERIC Processing Manual (EPM) is recommendation #3 concerning the mandatory assignment to ERIC Digests of Publication Type Code 071.

...Central ERIC

Heavily Posted Identifiers (Descriptor Candidates)

The Jun87 Identifier Authority List revealed a substantial number of heavily posted Identifiers that need to be evaluated as candidate Descriptors. A list of these Identifiers, with postings updated through Aug87, has been prepared as Attachment 3. All terms in the list have 35 or more postings. Most should either be Descriptors or UF's, although a few might involve only postings transfers without actually being represented, per se, in the Thesaurus.

Terms from earlier lists of heavily posted Identifiers (Mar85, Mar83, and Oct81 EABs) that have yet to be evaluated for Thesaurus status are flagged with asterisks. Of these, some also carry an additional flag indicating fewer than 10 postings since the previous Mar85 list. Terms with this additional flag need a closer look to see why their usage has trickled off (e.g., are they obsolete?, have the former "hot" topics since cooled down?). Answers are needed from Clearinghouses responsible for the earlier heavy postings. Maybe the "Candidate Descriptor" status of these Identifiers is not so warranted; if so, they can be dropped from future lists.

Each Clearinghouse needs to take responsibility for its own terms. The Facility lexicographic staff has grouped the terms by Clearinghouse based on postings and/or scope area, and has previously distributed this information to the ERIC Vocabulary Review Group, so see your VRG representative if you're wondering where to start.

Also, once you've decided to tackle a subgroup of terms, duplication of effort can be avoided by distributing your chosen list (via E-mail, etc.) to the Vocabulary Review Group.

...Central ERIC

ERIC Processing Advisory--Abstracting

Lists

In the September 1987 RIE input the editors encountered a number of abstracts that contained lengthy lists entered in an incorrect format. The EPM (Section VI-16 and VI-25), is quite specific as to the format of such lists. Items in lists should be numbered and separated by a semicolon. Recently, lists have been submitted in abstracts that not only violate the punctuation rule, but that also violate the rule that "abstracts should be written in complete sentences" (EPM-VI-1).

Editors have encountered, for example, the following confusing format:

4127

"The document discusses five types of responsibility: (1) Supervision. Reviews curriculum guides; trains staff; and implements new curriculum. (2) Administration. Takes attendance; checks up on truant students; and is a liaison with the school board. Truancy was found to be a major responsibility. (3)..."

Lists such as this one are typically taken from the headers within the document and while the reader with the document in hand may easily follow such text, the same cannot be said for the reader of the abstract. Formats of this type can usually be easily reformatted to be not only clear and concise, but in complete sentences and in accordance with EPM guidelines, e.g.:

"The document discusses five types of responsibility: (1) Supervision (reviews curriculum guides, trains staff, and implements new curriculum); (2) Administration (takes attendance, checks up on truant students--truancy was found be a major responsibility, and acts as the school board liaison); (3)..."

Grammar

Abstracts should be written in the third person and should not contain references to "we" or "you"; for example, "we have an education department whose head is William Bennett." Such a statement should be changed to "The United States has an..." Please remember that ERIC is an international database with an international audience and contains documents from countries other than the United States.

Indefinite references to "it" should also be avoided unless the antecedent is very clear; frequently the editors encounter "it" and find it impossible to determine to what "it" refers.

Author Abstracts

Clearinghouses are reminded that whenever an author abstract is used the abstract should be sent along with the document. The inclusion of the abstract is needed in order to enable the editors to check the RIE abstract against the author abstract--that is, whenever an abstractor cites at the end of the abstract "(Author)" or "(Author/AA)" the abstract should accompany the document. If it doesn't, the Clearinghouse will be asked to send the abstract or the attribution will be changed. An author abstract should never be removed from the document, even if it is used in its entirety for the RIE abstract.

The abstract should never be attributed to the author unless there is an actual abstract written by the author. Use of the author's words, selected from different locations, does not constitute an author abstract. Phrases from book jackets or blurbs, prefaces, introductions, forewords, and conclusions should not be considered author abstracts.

Author abstracts that have been edited by the abstractor should carry the abstractor's initials after the word "Author." Lately, there have been instances where an edited abstract was attributed to the author but it was changed so much that the author would not have been able to recognize his or her own abstract. Neither selecting several sentences from an author's abstract, nor paraphrasing it justifies citing an abstract as an author's. Author abstracts that carry the abstractor's initials normally have spelling errors changed; may have augmentation to identify the population sampled, the population size, geographical area where the study was conducted; may spell out an acronym or abbreviation; or may have information as to appendixes, references, statistical data, etc., added at the end of the abstract. The idea is that the changes or additions should be such that the integrity of the author's abstract is essentially intact and the author's abstract as originally written is still clearly visible. If an abstractor changes the author's language, re-arranges sentences, etc., the abstract no longer is the author's, but is the abstractor's and no author attribution should be made.

Length

Clearinghouses are reminded that the maximum length of an ERIC abstract should be 200 words. (The exception to this rule is a "Table of Contents" type abstract, for example one listing papers in a proceedings.) As Clearinghouse abstractors have graduated to online processing, abstract length appears to have increased. The length of the abstract was established by ERIC years ago in order to keep the RIE publication size within practical limits. Abstracts running 250-300 words should be reduced; it is particularly disturbing to find abstracts of this length used to describe 5 to 10 page documents. Clearinghouses are asked to check their inhouse computer and determine the margin sets necessary to stay within 200 words. (For transmission to the Facility the margins should never exceed 75 characters, including keywords; a right margin of 70 is preferable so as to ensure that no data gets lost in computer processing.)

Data Accuracy

The accuracy of the data within the abstract is primarily a Clearinghouse responsibility. All the data in the record, but especially the data in the abstract, should be proofed for typographical errors. Whenever a new keyer or abstractor starts processing data, it is especially important that the data be proofed. Clearinghouses with abstracts containing many typos are generally contacted by telephone, but usually by then several weeks of input have been completed. The editors have encountered situations recently where there were so many typos that a resume required several readings in order to ensure that the data was accurate. Please proof your data.

PRICE CHANGES

Resources in Education -- Price Changes Announced by
U.S. Government Printing Office (GPO)

The U.S. Government Printing Office (GPO) has applied a new pricing formula to ERIC's abstract journal Resources in Education (RIE) and has informed ERIC that effective July 16, 1987 the new prices shown below apply. The price for an RIE annual subscription (12 monthly issues) has been reduced 9%, from \$56 to \$51. However, the price for single issues of RIE has been increased 100% (i.e., doubled, from \$8.50 to \$17). Efforts by Central ERIC to appeal the 100% increase in single issue prices have been unsuccessful. The message is clear. Subscribers should keep their subscription up-to-date and not miss any issues!

<u>RIE</u>	<u>Domestic</u>	<u>Foreign</u>
Annual Subscription (12 issues)	\$51	\$63.75
Single Issue	17	21.25

RIE Semiannual Index

Annual Subscription (2 issues)	\$20	\$25.00
Single Issue	15	18.75

...Carolyn Weller (ERIC FACILITY)

DIALOG Lowers Annual Subscription Prices for Archival Set of
OnDisc ERIC

On October 20, 1987, DIALOG Information Services, Inc., announced that, effective immediately, customers who subscribe to the complete archival OnDisc ERIC database (1966 to the present, 3 discs) can renew their license agreement for only \$950 per year. The initial one-year subscription for the complete ERIC database with quarterly updates, remains at \$1650. This reduction, from \$3450 to

\$950, for Dialog's repeatable annual license fee, represents a price drop of \$2500 or 72% and was clearly caused by the pricing schemes of the competitor organizations SilverPlatter and OCLC.

...Jim Prevel (Central ERIC)

ABSTRACT JOURNALS

CIJE Annotation Size

Oryx Press reminds the ERIC Clearinghouses that journal article annotations written for CIJE should be limited to 50 words (EPM, V-93). The computer processing system in use at Oryx Press currently permits a 10-word leeway. Any abstract over 60 words is targeted by the program for reduction by the CIJE editors.

... Carol Hunter (Oryx)

"Chronicle of Higher Education" Now Covered by CIJE

After years of requests from users, major articles in The Chronicle of Higher Education are now being indexed and annotated for CIJE.

The addition of The Chronicle to CIJE's offerings comes as a result of a special project proposed by the ERIC Clearinghouse on Higher Education and funded in late 1986 by the Office of Educational Research and Improvement. Although the coverage remains limited (approximately 10 articles per weekly issue), the inclusion of even parts of The Chronicle in ERIC is seen as a valuable service to the education community. Of particular interest has been the addition of the "Fact File" sections of the paper.

Continued coverage at the current rate is expected for the new Clearinghouse contract years beginning January 1988. If ERIC's funding picture improves in the future, more articles will be indexed, but backfile additions are not anticipated.

Reprints of Chronicle articles are available through University Microfilms International (UMI).

...Lynn Barnett (HE)

Australian Education Index (AEI)--List of New Journals Covered

The InterEd group (consisting of the British Education Index, Canadian Education Index, and Australian Education Index)

agreed last year to share lexicographic and journal coverage information. Since the agreement, the Facility has regularly received new journal titles from this group, but hasn't known what to do with the information. It has now occurred to us that perhaps it would be useful to circulate this list (via the EAB) to Clearinghouses on the chance that some of the journals should be covered by CIJE. Since the journals are usually domestic Australian journals, this is probably unlikely, but there may be some titles the Clearinghouses would nonetheless like to subscribe to. (See Attachment 1)

...Joanna Eustace (ERIC Facility)

Australian Education Index Recent User Survey--Should a Similar Survey Be Done For RIE Subscribers?

The Australian Education Index (AEI) recently sent out a survey form to all subscribers. They sent ERIC a copy as part of the InterEd exchange arrangement. It made us realize that the RIE subscribers have never been surveyed. Should they be? If so, what questions should be asked? What should ERIC try to learn?

The AEI survey form is reproduced as Attachment 2. If an RIE subscriber survey is ever done (and it would be easy to include such a form with the issue mailing itself), perhaps we can learn from the AEI form.

...Ted Brandhorst (ERIC Facility)

Microfiche Subscriptions That Are Limited to the Input of Specific Clearinghouses

The recent EAB news item on microfiche subscriptions for just the input of selected Clearinghouses has spurred enough interest that we have decided to present the whole picture. The table below lists each ERIC Clearinghouse and the number of subscription orders EDRS has (as of 8-31-87) for microfiche from each Clearinghouse:

<u>CH Prefix</u>	<u>Subscriptions</u>
CE	2
CG	2
CS	13
EA	7
EC	11
FL	5
HE	5
IR	4
JC	16
PS	17

...Vic Fortin (EDRS)

LEXICOGRAPHY

Random House Dictionary (Second Edition, Unabridged)

The first unabridged dictionary in 20 years has just been published by Random House. The Random House Dictionary of the English Language, Second Edition, Unabridged has over 315,000 entries with over 50,000 new words. The dictionary retails for approximately \$70.00, although it can probably be obtained at a discount. One discount bookstore in the D.C. area is currently offering it at \$44.44.

This new unabridged dictionary will be a primary authority the ERIC Facility editors will use to resolve questions of spelling, usage, etc. Clearinghouses may recall that if a non-English word can be found in an English unabridged dictionary it is not necessary to translate it in the abstract as the word is assumed to be in current usage.

...Jim Houston (ERIC Facility)

A Women's Thesaurus

Harper & Row announced in mid-October the publication of A Women's Thesaurus, containing over 5,000 controlled terms relating to women's studies and issues. Edited by Mary Ellen Capek, Executive Secretary of The National Council for Research on Women (NCRW), the thesaurus resulted from a 5-year collaborative project between NCRW and The Business and Professional Women's Foundation. Among the terms listed are:

- | | |
|--------------------------------|------------------------|
| Advice Columns | Learned Helplessness |
| Biological Clock | Momism |
| Cinderella | Needlework |
| Domestic Violence | Piecework Labor Policy |
| Economic Value of Women's Work | Radical Feminism |
| Fat Liberation | Superwoman Syndrome |
| Glass Ceiling | Wedding Nights |
| Institutional Sexism | Womanist Writing |

4133

Several displays in the new thesaurus were modeled on those used by ERIC. ERIC's educational/age level Descriptors were also used intact with few exceptions. The ERIC Clearinghouse on Higher Education was among the 62 organizations that served as test sites for the thesaurus. ERIC's contributions are acknowledged in the front matter.

Ordering information for the new thesaurus follows:

A Women's Thesaurus: An Index of Language Used to Describe and Locate Information By and About Women. Mary Ellen S. Capock, Editor.

1987 / 1088 pages / 7 1/2 x 9 1/2 / Hardbound / ISBN 0-06-181171-8 / \$37.50

Harper & Row Publishers, Inc.
10 East 53rd Street
New York, NY 10022
(800) 242-7737

Identifier Authority List (IAL) Supplement--A New Facility Product

On September 30, 1987, the ERIC Facility distributed to the ERIC system the first edition of a new product: a supplement to the Identifier Authority List.

The first IAL supplement reflected the August 1987 update of the June 1987 complete edition of the IAL. The additions and changes listed in the supplement came primarily from RIEJUL87, but a few were based on items in the Identifier backfile.

Future IAL supplements will be cumulative and will be issued after every file update done between printed complete IAL editions.

Identifier work is so voluminous that it would require its own lexicographer in order to do it properly. Since such funding support is unlikely to materialize, the IAL supplement is part of the Facility's effort to keep up with Identifiers as well as we can under the circumstances.

CLEARINGHOUSE NEWS

ERIC/CG Hosts Conference on School Counseling

ERIC/CAPS recently co-sponsored a very successful workshop with the American Association for Counseling and Development (AACD), Washington, D.C. Billed as the "20/20 Conference", the program looked at school counseling research, as represented in the ERIC database over the past twenty years, and into the future for the next

'twenty years. About 150 participants found the program pertinent and informative. David Pearce Snyder provided some opening remarks on research with a look at the future. Major papers were presented and were then discussed by reactors and the participants. The conference ended with synthesis papers and "reflections and projections" by Garry Walz.

...Dale C. Jerome (CG)

EA Cooperates With Two Regional Labs

In June, the ERIC Clearinghouse on Educational Management (EA) completed a project with one regional educational laboratory and began a project with another. From September 1986 to June 1987 we produced three extensive synthesis papers and three annotated bibliographies under subcontract with the North Central Regional Educational Laboratory in Elmhurst, Illinois. Jane Arends, the Lab's Director, sought EA's help in producing the materials because she knew of EA's experience in preparing information analysis products.

Following completion of rough drafts in January, each of the syntheses was critiqued by two or three experts chosen by the Lab and then revised accordingly. The titles are as follows:

Syntheses

- o Instructional Leadership: A Composite Working Model
- o Teacher Evaluation as a Strategy for Improving Instruction
- o From Isolation to Collaboration: Improving the Work Environment of Teaching

Annotated Bibliographies

- o Models of Instructional Leadership
- o Teacher Evaluation
- o The Social and Organizational Context of Teaching

These products are now being printed and will be marketed separately by the Lab and the Clearinghouse. A flyer listing the titles and prices appears as Attachment 4.

Also in June, Sandra Kirkpatrick, Director of Publication Services at the Far West Laboratory on Educational Research and Development in San Francisco, sought EA's cooperation in printing and marketing The Mentor Teacher Casebook, an innovative instructional format for training mentor teachers developed by Judith Schulman and her colleagues. The casebook makes use of vignettes of actual interactions between mentors and their trainees. The Los Angeles Unified School District has indicated that it will eventually need 1,000 copies of the casebook, and other districts are showing similar interest. The Clearinghouse's role is to oversee the typesetting, printing, and marketing of the casebook to our nationwide audience of school administrators.

4135

Two other casebooks will be printed and marketed by the Lab during 1988, and EA plans to collaborate on those as well.

... Stuart Smith (EA)

MISCELLANEOUS

Centers for Disease Control (CDC) Select Council Of Chief State School Officers (CCSSO) to Direct National AIDS Education Project

The Centers for Disease Control (CDC) is helping to direct the Government's campaign against AIDS. CDC has a small bibliographic database dealing with AIDS education that they have talked about with Central ERIC concerning possible cooperative endeavors. Recently CDC awarded the Council of Chief State School Officers a grant to assist SEA's to teach students about AIDS. This project will generate additional literature on the subject of AIDS education. The CCSSO Press Release on the grant is Attachment 5.

ERIC On CD-ROM: A Comparison of DIALOG OnDisc, OCLC's Search CD450, and SilverPlatter

The September 1987 issue of Online magazine contained an article by Jean Reese and Ramona Steffey of Vanderbilt University comparing the three existing systems offering ERIC on CD-ROM. The article is very detailed and informative and contains tables comparing the three systems feature-by-feature. The article is repeated, with permission, as Attachment 6.

... Pat Brown (ERIC Facility)

LATE BREAKING NEWS

ERIC Document Reproduction Service (EDRS) Price Increase

We received information on October 30, 1987 (see Attachment 7A) that EDRS had been granted a 5% price increase on the basis of reduced document volume. A revised "EDRS Product Cost Table" reflecting this increase is shown as Attachment 7B. These new prices will be instituted by EDRS immediately for all Standing Order subscriptions and all orders for Back Collections. However, they will not be instituted immediately for on-demand orders. The reason for this is that a second price increase (based on materials cost increases and labor cost increases) is pending and will probably be granted within 30 days. When this second increase is granted, the "EDRS Product Cost Table" will be revised again and the EDRS Order Form will be revised and reprinted.

4136

In other words, there is no action appropriate for the Clearinghouses or the Facility at this time. When the second and final price increase is announced, the Facility will put a notice in the EAB, in Interchange, and in the front of RIE. EDRS will revise and reprint the EDRS Order Form and will distribute stock of the form to the Clearinghouses. At that time, it will be appropriate for Clearinghouses to announce the new prices in their newsletters and other outlets.

...Ted Brandhorst (ERIC Facility)

PERSONNEL

Becky Ament Joins CE Staff

Becky Ament recently joined CE as a graduate research associate. Becky, who is working on a masters degree in adult education at Ohio State University, is assisting with Clearinghouse administration and various writing projects.

...Judith Wagner (CE)

New Personnel at ERIC/CS

SueAnn Kendall Crain began work on June 15, 1987 as user services/research assistant (writer/abstractor), replacing Sylvia Read (Taber), who took a position at the National Council of Teachers of English. SueAnn left the Ph.D. program in linguistics at the University of Illinois to join ERIC. In addition, Janet Craven replaced Jacqueline Dorney as full-time research assistant on August 3, and Joe Grohens replaced Amy Wallace as part-time research assistant. Joe and Janet join us after completing Master's degrees in English at the University of Illinois. We will miss Jacqui, who went to Pennsylvania, and Amy, who went to the University of Virginia for graduate study in writing. Please note these staff changes in your ERIC Directory.

Adrienne Lannom Replaces Mary Cote at EA

Replacing Mary Cote as Processing Coordinator at EA is Adrienne Lannom. Mary is now a graduate student in English literature at the U of O and still drops by to assist Adrienne. More information about Adrienne will be forthcoming.

Carol Pritchett, Administrative Assistant, has moved over and up in the U of O History Department. Her position has not been filled yet.

• What is the approximate size of the library associated with your organisation?

- Not applicable
- Under 5000 volumes
- Between 5000 and 20,000 volumes
- Between 20,000 and 50,000 volumes
- Between 50,000 and 100,000 volumes
- More than 100,000 volumes (please specify)

1

• How adequate is AEI in each of the following areas?

	Excellent	Very good	Satisfactory	Unsatisfactory
Accuracy	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Cost	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Currency	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Product information	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Indexing quality	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Subject coverage	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

• What educational level/s do you access most frequently in AEI?

Primary	<input type="checkbox"/>
Secondary	<input type="checkbox"/>
Post-secondary	<input type="checkbox"/>
Tertiary	<input type="checkbox"/>

• How often do you have problems obtaining copies after identifying documents through AEI?

Often	Sometimes	Rarely	Never
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

4

• Do you subscribe to the AEI printed version?

Yes No GO TO SECTION 7

• From what year have you subscribed to the printed Index?

19.....

• How often is it used? Daily Weekly Monthly Occasionally Never

• How is it used? (Please check each line)

For own use	<input type="checkbox"/>				
On behalf of others	<input type="checkbox"/>				
For reference	<input type="checkbox"/>				
Verification	<input type="checkbox"/>				
Inter-library loans	<input type="checkbox"/>				

• How often do you direct others to use it?

• To what degree would your users be affected adversely by a change in publishing frequency from quarterly to annual only?

Very Moderately Slightly Not at all

6

• If you are not already using the AEI database online when do you plan to do so?

Within 6 mths	Within 1 year	Unknown
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

5

• If you are not an online subscriber how important are these factors in your not being online? (Please check multiple responses if applicable)

	Very	Fairly	Not very	Not at all
Cost	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Lack of appropriate equipment	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Insufficient demand	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Printed version serves current needs	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Online access available elsewhere	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Other (please specify).....

• Do you use the AEI database online?

Yes No GO TO SECTION 13

• From what year have you been using the AEI database through AUSINET?

19.... (Note: the database became available in 1979)

• Have you ever previously subscribed to the printed version of AEI and cancelled because online access was available?

Yes No

7

• How often do you use the AEI database in the following ways? (Please check each line)

	Daily	Weekly	Monthly	Occasionally	Never
For your own use	<input type="checkbox"/>				
On behalf of others	<input type="checkbox"/>				
For reference	<input type="checkbox"/>				
Verification	<input type="checkbox"/>				
Inter-library loans	<input type="checkbox"/>				

• How often do you check the 'Australian Thesaurus of Education Descriptors' prior to searching online?

Nearly always Sometimes Rarely Never

• If you receive unsatisfactory search results how often do you? (Check multiples if applicable)

	Nearly always	Sometimes	Rarely	Never
Refine & repeat search	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Assume material not included	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Contact ACER	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Other (please specify).....

8

• How useful would you find online access to the 'Australian Thesaurus of Education Descriptors'?

Very useful Fairly useful Occasionally useful Not at all useful

• To what extent would access to material prior to 1979 be useful?

Very useful Fairly useful Occasionally useful Not at all useful

• How were you trained for searching AEII?

AUSINET course

Inhouse training

Self taught through reading manual

Other (please specify)

9

• How important is online access to information on Australian education for your organisation?

Essential Very important

Fairly important Not very important

• To which other local database networks do you subscribe?

AUSTRALIS ABN CLIRS

• Would you prefer to access AEII through another database network?

Yes No

• If yes, which one?.....

Why?.....

.....

• To which overseas networks do you subscribe?

Dialog Orbit BRS ESA

Other

11

• What is your organisation's total online budget approximately?

up to \$500

between \$500 and \$2,000

between \$2,000 and \$5,000

between \$5,000 and \$10,000

between \$10,000 and \$50,000

over \$50,000

• How do you charge for online searching?

All direct costs

Fixed cost per search

Other (please specify).....

• Does your online search policy limit searching to certain categories of use, a?

Yes No

If yes please give details

.....

• How often do you promote online search services to your users?

Often Occasionally Rarely

Never

• How often is AEII used online?

Daily Weekly Monthly

Occasionally

• What is your total of online use of AEII in hours per year (last year if possible)

..... hrs

10

• Is AEII the locally produced database you use most?

Yes No

• Do you use ERIC online?

Yes No

• Do you belong to a local online interest group?

Yes No

• Is the current AEII online format for citations satisfactory?

Yes No

12

• Does your organisation have a CD-ROM player?

Yes No

• How many CD-ROM players (that you could access) are in your organisation?

None One Two More than two

• How many IBM PC or IBM PC compatibles are available to you in your organisation?

None One Two More than two

• What CD-ROM products does your organisation own?

Bibliofile

Dissertation abstracts

ERIC

Grolier encyclopaedia

LISA

Psyclit

Socrofile

None

Others (please specify).....

13

• How interested would you be in having AEI on CD-ROM?

Very Fairly Slightly Not at all

• Would your organisation's use of AEI increase if you had access to it on CD-ROM?

Very much A fair bit Not much Not at all

• What is the minimum update frequency you would expect with AEI on CD-ROM?

Quarterly Halfyearly Annual

• How likely would you be to cancel your subscription to the AEI printed version if you purchased the AEI on CD-ROM?

Very likely Unlikely Uncertain

• In your organisation how is AEI rated overall for access to information on Australian education?

Essential Very useful Fairly useful Not very useful

• What suggestions do you have for future improvements/developments?

Please specify

Instructional Leadership and School Improvement

Synthesis Papers

Instructional Leadership: A Composite Working Model by James R. Weber, 62 pages. This synthesis translates research findings on instructional leadership into a working model for practitioners—principals, assistant principals, teachers, and others. *Working model* means a cluster of areas of concern in instructional leadership that can be discussed as specific behaviors, that is, as a leader's responses to real situations in real schools.

Teacher Evaluation as a Strategy for Improving Instruction by James R. Weber, 65 pages. A state-of-the-art survey, this paper begins with a review of the common practices of teacher evaluation and the alternative approaches developed since the 1960s. Then, the separate problems of the main participants in the process are analyzed, beginning with evaluators and then proceeding to teachers. Finally, attention turns to the mechanics of assessment and the recycling of results to simulate teacher development.

From Isolation to Collaboration: Improving the Work Environment of Teaching by James J. Scott and Stuart C. Smith, 85 pages. Using numerous examples of actual schools and teachers at work, this paper examines the work environment of teaching, focusing especially on the interactions among the adults in schools. Teacher collegiality and involvement in decision-making are two characteristics of "collaborative schools," whose norms encourage teachers to work together to improve their practice of teaching. The final chapter suggests ways for principals to promote collaborative norms and practices in their schools.

Annotated Bibliographies

Models of Instructional Leadership by James R. Weber, 22 pages.

Teacher Evaluation by James R. Weber, 25 pages.

The Social and Organizational Context of Teaching by James J. Scott, 31 pages.

Corresponding in content to the above synthesis papers, these bibliographies feature extensive annotations of the most significant literature published, for the most part, since 1980.

These products were prepared in 1987 by the ERIC Clearinghouse on Educational Management for publication by the North Central Regional Educational Laboratory, Elmhurst, Illinois.

FOR IMMEDIATE RELEASE
September 26, 1987

**CENTERS FOR DISEASE CONTROL SELECT COUNCIL
TO DIRECT NATIONAL AIDS EDUCATION PROJECT**

The Centers for Disease Control has awarded the Council of Chief State School Officers a \$302,000 grant to assist more than 35 state education agencies to increase the number of schools across the country which are teaching students effectively about AIDS.

The grant to CCSSO was one of the largest in a series of 42 cooperative agreements announced by CDC in the "School Health Education to Prevent the Spread of AIDS" program.

During the first year of the five-year project, CCSSO will conduct a nationwide survey to assess the current condition of AIDS education. The survey will determine current state policy on AIDS education, the number of schools now teaching students about the disease and the content of the classroom programs.

CCSSO will assist the states in preparing better instructional materials on preventing AIDS. The Council will run three regional training workshops for state education teams in January and February, 1988. The training workshops will address the following concerns:

- criteria for evaluating and adopting materials and curricula for implementing AIDS education.
- strategies for encouraging support for AIDS education among community groups, parents, religious groups, students and others.
- collaboration with public health officials to ensure accurate information and with community organizations to help in identifying needs and values of a particular locale and to assure the appropriateness of the education program.
- knowledgeable staff at the state, local and school building levels prepared to address the subject of AIDS.

COUNCIL OF CHIEF STATE SCHOOL OFFICERS
379 Hall of the States, 400 North Capitol Street, N.W., Washington, D.C. 20001 • 202/393-8161

AIDS EDUCATION

2-2-2-2

-- materials and strategies for special populations, particularly minority youth because of the disproportionate impact of AIDS on minorities. Materials for disabled students, limited English proficient students and youngsters in rural settings also must be developed.

Each state, with assistance from the Council, will initiate and begin implementing plans to increase the number of its schools teaching students about AIDS. Emphasis will be placed on incorporating AIDS education into comprehensive health education programs which will be locally determined, consistent with community values and appropriate to community needs.

In addition, CCSSO, which is linked electronically by computer to each of its state members, will establish an AIDS Bulletin Board, using the Edline Network. The bulletin board will be accessible to anyone with access to current CCSSO bulletin boards and/or to The Source.

Because of the critical need for educators and health officials to work together on this issue, a national task force of chief state school officers and state health officials from across the country will guide and advise CCSSO. Gordon M. Ambach, CCSSO executive director and a former commissioner of education in New York, will chair the task force.

Jane Kratovil, senior project associate with the CCSSO's Resource Center on Educational Equity, will direct the AIDS education project.

In all, CDC awarded AIDS education grants to 15 national associations, 15 state education agencies and 12 city school districts.

ERIC ON CDROM: A COMPARISON OF DIALOG ONDISC, OCLC'S SEARCH CD450 AND SILVERPLATTER

by Jean Reese

and

Ramona Steffey

Jean and Alexander Heard Library
Vanderbilt University

INTRODUCTION

In the past months, the library scene has been bombarded with literature concerning CDROM, a technology that has been touted as "the new papyrus," an information storage medium as revolutionary as papyrus was in its day. Though the new industry has not boomed as originally predicted, [1] it is witnessing the debut of many products of interest to libraries, from a variety of sources. For example, publishers such as R. R. Bowker, H. W. Wilson, and McGraw-Hill are exploring this new technology as an alternative medium to complement their print and online products. Noted software publisher, Microsoft, recently introduced a reference product and has been instrumental in promoting the growth and standardization of the industry. There are companies like SilverPlatter Information, Inc whose sole function is developing these products from machine-readable data, purchased from the original producers. The giant of online database services, DIALOG, also entered the market with their OnDisc product line, the first of which is ERIC. In April, OCLC released a version of ERIC and announced plans for other CDROM products. Initial fears of lack of standardization and compatibility have been somewhat allayed as almost all of the available products have similar hardware requirements and to some degree are interchangeable. The decision facing many libraries now, is not whether or not to buy CDROM products, but which product or products to buy.

The focus of this article is not to discuss the pros and cons of CDROM in general, although our experience with this technology has been very favorable. For a more thorough review of the costs and benefits of CDROM, we recommend Ralph Alberico's "Justifying CD-ROM." [2] Nancy Herther's "A Planning Model for Optical

Product Evaluation" offers excellent advice to anyone considering this technology and stresses careful review of available products. [3] Her article and Bonnie Snow's [4] contain checklists for evaluating CDROM products. To aid the selection process, we will compare the three versions of the ERIC database currently available: those of SilverPlatter, OCLC, and DIALOG.

BACKGROUND

The Jean and Alexander Heard Library of Vanderbilt University is involved in a two year Enhanced Information Access Project, partially funded by a grant of \$750,000 from the Pew Memorial Trust, to provide access to bibliographic and full-text files in electronic format, to the academic community. Optical disk technology is one of the modes of access being researched as a part of this project, and several different CDROM products are being used throughout the library system. The Education Library at Vanderbilt served as a test site during OCLC's product development, and had the opportunity to use several versions of their CIJE portion of ERIC, since August 1986. SilverPlatter and DIALOG both consented to lend us copies of their product for evaluation and the writing of this article.

USERS OF THE SYSTEMS

The three products are set up on separate workstations and are available for all users of the Education Library. Most of the patrons using the systems are graduate students and faculty members in the fields of education, psychology, human development, and library and information science. Uses of the systems range from short class papers to dissertation research. The reference staff makes frequent use of the CDROMs for ready reference and to prepare, supplement, and even substitute for online searches.

There is heavy traffic at the stations, especially during late morning and afternoons. We placed log books next to each workstation to monitor how often and for how long the computers were being used. Patrons were requested to sign their names, starting time, and ending time. As often as possible, we tried to remind patrons to sign in, but it is impossible to say everyone did so. Nevertheless, the results are impressive. The number of searches performed on the three systems was 482, with the individual statistics fairly evenly divided. SilverPlatter was searched most frequently (177), while OCLC (155) and DIALOG (150) were close behind. Amounts of time spent at an individual station varied from about two minutes to over three hours. It was not uncommon for a person to stay more than an hour at one

time. On many days, the stations were busy from opening time at 8:00 am until at least 9:00 pm, with very few idle gaps.

HARDWARE REQUIREMENTS

As the chart demonstrates, the hardware requirements for these products are similar. An IBM or compatible microcomputer (OCLC requires XT or AT) is the basic requirement. DIALOG requires only 384K, but recommends 640K. SilverPlatter has released a list of compatibles which have been tested, [5] and lists of others may be available by contacting the suppliers. We have had no problems using the Z-248 (AT-compatible, 512K) from Zenith Data Systems with any of the products. Only SilverPlatter does not require storage space on a hard disk. Each one can be configured for either Hitachi or Philips CDROM drives, but OCLC and SilverPlatter will also operate with Sony drives. (The DEC drive is actually manufactured by Philips and can also be used with all three.) The controller card and cable for the CDROM drive is usually included with the purchase or lease. (We did experience some problem of compatibility with an older model of controller card, CD-IFI2, with SilverPlatter's latest release and with DIALOG OnDisc, but the new card, CD-IFI3, works with all three.) Monochrome monitors will work with all, but DIALOG's product was designed to make use of color. We are using an amber monochrome monitor with the DIALOG disk, and have only noticed one screen where the command prompt is not clear. If we decide to purchase this system, we may decide to upgrade to a color monitor. A DIALOG representative states that about half of their OnDisc users are using color monitors. DIALOG's product also offers the capability of online access, which requires a Hayes-compatible modem and telephone line for connection. As outlined on the chart, each of the companies offers lease or purchase options for hardware.

INSTALLATION PROCEDURES

DIALOG OnDisc works with DIALOGLINK, their telecommunications software. With our demonstration CDROM, we received two components: the Communications Manager and the OnDisc Manager. The disks are not copy protected, and you (the installer) are advised to make backup copies of the disks and to use the backups during installation. To install the system onto the fixed disk, you are instructed to create a subdirectory for the DIALOGLINK files. Using the backup copy of the Communications Manager disk, you run the "configure" program and answer a series of questions about the type of equipment you have, and enter telephone numbers and passwords for

your DIALOG account(s). (If the Communications Manager has already been installed, you will need to run "configure" again to add the OnDisc Manager.) If the station is going to be in a public area and the online capability causes you some concern, you do have the options of "locking" the system into the CDROM modes or not entering your passwords into the communications manager. If the passwords are not installed and a user chooses the ~~Online~~ Search option, he will be prompted to enter his password before he can continue. The OnDisc Manager prompts you to enter which type of CDROM drive you are using (Hitachi or Philips) and adds the appropriate information to a CONFIG.SYS file in your root directory. If you purchase DIALOGLINK's Account Manager, it will also be installed at this time with the same type of menu approach. The documentation for the entire installation procedure is clear and the menus are straightforward. You always have the opportunity to return to previous questions and previous screens by pressing the appropriate keys.

SilverPlatter's installation procedure is also well documented and easy to follow. You will receive two floppy disks (a Setup Diskette and a Database Diskette) and a manual which includes step-by-step instructions for installing the system on computers with either two floppy disk drives, one floppy disk drive, or hard disk. The documentation encourages you to create a "system diskette" and run SilverPlatter from a floppy even if you have a hard disk. We found that to be good advice. (The CONFIG.SYS file required by SilverPlatter is different from the ones required by DIALOG or OCLC, so it is helpful to have SilverPlatter's system diskette from which to boot the computer if you only have one machine to run different systems.) You will begin by formatting a new diskette, which will become your system diskette. When you run the setup program, you will specify which type of printer you have (if any), which type of CDROM drive you have, the default number of citations which will be printed when the print command is issued, whether or not you want users to be able to exchange CDROM disks themselves, which SilverPlatter databases will be used at the station, and whether or not the station is to be "dedicated." Each time you answer a question, the program repeats your response so you can make sure you answered correctly before continuing. The entire process took us only 15 minutes and the system diskette was ready.

OCLC's installation was the simplest and fastest of all. Three diskettes are supplied, which you first copy to create working disks. With the first of the three disks in the a: drive,

you type ~~install~~ and the installation procedure begins. You only have to answer one question regarding which type of CDROM reader you have and the rest of the work is done for you. A directory for the Search CD450 system is created and files from each of the three disks (you are prompted when to change disks) are copied to your hard disk. A CONFIG.SYS file and an AUTOEXEC.BAT file are created and added to your root directory. If you have existing files with these names, you will have to rename them. The instructions for doing this are included. We started with a brand new computer for this installation and did not have to follow this procedure, so the entire installation took approximately ten minutes.

SCOPE/COST/TERMS

Each company covers the full range of ERIC with the exception of OCLC, whose RIE begins with 1967 rather than 1966. SilverPlatter and DIALOG have managed to get the full set on three disks, while OCLC's product will consist of four. For OCLC's field test, we used a single disk containing only CIJE records. The latest OCLC disk contains the full file of CIJE, 1969-1986, but also offers the choice of searching a "current" file, 1982-1986. Each producer offers quarterly updated subscriptions. Since we have not been full-fledged subscribers, we will not be able to evaluate their promptness with updates.

Readers following the ERIC CDROM trail may have witnessed the price war which has developed. SilverPlatter was the first to release ERIC with the initial price of \$1750 for the current subscription. After OCLC's announcement of their cost structure, SilverPlatter reduced its price. DIALOG's initial price was announced as \$1950 for the current disk, but was also soon reduced. The price for DIALOG's current subscription is still slightly higher than the others, but the biggest difference lies in their practice regarding the archival set. OCLC and SilverPlatter both offer a one time purchase arrangement for the archives, but DIALOG's package consists of a licensing fee which is paid each year. OCLC members are eligible for discounts on their product. Full pricing information is included on the accompanying chart.

SEARCHING THE SYSTEMS

Each of the systems provides sophisticated searching capabilities including free-text searching, field qualifications, Boolean logic, expansion of search terms, truncation, nesting, and proximity searching. SilverPlatter's and OCLC's are both command driven, while DIALOG offers two levels of searching: *Easy Menu Search* for the novice and *DIALOG Command Search* for the experienced DIALOG searcher. The chart

summarizes the search capabilities of the three systems, but a closer look at how they handle free-text searching, indexing, and Boolean logic is necessary for an adequate comparison.

DIALOG ONDISC

The initial menu of the OnDisc system offers the options of *DIALOG Command Search*, *Easy Menu Search*, *Online Search*, or *Return to DOS*. The first choice allows you to search using the DIALOG commands and is a useful feature for those already familiar with DIALOG. Our librarians have found it a quick and convenient way of using the system. New online searchers can refine their skills without the cost of actual online searching. Since most of the commands such as select, expand, limit, type, and save are executed the same as in searching DIALOG online, we will not elaborate on them.

Most end-users use the *Easy Menu Search* mode (Figure 1).

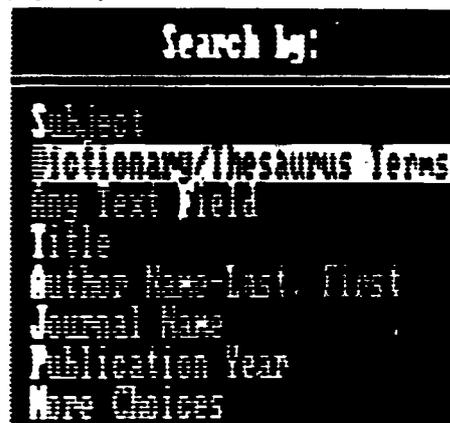

FIGURE 1

For the DIALOG OnDisc system, most end-users use the *EASY MENU SEARCH* mode, which begins with this screen display.

The selection of *More Choices* brings up a similar screen which includes the *Advanced Search Options* of Major (*) Descriptor/Identifier, Identifier, Abstract, Corporate Source, Language, Document Type, and Clearinghouse Code. Your choice from these screens will determine whether or not your search terms will be selected from an index display or entered directly as free text.

Free-text Searching

If you choose to search using *Any Text Field*, *Title*, *Major (*) Descriptor/Identifier*, *Identifier*, *Abstract*, or *Corporate Source*, you will be prompted to type in your terms. Words typed with spaces between them are searched as adjacent terms. You may also specify that two terms have one or two words separating them, which is particularly useful for omitting stop words, by inserting one or two periods between them. If you wish to

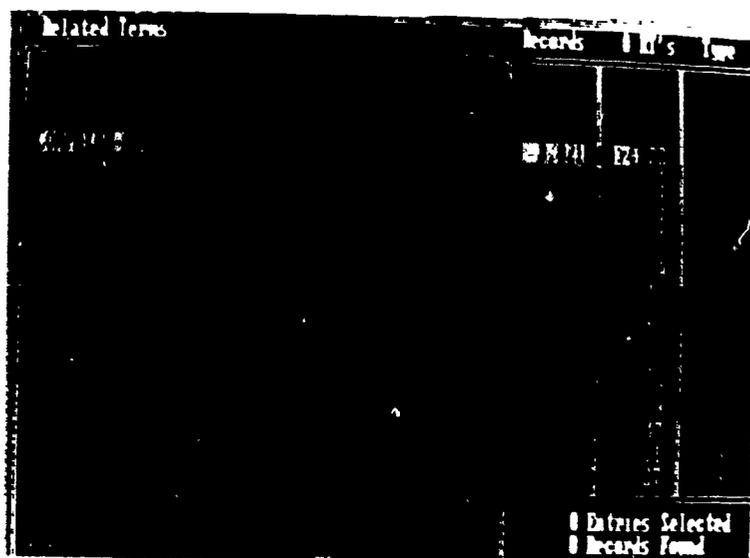

FIGURE 2

A very attractive feature of DIALOG OnDisc is the thesaurus option which offers lists of related terms. Similar to the online EXPAND, this index displays the number of related terms in a column next to the number of records.

search for words in the same sentence or same field, you may separate them with an "-" or an "+," respectively. Alternate terms ("or" combinations) are separated by commas.

The truncation symbol is the question mark in both the menu and command search modes. The screen displays each word being searched as a result of your truncation and the total number of hits for each term is displayed.

One field which is not searchable with DIALOG OnDisc is the accession or report number. Limiting to EJ or ED is possible in the Command Mode, but direct record access is not available in either mode of searching.

Selecting Terms from an Index Display

The selection of Subject, Dictionary/Thesaurus Terms, Author Name-Last, First, Journal Name, Publication Year, Language, Document Type, or Clearinghouse Code, results in an index display. When you begin typing a search term, the index opens to display an alphabetical list of words based on your query. You use the up and down arrow keys and press return to select the desired terms, then press F10 to enter them. If several terms are selected, they will be combined with "or."

A very attractive feature of DIALOG OnDisc is the thesaurus option which offers lists of related terms. Similar to the online expand, this index displays the number of related terms in a column next to the number of records. The expanded terms may be displayed by hitting the F2 function key and may be selected using the same technique described in the preceding paragraph (Figure 2).

Boolean Logic

DIALOG's Easy Menu Search allows for the combination of search statements using Boolean operations, but the menu approach handles the process in a very unique manner. After an initial set has been created, using the technique described earlier, the result is displayed and a menu appears (Figure 3).

FIGURE 3

DIALOG OnDisc's EASY MENU SEARCH allows for the combination of search statements using Boolean operations, but the menu approach handles the process in a very unique manner.

If you choose to Modify the current search with additional criteria, a menu of options for further modifying your search appears. The choice of Limit with additional concepts or terms results in the "AND" operation, while Include alternate terms results in "OR." To execute a "NOT" operation, you would choose Exclude unwanted terms. Either of these choices results in the display of the previous menu (Figure 1) and the

repetition of the same technique. There is no limit to the number of times you may modify your search. It is important to remember that the modification works only on the results of your last set. You may also undo an operation, for example when the result is too narrow, by selecting *Delete search steps*.

SILVERPLATTER

The SilverPlatter system is controlled by 14 commands. Ten of these (*Help, Find, Guide, Show, Index, Print, Restart, Exchange, Previous, and Next*) are activated by pressing one of the function keys, F1-F10. Four other commands (*Options, Clear, Transfer, and Quit*) are available only from the Command Menu, which is displayed when you press the *ESC* key. The system uses the *Find* mode to search the database and is automatically in that mode when booted up. If you get out of *Find* to use the index or to print or show records, you can return by pressing *F2 (Find)* or *F7 (Restart)*. The *Exchange* key is used when you wish to search a different compact disk of the SilverPlatter set.

Free-text Searching vs. Field Qualification

SilverPlatter automatically searches for words (free text) unless they are qualified with field tags. For example, you type *library in ti* to find records with *library* in the title. A complete list of the field abbreviations is available on the help screens and in the documentation. Words typed with a space between are searched as adjacent terms. You may also use the proximity operators *with* or *near* to locate words in the same field or same sentence. A number can be added to *near*, e.g. *near3*, to specify that words must appear within so many words of each other (in any order) in the same sentence.

The truncation symbol used on SilverPlatter is the asterisk (*). We have found that truncation should be done very carefully to avoid lengthy searches. For example, the search for *librar took about five minutes to execute.**

The truncation symbol used on SilverPlatter is the asterisk (*). We have found that truncation should be done very carefully to avoid lengthy searches. For example, the search for *librar** took about five minutes to execute. (DIALOG's skill in indexing pays off here. It took less than one minute to search *librar?* in *Any Text Field*.)

46 ONLINE September 1987

Selecting Terms from an Index Display

When you press *F3*, the *Index* function key, you may search for terms, to get an idea of the number of records containing them. Unlike DIALOG's separate indexes for specific fields, SilverPlatter's system has one index which contains single words, phrases, controlled terms, author names, and journal titles. It is particularly useful for authors because they are indexed and searchable only as bound phrases. Journal names and descriptors can be searched quickly as bound phrases, but are also double posted for free-text searching. One frustrating feature about SilverPlatter's index is the inability to page up. Another disadvantage is that terms cannot be selected directly for searching. You must return to the *Find* mode and retype the word or phrase you wish to search. Since the index screen disappears upon entering the *Find* mode, you must remember the exact form of the phrase when you retype.

Boolean Logic

The logical operators, "And," "Or," and "Not," are used to combine terms or sets. The user types in the search statements and includes the operator of choice. Nesting terms, for example, *television and (commercials or advertising) (television not (commercials or advertising))* is permitted.

The design of SilverPlatter's *Find* screen allows previous sets and their results to be displayed while entering a new search. You may use previous search steps to create new sets by specifying the set number; for example, *#1* refers to set 1. The last search set may be modified by simply beginning the next *Find* statement with one of the Boolean operators.

OCLC

The screen for OCLC's Search CD450 is divided into three rectangles: the query window, results window, and record window. Occasionally, additional windows (for example, help information, index display, and menu for selecting formats) are superimposed on the normal display. At the bottom of each window is a line of prompts referring to the specific function keys (Figure 4).

Free-text Searching vs. Field Qualification

Search statements are typed into OCLC's query window in much the same way as on SilverPlatter. Like SilverPlatter, terms are searched free text unless qualified with field tags. For example, to find records on Search CD450 with *library* in the title, you type *library:ti*. A list of the fields to be used is readily available by pressing the *F3* function key. Author names

are not bound phrases as they are on SilverPlatter and DIALOG. The tags **aa**, **la**, and **ll** may be used to qualify author names; **la** refers to the last name and **ll** the first.

Words typed with a space between them are assumed to be adjacent, although you may type **aa** if you wish. The order of the words is unimportant. For example, **adult literacy** will also retrieve **literacy adult**. One word of caution about free-text searching on OCLC: descriptor and identifier phrases are not double posted, but are only searchable as bound phrases. This practice can dramatically affect your search results as we will discuss more fully later.

OCLC's truncation symbol is also the asterisk, but as with SilverPlatter, we recommend caution in using it. Because of the large number of bound phrases in OCLC's index, searches using truncation can be very lengthy. The search for **liter*** took five minutes in the current file (1981-86) but took 25 minutes in the full CIJE file! As the search progresses and is tracked on the screen, you can see that it searches each phrase, combines it with the previous set, then searches the next phrase and combines it.

Selecting Terms from an Index Display

OCLC's index display, which you get by pressing **F2**, is like that of SilverPlatter, in that

single words, phrases, descriptors, author last names (remember, they are not bound), and journal names are all combined. You may use the up and down arrows to select terms and press **Tab** to copy them into your query window. This practice is much easier than SilverPlatter's requirement of retyping. Many journal names appear as bound phrases in the index, but this is very misleading because they must be searched as free text and qualified using the **aa** (source) field tag. For example, the search **journal-of-learning-disabilities** retrieves only one record, while **learning:aa disabilities:aa** retrieves 478. Another "fault" we have found with the index is the alphabetization of plural forms and bound phrases. As seen in Figure 5, bound terms like **day-care** come after words like **days** and **daytime**.

Descriptor terms are bound phrases and may be selected from the index or entered directly with the hyphen connecting multiple words. As we mentioned earlier, OCLC has decided not to double post these terms (despite our suggestion that it is highly desired). Therefore, you must take special care to use the system efficiently. The following searches (in the Current file) demonstrate how significant the difference in results can be. The search **mental-retardation** (unbound) retrieved 253 records. The same words, bound as **mental-retardation**, re-

OCLC's HISTORY WINDOW displays past searches and their results. Terms or phrases from the HISTORY WINDOW can be transferred to the new search by pressing the TAB key.

trieved 519. The combined set, *mental retardation: or mental-retardation*, retrieved 625 records. Experienced online searchers expect to find fewer numbers when limiting searches to descriptors rather than searching free text. As a matter-of-fact, the same words when searched on SilverPlatter resulted in 1409 records free text, and resulted to 733 records when bound. When limiting the sets (*mental retardation or mental-retardation*), the results on SilverPlatter were the same as for the unbound phrase set. As you might expect, the search for *retardation:su* on OCLC retrieved zero hits because the word *retardation* was not found in the bound subject phrase *mental-retardation*.

We feel OCLC's practice in indexing these phrases severely affects the product's value as an end-user system. It might be acceptable for trained searchers who could construct strategies to overcome this obstacle, but most of the patrons using the system are untrained and are likely to walk away with misleading results. We learned to keep a watchful eye on the searcher and put a sheet with examples and explanations of the best way to search next to the computer. A brightly colored sign alerts them to the helpful hints available. However, sometimes books or papers cover the table. And besides, people do not always read everything they should.

Boolean Logic

OCLC's use of "And," "Or," and "Not" and parentheses to nest terms is similar to that of SilverPlatter. Previous sets can be re-searched and combined with other sets or terms by typing the set number and an exclamation point. For example, 11 refers to set 1. However, the query window only displays the current search statement. Previous sets can be viewed by using the **History** function key. Terms or phrases from the history window can be transferred to the new search by pressing the **Tab** key (Figure 6).

DISPLAYING AND PRINTING SEARCH RESULTS

On OCLC, the first record appears in the record window as soon as a search is completed. On the other two systems, the user must issue a command to display a record. The **F4**, **Show**, key is pressed on SilverPlatter to display records, while **F8** is pressed to print. The options of **Display the records found on your monitor OR Print, Sort, or Transfer records found** appear on the DIALOG activity menu.

Formats

OCLC and DIALOG each have predefined formats for displaying and printing records. The user selects from a menu of the available formats (Figures 7 and 8).

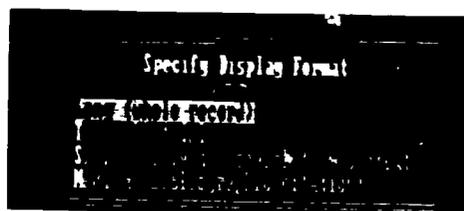

FIGURE 7
DIALOG predefined format

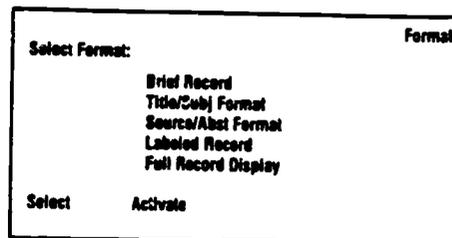

FIGURE 8
OCLC predefined format

Patrons often scan brief displays to select titles before displaying or printing fuller records.

SilverPlatter does not have a menu of set formats, but allows you to customize by selecting fields you wish to display or print. In the **Show** mode, there is a default of **All**, or full record, which results if no specific fields are chosen. The default format for printing is the citation, **Cite**. We have found that most patrons do not care to display or print the complete records, which contain some unnecessary fields. We often recommend using the citation plus an abstract, which is chosen by typing **Cite,ab**.

Selecting a format is probably the one feature that novice users have the most trouble with on SilverPlatter. The choices and combinations sometimes seem troublesome to the first-time user, but offer a great deal of flexibility after you get accustomed to the system. Another problem that novices encounter is the necessity to tab over to select the number of records to be shown or printed. It is so easy to forget and mistakenly accept the default of **All**. For that reason, we set the default very low (ten records) when we were installing the SilverPlatter system. The default can be overridden by specifying the exact number of citations you want, e.g. 1-25.

Sorting

DIALOG and SilverPlatter sort the records according to type (journal articles or ERIC reports) then sub-sort the two sets so that the most recent ones of each type are displayed first. DIALOG displays **ab** numbers first, and

offers the user the option of additional sorting by author, title, journal name, or publication year. SilverPlatter displays **ED** numbers first and offers no sort capability. OCLC has a unique feature of sorting records based on their "score" which is derived by counting the number of times the search term appears in the record. Items with the highest scores are displayed first. Also available on the OCLC system is a "graph" which shows how each record's score compares to others in the set. We have not found this "unique" feature to be very useful and prefer the chronological arrangement used by the other two companies. When searches are done using descriptors only, all of the records have identical scores and are displayed in chronological order similar to the other systems, except that the newer records are last rather than first!!!

We have also noticed that OCLC's product sometimes displays duplicate records. With descriptor searches resulting in over 100 hits, we often found records #100 and #101 to be duplicates.

Printing

Selections of records to print or printing all records is available with all three systems. The print option is selected from the DIALOG activity menu, and activated by **Print** function keys on OCLC and SilverPlatter. When you hit the print function key on OCLC, a window opens to ask you which records you wish to print. Because of this feature, you may print records as you see them on the screen and not lose your current search. In DIALOG and SilverPlatter, it is not practical to print one record at a time because the functions of searching, displaying, and printing are more isolated. You do not lose your search strategy when you display or print records with any of the three systems.

Downloading to a floppy disk or to the hard disk is available on all three systems. . . most of the users who want to download, have asked the reference staff for help, no matter which system they were using.

DOWNLOADING

Downloading to a floppy disk or to the hard disk is available on all three systems. DIALOG and SilverPlatter allow the searcher to name his file. OCLC assigns the name **SAVEFILE.n**, where "n" is a number assigned by the computer.

DIALOG has the "transfer" option clearly displayed in the menu concerning displaying, printing, or modifying search results, making it easy for a user to make the choice to save to disk. OCLC has a help screen menu which includes **Saving to disk** as one of the choices. SilverPlatter also has information available in the documentation and on help screens about how to save to disk, but requires a little more digging by the searcher to get it. Most of the users who want to download, have asked the reference staff for help, no matter which system they were using.

DOCUMENTATION AND USER SUPPORT

Success in getting started with any new product depends largely on the quality of its documentation. All three systems supply toll-free telephone support, onscreen help, and a printed manual. SilverPlatter's manual, which is arranged in a looseleaf notebook, is the most polished of the three. It is also the only one that contains a tutorial section. Although at first glance this manual appears to cover all the commands, a great deal of information is left out, or is difficult to find, even though it is the only one of the three that does contain an index. However, in all fairness, SilverPlatter has a wealth of information about the system commands, the database you are searching (in this case, ERIC), and search strategy on its many, many help screens, which are function key specific. That is, you may hit the **F1 (Help)** key at almost any point in a search and receive appropriate information. For example, if you are in the **Find** mode when you press **F1**, the help screen will tell you about the **Find** command. There are actually 16 screens at this command.

OCLC's and DIALOG's manuals are still in draft stage, but are both very thorough in explaining how to use the systems. Since DIALOG has two distinct search modes, there is a specific section on each. DIALOG also provides detailed information on the ERIC database. Copies of the DIALOG Bluesheet and database chapter are included. DIALOG and OCLC also provide a shortened brochure or guide for quick facts and tips on how to search. Novice users find these useful since it can be time-consuming and somewhat frustrating to have to sort through the material in the manuals. However, it is very unfortunate that OCLC's *Quick Reference Guide* fails to mention or give a single example of bound descriptors. Our previous discussion of these emphasized how crucial it is to inform users of OCLC's indexing philosophy.

Like SilverPlatter, DIALOG and OCLC have function key specific help. These two systems also have an option for reviewing help screens

available by selecting them from a menu. In many ways, the help screens for OCLC and DIALOG are more concise and easier to follow. Since the choice for help is displayed in a menu, it is easy to locate and use.

Online searching has decreased since installation of the CDROM workstations, especially since ERIC is one of our most frequently searched databases online.

EFFECTS OF CDROM IN THE EDUCATION LIBRARY

Online searching has decreased since installation of the CDROM workstations, especially since ERIC is one of our most frequently searched databases online. From July to December 1985 we ran 322 searches, 157 (49%) of which were ERIC requests. For the same time period in 1986, we did 140 searches, 68 (49%) in ERIC. We cannot say that installation of the CDROMs is the only factor in reduced online searching. Nevertheless, it must be considered as having an important impact. With CDROM technology available in our library, patrons now have the option of searching for themselves for free, or having a search run by a librarian. Our surveys have found that many patrons are doing searches on the CDROM who would not have paid for online searches. We may find online searches in ERIC will focus more on updating the CDROM searches, rather than an exhaustive search of the entire database.

The reference staff has spent much time instructing patrons in the use of CDROMs. Instruction may include a complete overview of the system, as well as help with search strategy, or a simple explanation of a particular function. We spend from a minute or so up to 30 minutes or more with people. Because the workstations are arranged in the middle of the Reference area, we have not held many group sessions for bibliographic instruction. We find we spend much less time instructing students in the use of the printed indexes. Once aware of the computers, most patrons choose to do their research on one of them. The Reference department has not required a scheduling nor set time limits on the use of the CDROM stations this year. Because we may only have two workstations available soon, and many of the search sessions have been so lengthy, we may decide to set time limits in the future. We do not charge for paper to print records, but do require patrons to provide their own floppy

disks for downloading. The staff encourages browsing through records first before printing, and recommends saving to a floppy disk if there are several hundred to print.

SUMMARY

All three companies offer a good product with the capability of searching ERIC a bit differently. OCLC's unique use of windows makes it special. The ability to use an expert as well as novice mode with DIALOG OnDisc expands the possibilities for experienced searchers. SilverPlatter's customized formats, while they require some getting used to, do allow for a great deal of flexibility in displaying or printing results. OCLC's and SilverPlatter's prices are competitive while DIALOG's leasing arrangement forces you to pay every year for the same archival disks. We feel confident with the accuracy and comprehensiveness of results from SilverPlatter and DIALOG OnDisc, but OCLC's indexing procedure causes us some concern. The searcher must be well informed on the appropriate way to search in order to achieve the most accurate results.

Now that our trial period is coming to an end, we are faced with the decision of which product to purchase. As far as overall char-

We like DIALOG OnDisc best. . . we hope to persuade our director to purchase the current ERIC from DIALOG and get the backfile and annual update of ERIC from SilverPlatter.

acteristics, we like DIALOG OnDisc best. It is a flexible and powerful system for searching ERIC, both for the novice and the experienced searcher. The capability of updating a search online is convenient and readily available. The OnDisc thesaurus also enables users to easily choose related terms for a comprehensive search. The fact that PsycLIT is also available on SilverPlatter, and is another CDROM we are purchasing, makes the decision of which ERIC to buy more difficult. While our users have not objected to having different systems to learn, having only one search technique to teach would simplify the work of the reference staff. We hope to persuade our director to purchase the current ERIC from DIALOG and get the backfile and annual update of ERIC from SilverPlatter. One workstation would then have DIALOG OnDisc only, while another would have ERIC and PsycLIT both from SilverPlatter. ▶

1987 September ONLINE 51

4163

We feel lucky to have had the opportunity to carefully compare all three products before making our decision, and hope that our observations may help others facing similar decisions. We highly recommend hands-on demonstrations with any of the products you are considering for purchase. Ultimately the choice should be based on your library's particular budget and needs.

CDROM technology provides another means of accessing the world of literature. It saves time, money, and increases the depth of research for students and faculty. We feel the technology enhances the printed indexes, but should not be viewed as an absolute end. Reference staff must make sure patrons use all reference tools available, not just the computerized ones. We look forward to using CDROM databases in our library and hope to

see continued progress in this technology as more products become available.

THE AUTHOR

JEAN REESE is the Public Services Librarian at the Education Library of Peabody College, Vanderbilt. In this position, she is involved in reference services, online searching, bibliographic instruction, and collection development. She holds a B.A. from Furman University, M.A. from the University of Georgia, and M.L.S. from Vanderbilt University. Before assuming her present position, she worked in the education profession.

RAMONA J. STEFFEY received her M.L.S. from Vanderbilt University and previously worked as a Reference Librarian and Engineering Bibliographer in Vanderbilt's Sarah Shannon Stevenson Science Library. Her current position as Automation Project Librarian is a two-year term appointment related to the Enhanced Information Access Project, funded by the Pew Charitable Trusts. In this position, she is coordinating the use of CDROM technologies in all the Vanderbilt libraries and is liaison with NOTIS staff in developing an interface for searching a locally-mounted subset of MEDLINE on Vanderbilt's NOTIS system. She is co-editor of a monthly newsletter for the Jean and Alexander Heard Library's Microcomputer User Group.

Communications to the authors should be addressed to Jean Reese, Public Services Librarian, Education Library, Box 325 Peabody Station, Vanderbilt University, Nashville, TN 37203; 615/322-8248; and/or Ramona Steffey, Automation Project Librarian, The Jean and Alexander Heard Library, Box 155 Peabody Station, Vanderbilt University, Nashville, TN 37203; 615/322-7125, or on DIALMAIL 15852.

FROM: Vic Fortin

SUBJECT: Revised EDRS prices

DATE: October 30, 1987

EDRS has been granted a 5% across the board price increase effective October 01, 1987.

Effective immediately all Standing Orders and Back Collections will be billed at the new prices. Attached is the approved ERIC Product Cost table.

A subsequent increase to reflect permissible cost increases in the film base and revisions to the Department of Labor (DOL) prevailing wage determination is expected within the next 30 days.

If and when this subsequent increase is granted, the ERIC Product Cost table will be revised again and we will revise the EDRS Order form to reflect the most current prices.

JUST ANNOUNCED

STONEHILL BECOMES NEW DIRECTOR OF ERIC

Robert M. Stonehill became the new Director of ERIC on December 20, 1987. He has been with the Department of Education and its predecessor, the Office of Education, since 1976. Most recently, he has been coordinating ERIC Redesign activities and the ERIC Clearinghouse competitions. Previous to his ERIC experience, Bob was an Educational Evaluation Specialist and then an Acting Division Director in the Department of Education's Office of Planning, Budget, and Evaluation; a Research and Teaching Associate at the University of Colorado; and an evaluation consultant to the National Assessment of Educational Progress (NAEP), as well as to other programs. He has also been a mathematics teacher and a New York City taxi driver! Bob has a B.A. from Queens College, City University of New York. His Master's Degree and Ph.D. are from the University of Colorado, where he did his major work in educational research (including design, statistics, measurement, and mathematics).

...Kevin Arundel (CERIC)

ACTION ITEMS

ERIC Technical Steering Committee Recommendations (from mid-1987 Meeting) and Responses to Them from Central ERIC

The June 1987 recommendations from the ERIC Technical Steering Committee and responses from Central ERIC are as follows:

87-3 RECOMMENDATION: Annual National Technical Meetings. Provide for 2 1/2 to 3-day annual tech meetings that would include one day devoted to training and professional development issues. Hold smaller regional meetings in addition to the national.

CERIC ACTION: Disapproved. RFP calls for a 2-day national tech meeting held biannually, alternating with regional meetings.

87-4 RECOMMENDATION: Microcomputer Tutorial on ERIC. Provide a status report on CERIC action on a microcomputer tutorial in development stage at San Francisco State University (project director Harriet Talan had asked for ERIC review).

CERIC ACTION: Approved; referred to Don Ely for action as possible special project. "ACCESS ERIC may also become involved in the program."

87-5 RECOMMENDATION: Documents from Labs and Centers. Gather in one place (preferably CERIC, who would forward them to the Facility) all documents originating from Labs and Centers in order to get them into ERIC in a timely manner.

CERIC ACTION: Approved; referred to Nancy Krekeler for action. "An OERI policy was established stating that the contracting officer's Technical Representative (i.e., project monitor) is responsible for forwarding seven copies of final reports or two copies of products to CERIC. ERIC Facility will receive one copy of all submissions. A meeting shall be scheduled with CERIC and Lab/Centers Institutional Liaison to discuss the acquisitions policy."

87-6 RECOMMENDATION: CERIC Acquisitions Personnel. Designate a person whose primary responsibility would be to monitor the ED and OERI (including Lab and Center) literature for inclusion in the ERIC database.

CERIC ACTION: Approved; referred to Nancy Krekeler for action. "Nancy Krekeler will be coordinating those activities for CERIC. She will be contacting each Clearinghouse for input and assistance."

87-7 RECOMMENDATION: EDRS Marketing Materials. Investigate whether a review process can be built into the production phase of EDRS marketing materials before they are printed and distributed in bulk.

CERIC ACTION: Approved; referred to Jim Prevel for action. A review process will be instituted, although "EDRS is a private contractor and our contractual agreement does not include a provision for final approval of marketing materials."

87-8 RECOMMENDATION: ERIC Logo on Displays. Require all Clearinghouses to have the ERIC Logo prominently displayed on all exhibits, including standup table exhibits.

CERIC ACTION: Approved; referred to Alberta Jett for action and distribution of appropriate ERIC Logos.

87-9 RECOMMENDATION: RIE Remove/Delay Reporting. Have the Facility give in the EAB the reason for a document's delay or removal from RIE.

CERIC ACTION: Approved; referred to Jim Prevel for action. Facility will add explanations.

87-10 RECOMMENDATION: CIJE Editing. Include in the Facility's RFP a requirement for editing CIJE as well as RIE input.

CERIC ACTION: Approved; referred to Jim Prevel for action.

87-11 RECOMMENDATION: EDRS 800 Telephone Number Promotion. Encourage publicizing of "800-227-ERIC" telephone number, emphasizing "227-ERIC" rather than "227-3742."

CERIC ACTION: CERIC will negotiate further with EDRS.

87-12 RECOMMENDATION: Institutional Source Directory Distribution. Have the Facility distribute to the Clearinghouses two copies of each new edition.

CERIC ACTION: Approved; referred to Jim Prevel to be added to the new Facility RFP.

87-13 RECOMMENDATION: In-house Indexing Practices: Information Dissemination. Authorize the Steering Committee to collect from each Clearinghouse a list of in-house guidelines regarding when and how to apply scope-specific indexing terms; these would be compiled in a small handbook for system-wide distribution.

CERIC ACTION: Approved; referred to Lynn Barnett for action.

87-14 RECOMMENDATION: Joint National Tech Meeting/COED Meeting, 1988. Schedule the meetings back-to-back in a way that allows significant overlap time for active discussion between the two groups. NOTE: The Steering Committee has reserved May 16-18 for the National Technical Meeting; at its May 1987 meeting COED planned its next meeting for May 19-20; the Technical Steering Committee and COED Executive Committee are calling for a joint evening social May 18 and a joint morning session May 19. The purpose of this recommendation was to institutionalize the idea of joint meetings in the interest of improved system operations.

CERIC ACTION: Deferred. "We are considering this recommendation in planning 1988 meetings and will make every effort to allow for overlap."

...Lynn Barnett (Steering Committee)

CIJE Schedule for 1988

The CIJE Schedule for 1988 was recently received from Oryx Press and is reproduced here as Attachment 1.

...Jim Prevel (CERIC)

New Publication Types in the ERIC Database

Beginning with the January 1988 issue of Resources in Education (RIE), two new Publication Types will begin appearing in RIE. Notice has gone out to all the online and CD-ROM vendors, who are in turn announcing the information to users in their respective newsletters. The notice that appeared in ORBIT's Searchlight newsletter is shown on the following page.

New Publication Types in ERIC

Beginning in January 1988, two new Publication Types will be added to the list of permissible types in the ERIC database. The description of the two types are as follows:

072 - Book/Product Reviews

This code will be used primarily for lengthy book reviews involving major works. It may also be used for product reviews, e.g., software reviews. This code will be used infrequently.

102 - Machine-Readable Data Files (MRDF) - This code will be used for data files involving education-related data. These will usually consist of one or more magnetic tapes available via data archiving organizations, e.g., ICPSR, NARS, etc. This addition reflects the first time that non-print media has been allowed into the ERIC database. This code will typically be used 3-4 times in each RIE issue.

ERIC Facility Needs Old RIE Issues

During the Facility's move last December, the movers inexplicably lost the box containing the display copies of the very early issues of RIE (1966-1969). If any Clearinghouse has extra copies of these early RIE issues (or even a complete set!), we would be very grateful for them.

In addition, there are some older issues that are now completely out-of-stock at the Facility. If you should have any extra copies of the following RIE issues, please donate them to the Facility. We are constantly in need of old issues to respond to the requests of librarians that are missing issues:

RIE Issues Out-of-Stock at the Facility

November 1975
October 1975
September 1975
January 1974
March 1973
October 1972
September 1971
April 1971
March 1971
November 1966--December 1969 (all issues)

...Cindy Lacey (Facility)

PROCESSING ADVISORIES

ERIC Processing Manual (EPM)--New Processing Personnel Must be Trained in Use of the EPM

The ERIC Processing Manual (EPM) is the primary tool that binds the network of 18 ERIC components (16 Clearinghouses, the Facility, and EDRS) into one operational system. Central ERIC has seen indications that, at times, new staff at the Clearinghouses are neither made aware of the importance of the EPM, nor well trained in its use.

It is vital that all Clearinghouse personnel, both new and experienced, consistently follow EPM guidelines when processing documents for the system. That is the only way to maintain a unified and integrated database. More importantly, we must remember that the purpose of ERIC is to serve the information needs of our users. In order to use the system most effectively, users must be assured of consistency in abstracting, cataloging, and indexing.

All Clearinghouses originally received five (5) copies of the EPM, so there should be an adequate number of copies available for the staff to use. All new personnel should be introduced to the EPM when they start their new assignments and Clearinghouse supervisors should monitor the work of new staff to ensure that the EPM is being followed.

...(CERIC)

Preparing Documents for Shipment to the Facility

The Facility is finding a number of damaged or loose pages in documents that arrive for inclusion in RIE. Please use care when preparing documents for shipment to the Facility. Using the following procedures will help assure that documents remain intact throughout processing.

1. Please check all documents to make sure they are complete and securely fastened before shipping them to the Facility.
2. Use staples, metal clamps, or rubberbands to secure documents. Please do not use paper clips because they will often adhere to other documents, causing pages to fall out, get out of sequence, or to get damaged. The Facility simply does not have enough staff to check every document page-by-page, consequently, pages that are out of sequence or missing may not be noticed.
3. Please do not use butterfly clips to secure documents. They can cause problems by tearing pages or cause documents to become attached to one another.
4. When using staples, please make sure the staple goes through the document completely, so that the last pages are firmly attached to the document.
5. If a document is very large and too unwieldy to staple or clamp, please wrap the document in paper (not newspaper because the print can "bleed") and secure it with two or more rubber bands.
6. Documents should fit snugly into a box or jiffy bag for shipment. Either overpacking or loosely packing documents can cause damage to them.
7. Documents should be packed in the same sequence as listed on the accompanying logsheet.

...Miren Loveland (Facility)

Recording Clearinghouse Accession Numbers on Documents Submitted for RIE

Clearinghouse Accession Numbers that are recorded on documents should be regarded by Clearinghouse staff as permanent numbers requiring some neatness and care. Clearinghouse Accession Numbers appear on the permanent ERIC microfiche along with the final stamped ED Number. While Clearinghouses are not required to stamp Clearinghouse Numbers on the documents, reasonable care should be taken to make the numbers neat and legible.

Numbers should be printed clearly in black ballpoint on the lower left hand corner of the document. (The upper left hand corner is reserved for the ED Number.) The numbers should be parallel with the left side of the page. Pencil or colored inks should not be used because the former may smear and the latter frequently will not copy well. The numbers should be printed so that everyone from Clearinghouse, personnel through the Facility

staff and, finally, the EDRS staff that film the documents, can easily read the numbers. If the title page or cover on which the number is to be placed is a dark color, the number should be first written on a label with a white background and then placed on the document.

Trends and Themes in Career Guidance and Counseling Field Outlined and Defined by Garry Walz (CG)

An essay entitled "Trends and Themes in Career Guidance and Counseling Literature in the Last Decade", by Professor Garry R. Walz, Director of the ERIC/CG Clearinghouse, was recently published in the Bulletin of the International Bureau of Education. The issue is organized around the theme of educational and vocational guidance. In his essay, Dr. Walz points out that there has been an increasing recognition of the importance of career guidance in recent years with attendant changes in the climate in which career development occurs, the resources available for counselors and teachers, and the number of people who express interest and participate in career guidance programs. Copies of the publication are available through the International Bureau of Education (IBE), P.O. Box 199, 1211 Geneva 20, Switzerland.

Kuwait Embassy Invites SP and HE to "Academic Year" Reception

Margaret Mann, SP Associate Director, and Vi Walker, HE User Services Coordinator, attended a reception at the Kuwait Embassy, Washington, D. C. on the evening of October 29. The occasion celebrated the start of the Kuwait Academic Year (1987/1988) and was hosted by Dr. Musaed R. Al-Haroun, Cultural Counselor of the Embassy of the State of Kuwait.

Because Kuwait has made a priority item of education (and more specifically of higher education), HE has responded on numerous occasions to requests for discussions about the ERIC system and for computer searches. Kuwait University is currently considering obtaining ERIC on CD-ROM.

It was an extremely successful gathering and the food was superb.

ARTICLES ABOUT ERIC

"ERIC, The Information Source"--Article by Fred Risinger (SO)
Finds Practitioner Usages Abound

Attachment 4A is a forceful statement by the Associate Director of the SO Clearinghouse to the effect that practitioners use ERIC (at least in his baliwick) every bit as much or more than do researchers. The specifics used to back this claim will be of interest to virtually all ERIC staff.

...Ted Brandhorst (ERIC Facility)

"Experiencing CD-ROM ERIC"--Article by Lucie Olson (TM) in
Education Libraries (Fall 1987)

The Fall 1987 issue of Education Libraries (Vol. 12, No. 3, p. 77-80) contains an article by Lucie Olson of TM that describes her experience with DIALOG OnDisc ERIC. The article is of special interest vis-a-vis the teaching of novice searchers and is reproduced here as Attachment 4B.

...Joanna Eustace (ERIC Facility)

"DIALOG OnDisc: ERIC"--Article by Margaret Morabito in CD-ROM Review (November/December 1987)

This article (re-printed here as Attachment 4C) is very short and is primarily of interest for the sidebar entitled "What You See is What You Get." This sidebar illustrates how computer searching can expose the typos and other errors that a database lets through its quality control filters.

NOTE: The Facility is investigating the anomalies cited and is making backfile corrections where appropriate.

...Pat Brown (ERIC Facility)

VISITORS

USSR Delegation Visits SE

A delegation from the USSR, under the "US-USSR Agreement on Cooperation in the Field of Environmental Protection" visited Ohio State University and ERIC/SMEAC in October. The delegation was headed by Professor N. Egorov, Vice-Minister of Higher and Specialized Education of the USSR. Members of the delegation were:

Professor Dmitri N. Kavtaradze, Head of Lab Ecology and Nature Protection, Biological Faculty, Moscow State University;

Professor Y. Kotov, Department of Nature Protection and Ecology, University of Kazan;

Professor Y. A. Lejkin, Department of Industrial Ecology, D.I. Mendelejev Institute of Chemical Technology;

Professor Valery S. Petrosyan, Department of Chemistry, Moscow State University; and

Professor Lyudmila Treijakova, Associate Professor of Organic Chemistry, D. I. Mendelejev Institute of Chemical Technology, Institute of Chemistry, and Main Scientific Secretary of the Ministry of Higher Education of the USSR.

The delegation wanted to see the ERIC system, ERIC/SMEAC activities and materials, and the Environmental Quality Instructional Resources Center located within ERIC/SMEAC. Dr. John Disinger coordinated the visit. The delegation was interested in cooperative exchanges and in obtaining many specific items in the two databases (ERIC and IRIS).

....Robert Howe (SE)

Congressman Carl Pursell (Michigan) Visits CG

Congressman Carl Pursell of Michigan's Second Congressional District recently paid a visit to the Director of the CG Clearinghouse, Dr. Garry Walz, in order to better understand the role of the Clearinghouse in the ERIC system and in the field of education in general. A member of the House Appropriations Committee, Congressman Pursell is a strong supporter of ERIC.

Congressman Pursell is a former public school elementary teacher and, therefore, showed a special appreciation of the contributions ERIC makes to education professionals and lay people. AT their meeting, Dr. Walz and Congressman Pursell discussed plans to work toward the establishment of close connections between ERIC and Pursell's office with a view toward providing the Congressman and his staff with information from the ERIC database relating to pending legislation and other areas of policy development, as needed. Walz and Pursell also discussed the possible distribution of ERIC resources to the Congressman's constituents. In return, ERIC will be kept apprised of Congressional developments of interest to counselors and helping professionals.

...Dale Jerome (CG)

MISCELLANEOUS

An ERIC Anecdote

When the ERIC Digest I wrote was first published, I took a copy home to share with my family. So that my two sons could understand what a Digest is, I explained that I had read a lot of information about a topic, and then I had written a summary of it. I further explained that the Digest might be useful to someone who wanted information about a topic, but did not have the time to locate and read several much longer journal articles or papers. When school started this year, my younger son's teacher was getting acquainted with the students and asked John what his mother did. He repeated the explanation I had given him about the Digest, and she replied, "Oh, does she write Cliff Notes?"

...Becky Ament (CE)

PERSONNEL

Gail Dietz Conley has joined TM as a part-time Documents Processing Coordinator. Veteran ERIC people will remember Gail from earlier days (1977-1980). She has also been working for TM as a free-lance indexer for the past two years.

...Lucie Olson(TM)

Dr. Marilyn Lisowski (SE) Moves to Eastern Illinois University

Dr. Marilyn Lisowski, Graduate Research Associate at SE, recently completed her dissertation and Ph.D in science and environmental education at Ohio State University. She has accepted a position as an Assistant Professor at Eastern Illinois University, where she will be involved in science education, research, and other activities.

While in Columbus, Marilyn was employed by the Board of Regents for the State of Ohio as well as by SE.

THESAURUS

NOTES ON THE CANADIAN EDUCATION THESAURUS

Number 3, September 1987

SOURCES

The literature itself is our main source for terms to be included in the Canadian Education Thesaurus. Since the beginning of the project, we have scanned a large number of Canadian publications covering a wide range of interests and issues, from educational research methodology to classroom techniques, from multicultural education to teachers' right to strike.

In accordance with guidelines for the development of thesauri, pre-arranged sources are also used. Pre-arranged sources propose not only a terminology but also a conceptual organization of a field. The most useful sources of that type will be the comprehensive education thesauri already used by the educational community:

. Thesaurus of ERIC Descriptors, 11th ed., 1986

. ERIC Identifier Authority List, June 1987

. Canadian Education Subject Headings / Vedettes-matière sur l'éducation au Canada, 6th ed., 1979

. Thésaurus de descripteurs sur l'éducation, Centre d'animation, de développement et de recherche en éducation, 4e éd., 1981

. EUDISED Multilingual Thesaurus for Information Processing in the Field of Education, 1984

. Thesaurus de l'éducation Unesco:BIE / Unesco:IBE Education Thesaurus, 4e éd. rev., 1984

Other specialized thesauri as well as lists of terms prepared by various provincial, national or international administrations are important sources.

Useful terminological work is being done in local settings around the country in response to specific demands. It will be most interesting to look at every list which will be made available to us.

PROGRESS REPORT

As of September 1, the term bank contains more than 2000 terms, all candidate descriptors selected from recent papers or transferred from sources listed above.

As the Canadian Education Thesaurus is slowly taking shape, we face problems relating to its contents and scope. Some decisions will have to be made soon. A major issue is the required degree of specificity of the vocabulary. Is it necessary to list all types of schools, mental or physical handicaps, curriculum disciplines and subjects, categories of teachers, sports, etc. in a general education thesaurus? Deciding on that matter is more difficult than it should be because we do not know at this time what would be included in a Canadian education database, and how large such a database would be.

Any comments?

RIE

Resources in Education
1987 Annual Cumulation

4187

Resources in Education 1987 Annual Cumulation

The Facts You Need TODAY in One Convenient Source!

The RIE 1987 Annual Cumulation brings together a full year's worth of information on educational report literature in three easy-to-use volumes.

Each year The Oryx Press cumulates and publishes two volumes of abstracts and a one-volume index to *Resources in Education*, the monthly journal published by ERIC—Educational Resources Information Center. This journal covers current educational research findings, technical reports, speeches, unpublished manuscripts, and books.

Access to this wealth of information is more convenient with the Annual Cumulation. It's the most effective way to keep your education collection current.

A Comprehensive Reference System

The three volume RIE 1987 Annual Cumulation gives you the entire RIE entry as drawn from the ERIC Database:

- Accession Number
- Author
- Source
- 200-Word Abstract
- Descriptive Notes
- Publication Date
- Availability
- EDRS Price Code
- Title Report Number
- Publication Type
- Descriptors and Identifiers

Locating specific entries in the abstracts is quick and easy through the index's five sections

- Subject (descriptors)
- Author
- Institution (organization where the document originated)
- Publication Type
- ERIC Clearinghouse Number/ED Number Cross-Reference

The handy separate index provides titles and identification/accession numbers to the documents.

Order All or Part—Save Either Way!

You may purchase the complete three-volume set or buy the Abstracts and the Index separately. Since there is **no increase in cost** from last year, you'll save no matter which you order. And you can save an **additional 5%** off the regular subscription rate by placing a standing order.

Make certain your education collection is complete and up to date—and ensure comprehensive coverage of the important areas in educational literature. Order your copies of the RIE 1987 Annual Cumulation today!

Back Issues and Microfiche Available, Too!

You can still obtain some back editions of RIE annual cumulations—all editions become available on microfiche when the clothbound issues are sold out. You can even order CIJE (*Current Index to Journals in Education*) and RIE combined subject indexes on microfiche to expand your collection. Call The Oryx Press for details

ERIC KEEPING UP

ISSN 0890-1422

NEWS BULLETIN OF THE CLEARINGHOUSE FOR SOCIAL STUDIES/ SOCIAL SCIENCE EDUCATION

Fall 1987

ERIC, THE INFORMATION SOURCE

By C. Frederick Risinger
Associate Director, ERIC/ChESS

By the time you read this issue of *Keeping Up*, it will be nearly two years since ERIC/ChESS moved to Indiana University from the Social Science Education Consortium. It has been an exciting, busy, and fruitful learning experience. Although many of us at the Social Studies Development Center had previously written and reviewed materials for ERIC and even served on the ERIC/ChESS Advisory Board, we were still surprised by the complex tasks associated with acquiring and processing the thousands of documents and magazine articles that are entered into the ERIC system each year. During September and October, we have been busy preparing another contract proposal to manage ERIC/ChESS. Therefore, while our eyes are on the future, it is also a time to reflect on the various aspects of ERIC in the present.

The Department of Education is encouraging wider dissemination of ERIC information and resources to "practitioners" (classroom teachers) and to interested individuals outside the immediate education profession such as educational journalists, school board members, state legislators, and other policy makers. There is a concern that ERIC is used primarily by college-level researchers, graduate students, and a few administrators, but our records do not substantiate this worry. We receive hundreds of inquiries each month (nearly 2000 in 1986) and the vast majority fall into the practitioner category. A breakdown of ERIC/ChESS users in 1986 shows that 3018 teachers and department heads received assistance or materials. By contrast, 199 researchers and curriculum developers and 143 student clients were served by us.

ERIC is most often used in school, college, and public libraries throughout the U.S. and in many other nations. It is the largest and most widely-used information database on education in the world. With the addition of compact disk technology, the number of individuals doing their own searches with the ERIC system has multiplied. The education librarian at Indiana University shakes her head in amazement

as she tells me that use of ERIC has more than quadrupled since addition of the CD-ROM version of ERIC. We have had CD-ROM technology in the ERIC/ChESS offices for several months and it has greatly expanded our ability to search the ERIC database.

Recently, a search for curriculum guides was completed. They are among the most requested items when teachers, department heads, and supervisors contact the Social Studies Development Center, ERIC/ChESS's parent organization. The search indicated there have been 22 state and local curriculum guides added to ERIC since 1985. Look at some of the titles and brief descriptions:

- "Technology, Change and the Future." Provides a rationale, content outline, goal, activities, and a bibliography for a one semester course. (EJ 336 689)
- "Secondary Social Studies: Alaska Curriculum Guide." Lists topics/concepts, content areas, learner outcomes, and sample learning activities for secondary schools. (ED 274 585)
- "Teaching About Developing Nations: The Role of Food and Hunger." A seven-unit curriculum guide which presents a factual basis for understanding the global implications of hunger. (ED 271 373)

Classroom teachers want to see the guides but they also want to view available instructional materials. There were 68 new items in this category placed in the ERIC system since 1985. A few examples of step-by-step lesson plans are:

- "Spanish-American War to Vietnam: Critical Thinking in American History." Includes Teacher's Guide, Source Envelope, and Student Manual. (ED 257 757)
- "How to Help Slim Down the Energy Monster: Energy Conservation Activities for the Elementary Grades." This guide, developed by the Iowa Department of Education, includes 26 activities with goals, step-by-step les-

son plans, and evaluation criteria. (ED 275 527)

- "Lessons on the Northwest Ordinance." Contains six lessons designed for secondary schools. The packet includes goals, all teacher and student materials, a lesson plan. (ED 272 438)

Whoever said that ERIC does not have practical, easy to obtain information for classroom teachers? The ED and EJ numbers following each of the above citations can be used to read a more complete abstract of the full text of the materials.

These materials are available to social studies educators throughout the nation because "practitioners" sent them to us. The individuals who worked on the curriculum materials and their schools or organizations receive credit for their efforts, and their colleagues around the country benefit. If you have or know of curriculum guides, instructional materials, or other local and state documents that might be appropriate for ERIC, please help us obtain them. If you want to discuss a set of materials to determine if it would be suitable for ERIC, please contact us.

ERIC/ChESS has an excellent Advisory Board that helps us chart a course for our publications program, but we would appreciate hearing from you. Is there a trend or issue that should be treated in an ERIC Digest? Do you have suggestions about a monograph on issues and trends in the social studies that you think we should publish? Is there a topic for which a Resource Packet should be developed? One way to make ERIC more useful to practitioners is to provide opportunities for more practitioner suggestions and advice. Let us hear from you.

- ... Upcoming Meetings, Workshops, and Conferences

EXPERIENCING CD-ROM ERIC

by Lucie Olson

The introduction of CD-ROM offers libraries an opportunity to set up central workstations to be used by novice ERIC searches, by trained searchers, or by both. Scheduling time for searching can be adapted to the needs of the library. If security is a problem, CD-ROM readers can be placed behind a reference desk and discs can be secured. If the CD-ROM reader is available to the user, the discs can be checked out to users with library cards.

Using DIALOG OnDisc ERIC as an example, we would like to demonstrate use of CD-ROM in meeting a user's information needs. This will be the first in a series of articles to discuss CD-ROM educational applications.

A DIALOG OnDisc workstation can be set up with equipment (recommended by DIALOG) which may already be available in the library: IBM PC or compatible personal computer and IBM PC DOS Version 2.0 or higher; 384K RAM (minimum required, 640K RAM recommended); hard disk drive with at least one megabyte of free space; Philips CM-100 reader and CM 155 controller card or a Hitachi CDR-1502S CD-ROM Drive. If the workstation is to be made compatible with online searching using the communications software included with the DIALOG OnDisc Manager, a Hayes-compatible modem is needed. DIALOG offers a DIALOG/Philips purchase arrangement for CD-ROM readers. Special arrangements can also be made for leasing the entire workstation through DIALOG.

Currently, there are two different ERIC subscriptions in the DIALOG OnDisc format. The current ERIC information (1981 to present) is provided on one disc; the complete ERIC file (1966 to the present) is available on three discs. A subscription includes the ERIC disc(s), quarterly updates to the current disc, the DIALOG OnDisc Manager retrieval software, the complete DIALOGLINK package for telecommunication, and searching assistance. Since prices have changed considerably following the introduction of DIALOG OnDisc, check with Dialog for current prices.

The software provided with DIALOG OnDisc offers two searching methods, the Command Search and the Easy Menu Search. Experienced DIALOG users will be at home with the Command Search method and will be pleased with the speed of searching OnDisc. Search commands are much the same as the online ones, with a few differences which can be quickly reviewed in the manual. Right-hand truncation, embedded truncation, and nesting are available as in online DIALOG.

New users will enjoy the Easy Menu Search method, and experienced users will find it a welcome innovation. Help screens are available to assist the new user, and the need to understand Boolean logic is reduced by the use of terms such as "limit," "modify," and "exclude" in the "Modify Existing Search" menu. However, some practice, depending on the searcher's level of sophistication, will still be required to master the easy menu search.

To give an example of CD-ROM application, imagine a parent interested in finding the best school situation for a preschooler entering kindergarten. The parent comes to the library with some idea of the information needed, but with no idea how to approach the search using ERIC. If the librarian working with the parent is an experienced DIALOG searcher, the Command Search mode offered by the DIALOG OnDisc software will be familiar and comfortable. Signing on to the system calls up a screen that looks like this:

```
WELCOME TO DIALOG ONDISC(tm) MANAGER

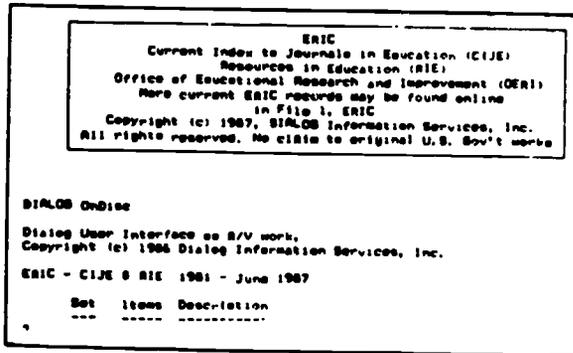

Version 1.01
Serial Number DMO401241011
This software product and the information contained
therein is protected by both United States Copyright
Law and International Treaty Provisions.
Written By: Claude Schoch
Copyright 1985, 1986, 1987 Digital Library Systems, Inc.

All rights reserved

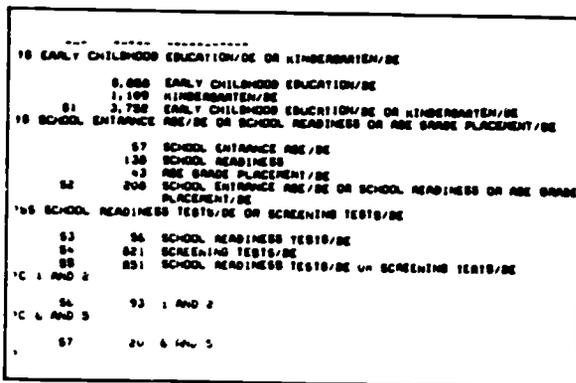

Select Search Mode
DIALOG Command Search
Easy Menu Search
Online Search
Return to DOS

-Home -Select
```

The searcher highlights "DIALOG Command Search" and presses the enter key. A screen similar to the online DIALOG begins the search.

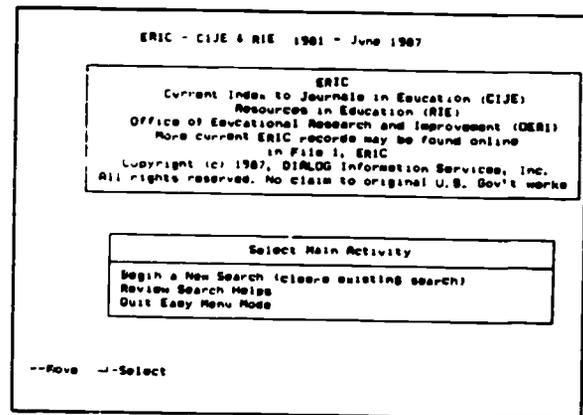

The searcher inserts terms selected from the ERIC Thesaurus and narrows the search from the initial set of 3,752 items to 20 items.

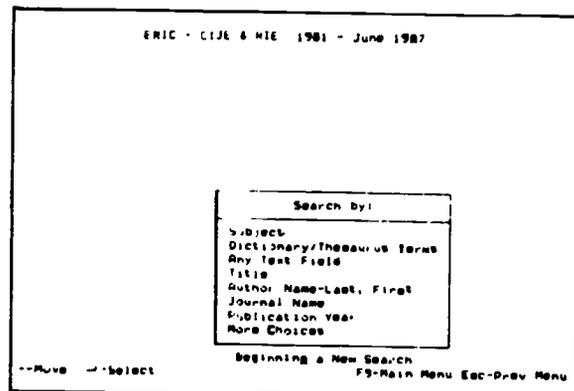

In the OnDisc mode, the search strategy is not printed as it is being constructed. In order to save the search strategy, the command "display sets"(ds) must be used in conjunction with the SHIFT and PRTSC keys. The search results can be displayed, printed, or transferred to disk. Instructions for transferring to a disk file in Command Search are not available in the current manual, but DIALOG assures us that these instructions will be available in the forthcoming version of the manual. The command "Set Print Filename (Enter)" followed by "Print (Search Statement Number/Format Number/Document Number)" will result in downloading results to disk.

If the searcher finds that the quarterly updated OnDisc information is not timely enough, the search strategy can be saved from Command Search and sent to the online version of ERIC via DIALOGLINK. The DIALOG OnDisc products include DIALOGLINK communications software for retrieving information added to the database between quarterly updates. Also, the DIALOGLINK capability can be used to run a search in another database. It is important to note that the online feature is not available in the Easy Menu version.

Now imagine that the same search is to be conducted by the parent, a novice ERIC user with no knowledge of Thesaurus terms. The parent highlights and selects the Easy Menu Search from Screen 1, "Select Search Mode." The next menu, "Select Main Activity," offers options of beginning a new search, reviewing help screens, or leaving the Easy Menu mode.

After highlighting "Begin a New Search," the parent moves to the "Search by" menu:

and presses F2 to view its related terms.

Related Terms	Records	# RT's	Type
*SCHOOL READINESS	138	F2 12	
READINESS	1,404	11	R
AGE GRADE PLACEMENT	43	11	R
COGNITIVE DEVELOPMENT	3,178	23	R
EARLY ADMISSION	40	9	R
EMOTIONAL DEVELOPMENT	383	15	R
*LEARNING READINESS	130	13	R
PHYSICAL DEVELOPMENT	234	16	R
READING READINESS	351	11	R
*SCHOOL ENTRANCE AGE	67	8	R
SCHOOL READINESS TEST	56	9	R
STUDENT PLACEMENT	1,413	22	R
WRITING READINESS	166	9	R
3 Entries Selected 698 Records Found			

--More -- Select/Reverse F10 when Done F9=Main Menu Esc=Print Menu

Some of the terms from the first search, "School Entrance Age" and "School Readiness," are selected by highlighting each term and pressing the enter key. Being able to view the related terms allows for the selection of an additional term, "Learning Readiness." The parent also goes back to the dictionary and chooses another term for this set of terms, "Chronological Age." Not all of the selected terms will appear on the final screen, but they are apparent in the number of records remaining (See below). The parent chooses a third and final set of terms to limit the search, "School Readiness Tests" and "Screening Tests," by again using the Modify Existing Search menu and viewing related terms of "School Readiness Tests."

Related Terms	Records	# RT's	Type
*SCHOOL READINESS TESTS	36	9	
APTITUDE TESTS	420	F2 16	R
DIAGNOSTIC TESTS	16	23	R
ABILITY TESTS	66	8	R
PRE-SCHOOL TESTS	15	9	R
PROGNOSTIC TESTS	20	16	R
READING READINESS TESTS	67	10	R
SCHOOL ENTRANCE AGE	130	8	R
SCHOOL READINESS	481	14	R
*SCREENING TESTS		15	R
2 Entries Selected 881 Records Found			

--More -- Select/Reverse F10 when Done F9=Main Menu Esc=Print Menu

The completed search strategy appears on the screen. To view the results of the search, the parent can choose several options for the search results from the "Select Main Activity" menu, such as printing the search results.

ERIC - CISE & RIE 1981 - Jun 1987

- 4,917 records with Dictionary/Thesaurus Terms of KINDERGARTEN or EARLY CHILDHOOD EDUCATION
- 831 records remaining. Limiting to those with Dictionary/Thesaurus Terms of CHRONOLOGICAL AGE or SCHOOL READINESS or LEARNING READINESS or EARLY...
- 89 records remaining. Limiting to those with Dictionary/Thesaurus Terms of SCHOOL READINESS TESTS or SCREENING TESTS

Select Main Activity

Display the records found on your monitor
Print, Sort or Transfer records found
Modify the current search with additional criteria
Begin a New Search (clears existing search)
Review Search Steps
Quit Easy Menu Menu

--More --Select

There are several places the novice user could have problems with the Easy Menu Search. In using the "Search By" menu, a help screen is available only for the first of the "More Choices" options ("Major Descriptor/Identifier"). The searcher who wishes to look for documents by Corporate Source, for example, will have to turn to other resources for a description of that option. The advantages to sorting records may not be obvious from the information available on the help screens. Also, modifying a search with additional criteria could be difficult for new users to understand without some practice. Most of the difficulties in Easy Menu can be overcome by an individual working with the system and the help menus. The addition of more and better help screens could make user training easier.

For the experienced searcher, DIALOG On-Disc offers a fast and easy substitute to expensive online searching. Being able to update the search online using DIALOGLINK provides a valuable extra. The new user obtains a quick introduction to the ERIC database, conducts a reasonably well-constructed search, and leaves with a satisfying number of relevant hits.

Lucie Olson is User Services Coordinator, ERIC Clearinghouse on Tests Measurement and Evaluation, Educational Testing Service, Princeton NJ 08541, (609) 734-5181.

Dialog OnDisc: ERIC

By Margaret Morabito

Dialog OnDisc ERIC requires an IBM PC or compatible with a minimum of 384K RAM and hard disk drive, and MS-DOS 2.0 or higher or PC-DOS 3.1 or higher. It runs on the Philips CM100, DEC RRD-50E4, and any Hitachi drive with controller card. For more information, contact: Dialog Information Services Inc., Customer Administration, 3460 Hillview Ave., Palo Alto, CA 94304, (800)-3-DIALOG or (415) 858-3785.

Circle 73 on Reader Service Card.

DIIALOG, THE PALO ALTO, CALIF.-based online database company, has joined the growing number of CD-ROM producers with its rendition of the government-sponsored ERIC (Educational Resources In Computer).

ERIC is Dialog's first offering in its new OnDisc product line, but the company plans to offer several other databases soon. (Medline and NTIS were scheduled to be available on CD-ROM in late 1987, to be followed by databases for business and the humanities.)

ERIC is an educational research tool that includes abstracts of articles published in more than 700 education journals, plus thousands of other reference materials collected by the US. Department of Education. The official database is composed of two major printed indexes: *Resources in Education* (RIE) and the *Current Index to Journals in Education* (CIJE).

This product fits into an academic or research library environment where many users need to perform educational research. Graduate library schools are another key audience for ERIC.

CD-ROM and Online Searching

Dialog has added a new twist to its CD-ROM product. Its retrieval software has been designed with two search modes, one of which matches the Dialog online command search procedure. Furthermore, Dialog has integrated its DialogLink communications software so users can go online during a search session without having to abandon their search results or reboot their computers.

Because the command search procedures are the same on CD-ROM as well as online,

they provide a cost-effective way for new searchers to learn how to use Dialog. New users can take their time learning the commands offline while simulating online conditions. Dialog found that training for online searching has become a major application for its OnDisc database. Library schools in particular are using the CD-ROM as a training tool for graduate students studying the Dialog command language.

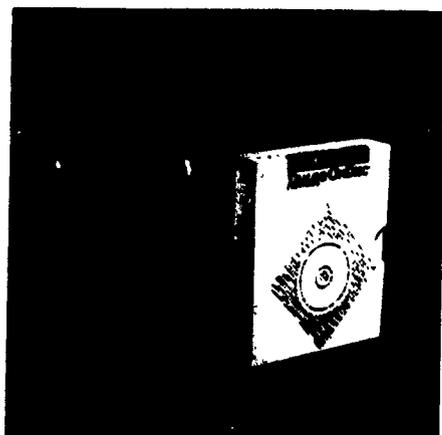

Easy Menu Mode

While the command mode is directed at advanced searchers who might wish to proceed to an online search, it is complicated; newcomers and more casual users may choose to use OnDisc's Easy Menu mode. I won't detail the command mode here because it illustrates more of the online search application than CD-ROM usage.

The Easy Menu mode is simply that: easy to use. But easy to use doesn't imply that it has few features; the same indexes and records are used in Easy Menu mode as in Command mode, and both modes offer many of the same functions.

Within the menu mode are two basic search methods: selecting terms from displayed indexes, and entering search terms directly. You begin each method by selecting the category of search terms, such as article subject, journal name or author. Two search menus include the options for subject, dictionary/thesaurus, any text field, title, author, journal name, publication year, major descriptor/identifier, identifier alone, abstract, corporate source, language, document type and clearinghouse code.

The menu selection will determine whether you automatically advance to a complete index

from which to choose terms, or to a prompt where you directly enter a term without seeing an index.

The software is designed so that all of the index terms are listed vertically and in alphabetical order on screen. You may scroll through that list, or you can type in a term at the prompt above the list. The index term jumps ahead to the appropriate location as each letter is typed.

When you locate the term you want, pressing a key begins the actual search operation. Statistics about the search results are displayed on screen in a window alongside the index. Included are the number of entries selected and the number of records found.

The Easy Menu mode lets you modify searches in four ways. Searches can be limited using additional terms, including alternate terms in the search, excluding unwanted

terms, and deleting search steps. You may also use a wildcard character to get variations of a word, and you can specify word proximity. The menu mode lets you sort records, too.

Records can be displayed and printed out in four formats: titles only, and short, medium and long records. In the long format, the entire record is viewed. In medium format, you see only the key fields. In short format, the program displays one key field and the search terms. In all formats, the software takes advantage of the monitor's highlighting and color capability to illuminate the most important information in each record.

This mode lets you save your search results, but does not let you save the search procedure—you can do it in the command mode.

If you are having trouble locating the terms you need, Dialog OnDisc provides the complete ERIC thesaurus in both search modes.

In Easy Menu mode, pressing a function key displays a list of related terms along with the number of records containing them, the number of other related terms available, and the description of the related terms. The description function will tell you if the related term is narrower in focus or broader, not worth searching, or only related to the term. The thesaurus is a helpful addition to this database and provides multiple levels of related terms with which to work.

Setup & Customer Service

While most of my experiences with this product were positive, I encountered a few snags.

I stumbled a bit when installing the communications software onto the computer's hard disk drive. This was due to my inexperience with hard disk drives, and also because ▶

WHAT YOU SEE IS WHAT YOU GET

NOBODY BELIEVES THAT COMPUTERS ARE INFALLIBLE. NEWSPAPERS LOVE CITING CASES OF PEOPLE BEING inconvenienced by so-called "computer error," and we all have our war story to tell. But when we're using a personal computer, or information on CD-ROM, we want to believe that the information we retrieve is perfect, correct, precise.

That's simply not the case. Like any big database, computerized or manual, ERIC contains slight imperfections, sometimes slight typographical or key-punch errors, and inconsistencies in the data itself. Some errors and inconsistencies are amusing, others are barely noticeable—but you'll need to know about them when you try to optimize the accuracy of your search results.

Imagine that you wish to find all educational articles dated 1985. That's not difficult. According to our review, Dialog OnDisc ERIC (1981-December 1986), 27,070 articles were published that year. But actually, there were 27,071—one article is mistakenly indexed as 1995. I only noticed that while scanning a sorted list of publication dates. Had that article been dated 1975, nobody would have seen it.

There's one interesting article authored by the number 81. A Mr. O'Hagan has four articles in the author index, each under a different version of his name: O'Hagan, Frank J.; O'Hagan, F. J. (space between the initials); O'Hagan, F.J. (no space); and O'Hagan, Frank (that's a zero in front of the apostrophe, not the letter).

Similar imperfections slipped into the published-language index field. There are six documents in the Creole language: five are indexed as *Creole*, and one as *Croles*. There are two articles in the Philippine language Ilocano, one spelled that way, the other in the perfectly acceptable variant Ilokano. But you'd have to search using both terms, or use a wildcard search character, to find them both.

While tens of thousands of articles are written in English, seven are in the language *Eng*, six in *Engl* and one in *Englis*. I also found a previously undiscovered tongue in the menu: *Beautiful*. When I printed that document's abstract, the language actually was *Spanish lake in the beautiful Santa Ynez mountains (with map)*. Oops. But that means that the words *lake*, *in*, *the*, *beautiful* and so on were all in the language index.

Granted, I've found only minor errors and inconsistencies, none of which would seriously inconvenience a searcher. But these were found visually by noting implausible errors while in the Easy Menu mode; more serious and plausible errors are much harder to find. . . . Were it not for the Easy Menu mode, even these eye-catching mistakes would be nearly impossible to find.

Don't get the impression that the ERIC database is bug-ridden; it's not, and I would estimate that the number of errors represents only a tiny fraction of one percent of this CD-ROM's useful information. But keep these inconsistencies in mind when searching, and use as many synonyms and variants as you can to find everything you need.

—Alan L. Zeichick

it was awkward to refer to two different manuals at the same time during setup. It was a juggling act, but not overwhelming. After I installed the Communications Manager and the OnDisc Manager onto the hard drive, it was easy to modify the setup when I had to switch computers in mid-review. I merely had to reboot the system after installation.

I did encounter one "fatal error" in my product review copy, and it gave me a chance to interact with customer service. Dialog's customer service and technical support people were professional and very helpful. The technical person I spoke with tried to duplicate the error conditions to see what the problem might be. She could not get her system to crash, but she did suggest a cure for my problem

(deactivating the memory resident programs I had installed in my computer). Sometimes, these resident programs can conflict with memory usage and cause problems similar to what I encountered. (Oddly, I was unable to duplicate the error several days later.)

Dialog's documentation explains how to handle a fatal error, and the company requests that you document the search strategy that led to the error and mail it in. Any problems connected with the product will be corrected, and free updates will be automatically sent to all registered owners.

Requirements and Subscriptions

Dialog OnDisc ERIC requires an IBM PC or compatible with at least 384K of RAM (640K

is recommended) and a hard disk. It also requires MS-DOS version 2.0 or higher or PC-DOS version 3.1 or higher. You need at least 1MB of space on your hard disk, and either a monochrome or color monitor. The color display effectively uses color for highlighting. A modem is required for utilizing the online access option.

The program supports three CD-ROM drives: Philips CM100 with Philips controller; DECRRD-50E4 with controller; or any Hitachi using either the CD-1F13 or CD-1F125AZ controller card.

Included with Dialog OnDisc are: Dialog OnDisc user's guide and OnDisc Manager software; one or more CD-ROM discs; documentation about ERIC; DialogLink user manual with Communications Manager software; DialogLink Account Manager software and documentation; and information about the Dialog online system. You are also given the customer service toll-free telephone number, which you can use Monday through Saturday for technical support.

Two subscription options are available. You can license the current files, from 1981 to the present, on one disc for \$950; or, you can get the complete ERIC file from 1966 to the present on three discs for \$1,650. The current disc is updated quarterly and is automatically sent to you as it becomes available, as do any updates in the software or documentation.

If you don't have a CD-ROM reader, you can purchase a Philips CM 100 with controller card from Dialog (\$740), or you can lease the entire system with computer and CD-ROM reader from Dialog.

Dialog is the first online retrieval network to introduce its own CD-ROM product. It was a speculative move to provide this service, but Dialog sees great benefits to its customers and to its own online system. ●
